LEGAL NOTICE

Notice is hereby given that on January 31, 2012, United States of America, National Park Service, Pecos National Historical Park, c/o Chief, Water Rights Branch, 1200 Oakridge Drive, Suite 250, Fort Collins, CO 80525 filed Applications UP-00800 for Permit with the STATE ENGINEER to Drill Supplemental Wells to Supplement Ground Waters and to Change Place or Purpose of Use of Underground Waters within San Miguel County. The applicant proposes to supplement the diversion, consumptive use, of 20.0 acre-feet per annum from declared well UP-00800 (referred to as the Headquarters well in the National Park Service well network) located by latitude 35 d 32 m 55 s N and longitude 105 d 41 m 21 s W in the NW 1/4 NW 1/4 NE 1/4 Section 09, Township 15N, Range 12E N.M.P.M. with four additional wells located at the following points:

- 1) UP-04462-POD1 (Visitor Center Well), drilled in 1993 and located by latitude 35 d 33 m 02 s N and longitude 105 d 41 m 10 s W in the SW 1/4 SE 1/4 Section 05, Township 15N, Range 12E;
- 2) UP-04461-POD1 (Trading Post Well), drilled in 1978 and located by latitude 35 d 32 m 22 s N and longitude 105 d 40 m 58 s W in the SW 1/4 NE 1/4 SW 1/4 of Section 09, Township 15N, Range 12E;
- 3) UP-04460-POD1 (Forked Lightning Ranch House Well), drilled in the 1950's and located by latitude 35 d 32 m 11 s N and longitude 105 d 40 m 13 s W in the SE 1/4 SW 1/4 SE 1/4 Section 09, Township 15N, Range 12E; and
- 4) UP-00972 (Middle Pasture Well) drilled in 1982 and located by latitude 35 d 31 m 21 s N and longitude 105 d 40 m 17 s W in the NW 1/4 SW 1/4 SE 1/4 Section 16, Township 15N, Range 12E N.M.P.M.

The applicant also proposes in a companion application to change the purpose of use of the declared 20.0 acre-feet per annum from municipal to domestic, live-stock, irrigation, municipal, construction,

fire suppression and other National Park purposes and expand the place of use from within the former Pecos National Monument boundaries of 365.0 acres located within Sections 4&5, 8&9 of Township 15N Range 12E to include all lands lying within the current exterior boundaries of the Pecos Unit of Pecos National Historical Park consisting of 5,993.0 acres described as within Sections 2-5, 7-11, 14-17, 20-23 of Township 15N Range 12E.

Pecos National Monument was established in 1905 (79 Stat. 195). In 1990, the Monument was included in the Pecos Unit of Pecos National Historical Park along with that part of the Forked Lightning Ranch (104 Stat. 278) in the Pecos Pueblo Grant. The acreage covered by the park was increased by more than 17 fold. Thus the National Park Service requests the place of use be changed to include all lands lying within the exterior boundaries of the Pecos Unit of Pecos National Historical Park and that the purposes of use be changed to include possible water uses within the park unit. The diversion amount remains the same. The Pecos National Historical Park is located along Highway 83 between Pecos and Rowe, New Mexico, within the Pecos Pueblo Grant. All wells and places of use are located within the exterior boundary of the Park. "Consumptive Use" is for all groundwater withdrawals within the exterior boundaries of the Park.

Any person, firm or corporation or other entity having standing to file objections or protests shall do so in writing (objection must be legible, signed, and include the writer's complete name, phone number and mailing address). The objection to the approval of the application must be based on: (1) Impairment; if impairment, you must specifically identify your water rights; and/or (2) Public Welfare/Conservation of Water; if public welfare or conservation

of water within the state of New Mexico, you must show how you will be substantially and specifically affected. The written protest must be filed, in triplicate, with the State Engineer, PO Box 25102, Santa Fe, NM 87504-5102, within ten (10) days after the date of the last publication of this Notice.

Facsimiles (faxes) will be accepted as a valid protest as long as the hard copy is hand-delivered or mailed and postmarked within 24-hours of the facsimile. Mailing postmark will be used to validate the 24-hour period. Protests can be faxed to the Office of the State Engineer, (505) 827-6862. If no valid protest or objection is filed, the State Engineer will evaluate the application in accordance with the provisions of Chapter 72 NMSA 1979. Legal # 92928 Pub. Apr. 3, 18, 17, 2012

RE: Legal Notice for Water-Right Applications, Pecos National Historical Park

Dear Ms. or Sir,

The National Park Service (NPS) recently filed applications for water rights with the New Mexico Office of the State Engineer. The Office requested that the NPS have a notice published by the *Las Vegas Optic* once a week for three weeks. As you know, the Office also requests that the publisher file affidavit of publication with the Office after the last publication and within 60 days of March 28, 2012. The notice for publication is enclosed.

