

New Journal Available Through E-Mail

Conservation Ecology is a new peer-reviewed journal of the Ecological Society of America. With article preparation, submission, review, and publication to be entirely electronic, *Conservation Ecology* is intended to supplement, rather than supplant, similar extant periodicals. Papers will range from theoretical to applied and will focus on, 1) the ecological bases for the conservation of ecosystems, landscapes, species, popula-

tions, and genetic diversity, 2) habitat restoration, and 3) resource management.

On-line access and subscriptions are offered without charge. Access to the journal will be via the World Wide Web, Gopher, and e-mail over the Internet (see the article on page ??? for a discussion on these). Those intrigued will be able to find *Conservation Ecology* by browsing the web and searching under "Electronic Journals" or by connecting directly to URL "<http://journal.biology.carleton.ca/Journal/Overview.html>".

Once it is up and running, the publication will also be available by connecting to Gopher at "journal.biology.carleton.ca" for text-only access. Internet users can subscribe by sending an e-mail message to "subscribe@journal.biology.carleton.ca" that contains the following message: `subscribe conservation-ecology <reader's full e-mail address>`. The first issue will be available in early 1996.
