 ACQUIRED BY Purchase
 APPLICATION 20022 PERMIT 13337 CERTIFICATE 7942
 ACTION DUE _____ PRIORITY March 6, 1961 RESERVATION July 12, 1971
 QUANTITY 1.4 acre/feet per year USE Stockwatering
 STATUS Active SOURCE Stream
 REMARKS See trip report of August 19, 1975.

NARRATIVE: On July 12, 1971, Mary G. Rogers sold to the United States her property, the Coast Ranch, located within Point Reyes National Seashore. She also conveyed all her water rights appurtenant to these 398 acres.

Those right were to the water flowing in two streams, which were used for stockwatering where they crossed the Rogers property. The Rogers' had acquired the right to appropriate 1.4 acre/ft. of water per annum, from one of these streams under license 7942, their application 20022 having been filed June 6, 1966.

In response to a request from this office, the ownership of license 7942 was changed to the United States, as indicated by a letter from the California Division of Water Rights dated July 9, 1973.

It is suspected that this water source and PORE WR #9 are stream diversions to a pond. A field check of the area is needed.

A field investigation of the Roger's tract was made on July 8, 1975 by Mike Ackerman of Water Resources (see trip report of August 19, 1975) and maps attached). Mr. Rogers has a well in the vicinity of his home which supplies his domestic needs. He also has a spring nearby which supplies water for his barn and dairying operations (we did not have time to inspect the spring or its location).

Note: Rogers reserved the right of occupancy and water use for a 20 year period from the date of sale - July 12, 1971.

Direct Diversion Rate: 0.000 Gallons per Day **Collection to Storage Amount:** 1.400 AC-FT**LICENSEE REPORTING FOR 2011**

As indicated in the California Code of Regulations title 23, section 847, the State Water Resources Control Board (State Water Board) requires annual reporting of water diversion and use under licenses. The State Water Board has historically required these reports to be filed once every three years in paper form. California Water Code chapter 2.7 section 348 authorizes the State Water Board to require online reporting of water diversions. Consistent with these requirements, the State Water Board, Division of Water Rights (Division) developed a new online Report Management System (RMS) as a component of the enhanced Water Right Information Management System (eWRIMS). RMS allows electronic submittal of water diversion and use reports, saving both paper and resources. **All reports must be completed online through RMS; paper copies are not available.** To report online, go to www.waterboards.ca.gov/rms and login with your User ID and Password. The information required to login and access your online Report of Licensee is:

User ID (Water Right ID): **A020022**
Password (Reporting Identifier): **205125**

You are required to complete the online report for 2011 no later than **June 30, 2012**. If you do not have a computer or internet access, you should use a friend's computer, a computer in a public library, or a Division computer to fill out the form. Unfortunately, Division staff cannot fill the form out on your behalf. However, if you wish to seek assistance with the form, you may contact the Division to request a listing of attorneys and consulting firms with water rights experience. You can also review the listing on the Division's Business Information Contacts webpage at: http://www.waterboards.ca.gov/waterrights/board_info/contacts.shtml.

If you have multiple water rights, please be aware you must report water use separately for

CHARLES R. HOPKIN, CHAIRMAN | THOMAS HOWARD, EXECUTIVE DIRECTOR

each right. Do not list total combined diversions under multiple rights on the form. To document compliance with the conditions of your water right(s), you may use RMS to submit photos (such as staff gages, measuring devices, etc.), documents (Department of Fish and Game agreements, other agency approvals, etc.), graphs, and spreadsheets.

CHANGES FOR 2011 REPORTING:

- It is possible to create one account on the RMS site to report all of your water rights. It is not necessary to create an account if you would like to report your water rights individually. Please see the RMS login page for more information and instructions.
- RMS includes the capability to amend current and past reports. Amendments to credits previously claimed pursuant to Water Code sections 1010, 1011, and 1011.5 are subject to review and may not be accepted.
- Licensees can list all of their reservoirs associated with this license in their report.
- RMS includes new on screen help tools and instructions.

