Limax maximus observation

Here, on my last day, I introduce to you my friend *Limax maximus*, the Giant Gardenslug. I found him Sunday, September 22nd 2013 at 10am in front of 90 Sperry Lane (12U 279842 x 5376477, NAD83) in the NPS Headquarters residence near West Glacier. Thanks for helping us document this interesting creature!
