

WATER-RIGHT DOCKET

Mount Rainier National Park

Docket No: 10

CARBON RIVER ENTRANCE PIPELINE

Preliminary Docket Information

05-10-2000: Note to File; water right cancelled

MORA: Carbon River Entrance—June Creek
NOTE TO FILE (E. Lord)

May 10, 2000: The Washington Department of Ecology was contacted August 1999 to determine the status of the June Creek water right. I was informed that the water right had been cancelled by the State of Washington in December 1961 due to the failure of NPS to perfect the right. The three documents faxed 8-17-99 were the documents provided by the Department of Ecology indicating that the water right had been cancelled. See also: Ipsut Creek Campground—same thing happened there.

Permit to Appropriate Public Waters of the State of Washington

Book No. 15 of Permits, on Page 3768 Under Application No. 5916

United States of America; Department of the Interior, National Park Service,
Mount Rainier National Park, Longmire, Washington

is hereby granted a permit to appropriate the following described public waters of the State of Washington, subject to existing rights and to the following limitations and provisions: Permittee shall construct and maintain at his own expense a weir, or other suitable device, for measuring any water granted herein for irrigation purposes and such appropriation shall be subject to a reasonable rotation system if ordered by the State Supervisor of Hydraulics; and it is further provided that Permittee, in the use of water under this permit, shall comply with all the laws of the Departments of Fisheries and Game in accordance with Chap. 127, Laws of 1939, and all regulations and laws hereafter enacted.

October 15, 1943

Priority date of this permit is

June Creek

Source of the proposed appropriation is

Carbon River

tributary of

The quantity of water appropriated shall be limited to the amount which can be beneficially applied and not to exceed 0.01 cubic feet per second, or its equivalent in case of rotation, to

be used as set out below:

The approximate point of diversion is located S 48°35' E. 1150 ft., more or less, from

NW corner of Sec. 3, Twp. 17 N., Rge. 7 E.W.M. (Diversion point subject to

minor change from time to time because of shifting channel of creek)

being within Lot 4 Sec. 3 Twp. 17 N., Rge. 7 E. W. M.,
county of Pierce

The use, or uses, to which water is to be applied:

For DOMESTIC SUPPLY AND MISCELLANEOUS USES: 0.01 cubic feet per second during entire
year for domestic use, recreational, irrigation, fire protection, to be used

land described below Sec. Twp. N., Rge. W. M.

For IRRIGATION: 0.02 cubic feet per second, from to
each year, for irrigation of acres, described as follows:

Lot 4, Sec. 3, Twp. 17 N., Rge. 7 E.W.M., being small areas
adjacent to buildings at Carbon River Entrance to Mount Rainier
National Park.

Gentlemen:

Re: ~~Surface~~ Water Permit No. 3768

In checking over your permit we find that you have not submitted your Proof of Appropriation of Water.

If the water has been put to the full use as indicated in the permit, you should fill out the enclosed Proof of Appropriation form (to be notarized) and submit to this office along with statutory fees of \$3.00 payable to the Department of Conservation and \$ 2.00 payable to the Pierce County Auditor. Please send two separate checks or money orders. By following the above instructions, you will receive your final water right certificate.

If more time is required to put the water to full use, an extension of the time limit should be requested. By statute, a \$2.00 fee must accompany such request. Please state why such extension is necessary.

If we do not hear from you within sixty (60) days from date, we shall assume that you are no longer interested in retaining the permit and shall cancel it without further notice.

Very truly yours,

DEPARTMENT OF CONSERVATION

S E A L

INSTRUCTIONS

This permit is not a final water right but a license to proceed with construction and use the water, under the provisions of the permit, pending the time that the final certificate of water right is issued.

Actual construction work must be commenced, the project must be completed, and water put to beneficial use within the time fixed by the permit. The times for commencement and completion will be found on the second page of this permit.

Accompanying this permit is a blank for making report of beginning of construction and thereafter blanks, as listed on the back of the permit, will be furnished you and must be filled out and filed in this office as the work progresses. *Failure to file the required notices or to comply with the provisions for protection of fish life may result in cancellation of the permit.*

Should it be impossible for you to begin or to complete the work before the expiration of the time fixed in the permit, you should make application to the Supervisor of Hydraulics for an extension of time, stating reasons why such an extension is needed.