REQUIRED NOTIFICATION OF CHANGE IN OWNERSHIP

You are required to notify the Division directly of any water right ownership change. Your county assessor's office or title company does not notify the Division of ownership changes. Failure to notify the Division of an ownership change prior to assessment of annual water right fees will result in your liability to pay the annual water right fee even if you transferred the property associated with the water right. Notification to the Division should be made using the Change of Name/Address or Ownership form by clicking on the Water Rights Forms link located at www.waterboards.ca.gov/waterrights/board_info.

CONTACT INFORMATION

Frequently asked questions pertaining to filling out online reports are posted at the RMS website and we encourage you to read these first. However, if you still have any questions or need assistance completing the report, please contact the Division of Water Rights at (916) 323-9393 or send an email to: ewrims@waterboards.ca.gov.

ANNUAL LICENSEE REPORTING FOR 2010

The State Water Resources Control Board (State Water Board) has historically required Reports of Licensee to be filed once every three years in paper form. Senate Bill 8, which was signed into law in 2009, authorized the State Water Board to adopt regulations requiring online reporting of water diversions. Consistent with the Senate Bill, the State Water Board has adopted regulations requiring annual reporting of water diversion and use under licenses, and developed a new online Report Management System (RMS) as a component of the enhanced Water Right Information Management System (eWRIMS). The online RMS allows you to electronically submit your water diversion and use report, saving both paper and resources. To report on-line, go to www.waterboards.ca.gov/rms and log in with your water right ID and password. The information required to log in and access your online Report of Licensee is:

Water Right ID: **A020022**
Password: **7C2D6B**

You are required to complete the online report for 2010 no later than **July 1, 2011**. You may also submit your record of diversion and use for previous years using the RMS. To maintain a continuous record of water use under your license, Licensees with **Reporting Cycle 1** should report their monthly diversion and use for 2008, 2009, and 2010. Licensees with **Reporting Cycle 2** should report their monthly diversion and use for 2009 and 2010; and Licensees with **Reporting Cycle 3** only need to report monthly diversion and use for 2010. Please note that it is not possible at this time to amend a report submitted through the RMS.

CHANGES FOR 2010 REPORTING:

Question 4 on the previous Report of Licensee form ("Amount of Water Used") has changed. New Question 5c requires you to report both the "*Amount directly diverted and/or collected to storage*" and the corresponding "*Amount used*" for each month. For many direct diversion-only projects, these amounts will be the same and the online form provides a check box for that purpose (Question 5b).

New Questions 6a and 6b on the RMS Report of Licensee requires you to report the maximum instantaneous *rate* of diversion that has occurred in each month under the license, if available.

If your water project is covered by two or more water rights, you should only report your diversion and use of water for the project covered by the license number printed above. The total amount diverted and used under multiple water rights should not be combined and reported on a single

California Environmental Protection Agency

**Notice to Water Right Licensee
Licensee Reporting for 2010**

February 2011

form. In such cases, you should quantify your diversion under each water right, assigning water to the senior-most right first, to the extent allowed under the permit or license.

REQUIRED NOTIFICATION OF CHANGE IN OWNERSHIP

You are required to notify the State Water Board directly of any water right ownership change. Your county assessor's office or title company does not notify us of any ownership updates. Failure to notify the State Water Board of an ownership change prior to assessment of annual water right fees will result in your liability to pay the annual water right fee even if you transferred the property associated with the water right. Notification to the State Water Board should be made using the Change of Name/Address or Ownership form by clicking on the Water Rights Forms link located at www.waterboards.ca.gov/waterrights/board_info

COMPLIANCE WITH LICENSE TERMS AND CONDITIONS: This Report is important since it provides a record of your actual water use as well as your compliance with the terms and conditions of your water right license. The information requested below should be filled out carefully. This Report should be promptly returned to the above address.

