Direct Diversion Rate: 0.500 Cubic Feet per Second **Collection to Storage Amount:** 0.000 AC-FT**LICENSEE REPORTING FOR 2011**

As indicated in the California Code of Regulations title 23, section 847, the State Water Resources Control Board (State Water Board) requires annual reporting of water diversion and use under licenses. The State Water Board has historically required these reports to be filed once every three years in paper form. California Water Code chapter 2.7 section 348 authorizes the State Water Board to require online reporting of water diversions. Consistent with these requirements, the State Water Board, Division of Water Rights (Division) developed a new online Report Management System (RMS) as a component of the enhanced Water Right Information Management System (eWRIMS). RMS allows electronic submittal of water diversion and use reports, saving both paper and resources. **All reports must be completed online through RMS; paper copies are not available.** To report online, go to www.waterboards.ca.gov/rms and login with your User ID and Password. The information required to login and access your online Report of Licensee is:

User ID (Water Right ID): **A021371**Password (Reporting Identifier): **647528**

You are required to complete the online report for 2011 no later than **June 30, 2012**. If you do not have a computer or internet access, you should use a friend's computer, a computer in a public library, or a Division computer to fill out the form. Unfortunately, Division staff cannot fill the form out on your behalf. However, if you wish to seek assistance with the form, you may contact the Division to request a listing of attorneys and consulting firms with water rights experience. You can also review the listing on the Division's Business Information Contacts webpage at: http://www.waterboards.ca.gov/waterrights/board_info/contacts.shtml.

If you have multiple water rights, please be aware you must report water use separately for

each right. Do not list total combined diversions under multiple rights on the form. To document compliance with the conditions of your water right(s), you may use RMS to submit photos (such as staff gages, measuring devices, etc.), documents (Department of Fish and Game agreements, other agency approvals, etc.), graphs, and spreadsheets.

CHANGES FOR 2011 REPORTING:

- It is possible to create one account on the RMS site to report all of your water rights. It is not necessary to create an account if you would like to report your water rights individually. Please see the RMS login page for more information and instructions.
- RMS includes the capability to amend current and past reports. Amendments to credits previously claimed pursuant to Water Code sections 1010, 1011, and 1011.5 are subject to review and may not be accepted.
- Licensees can list all of their reservoirs associated with this license in their report.
- RMS includes new on screen help tools and instructions.

REQUIRED NOTIFICATION OF CHANGE IN OWNERSHIP

You are required to notify the Division directly of any water right ownership change. Your county assessor's office or title company does not notify the Division of ownership changes. Failure to notify the Division of an ownership change prior to assessment of annual water right fees will result in your liability to pay the annual water right fee even if you transferred the property associated with the water right. Notification to the Division should be made using the Change of Name/Address or Ownership form by clicking on the Water Rights Forms link located at www.waterboards.ca.gov/waterrights/board_info.

CONTACT INFORMATION

Frequently asked questions pertaining to filling out online reports are posted at the RMS website and we encourage you to read these first. However, if you still have any questions or need assistance completing the report, please contact the Division of Water Rights at (916) 323-9393 or send an email to: ewrims@waterboards.ca.gov.

PERMIT 14317

LICENSE 9730

THIS IS TO CERTIFY, That

US National Park Service
Point Reyes National Seashore
1 Bear Valley Road
Point Reyes, CA 94956

has the right to the use of the waters of an **Unnamed Stream (aka Fish Hatchery Creek)**
in **Marin County**

tributary to **Tomales Bay** thence the **Pacific Ocean**

for the purpose of **Fish and Wildlife Preservation and Enhancement and Recreational uses.**

The Deputy Director for Water Rights finds that the State Water Resources Control Board (State Water Board) and/or the licensee have met the following requirements for Change Petition approval: (a) the change will not operate to the injury of any lawful user of water; (b) good cause has been shown for the change; (c) the petition does not constitute the initiation of a new right; and (d) demonstrated that the requirements of the California Environmental Quality Act (CEQA) have been met or that the project is exempt from CEQA.