Any assignment of this permit must be in writing and must be recorded in this office in order to be valid. There is a statutory fee of \$2.00 for recording assignments.

This permit is issued subject to vested rights and all beneficial uses made of the water prior to the date of filing of the application for this permit, and it should be understood that the diversion must be so regulated that it will not injuriously affect such prior rights.

When all of the water has been put to the beneficial use or uses set out in the permit and all notices filed "Certificate of Water Right" will be issued. *Such certificate gives final title to the water granted.*

CHAS. J. BARTHOLET,
State Supervisor of Hydraulics.

Before your certificate of water right is issued it will be necessary to file with the State Supervisor of Hydraulics each of the following reports:

1. Notice of Beginning of Construction.
2. Notice of Completion of Construction.
3. Notice of Complete Application of Water to a Beneficial Use.
4. Proof of Appropriation of Water.

Upon a satisfactory showing that the appropriation has been perfected as provided by statute the State Supervisor of Hydraulics will issue a water right certificate.

(Blanks will be furnished by the office of the Supervisor of Hydraulics)

NOTICE OF WATER RIGHT APPLICATIONS Nos. 5916 and 5917

State of Washington, Office of Supervisor of Hydraulics, Olympia.

TO WHOM IT MAY CONCERN:

Notice is hereby given that the United States of America, Department of the Interior, National Park Service by John C. Preston, Superintendent of Mount Rainier National Park, Longmire, Washington, on October 15, 1943, filed with the State Supervisor of Hydraulics, Olympia, Washington, two applications for permits to divert continuously each year, subject to existing rights, public waters in Pierce County for domestic supply, recreational, fire protection, irrigation, industrial, and stock watering purposes, as follows:

Application No. 5916 for appropriation of 0.01 second-feet of waters of June Creek, tributary of Carbon River, to be diverted within Lot 4, Sec. 3, Twp. 17 N., R. 7 E.W.M.; and

Application No. 5917 for appropriation of 0.04 second-feet of waters of Ipsut Creek, tributary of Carbon River, to be diverted within approximate NE 1/4 of SE 1/4 of Sec. 7, Twp. 17 N., Rge. 8 E.W.M. (unsurveyed).

Maps showing locations and plan of said diversions and places of proposed use are on file in the office of the State Supervisor of Hydraulics, Olympia, Washington, together with such other information as is required by law.

Any person, firm or corporation whose right will be injuriously affected by said applications may file with the State Supervisor of Hydraulics, at Olympia, Washington, such objections or representations, in writing, as he may desire to make, within thirty (30) days after date of last publication, which date is October 30, 1943.

Witness my hand and official seal this 19th day of October, 1943.

APPLICATION FOR A PERMIT

To Appropriate Public Waters of the State of Washington

(Read directions on last page carefully before filling out this form)

Application No. 5916

United States of America, Department of the Interior, National Park Service,
I, by John C. Preston, Superintendent of Mount Rainier National Park,

of Longaire (Post office), County of Pierce
State of Washington, do hereby make application for a permit to appropriate

the following described public waters of the State of Washington subject to existing rights:

If the applicant is a corporation, give date and place of incorporation. ---

1. The source of the proposed appropriation is June Creek
(Name of stream)
tributary of Carbon River
2. The amount of water which the applicant intends to apply to beneficial use is 0.01
cubic feet per second.

3. The use to which the water is to be applied is domestic, recreational, irrigation, fire
(Irrigation, power, mining, manufacturing, domestic supplies, etc.)
protection, industrial and stock watering.

4. Time during which water will be required each year May to October inclusive with
negligible use by patrol rangers during remainder of year.

5. The approximate point of diversion is located S. 48°35' E. 1150 ft., more or less, from
(Give distance and bearing to section corner)
NE corner Section 3, T. 17 N., R. 7 E., W.M. (diversion point is subject to minor change
from time to time because of shifting channel of creek)

being within the Lot 4 in NW 1/4 of Sec. 3, Tp. 17 N., R. 7 E W. M.,
(Give smallest legal subdivision) (E. or W.)
in the county of Pierce.