1. ☐ YES ☐ NO I have currently reviewed my water right license.
2. ☐ YES ☐ NO I am complying with all terms and conditions listed in the license. Identify any noncompliance under "Remarks" on the reverse side.
3. ☐ YES ☐ NO I have changed the intake location, type(s) of use, and/or place of use authorized by the license. If Yes, explain under "Remarks" on reverse side. *Note: A Change Petition and associated fees may be required for any significant changes to the licensed project.*

BENEFICIAL USE(S) OF WATER: Under the appropriate boxes below, briefly explain how the water was used each year

4. Current Use(s) of Water	2007	2008	2009
4.a. Irrigation – specify no. of acres irrigated			
4.b. Frost Protection – specify no. of acres protected			
4.c. Heat Control – specify no. of acres protected			
4.d. Industrial – specify type			
4.e. Stockwatering – specify no. & type of animals			
4.f. Municipal – approx. population served			
4.g. Domestic – specify no. of persons, lawn/garden area			
4.h. Power Generation – installed capacity in kW, MW, or hp			
4.i. Recreational – specify (boating, fishing, water contact sports, etc.)			
4.j. Other – specify (Examples: fire protection, snowmaking, mining, etc.)			

AMOUNT OF WATER TAKEN FROM THE SOURCE: Please report only the amounts diverted and/or stored under this license.

PLEASE ANSWER ONLY THOSE QUESTIONS BELOW THAT ARE APPLICABLE TO YOUR WATER RIGHT PROJECT
(Please note that future amendments to the claims below will not be accepted.)

An appropriate water right can be reduced or revoked through five continuous years of nonuse. However, the California Water Code specifies that under certain conditions no reduction or loss of the appropriate water right shall occur due to: (a) water conservation efforts; (b) use of recycled, desalinated, or polluted water; and/or (c) conjunctive use of groundwater and surface water. You must report the extent and amount of water claimed for credit below. Failure to report the amounts will deprive you of the benefits allowed under the Water Code sections.

CONSERVATION OF WATER: (Water Code section 1011)

7. ☐ YES ☐ NO During the period covered by this Report, were you implementing any water conservation efforts? If YES, please describe:

8. If YES and you want to claim credit for the amount of water conserved towards the water use authorized under your license as allowed under Water Code section 1011, please show the amount of water conserved below:

Future amendments to this claim will not be accepted.

	2007	2008	2009
Amount of water conserved.			
Specify in acre-feet (AF) or million gallons (MG)			

WATER QUALITY AND WASTEWATER RECLAMATION: (Water Code section 1010)

9. ☐ YES ☐ NO During the period covered by this Report, did you use reclaimed water from a wastewater treatment facility, water from a desalination facility, or water polluted by waste to a degree which unreasonably affects the water for other beneficial uses?

10. If YES and you want to claim credit for the substitution of this reclaimed, desalinated, or polluted water in lieu of the surface water authorized under your license as allowed by Water Code section 1010, please show the amount of reclaimed, desalinated, or polluted water used below:

Future amendments to this claim will not be accepted.

	2007	2008	2009
Amount of reclaimed, desalinated, or polluted water used.			
Specify in acre-feet (AF) or million gallons (MG)			

CONJUNCTIVE USE OF GROUNDWATER AND SURFACE WATER: (Water Code section 1011.5)

11. ☐ YES ☐ NO During the period covered by this Report, were you using groundwater in lieu of the surface water authorized under your license?

12. If YES and you want to claim credit for the groundwater used in lieu of the surface water authorized under your permit as allowed under Water Code section 1011.5, please show the amount of groundwater used below:

Future amendments to this claim will not be accepted.

	2007	2008	2009

Licensee shall allow representatives of the Board and other parties, as may be authorized from time to time by the Board, reasonable access to project works to determine compliance with the terms of this license.

All rights and privileges under this license including method of diversion, method of use and quantity of water diverted are subject to the continuing authority of the Board in accordance with law and in the interest of the public welfare to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.

Reports shall be filed promptly by licensee on appropriate forms which will be provided for the purpose from time to time by the Board.

The right hereby confirmed to the diversion and use of water is restricted to the point or points of diversion herein specified and to the lands or place of use herein described.

