Subject: Water Right Permit No. 4535,
Enlargement

Dear Mr. Bishop:

The subject water right was initiated by Otho E. Williams in 1927. The land to be irrigated was subsequently acquired by the Jackson Hole Preserve, Inc., and conveyed to the United States, which conveyance we have designated for identity as Deed No. 5, Grand Teton National Park. A certified copy of that deed was submitted to you by letter of March 26, 1951, from A. E. Demaray, Acting Director of the National Park Service, in connection with the establishment of Federal title to the William D. Menor Ditch (Permit 8041, Certificate 1).

We find that there has been no irrigation under Permit 4535 Enlargement since 1929, as reported by the Park Superintendent, as follows:

"The 10 acre tract in the SE $\frac{1}{4}$ of NE $\frac{1}{4}$ of Section 23, southeast of Grand Teton National Park Headquarters has been abandoned for irrigation. Miss Tarbell uses this land for summer pasture for her horses. There is no reason why this land should be irrigated, as it is a rocky soil covered with sagebrush and would involve considerable expense to rebuild ditches and put this land under irrigation again. It seems that this land was last irrigated between 1920 and 1929. It is suggested that the abandonment of irrigation on this tract be permanent."

As a step toward the clarification of water right status in Grand Teton National Park, please cancel Permit No. 4535 Enlargement.

Sincerely yours,

(SGD) THOMAS J. ALLEN