6. The pipe line to be 1000 ft. or more in length, terminating
(Main ditch, canal, or pipe line)
in the said Lot 4, in NW 1/4 of Sec. 3, Tp. 17 N., R. 7 E W. M.,
(Smallest legal subdivision) (E. or W.)

the proposed location being shown on the accompanying map. (Carbon River Water Claims, Mount Rainier
National Park - NP-RAI-6986)

7. The name of the ditch, canal or other works is Carbon River Entrance Pipe Line.

8. Estimated cost of development necessary to utilize fully the appropriation herein asked for
\$ 1000.00.

9. Does the stream from which you wish to appropriate water flow through the tract of land on
which the water is to be used? Yes.

10. Do you own the required right-of-way for the proposed works? Yes.

DESCRIPTION OF WORKS

DIVERSION WORKS—

11. (a) Height of diversion dam --- feet; length on top --- feet;
length at bottom --- feet; material to be used and character of construction

(Loose rock, concrete, masonry, rock and brush, timber crib, etc., wasteway over or around dam)

(b) Description of headgate: 1 1/2" screened pipe extends into creek in a small wooden
(Timber, concrete, etc.; number and size of openings)
box to keep out sand.

When storage works are contemplated a storage permit must be filed in addition to the above. These forms can be secured, together with instructions, by addressing the State Supervisor of Hydraulics, Olympia, Washington.

CANAL SYSTEM—

12. (a) Give approximate dimensions at each point of canal where materially changed in size, stating miles from headgate. At headgate: Width on top (at water line) _____ feet; width on bottom _____ feet; depth of water _____ feet; grade _____ feet fall per one thousand feet.

(b) At _____ miles from headgate: Width on top (at water line) _____ feet; width on bottom _____ feet; depth of water _____ feet; grade _____ feet fall per one thousand feet.

The pipe is 1½" in diameter with grade 100 feet of fall per 1000 feet.

SUPPLY THE FOLLOWING INFORMATION ACCORDING TO USE PROPOSED:

IRRIGATION—

13. The land to be irrigated has a total area of approximately 0.02 acres, described as follows: Lot 4 in NW¼ Section 3, T. 17 N., R. 7 E., W.M., being small areas
(Give legal subdivision by section, township and range)
adjacent to buildings at Carbon River Entrance of Mount Rainier National Park.

(If more space is required, attach separate sheet)

14. Give the legal description of land when water is to be used for purposes other than irrigation, power and municipal supply Lot 4 in NW¼ Sec. 3, Tp. 17 N., Rge. 7 E W. M.
(Legal subdivisions) (E. or W.)

(a) To what stream is water returned Carbon River

(b) Locate the point of return said Lot 4 Sec. 3, Tp. 17 N., Rge. 7 E W. M.
(Smallest legal subdivision) (E. or W.)

POWER—

15. (a) Total amount of power to be developed none H. P.
(Theoretical horsepower)

(b) Total fall to be utilized _____ feet.
(Head)

(c) The nature of the works by means of which the power is to be developed _____

(d) Such works to be located in _____ of Sec. _____,
(Legal subdivision)
Tp. _____ N., Rge. _____ W. M.
(E. or W.)

(e) To what stream is the water to be returned _____

(f) Locate point of return _____ Sec. _____,
Tp. _____ N., Rge. _____ W. M.
(E. or W.)

(g) The use to which power is to be applied is —

MUNICIPAL SUPPLY—

16. To supply the city of _____ (Name)
 _____ County, having a present population of _____
 and an estimated population of _____ in 19 _____

(a) Estimated present requirement 0.01 ~~£~~

(b) Estimated future requirement 0.01

17. Construction work will begin on or before completed.

18. Construction work will be completed on or before completed

Duplicate maps of the proposed ditch or other works, prepared in accordance with the rules of the State Supervisor of Hydraulics, accompany this application.

United States of America

(Name of applicant)

by /s/ John C. Preston

Superintendent of Mount Rainier National Park.

Signed in the presence of us as witnesses:

(1) /s/ O. W. Carlson (Name), Mt. Rainier National Park (Address of witness)

(2) /s/ Mary A. Boyd (Name), Longview, Washington, (Address of witness)

Remarks: The Carbon River Entrance development consists of a Ranger Station, Maintenance Camp with equipment storage, bunk and mess houses, and a stable; and public comfort stations.

STATE OF WASHINGTON, }
 COUNTY OF THURSTON. } ss.

This is to certify that I have examined the foregoing application together with the accompanying maps and data, and return the same for correction or completion, as follows: _____

In order to retain its priority, this application must be returned to the State Supervisor of Hydraulics, with corrections, on or before _____, 19 _____

WITNESS my hand this _____ day of _____, 19 _____

 State Supervisor of Hydraulics.