This license is granted and licensee accepts all rights herein confirmed subject to the following provisions of the Water Code:

Section 1625. Each license shall be in such form and contain such terms as may be prescribed by the Board.

Section 1626. All licenses shall be under the terms and conditions of this division (of the Water Code).

Section 1627. A license shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code) but no longer.

Section 1628. Every license shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a license is issued takes the license subject to the conditions therein expressed.

Section 1629. Every licensee, if he accepts a license does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any license granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any licensee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any licensee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

Section 1630. At any time after the expiration of twenty years after the granting of a license, the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State shall have the right to purchase the works and property occupied and used under the license and the works built or constructed for the enjoyment of the rights granted under the license.

Section 1631. In the event that the State, or any city, city and county, municipal water district, irrigation district, lighting district, or political subdivision of the State so desiring to purchase and the owner of the works and property cannot agree upon the purchase price, the price shall be determined in such manner as is now or may hereafter be provided by law for determining the value of property taken in eminent domain proceedings.

Memorandum

To: Superintendent, Point Reyes National Seashore

From: Chief, Water Rights Branch

Subject: California State Water Resources Control Board Progress Reports and Reports of Licensee

We have reviewed the thirteen reports of licensee and one progress report by permittee (attached) mailed to us in a letter dated October 6, 1997. There is missing information or discrepancies in all of the reports between the authorized beneficial purposes and the reported water uses. Before we can finalize the reports and sign them, we would like your assistance in clarifying these discrepancies. Please review our comments below and return the completed reports and/or call Bill Hansen, of my staff, at (970) 225-3532 to discuss the need for filing change applications so we are in compliance with the conditions of each permit.

Our concerns are listed below and referenced by application and permit number:

Application A029021, Permit 020434, Use of Water (5): Has use of water commenced? If so, is any irrigation use and/or recreational use occurring?

Application A021954, Permit 009630: There is a conflict between the authorized purpose which is stockwatering and the actual uses shown on page 2. If this water is being used for domestic purposes we are in non-compliance with the permit and should file a change application to add domestic use.

No Use

Application A019955, Permit 007931: What type of recreational use is occurring (i.e., fishing, boating, etc.)? *2*

Application A019953, Permit 007929: There is a conflict between the authorized purposes which are domestic, recreational, and stockwatering and the actual uses shown on page 2. Is this water is being used for domestic purposes? If not, will it be in the future or should we file a change application to subtract domestic use? What type of recreational use is occurring (i.e., fishing, boating, etc.)?

Application A019952, Permit 007928: There is a conflict between the authorized purpose which is stockwatering and the actual uses shown on page 2. If recreational use is occurring we should file a change application. If it is not, we should not show this use on page 2.

Application A019951, Permit 007927: Is recreational use occurring? If so, what type and it should be shown on page 2.

Application A019950, Permit 007926: There is a conflict between the authorized purposes which are recreational and stockwatering and the actual uses shown on page 2. Is there actually 280 acres being irrigated, or was it intended to show 280 head of stock being watered. If irrigation is occurring we are in non-compliance with our permit. Is recreational use occurring? If so, what kind. If these discrepancies are real we will need to file a change application.

Application A020021, Permit 007941: There is a conflict between the authorized purpose which is stockwatering and the actual uses shown on page 2. If domestic use is occurring we need to file a change application to be in compliance with our permit.

Application A020022, Permit 007942: There is a conflict between the authorized purpose which is stockwatering and the actual uses shown on page 2. If domestic use is occurring we need to file a change application to be in compliance with our permit.

Application A021277, Permit 009049: There is a conflict between the authorized purposes which are recreational and stockwatering and the actual uses shown on page 2. If domestic use is occurring we need to file a change application to be in compliance with our permit. Is recreational use occurring? If so, what type and it should be shown on page 2.

Application A013473, Permit 003827: Are uses occurring in November, December, January, and February? Is irrigation occurring? If not, should we file a change application to be in compliance with our permit?