Additionally, the State Water Board has complied with its independent obligation to consider the effect of the proposed project on public trust resources and to protect those resources where feasible. (*National Audubon Society v. Superior Court* (1983) 33 Cal.3d 419 [189 Cal.Rptr. 346], 658 P.2d 709.)

The amended license is being issued in accordance with the redelegations of authority (Resolution No. 2007-0057.) Therefore, an amended license on **Application 21371** filed on **June 28, 1963** has been approved by the State Water Board SUBJECT TO PRIOR RIGHTS and to the limitations and conditions of this amended license.

Amended License 9730 supersedes the license originally issued on **April 8, 1971**, which was perfected in accordance with the laws of California, the Regulations of the State Water Board, or its predecessor, and the terms of **Permit 14317**. The priority of this right dates from **June 28, 1963**. Proof of maximum beneficial use of water under this license was made as of **March 16, 1971** (the date of inspection).

The amount of water to which this right is entitled and hereby confirmed is limited to the amount actually beneficially used for the stated purposes and shall not exceed five-tenths (0.5) cubic foot per second, from **May 30 to September 30 of each year**, and **seven thousand eight hundred (7,800) gallons per day**, from **April 1 to May 30 and October 1 to December 30 of each year**. The maximum amount diverted under this license shall not exceed one hundred fifty (150) acre-feet per year.

PERMIT 14317

LICENSE 9730

The right hereby confirmed to the diversion and use of water is restricted to the point or points of diversion herein specified and to the lands or place of use herein described.

Reports shall be filed promptly by the licensee on the appropriate forms which will be provided for the purpose from time to time by the State Water Board.

Licensee shall allow representatives of the State Water Board and other parties, as may be authorized from time to time by the State Water Board, reasonable access to project works to determine compliance with the terms of this license.

Pursuant to Water Code sections 100 and 275 and the common law public trust doctrine, all rights and privileges under this license, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the State Water Board may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirement for the authorized project. No action will be taken pursuant to this paragraph unless the State Water Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the State Water Board also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the State Water Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution article X, section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.

The quantity of water diverted under this license is subject to modification by the State Water Board if, after notice to the licensee and an opportunity for hearing, the State Water Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the State Water Board finds that: (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

This license does not authorize any act which results in the taking of a threatened or endangered species or any act which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish and Game Code sections 2050 to 2089) or the federal Endangered Species Act (16 U.S.C.A. sections 1531 to 1544). If a "take" will result from any act authorized under this water right, the licensee shall obtain authorization for an incidental take prior to construction or operation of the project. Licensee shall be responsible for meeting all requirements of the applicable Endangered Species Act for the project authorized under this license.

If construction or rehabilitation work is required for the diversion works covered by this license within the bed, channel, or bank of the affected water body, the licensee shall enter into a streambed or lake alteration agreement with the State Department of Fish and Game. Licensee shall submit a copy of the agreement, or waiver thereof, to the Division of Water Rights prior to commencement of work. Compliance with the terms and conditions of the agreement is the responsibility of the licensee.

This license is granted and the licensee accepts all rights herein confirmed subject to the following provisions of the Water Code:

Section 1625. Each license shall be in such form and contain such terms as may be prescribed by the State Water Board.

Section 1626. All licenses shall be under the terms and conditions of this division (of the Water Code).

Section 1627. A license shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code) but no longer.

APPLICATION 21371

PERMIT 14317

Section 1628. Every license shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article (of the Water Code) and the statement that any appropriator of water to whom a license is issued takes the license subject to the conditions therein expressed.

Section 1629. Every licensee, if he accepts a license, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefore shall at any time be assigned to or claimed for any license granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any licensee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any licensee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

Section 1630. At any time after the expiration of twenty years after the granting of a license, the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State shall have the right to purchase the works and property occupied and used under the license and the works built or constructed for the enjoyment of the rights granted under the license.