DIRECTIONS FOR PREPARING APPLICATIONS

Initial examination fee of \$5.00 should accompany each application. If additional fee is required, you will be notified.

1. Write plainly in ink or use typewriter.
2. Read carefully all questions. Answer only those that apply to your project.
3. Under Question 2 estimate quantity in cubic feet per second or gallons per minute.
 - 1 cubic foot per second equals 450 gallons per minute and is sufficient to irrigate from 40 to 100 acres of land.
 - 0.1 of a cubic foot per second equals 45 gallons per minute and is sufficient for domestic supply and irrigation of 5 to 10 acres of land.
 - 0.05 of a cubic foot per second equals 22 gallons per minute or 31,700 gallons per day. This is ample for a domestic supply and for irrigation of lawn and garden up to 1 or 2 acres.
 - 0.01 of a cubic foot per second equals 4.5 gallons per minute or 6,500 gallons per day. This is ample for an ordinary domestic supply and for irrigation of about $\frac{1}{2}$ acre.
4. Maps, showing the location of the stream, point of diversion and place of use, must be made in duplicate on the enclosed section plats. If for irrigation, show the approximate area to be irrigated.
5. In answering Question 5 give approximate distance and direction of diversion point from nearest 40-acre corner, as

"320 feet North and 1100 feet East from South quarter corner of Section 1, Township 13 North, Range 2 East, W. M."

or

"North 36 degrees 20 minutes East 550 feet from the Northeast Corner of the Northwest Quarter of the Southwest Quarter of Section 33, Township 12 North, Range 3 East, W. M."
6. **Right-of-Way.** If you wish to divert water from or across land not owned by you it will be necessary to secure from the owner the right-of-way needed. The State cannot help you in this.
7. Be sure to give on the map brief directions for driving to the point of diversion from some town or easily located point on a State highway. This for our convenience in making the examination.
8. If you have been using water since before June 15, 1917, a State permit will be of no advantage to you for that particular use.
9. "Public waters" only are subject to appropriation. If a stream does not flow beyond the borders of the landholding on which it rises or into any other body of water it will not be considered public water in the meaning of the statute.
10. Sign application on the line indicated under Section 18.

SCHEDULE OF FEES DUE IN CONNECTION WITH OBTAINING WATER RIGHTS (Sec. 44 of Water Code—Sec. 7399, Remington's Rev. Stat.)

EXAMINATION FEES

There is a minimum fee of \$5.00 for all applications received.

Additional Examination Fees for Appropriation Applications:

- \$1.00 per c. f. s. over 5 c. f. s. to 500 c. f. s., inclusive.
- .25 per c. f. s. over 500 c. f. s. to 2000 c. f. s., inclusive.
- .10 per c. f. s. over 2000 c. f. s.

Additional Examination Fees for Reservoir Applications:

- 1/2¢ per acre-foot over 1000 a. f. up to 100,000 a. f., inclusive.
- 1/10¢ per acre-foot over 100,000 acre-feet.

FEES FOR FILING AND RECORDING PERMITS

There is a minimum fee of \$2.00 for filing and recording permit.

Additional Permit Fee for Irrigation Purposes:

- 10¢ per acre over 20 acres to 100 acres, inclusive.
- 5¢ per acre over 100 acres to 1000 acres, inclusive.
- 2½¢ per acre over 1000 acres.

Additional Permit Fee for Power Purposes:

- 10¢ per theoretical horsepower over 20 H. P. to 1000 H. P., inclusive.
- 2¢ per theoretical horsepower over 1000 H. P.

Permit Fee for Other Uses:

For all other beneficial purposes the fee is twice the amount of the examination fee, except for individual household and domestic use; this may include water for the irrigation of a family garden, for which the minimum fee of \$2.00 is charged.

Department of Conservation
335 General Administration Building
Olympia, Washington

Dear Mr. Walker:

Request is hereby made for extension of time in which to make full beneficial use of water under each of the two following permits:

Permit ~~3768~~ - Carbon Creek Entrance Water System-Mount Rainier
Permit 3769 - Ipsut Creek Campground Water System-Mount Rainier

Since planned development in these two areas is still in progress, and the great increase in visitation and use may require further expansion of the facilities and possibly some regrouping to permit proper utilization and provide service to the public, it will be appreciated if we may have a further extension of time.