Application A013322, Permit 003800: Does use occur in January? There is a conflict between the authorized purposes which are domestic and industrial and the actual uses shown on page 2. It appears that the purpose should be changed to stockwatering since this is a beef cattle operation. Was this water used at one time for a dairy operation and the original permittee issued for industrial uses associated with dairy farming?

Application A017417, Permit 006748: There is a conflict between the authorized purpose which is recreational and the actual uses shown on page 2. If horses are being watered we are in non-compliance with our permit and should either discontinue stockwatering or file a change application to add stockwatering. *May need change application*

Application A019954, Permit 007930: What types of recreational use are occurring?

Subject: Transmittal of Reports of Licensee for California park units

Attached are completed Report of Licensee forms for 1985, 1986 and 1987 water usage for water rights at Death Valley NM, Lassen Volcanic NP, Point Reyes NS, Redwoods NP, Sequoia-Kings Canyon NP, Whiskeytown NRA, and Yosemite NP. The Water Rights Branch of the Water Resources Division prepared the forms based upon information received from the respective park units.

The forms need to be transmitted to the State Water Resources Control Board from your office as soon as possible. We have attached proposed letters of transmittal to accompany each park unit's set of forms.

If you have any questions regarding the forms or their transmittal, please contact Pat Larson of the Water Rights Branch at 303/221-5341.

NPS PERSON ON CALL: Patt Larson ☒ I CALLED ☐ S/HE CALLED

PERSON Jack Williams, Chief of Maintenance
ORGANIZATION Point Reyes National Seashore
ADDRESS Point Reyes, CA 94956

TELEPHONE NO. (415) 663-8522 EXT. _____

SUBJECTS DISCUSSED Initially I asked Mr. Williams about water right records regarding the Park. He said they are non-existent and very little is known about the Park's water rights. Then, I asked if the two Rogers' properties are still supporting cattle, particularly:

WR #9- Unnamed Stream, Appl #20021, License #7941, 130 dairy cattle
WR #10- Unnamed Stream, Appl #20022, License #7942, 130 dairy cattle
(Both on lands previously owned by Mary G. Rogers)

WR #11- Unnamed Stream, Appl #22784, License #10112, 100 beef cattle
(On lands previously owned by Clarence and Rosilda Rogers)

After consulting with John Sansing, Superintendent, PORE, Mr. Williams confirmed that both operations are still active. We agreed that the Reports of Licensee for these three water rights should be submitted the same as the previous reports. No record has been found regarding a water right for stockwatering from an unnamed stream, Appl #25498, License #11635, at either the Park or the Water Resources Division.

(Continued on blank page following.)

ACTION TO BE TAKEN Prepare the Reports of Licensee for WR #9, #10 and #12 for Stan Ponce's signature and send them to Dave Cherry for transmittal to the State Water Resources Control Board. For the unknown water rights I'll consult with Gerry Witucki and Dave Cherry or Merv Kolipinski to see if anyone has additional information or documentation regarding these water rights.

PORE - Reports of Licensee (continued)

I asked about a water right for which we need to complete a "Progress Report By Permittee." The project is listed as 216 acre-feet, for domestic, irrigation, recreation, and stockwatering from an unnamed stream and it was supposed to be completed 12/1/84.

(Appl # 25504, Permit # 18061) Mr. Williams said the only possible water project he could think of was the dam that Niman and Schell were building about that time.

I also asked Mr. Williams about three "Supplemental Statements of Water Diversion" for diversions from an unnamed stream that is tributary to Papermill Creek (listed as "Peppermill Creek" on the forms but an accompanying memo from John Sansing states that it should be "Papermill Creek"). He said he knew nothing about them. I noted that we have until July 1, 1988, to file these three forms.

ISSUE/CONCERN:

Received Reports of Licensee for 1985, 1986 and 1987 for California park units. The package included three reports for Point Reyes N.S.: Application #20021, License #7941 - Docket #9
 Application #20022, License #7942 - Docket #10
 Application #22784, License #10112 - Docket #17

ACTION PLAN:

1. Contact park staff to check status of water use for each application.
2. Prepare Report of Licensee for each application.
3. Transmit to Western Region for submittal to State Water Resources Control Board.