Please publish the notice and submit the affidavit of publication within 60 days of March 28, 2012. If you would prefer the notice in electronic format, we can email it to you. Also please send me an invoice, so that payment may be promptly remitted.

If you have any questions or need further information, please contact Paul Christensen of my staff at 970-225-3534 or paul_christensen@nps.gov.

Sincerely,

for
William R. Hansen

Re: Notice for Publication—Applications UP-500 for Permit to Drill Supplemental Wells to Supplement Ground Waters **and** to Change Place or Purpose of Use of Underground Waters

Greetings:

Enclosed is the Notice for Publication for the above numbered application. In accordance with State statute and because all points of diversion and places of use are located within San Miguel County, please have the Notice published in the **Las Vegas Optic** with Proof of Publication filed in this office according to the instructions. As the newspaper of highest readership is the **Santa Fe New Mexican**, please also have this Notice published in that paper as well.

The following notice shall be published at applicant's expense once a week for three (3) consecutive weeks in the **Las Vegas Optic** and the **Santa Fe New Mexican**. First Publication should be made as soon as possible after receipt of this notice. Publisher's affidavit of such publication must be filed with the State Engineer within sixty (60) days from the date hereon. If the application is for a new appropriation, failure to file proof of publication within the time allowed shall cause postponement of the priority date of the application to the date of receipt of such proof in proper form. In the case of any other type of application, failure to file proofs within the time allowed will cause the application to be cancelled.

The accuracy of the content of this Notice is the responsibility of the applicant and the State Engineer is not obligated for any additional expense incurred by the necessity of re-advertisement. If an error is found in the enclosed notice, or if you disagree with the content, please notify this office before presenting it to the newspaper. It is also your responsibility to ensure that the legal advertisement in the newspaper is accurate and that it contains all the information set forth in the enclosed Notice for Publication. You should check the first publication and advise the newspaper of any necessary corrections.

This notice is not a permit and neither issuance of this Notice nor lack of protest thereto, in any way, indicates favorable action by the State Engineer or approval of the application as requested.

Sincerely,

A handwritten signature in dark ink, appearing to read "Jerri L. Trujillo".

Jerri L. Trujillo

RE: Water Use by the National Park Service at Pecos National Historical Park

Dear Ms. Trujillo:

It has come to the attention of the National Park Service (NPS) that its water use at Pecos National Historical Park (Park) needs to be clarified and brought into compliance with state water use regulations. Therefore, the NPS prepared six applications and declarations regarding five wells in the Pecos Unit of the Park.

<i>Wells</i>	<i>Type of Application or Declaration</i>	<i>Fee</i>
Headquarters, UP-500	Application for permit to change place or purpose of use of underground waters	\$25.00
Visitor Center	Declaration of owner of underground water right	\$1.00
Trading Post	Declaration of owner of underground water right	\$1.00
Forked Lightning Ranch House	Declaration of owner of underground water right	\$1.00
Middle Pasture, UP-972	Change of ownership of water right, groundwater (corporation)	\$2.00
Headquarters, Visitor Center, Trading Post, Forked Lightning Ranch House, Middle Pasture	Application for permit to add supplemental wells to supplement groundwater	\$25.00
	Total	\$55.00

The six applications and declarations with supporting information are enclosed along with a check for \$55.00. The applications and declarations are submitted in triplicate as requested. If you have any questions or require additional information, please contact Paul Christensen of my staff at 970-225-3534 or paul_christensen@nps.gov.

Sincerely,

William R. Hansen
Chief, Water Rights Branch

After printing this label:

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g., jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Lands within the exterior	2-6			All
boundaries of the Pecos Unit	7-11	T15N	R12E	5,993
of Pecos National Historical	14-17			
Park	20-23			
Drawing No. 430/80,032				

Who is the owner of the land? United States of America

If there are other sources of water for these lands, describe by file number:

C. QUANTITY

Diversion Amount: 20 acre-feet per annum
Consumptive Use: _____ acre-feet per annum

5. REASON FOR CHANGE

Application is made to change place or purpose of use for the following reasons:

Pecos National Monument was established in 1965 (79 Stat. 195). In 1990, the Monument was included in the Pecos Unit of Pecos National Historical Park along with that part of the Forked Lightning Ranch (104 Stat. 278) in the Pecos Pueblo Grant. The acreage covered by the park was increased by more than 17 fold. Thus the National Park Service requests the place of use be changed to include all lands lying within the exterior boundaries of the Pecos Unit of Pecos National Historical Park and that the purpose of use be changed to include possible water uses within the park unit. The diversion amount remains the same.