Treasury Check in the amount of \$4.00 is enclosed to cover the two extensions requested.

Sincerely yours,

Willard M. Chase
Acting Superintendent

Gentlemen:

Re: Surface Water Permit No. 3768

In checking over your permit we find that you have not submitted your Proof of Appropriation of Water.

If the water has been put to the full use as indicated in the permit, you should fill out the enclosed Proof of Appropriation form (to be notarized) and submit to this office along with statutory fees of \$3.00 payable to the Department of Conservation and \$ 2.00 payable to the Pierce County Auditor. Please send two separate checks or money orders. By following the above instructions, you will receive your final water right certificate.

If more time is required to put the water to full use, an extension of the time limit should be requested. By statute, a \$2.00 fee must accompany such request. Please state why such extension is necessary.

If we do not hear from you within sixty (60) days from date, we shall assume that you are no longer interested in retaining the permit and shall cancel it without further notice.

Very truly yours,

DEPARTMENT OF CONSERVATION

Commission
Washington 25, D. C.

Re: DA-160 Washington

Dear Mr. Gutride:

The portion of S $\frac{1}{2}$ Sec. 34, T 18 N, R 7 E, WM, lying south of the Carbon River, Washington, as described in your letter of January 14, is within Mount Rainier National Park as enlarged by the act of May 28, 1926 (44 Stat. 668). The pertinent portion of the enlargement of the Park made by the 1926 act may be described as:

Beginning at original boundary monument numbered 1, a point three miles east of NE Cor. T 17 N, R 6 E, (NE Cor. Sec. 4, T 17 N, R 7 E); thence easterly along the original north Park boundary line to an intersection with the north bank of the Carbon River, on the line between T's 17 and 18 N, thence westerly along the north bank to point due north of monument numbered 1, thence due south to place of beginning.

Mr. A. van V. Dunn, Chief of our Water Resources Section discussed your letter with Mr. M. P. Devine of your agency and finds that it is your intention to cancel the Geological Survey Power Site classification of 1924 as it relates to this portion of the Park. We believe that such action is entirely proper in view of the proviso contained in the act of May 28, 1926, reading as follows:

"Provided, That the provisions of the act of June 10, 1920, entitled 'An Act to create a Federal power commission; to provide for the improvement of navigation; the development of water power, the use of the public lands in relation thereto; and to repeal section 18 of the River and Harbor Appropriation Act, approved August 8, 1917, and for other purposes', shall not apply to or extend over such lands (added to the Park)."

Accordingly, we shall appreciate your efforts to clear the record of the Power Site Classification covering the land described in your letter since it is not legally available for power development.

Sincerely yours,

Jackson E. Price
Assistant Director

Subject: Extensions of Time, Water Right Permits 3758 and 3769 and 11, Mount Rainier

Attached are your copies of the orders granting extensions of time until October 1, 1961, in which to perfect the subject water rights. Copies and the originals are being distributed as designated, and all should be filed in the designated docket folders.

As early as possible during the next five years, the water systems and present water use, and future water demands from the same drainage within the Park should be analyzed. Plans and amended or supplemental water right applications should then be prepared in order that we may make proofs on ultimate construction and use of the water as far as possible in 1961.

Water System-Mt. Rainier
Permit 3769-Ipsut Creek Campground
Water System-Mt. Rainier

Dear Mr. Walker:

Request is hereby made for extensions of time in which to make full beneficial use of water under each of the five designated permits. Since Section 90.20.090 of the Remington Revised Statutes does not seem to limit the length of such extensions, we suggest that 5-year extensions, if permissible, would be much more convenient for both of our offices than the one year permits of the type which were granted a year ago.

During the war years, the National Park Service was forced to leave developments at the stage completed by 1941. For the past decade, the annual increases in public use of the national parks and monuments has far exceeded expectations, and is still increasing. The annual visitation already exceeds the stabilized limits which had been estimated for about 1960 but it has been impossible to anticipate the trends in time to provide adequate facilities. As a result, the number of guest accommodations are less than planned before the war and per capita water use is below modern standards.

The three water claims for Olympic appeared excessive when jurisdiction was transferred from the Forest Service to the Park Service but it now appears that the full quantity of water may be used although such use has not been reached. It would be unwise to make proof and limit rights at this time, or to define the method or place of use by such proof.