Originally called Superintendent Sansing, but he referred me to Jack Williams, Chief of Maintenance. I told him I needed to know if water use has changed for the three applications. He consulted Superintendent Sansing and they confirmed that both cattle operations were still operating so water use remained the same as the last report. (Appl # 20021 and #20022 are for a cattle ranch on lands previously owned by Mary G. Rogers. Appl # 22784 is for a cattle ranch on lands previously owned by Clarence and Rosilda Rogers.)

Conversation: Subject: Water Rights on the Rogers Property inside the Park.

The Superintendent stated that the Rogers have sold their property in the Park to the Government, but retained a 20-year reservation of occupancy. They may continue to use the water for their dairy operation, as they did before they sold their property; but any new water sources they develop will become the property of the Government. Thus, the Rogers cannot file an application for any water rights with the State Water Resources Division, because the water would automatically be the property of the Government.

There are two streams which cross the Rogers property. They both cross a corner of the property, and flow into Schooner Bay. They are no doubt used for stock-watering purposes.

The Superintendent has no clear picture of the extent of water usages in the Park. He suggested that a field inspection and inventory of the whole Park would be required to obtain that information.

Field Trip to Point Reyes National Seashore, July 8, 1975

Purpose of the Trip: Trip made to acquire specific physical data necessary to update water right docket - specifically to conduct field investigation of various properties to establish and locate the diversions. Point Reyes has been topographically mapped by the U.S. Geological Survey but unfortunately the range and township survey was not extended over the park. Ranges and townships are shown on adjoining maps but due to the distance over which the survey would have to be extended, and the irregular shape and staggered configuration of many of the sections due to surveying corrections, ranges and townships cannot be accurately projected over the park. Thus a listed range and township location of a specific diversion fails to provide an accurate location. These diversions are in use, being utilized by individuals holding life estates or term leases within the park.

Itinerary: Departed San Francisco the morning of July 8, 1975. Arrived at Point Reyes and remained until late that afternoon at which time I returned to San Francisco.

Companions: None

Accomplishments and Observations: Met with Dick Engle, Park Engineer, who accompanied me to the various diversions.

Nunes Diversion (Water Right Docket #11) - Mr. Nunes had constructed an earthen dam about midway down a small canyon immediately to the south of his residence (see Figure 1). There was a stream flowing at an approximate rate of 3 gallons per minute in this canyon. The source of the stream was several small springs and seeps arising in the hillside to the south of the stream. Mr. Nunes had constructed a spring box and pumphouse over one particular spring opening. This supplies water for his domestic needs and the overflow is piped to the stream to also feed the reservoir. The specific conductance of the water was 700 at 15°C.

Rogers Property (Water Right Dockets # 9 & 10) - Spoke with a member of the family who informed us that their domestic supply was from a well

drilled adjacent to their home, and that their supply for the dairying operations was from a nearby spring. He directed us to the diversion he had made in a canyon and for which he had applied to the State of California for an appropriative right (and for which he had received a license). We drove to a hill overlooking the small stock reservoir which is his diversion. The earthen dam traps the present total flow of water in the canyon. Streamflow is probably due solely to rainfall. Assuming this reservoir is that described in License No. 7942 (Water Right Docket # 10), the only other diversion in the general vicinity of the one described in License No. 7941 (Water Right Docket # 9) is the spring used to supply water to their barn (see Figure 2). However, the description and the location in the license does not describe this diversion. We can only guess that Mr. Rogers filed on the reservoir and spring and received licenses on both, or he has or had made another diversion which he did not mention to us.

Conclusions: The Nune diversion was as described in the application. The future importance of this reservoir may ultimately lie in the fact that it is fed by springs capable of providing a continuous domestic supply year round (as they are used now). In comparison, the Rogers diversions were not as described in the applications and may have no other use than in dairying operations.

Recommendations: The information contained in this trip report should be incorporated into the respective docket files so as to supplement and update the information already contained therein. The pertinent information contained in this trip report should also be transmitted to the park and WASO along with copies of the maps.