OF UNDERGROUND WATERS**

6. ADDITIONAL STATEMENTS OR EXPLANATIONS:

This application regards the Headquarter's well at the Pecos Unit of Pecos National Historical Park. Three other wells located within the Park are to be made supplemental to the Headquarter's well: Visitor Center well, Trading Post well, and Forked Lightning Ranch House well. The Pecos Unit is located between Pecos and Rowe, NM, along State Highway 63 in the Pecos Pueblo Grant. The wells and places of use are located within the exterior boundary of the Pecos Unit. The wells are located within the Glorieta Creek stream system, which is tributary to the Pecos River. The Headquarters well is also known as the well in the administration area. The well is described in the 1995 water resources management plan (pages attached).

ACKNOWLEDGEMENT

I, William R. Hansen, Chief, Water Rights Branch, affirm that the
(Please Print)
foregoing statements are true to the best of my knowledge and belief.

William R. Hansen

Cistern/Pumphouse at Forked Lightning Ranch House (Big House). Water for the Ranch House was pumped from a cistern on Glorieta Creek, probably through the 1940s, possibly until the new well above the house was drilled in the 1950s. There is no documentation of this water use on file in the State Engineer's Office.

Other Historic Diversions/Uses. For the Pecos Unit other diversions and uses are unknown and/or undocumented, but uses were likely involved during Pueblo, Spanish and Anglo occupation periods. Associated rights, if any, are unknown. Diversions and uses in the Glorieta Unit are unknown and/or undocumented, but some uses are likely with current or former landowners.

Trading Post Spring near Glorieta Creek. This water source was used historically as a water supply for the Trading Post and Forked Lightning Ranch headquarters. The spring box collected water which was pumped to buildings and was active through the late 1970s. There is no documentation of this water use on file in the State Engineer's Office.

Middle Pasture Spring. This unimproved spring with an intermittent flow is located 300 yards south of the middle pasture well. There is no documentation of this water use on file in the State Engineer's Office.

Mud Spring. This spring, located 1/2 mile south of Forked Lightning Ranch House (Big House) has a mudflow. It is near an old collapsed well and stock pond impoundment. There is no documentation of this water use on file in the State Engineer's Office.

Galisteo Creek (Cañoncito Sub-Unit). Historic diversion/uses are unknown, but some uses are possible with current landowners.

Wells

The National Park Service has water rights recorded at the State Engineer's Office for only one of the four wells (the well servicing the administrative area) used in the operation of the park. In the Glorieta Unit, existing dwellings probably have small domestic and stock wells which may or may not be recorded with the State Engineer's office. As these facilities are acquired, existing water rights associated with them would also be acquired. The following is a list of groundwater sources.

Well in Administration Area (Declaration of Water Right #UP-500). (NW1/4, NW1/4, NE1/4, Section 8, T15N, R12E) This well was drilled to a depth of 100 feet below the surface sometime prior to December 7, 1941, and subsequently redrilled to a depth of approximately 300 feet in 1951. A Declaration of Water Right was filed with the State Engineer's Office on July 18, 1978, for this well which services the park's administration area.

Well at the Visitor Center. A well to provide potable water to the current park Visitor Center was drilled by the NPS in the 1980s. However, no documentation of this water use

was found on file in the State Engineer's Office. It is recommended that the park apply with the State Engineer's Office for the permit required to use this water.

Two Wells by Ruins/Poison Spring. Applications were approved by the State Engineer's Office on August 1, 1978, to drill two exploratory wells (UP-x1 (location NE1/4, NE1/4, SE1/4, Section 5, T15N, R12E) and UP-x2 location SW1/4, SE1/4, SE1/4, Section 5, T15N, R12E)) near the Ruins/Poison Spring to support the planned site for the park's proposed Visitor Center. While both wells were successfully drilled (to 300 feet and 500 feet), and capped for future use, the presence of cultural resources near the proposed site of the Visitor Center caused its location to be moved.

Should the park decide that it is unlikely these wells will be used to supply water needs in the future, State of New Mexico regulations require that the wells not to be used for park purposes (as defined by their permits) be properly plugged and abandoned. The Water Rights Branch of the Water Resources Division could assist the park in determining either the appropriate approach for deciding if these wells will be used for park purposes, or determining requirements for abandoning the wells according to state regulations. In either case, further permit needs and requirements defined by the State Engineer's Office will need to be met.

Well at the Trading Post (Kozlowski's Stage Stop). This well was drilled by the Forked Lightning Ranch to a depth of 350 feet around 1978. While this well is currently used to supply potable water to administrative offices and a residence, there is no documentation of this water use on file in the State Engineer's Office. It is recommended that the park apply with the State Engineer's Office for the permit required to use this water.