The two claims for Mt. Rainier are for quantities of water which might be used now or in the near future if it were not for the lack of adequate modern comfort stations and cottages with private baths. Recent studies have also indicated that developments in the greater Carbon River drainage, in the Park, may have to be regrouped with different proportions of the water used from each system, to permit proper spacing of the accommodations which are now expected to be needed.

We are now faced with the same problem in all national parks and monuments. Accordingly, under MISSION 66, to which I have referred in previous correspondence, and you have probably seen press releases, we have now started a 10-year planning and development program to have facilities adequate for the anticipated attendance of 1966. Specific developments involving individual water systems will be completed in the order of the apparent most desirable priority. Some of the subject water rights pertain to developments with relatively low priority. For this reason, we should like to obtain long enough extensions of time to keep the total number at a minimum.

Very truly yours,

A. VAN V. DUNN

ORIGINAL

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Chicago 54, Illinois

October 9, 1946.

Mr. Rodney Ryker,
Supervisor of Hydraulics,
Olympia, Washington.

My dear Mr. Ryker:

Reference is made to your letter of October 2, in which you ask how long we shall need to have the time extended in which to prove full beneficial use of water at the Carbon River Entrance and Ipsut Creek Campground at Mount Rainier National Park, under Permits Nos. 3768 and 3769.

We do not wish to make unreasonable requests and do not know your limitations in granting them, but we anticipate that it may be between 5 and 10 years before we can prove full beneficial use under the particular permits. The water systems are in operation, and the Park has been visited by sufficient people to use the water, during the year ending September 30, but related facilities, such as sewage disposal systems and comfort station with flush toilets, will not be available for some years. There were 758,504 visitors to the Park this year, compared with only 456,637 in the last peak year of 1940; but the total accommodations, which were inadequate in the earlier year, have actually decreased in the interval, by moving the cabins from the Yakima Park area to the coast for war housing. The Carbon River Entrance and Ipsut Creek Campground, being outlying areas, will not be improved further until the more important tourist centers at Yakima Park and Paradise are enlarged to handle the majority of the increased attendance.

The National Park Service, as a bureau in the Department of the Interior, is further subject to all national legislation and regulations which have been imposed to further the war effort, and now to facilitate the construction of additional housing. Although the Congress appropriated considerable funds for construction in the national parks and monuments during the fiscal year 1947, which has just started, these funds have been impounded under the War Mobilization and Reconversion Directive No. 128. In addition, the funds will be allocated to all of the 169 areas of the National Park System when released or reappropriated. Finally, the National Park Service has a total program which will run between 5 and 10 years,

when it gets started, depending on the size of annual appropriations which the Congress may provide, before we can hope to have facilities and attendance again in the approximate balance which prevailed before the war.

With this explanation, it is hoped that you will grant as liberal an extension of time as possible without overstepping your authority and the spirit in which the water laws have been formulated.

Sincerely yours,

(SGD.) A. VAN V. DUNN

A. van V. Dunn,

RR:eb
Enc.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
CHICAGO, ILLINOIS

ADDRESS ONLY
THE DIRECTOR, NATIONAL PARK SERVICE

September 23, 1946.

Mr. Rodney Ryker,
Supervisor of Hydraulics,
Department of Conservation and Development,
Transportation Building,
Olympia, Washington.

My dear Mr. Ryker:

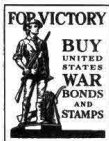

In compliance with the instructions in your letter of September 16, we enclose a purchase order and voucher covering payment of \$5 each for extensions of time in which to perfect water rights under Permits 3768 and 3769 at Mount Rainier National Park. Please sign the voucher and return it for payment with the order granting such extensions.

It is requested that you grant as long an extension of time as possible to permit park use to return to a stable condition. Although the number of visitors at the national parks this year is slightly greater than in 1941, it is a restricted use because of the limited facilities now available, and the lack of adequate transportation. It is, therefore, desirable to defer water use proof until attendance and related water use become relatively stable after the present postwar social and economic adjustments.

Sincerely yours,

(SGD.) A. VAN V. DUNN
A. van V. Dunn,
Chief, Water Rights Division.

(Sgd) Rodney Ryker
Rodney Ryker
Supervisor of Hydraulics

RR:eb

File Copy.

September 3, 1946.

Supervisor of Hydraulics,
Department of Conservation and Development,
Olympia, Washington.