Section 1631. In the event that the State, or any city, city and county, municipal water district, irrigation district, lighting district, or political subdivision of the State so desiring to purchase and the owner of the works and property cannot agree upon the purchase price, the price shall be determined in such manner as is now or may hereafter be provided by law for determining the value of property taken in eminent domain proceedings.

ANNUAL LICENSEE REPORTING FOR 2010

The State Water Resources Control Board (State Water Board) has historically required Reports of Licensee to be filed once every three years in paper form. Senate Bill 8, which was signed into law in 2009, authorized the State Water Board to adopt regulations requiring online reporting of water diversions. Consistent with the Senate Bill, the State Water Board has adopted regulations requiring annual reporting of water diversion and use under licenses, and developed a new online Report Management System (RMS) as a component of the enhanced Water Right Information Management System (eWRIMS). The online RMS allows you to electronically submit your water diversion and use report, saving both paper and resources. To report on-line, go to www.waterboards.ca.gov/rms and log in with your water right ID and password. The information required to log in and access your online Report of Licensee is:

Water Right ID: **A021371**
Password: **2N8R9H**

You are required to complete the online report for 2010 no later than **July 1, 2011**. You may also submit your record of diversion and use for previous years using the RMS. To maintain a continuous record of water use under your license. Licensees with **Reporting Cycle 1** should report their monthly diversion and use for 2008, 2009, and 2010. Licensees with **Reporting Cycle 2** should report their monthly diversion and use for 2009 and 2010; and Licensees with **Reporting Cycle 3** only need to report monthly diversion and use for 2010. Please note that it is not possible at this time to amend a report submitted through the RMS.

CHANGES FOR 2010 REPORTING:

Question 4 on the previous Report of Licensee form ("Amount of Water Used") has changed. New Question 5c requires you to report both the "*Amount directly diverted and/or collected to storage*" and the corresponding "*Amount used*" for each month. For many direct diversion-only projects, these amounts will be the same and the online form provides a check box for that purpose (Question 5b).

New Questions 6a and 6b on the RMS Report of Licensee requires you to report the maximum instantaneous *rate* of diversion that has occurred in each month under the license, if available.

If your water project is covered by two or more water rights, you should only report your diversion and use of water for the project covered by the license number printed above. The total amount diverted and used under multiple water rights should not be combined and reported on a single

California Environmental Protection Agency

form. In such cases, you should quantify your diversion under each water right, assigning water to the senior-most right first, to the extent allowed under the permit or license.

REQUIRED NOTIFICATION OF CHANGE IN OWNERSHIP

You are required to notify the State Water Board directly of any water right ownership change. Your county assessor's office or title company does not notify us of any ownership updates. Failure to notify the State Water Board of an ownership change prior to assessment of annual water right fees will result in your liability to pay the annual water right fee even if you transferred the property associated with the water right. Notification to the State Water Board should be made using the Change of Name/Address or Ownership form by clicking on the Water Rights Forms link located at www.waterboards.ca.gov/waterrights/board_info

NOTICE OF PETITIONS FOR CHANGE FOR LICENSES 9730, 4324A, 3827, AND 3800 (APPLICATIONS 21371, 13965A, 13473, AND 13322, RESPECTIVELY) TO DEDICATE WATER TO ENHANCE INSTREAM FISH HABITAT (WATER CODE SECTION 1707)

COUNTY: Marin STREAM SYSTEM: Lagunitas Creek

The U. S. National Park Service - Point Reyes National Seashore (Petitioner) has filed four petitions for change in place and purpose of use, pursuant to California Water Code Section 1707. The Petitioner proposes to dedicate water diverted under Licenses 9730, 4342A, 3827, and 3800 to instream use to enhance the flow of three creeks, Lagunitas, Olema, and an Unnamed Stream (aka Fish Hatchery Creek) located within Point Reyes National Seashore, for the benefit of fish, wildlife, and recreation. The dedication of two of the existing water right licenses (4342A and 9730) to instream use is part of the Giacomini Wetland Restoration Project (Project), which involves restoring ranchland to active floodplain or wetlands. All structural diversions have been or will be removed and there will be no construction or re-grading as a result of these petitions. The impacts of the Project are addressed in the *Final Giacomini Wetland Restoration Project Environmental Impact Statement/Environmental Impact Report (2007 (Giacomini EIS/EIR))*, on file at the Division of Water Rights. Any correspondence directed to the Petitioner should be mailed to Eric Lord, 1201 Oak Ridge Drive Ste 250, Fort Collins, CO 80525, or by email at Eric_Lord@nps.gov.

