Southeast • Mark Wood (acting)
Pacific West • Jim Shevock

Park Science (ISSN-0735-9462) is a research and resource management bulletin that reports recent and ongoing natural and social science research, its implications for park planning and management, and its application in resource management. Content receives editorial review for completeness, clarity, usefulness, basic scientific soundness, and policy considerations—materials do not undergo anonymous peer review. *Park Science* is also available on-line (ISSN-1090-9966).

Park Science accepts subscription donations from non-NPS readers. If you would like to help defray production costs, please consider donating \$10 per subscription per year. Make check payable to National Park Service and send to the editor.

The editor encourages submissions from all readers and would especially like to invite contributions for the Highlights column. Please refer to the guidelines in 16(3):5-6 and on-line, or contact the editor:
