JEAN LAFITTE NATIONAL HISTORICAL PARK AND PRESERVE

AVIAN POINT COUNT DATA, 2014

NOTES

1) I could not find the four letter code for Jean Lafitte, so entered it as JELA on the field sheets; happy to change it if needed.

2) At sites that were on the park periphery, I counted birds inside and outside the park boundary in identical fashion.

At five such points, I also underlined observations pertaining to birds that were detected from the point but never entered the park- in case it would be useful to you at some point to distinguish birds inside the park from those outside.

(FYI, there were no cases in which a bird that was first tallied outside the park entered the park boundary at a later minute- I mention this in case at some point you want to exclude birds outside the park and time of first detection inside the park might come to be of interest).

Regards,

Peter Yaukey, Ph.D.