The existing point of diversion and place of use are on federal lands. Federal lands are not subject to Streambed Alteration Agreements.

4. ENVIRONMENTAL DOCUMENTS

a. Has any California public agency prepared an environmental document for your project?

No.

If YES, submit a copy of the latest environmental document(s) prepared, including a copy of the notice of determination adopted by the California public agency. Public agency:

If NO, check the appropriate box and explain below, if necessary:

CEQA: This change is exempt from CEQA pursuant to 14 Cal. Code Regs. 15301(i), 15307, 15308, and In the Matter of Lic. 465, 466, and 4822, and Permit 854, 1995 WL 59093 (Cal.St.Wat.Res.Bd.).

NEPA: As part of the Giacomini Wetlands Restoration Project, water rights held by Waldo Giacomini (previous owner) were to be dedicated pursuant to Section 1707. This dedication of water rights is addressed generally in the Final Giacomini Wetland Restoration Project Environmental Impact Statement/Environmental Impact Report (2007). This License 9730 was not specifically mentioned in the EIS/EIR, but the lands authorized for irrigation pursuant to License 9730 were restored as part of the Wetlands Project.

See Attachment No. 2

* Note: When completed, submit a copy of the final environmental document (including notice of determination) or notice of exemption to the SWRCB, Division of Water Rights. Processing of your petition cannot proceed until these documents are submitted.

** Note: CEQA requires that the SWRCB, as Lead Agency, prepare the environmental document. The information contained in the environmental document must be developed by the petitioner and at the petitioner's expense under the direction of the SWRCB, Division of Water Rights.

5. WASTE/WASTEWATER

- a. Will your project, during construction or operation, (1) generate waste or wastewater containing such things as sewage, industrial chemicals, metals, or agricultural chemicals, or (2) cause erosion, turbidity or sedimentation?

No. Diversion pursuant to this license ceased in August 2007, and all diversion activities stopped then. There are no structures remaining to be removed.

If YES, or you are unsure of your answer, explain below and contact your local Regional Water

Quality Control Board for the following information (See instruction booklet for address and telephone no.):

See Attachment No. _____

- b. Will a waste discharge permit be required for your project? **NO**
Person contacted: _____ Date of contact: _____

- c. What method of treatment and disposal will be used? **NA**

See Attachment No. _____

6. ARCHEOLOGY

- a. Have any archeological reports been prepared on this project? As part of the Giacomini Wetland Restoration Planning process, archeological surveys were completed on the entirety of the project planning area, including the Point of Diversion for License 9730. On August 21, 2006 SIPO concurred with the park determination of "no historic properties affected."
- b. Will you be preparing an archeological report to satisfy another public agency? NO
- c. Do you know of any archeological or historic sites located within the general project area? NO
If YES, explain:
See Attachment No. _____

7. ENVIRONMENTAL SETTING

Attach three complete sets of color photographs, clearly dated and labeled, showing the vegetation that exists at the below-listed three locations. For time extension petitions, the photographs should document only those areas of the project that will be impacted during the requested extension period.

Along the stream channel immediately downstream from the proposed point(s) of diversion.

Along the stream channel immediately upstream from the proposed point(s) of diversion.

At the place(s) where the water is to be used.

8. CERTIFICATION

Attachment No. 1

National Park Service (NPS) acquired this water right—License 9730—from Waldo Giacomini. Mr. Giacomini used this right to irrigate meadow and for stock watering in support of his dairy operation. The right continued to be used pursuant to its licensed terms until August 2007, at which time the dairy operation was discontinued. Since that time, the water has not been diverted but rather has been allowed to remain in the stream.