Dear Sir:

We are supposed to prove full beneficial use of water during this summer under water right Applications Nos. 5916 and 5917, Permits Nos. 5758 and 5769, at Mount Rainier National Park. This is to request an extension of time in which to make such proof because of the unusual conditions which have resulted from the war.

In order that combat agencies might function to the limit during the war, the United States did little or no construction and maintenance in its national parks. Since the close of hostilities, it followed much the same policy in order not to compete in the market for home building materials. As a result, even though park attendance has been generally higher this summer than in the last peak year of 1941, the facilities for water use have been below standard and cannot be brought to maximum production until after the immediate home building program is more advanced. In addition, although attendance is above that for 1941, it is not as great as it would be if motor car production were in balance with the demand.

From your manual, it is not clear whether a fee is due with this application or not. A voucher will be sent if requested.

Very truly yours,

A. van V. Dunn,
Chief, Water Rights Division.

AvVD:ch.

cc: Supt., Mt. Rainier N. P.(2).

**WATER RIGHTS SECTION
601 Sheldon Building
San Francisco 3, California**

February 24, 1944.

State Supervisor of Hydraulics,

Olympia, Washington.

Dear Sir:

We enclose applications relating to water rights at Mt. Rainier National Park as follows, all in the Nisqually River Drainage:

- 1. Application to appropriate a supplemental supply for the Nisqually Entrance with a declaration of vested interests at time of adoption of your water code.**
- 2. Application to appropriate water for the Tahoma Vista area from a nameless tributary of Fish Creek.**
- 3. Application to change point of diversion and enlarge area of use under a water claim filed in the county by David Longmire in 1906.**
- 4. Application to change point of diversion and place of use from the old Longmire hydroelectric plant on the Nisqually River, with claimed priority of 1911, to the Paradise Hydroelectric plant of this Service.**
- 5. Similar application to change point of diversion and place of use from Van Trump Creek power plant with claimed priority of 1916 to said Paradise hydroelectric plant.**
- 6. Application for supplemental supply to cover remainder of diversion capacity of the Paradise hydroelectric plant.**
- 7. Application to change point of diversion of original Reese's Camp system at the Paradise area, with priority of 1906, to the present water system of the National Park Service in that area.**
- 8. Application to appropriate a supplemental supply from Edith Creek to cover capacity of the Paradise water system in excess of the vested interests established for Reese's Camp.**

ENCLOSURE

There is also enclosed a summary of the method used in determining the vested power rights appurtenant to the Nisqually and Van Trump hydroelectric plants.

From your letter to Superintendent Preston at Mt. Rainier, dated October 19, 1943, and relating to Applications 5916 and 5917, we gather that you will only need 3 prints of the map NF-RAI-6983 to accompany this group of applications, and enclose them accordingly. More prints are available if our interpretation is wrong.

We enclose a voucher for \$24 which seems to cover the initial fees for filing. Should the applications for change in points of diversion cost more, we can merely substitute a new continuation sheet. Hence, please sign the first sheet and return with a statement of any alterations you may wish.

Please address this office if you have any questions regarding the applications, but send the notice of appropriation for publication to the Superintendent, Mount Rainier National Park, Longmire, Washington.

Yours very truly,

AvVD:sh

MEMORANDUM for Hydraulic Engineer, Water Rights Section,
c/o Regional Director, Region Four.

We have located practically all of the data pertaining to water rights in this park as mentioned in your memorandum of January 3. These data are as follows, and are transmitted under this cover:

1. Copy of Notice of Water Right Applications Nos. 5864, 5865, 5866, 5867, 5875 and 5876 as prepared by the State Supervisor of Hydraulics. The last date of publication has been inserted by this office and corresponds to the published Notice and Affidavit of Publication.
2. Affidavit of Publication as furnished by the Tacoma Daily Index in connection with the applications listed in the foregoing paragraph. Another copy of this Affidavit has been furnished the State Supervisor of Hydraulics.
3. Original letter dated August 24, 1943 from Supervisor of Hydraulics acknowledging receipt of applications listed above.
4. Copy of Notice of Water Right Applications Nos. 5916 and 5917 as prepared by the State Supervisor of Hydraulics. Date of last publication has been inserted in this office.
5. Copy of Affidavit of Publication as furnished by the Tacoma Daily Index covering Applications 5916 and 5917. Another copy of this affidavit has been furnished the State Supervisor of Hydraulics.
6. Original letter from office of State Supervisor of Hydraulics acknowledging receipt of Affidavit of Publication of Notice of Applications Nos. 5916 and 5917.
7. Regarding paragraph 6 of your memorandum of January 3 permits have not yet been issued covering Applications Nos. 5916 and 5917, although the Supervisor of Hydraulics has advised that the applications have been approved and that permits will be issued upon payment of the fees involved. In this connection please refer to memorandum from this office dated January 17. As soon as permits are received they will be forwarded to you.