Well at Forked Lightning Ranch House. This well was probably drilled by the Forked Lightning Ranch in the 1950s to a depth of approximately 800 feet to supply potable water to the Ranch House and Casita. While this water is still being used as a potable water supply by the park, there is no documentation of this water use on file in the State Engineer's Office. It is recommended that the park apply with the State Engineer's Office for the permit required to use this water.

Stock Well in Middle Pasture (Forked Lightning Ranch). This well was possibly drilled by the Forked Lightning Ranch in the early 1980s to a depth of 325 feet. There is no documentation of this water use on file in the State Engineer's Office.

Well at Glorieta House (NE1/4, NE1/4, SE1/4, S34, T16N, R11E). In the Glorieta Sub-Unit, the well was drilled in September, 1981, to a depth of 90 feet. Water is heavily contaminated and not currently being used. There is no documentation of this water use on file in the State Engineer's Office.

Well at Alvarez House. This Glorieta sub-unit well has no written information available. There is no documentation of this water use on file in the State Engineer's Office.

While the status of water rights of the remaining wells has not been documented by the park, a recent conversation with the New Mexico State Engineer's Office indicated that wells drilled prior to 1972 need to be registered and that the park is required to transfer the registration to denote the

change of ownership. Wells drilled after 1978 require permits which need to be registered in the name of the new owner (Ronald E. Palmer, NM State Engineer's Office, pers. comm.). It will be necessary

for the park to update these well permits to indicate the recent change in ownership with the acquisition of the Forked Lightning Ranch.

Potable Water Supply

Potable water systems at the Pecos National Historical Park Headquarters, Visitor Center, Ranch House and Casita, and the Trading Post have all been tested and managed for compliance with National Primary Drinking Water Regulations, the State of New Mexico Drinking Water Regulations, and the NPS Public Health Management Guidelines (National Park Service, 1993).

Several surveys of these systems have been conducted and provide the following overview of potable water quality in the park water supply systems (Sacoman, 1993; New Mexico Environment Department, 1994; National Testing Laboratories, 1994):

- **Park Headquarters:** Water for the Headquarters site is obtained from a drilled well on the west side of the picnic area. The system is classified as a public non-community system and is chlorinated. The water generally meets the requirements of the national and state regulations as well as NPS guidelines with the exceptions of sodium (221 mg/L; NPS action level = <200 mg/L), and total dissolved solids (TDS) (605 mg/L; Maximum Contaminant Level (MCL) = 500 mg/L). A reverse osmosis system is due to be installed on the primary drinking water fountain at the site (John Gibson, Pecos National Historical Park, pers. comm.).
- **Visitor Center:** Potable water for the Visitor Center is supplied from a 300-foot well drilled approximately 50 feet east of the building. The system is classified as a public non-community system and is chlorinated. The system meets the requirements of the national and state regulations as well as the NPS guidelines with the exception of iron (1.6 mg/L; MCL = .3 mg/L) and manganese (.056 mg/L; MCL = .05 mg/L). Sodium has also been observed to be at elevated levels, but meets compliance. A reverse osmosis unit will be installed on the primary drinking water fountain at the Visitor Center (John Gibson, Pecos National Historical Park, pers. comm.).
- **Ranch House and Casita:** Water for the Ranch House and Casita is obtained from a drilled well located approximately 1/4 mile from the Ranch House. Water is stored in a galvanized steel water storage tank. From there, water is chlorinated and stored in four pressure tanks before being used to supply four residential apartments. The water meets the requirements of the national and state regulations as well as NPS guidelines. TDS has been reported at elevated levels, but still is in compliance. A reverse osmosis system may be added later to this system (John Gibson, Pecos National Historical Park, pers. comm.).
- **Trading Post:** Water is supplied to the administrative offices and one apartment located at the Trading Post from a well located approximately 300 feet from the building. The system has not been classified. A chlorinator has been installed on the system. Water has been out of compliance for TDS (592 mg/L; MCL 500 mg/L) and pH (9.6; standard is between 6.5 and 8.3). A reverse osmosis system is being planned for installation in the apartment (John Gibson, Pecos National Historical Park, pers. comm.).

7. REASON FOR CHANGE

Application is made to supplement for the following reasons:

Besides the Headquarters well, three other wells (Visitor Center, Trading Post, and Forked Lightning Ranch House) provide groundwater for use at Pecos National Historical Park. The Middle Pasture Well may also provide water at The Park. The consumptive use for the four wells is included in that claimed for the Headquarter's well.

8. ADDITIONAL STATEMENTS OR EXPLANATIONS:

Pecos National Historical Park is located along State Highway 63 between Pecos and Rowe, New Mexico, within the Pecos Pueblo Grant. All wells and places of use are located within the exterior boundary of the Park. "Consumptive Use" is for all groundwater withdrawals within the exterior boundaries of the Park.