Subsequent to the ceasing of dairy operations, the NPS restored the dairy lands, including the lands identified for irrigation pursuant to this license, as part of the Giacomini Wetlands Restoration Project (Wetlands Project). The impacts of the Wetlands Project are addressed in the *Final Giacomini Wetland Restoration Project Environmental Impact Statement/Environmental Impact Report* (2007). Though dedication of License 9730 was not specifically identified as part of the Wetlands Project in the EIS/EIR, the lands authorized for irrigation pursuant to this license were included and restored as part of the Wetlands Project. License 4324A, used by Mr. Giacomini in support of the dairy operation and acquired by the Park, was specifically identified in the EIS/EIR for dedication; a petition for change of License 4324A is also being submitted with this petition.

In support of the Wetlands Project and the mission of the Park in general, NPS desires to change the use of License 9730 pursuant to Water Code Section 1707. The proposed place of use is the stream segment from the headwater to the mouth of the creek, as shown on the attached map.

Attachment No. 2

A hard copy of the *Final Giacomini Wetland Restoration Project Environmental Impact Statement/Environmental Impact Report* (2007) has been provided to staff of the State Water Resources Control Board.

Notices of Decision regarding the Wetland Project are attached.

Giacomini Wetland Restoration Project

SCH Number: 2002114002

Type: NOD - Notice of Determination

Project Description

The National Park Service (NPS), Point Reyes National Seashore, is proposing to restore natural hydrologic processes and wetland functions to significant portions of the project area known as the Giacomini Ranch and Olema Marsh. The stated purpose of this large scale restoration project is to "promote restoration of ecological processes and functions" within the project area and adjoining watersheds. By a combination of actions including removal of levees, tide gates, and culverts, floodwaters of Legunitas and other Project Area creek that carry sediment, nutrients, and other pollutants will be able to flood onto historic floodplains to be filtered and transformed by the restored wetlands. The California Department of Fish and Game (DFG) is executing Lake and Streambed Alteration Agreement Number 1500-2008-0141-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Don Neubacher, Point Reyes National Seashore, National Park Service.

From:  Charles Armor, Regional Manager
Department of Fish and Game – Bay Delta Region, Post Office Box 47, Yountville, California 94599

Subject: Fee Waiver for the National Park Service on Section 1707 Petitions for License Numbers 9730, 4324A, 3800, and 3827 on Lagunitas and Olema Creeks in the Point Reyes National Seashore, Marin County

The Department of Fish and Game (DFG) is requesting that the State Water Resources Control Board accept the four 1707 petitions from the National Park Service without the DFG filing fee required by Public Resources Code 10005. Per Section 10005 (d)(4) of the Public Resources Code, DFG is waiving the fee requirement for the four 1707 petitions referenced above on Lagunitas and Olema creeks because the purpose of the filings is to change the licenses from consumptive use to instream use for the benefit of fish and wildlife resources.

If you have questions regarding this protest, please contact Mr. Greg Martinelli, Water Conservation Supervisor, at (707) 944-5570; or by writing to DFG at the memorandum address listed above.

Re: Request for Fee Waiver

Dear Mr. Armor,

The Water Resources Division of the National Park Service is in process of filing 4 petitions pursuant to Cal. Water Code § 1707 with the State Water Resources Control Board. The purpose of the filings is to change the 4 licenses from consumptive use of water to instream use in support of fish and wildlife.

Through this letter, we are requesting, pursuant to Cal. Public Resources Code § 10005(d)(4), that the fee payable to the Cal. Department of Fish and Game be waived. Eric Lord of my office has provided draft copies of this project to your office for review and determination of the benefit to fish and wildlife.

If you need further information or have other questions, please contact Eric Lord of my staff at (970) 225-3526. I appreciate your consideration of this matter.

Sincerely,

Charles W. Pettee