8. Copy of Notice of Water Right Applications Nos. 5788, 5789 and 5790 as prepared by the State Supervisor of Hydraulics. The last date of publication has been inserted in this office in accordance with notation appended to copy of Notice attached.

9. Original letter from State Supervisor of Hydraulics dated February 17, 1943 referring to Applications 5788 to 5790, inclusive.

10. Original letter from State Supervisor of Hydraulics dated August 17, 1943 acknowledging receipt of Affidavit of Publication covering Applications 5788, 5789 and 5790. In this connection we have requested another copy of this affidavit from the Chehalis Advocate, the newspaper that published the notice, and as soon as it is received it will be forwarded to you.

11. Tracing of NP-RAI-6978, Ohanapecosh Water Systems, has been located in our files and is being mailed under separate cover.

NOTICE OF WATER RIGHT APPLICATIONS NOS. 5916 and 5917.

TO WHOM IT MAY CONCERN:

Notice is hereby given that the United States of America, Department ~~of the Interior~~ of the Interior, National Park Service by John C. Preston, Superintendent of Mount Rainier National Park, Longmire, Washington, on October 15, 1943 filed with the State Supervisor of Hydraulics, Olympia, Washington, two applications for permits to divert continuously each year, subject to existing rights, public waters in Pierce County for domestic supply, recreational, fire protection, irrigation, industrial, and stock watering purposes, as follows:

Application No. 5916 for appropriation of 0.01 second-feet of waters of June Creek, tributary of Carbon River, to be diverted within Lot 4, Sec. 3, Twp. 17 N., Rge. 7 E.W.M.; and

Application No. 5917 for appropriation of 0.084 second-feet of waters of Ipsut Creek, tributary of Carbon River, to be diverted within approximate NE $\frac{1}{4}$ of SE $\frac{1}{4}$ of Sec. 7, Twp. 17 N., Rge. 8 E.W.M. (unsurveyed).

Maps showing locations and plan of said diversions and places of proposed use are on file in the office of the State Supervisor of Hydraulics, Olympia, Washington, together with such other information as is required by law.

Any person, firm or corporation whose right will be injuriously affected by said applications may file with the State Supervisor of Hydraulics, at Olympia, Washington, such objections or representations, in writing, as he may desire to make, within thirty (30) days after date of last publication, which date is Oct 30, 1943. (X)

Witness my hand and official seal this 19th day of October, 1943.

CHAS. J. BARTHOLET
State Supervisor of Hydraulics.

(X) This date noted in book and corresponds to date as covered in Published Notice & Affidavit of Publication.

when voucher
arrives

Dear Sir:

Re: Applications Nos. 5916 and 5917

We acknowledge receipt of two applications for the appropriation of water from the Carbon River Basin for use in Mount Rainier National Park, which have been numbered for our records as follows:

Application #5916 for appropriation of 0.01 c.f.s. of water from June Creek.

Application #5917 for appropriation of 0.084 c.f.s. of water from Ipsut Creek.

We require only one copy of each application, and are therefore returning the duplicate of each application, as requested.

We should have three copies of maps accompanying each application, as we now send one copy each to the State Departments of Fisheries and Game and keep one for our records. In this case, as both diversions have been shown on the same map, we have combined both the notice and the map sent each, and have had only three extra white prints made, the cost of which we have added to your voucher for the Van dyke negatives, as suggested in letter of September 27, 1943 from Mr. A. van V. Dunn and your letter of October 13, 1943.

We enclose this voucher now in the amount of \$2.31, and the voucher in the amount of \$10.00, covering examination fees on the above numbered applications.

The Van dyke negatives requested in Mr. Dunn's letter of Sept. 27, are being forwarded to him, together with the tracings, which we do not need any longer.

Yours very truly

CHAS. J. BARTHOLET
Supervisor of Hydraulics
