

Paleontology publication planned

Researchers in the paleontology of national parks now have an opportunity to publish their most recent work in the upcoming third volume of National Park Service Paleontological Research. With earlier versions appearing in 1993 and 1995, this nonpeer-reviewed publication features brief accounts (5-6 page mini papers) of recent original paleontological research occurring within units of the national park system. Vincent Santucci, Resource Management Specialist and paleontologist at Fossil Butte National Monument, Wyoming, will serve as editor and is now soliciting titles for the volume. Interested contributors should submit their titles to Santucci by December 15 at (307) 877-4455; vincent_santucci@nps.gov. According to Santucci, "A collective work such as this illustrates the diverse and often cutting-edge research going on in parks. It demonstrates our appreciation of the efforts of paleontol-

ogy researchers and will help foster future work.” The publication is sponsored by the NPS Geologic Resources Division.
