Re: Statement Of Claim Of Right To Use Public Waters Of The State Of Arizona –
Registry No.s (to be assigned)
Statement Of Claimant Form For Other Uses Amendment – File No.s 39-89220,
39-89222, 39-91444, 39-91445, 39-91446, and 39-91447.

Dear Ms. Hanna:

Attached you will find completed water rights claim forms for Wupatki National Monument, Petrified Forest National Park, Sunset Crater National Monument, and Walnut Canyon National Monument.

“Statement Of Claim Of Right To Use Public Waters Of The State Of Arizona” forms are filed for Peshlaki and Heiser Springs in Wupatki National Monument.

“Statement Of Claimant Form For Other Uses Amendment” forms are filed to amend the claimed priority dates for Peshlaki and Hesier Springs in Wupatki National Monument. Please note the “Registry Number” referred to in Items 2, 3, and 15 must be filled in after your office has processed the “Statement Of Claim” forms and assigned a Registry Number. Amended claims are also filed to amend the quantifiable present and future administrative consumptive uses for Petrified Forest National Park, Sunset Crater National Monument, and Wupatki National Monument, and to amend the boundary description for Walnut Canyon National Monument.

Please return signed and dated copies of the processed claim forms to our office. Contact

Jim Harte (970) 225-3538 with any questions you may have regarding these claims.

Sincerely,

A handwritten signature in cursive script, appearing to read "Charles W. Pettee".

Charles W. Pettee
Chief, Water Rights Branch

AMENDMENT

SUPERIOR COURT OF APACHE COUNTY

File No. 39-

Date Filed:

WFN

1. Claimant Name: United States of America c/o National Park Service (Walnut Canyon NM)Claimant Address: 1201 Oak Ridge Dr. Suite 250 City Fort CollinsState: Colorado Zip Code 80525-5596 Telephone 970-225-3500

2. Basis of Claim:

- A. ☐ Appropriation Right acquired prior to June 12, 1919. 1974 Water Rights Registration Act Registry No. _____
- B. ☐ Appropriation Right acquired after June 12, 1919. Application No. _____ Permit No. _____, or Certificate of Water Right No. _____
- C. ☐ Decreed water right. Principal litigants, court, date and case no. _____
- D. ☐ Right to withdraw groundwater. Grandfathered Right No. _____
- E. ☒ Other, describe: (see file No. 39-89220)

3. Claimed Priority Date: ____/____/____ (month/day/year) (see File No. 39-89220)-

4. Use:

- A. ☐ Municipal
- B. ☐ Commercial or Industrial
- C. ☐ Mining
- D. ☐ Stockwatering other than from a stockpond
- E. ☐ Recreation, Fish & Wildlife
- F. ☒ Other, describe: (see file No. 39-89220)

5. Source of Water: (see file No. 39-89220)

- A. ☐ Stream: name _____, tributary to _____
- B. ☐ Spring: name _____, tributary to _____
- C. ☐ Lake or Reservoir: name _____, tributary to _____
- D. ☐ Groundwater.

6. Legal description of the Point of Diversion: (attach additional sheet if required) (see file No. 39-89220)

____ 1/4, ____ 1/4, ____ 1/4, Section _____, Township _____ N/S, Range _____ E/W

7. If there are Irrigation, Domestic or Stockpond Uses also supplied from the Point of Diversion, describe: _____

8. Means of Diversion:

- A. ☐ Instream pump.
- B. ☐ Gravity flow into a ditch, canal or pipeline.
- C. ☒ Well: Arizona Department of Water Resources Well Registration No. 55-629093
- D. ☒ Other, describe: (see file No. 39-89220)

¹ See Instructions for explanation of uses in this category

9. Means of Conveyance:

- A. ☐ Ditch, canal or pipeline. If the means of conveyance is owned and/or operated by some other entity, please give name and address: _____
- B. ☒ Other, describe: (see file No. 39-89220) _____

10. Place of Use, If other than point of diversion: (attach additional sheet if required)

County Coconino County

INSTRUCTIONS

STATEMENT OF CLAIM OF RIGHT TO USE PUBLIC WATERS OF THE STATE OF ARIZONA

This claim is for surface water which is defined by statute as "the waters of all sources, flowing in streams, canyons, ravines, or other natural channels, or in a definite underground channel, whether perennial or intermittent, flood, waste or surplus water, and of lakes, ponds and springs on the surface."

The following instructions are referenced by number to the questions on the claim.

1. Complete name of claimant, current mailing address, including zip code and telephone number. If the claimant is a corporation or business, include the name of the authorizing agent.
2. Give the name of the direct source of surface water and the type of source. If known, provide the name of the drainage, creek, etc. to which the source is a tributary.
3. Describe the claimed beneficial uses including the annual quantity of use (in gallons or acre-feet for each type of use), the irrigated acreage for any claimed irrigation use and the months the water is used. A quantity of use must be provided for each beneficial use or the claim will be returned for correction. Per Arizona Revised Statute § 45-181, beneficial use includes but is not limited to, use for domestic, municipal, recreation, wildlife, including fish, agricultural, mining, stockwatering, and power purposes.
4. The date of first beneficial use must be completed or the claim will be returned for correction.
5. Provide the legal land description for the location of the claimed point of diversion from the claimed source. This location must be described to the nearest 40 acre tract ($\frac{1}{4}, \frac{1}{4}$) or other appropriate description or the claim will be returned for correction.
6. Provide the legal land description for the location of the place(s) of use. This location must be described to the nearest 40 acre tract ($\frac{1}{4}, \frac{1}{4}$) or other appropriate description or the claim will be returned for correction.
7. Provide any information you may have pertaining to the legal basis of the claim. Documentation could include affidavits, homestead documents, a notice of location, notice of appropriation, photographs, etc.

General Instructions:

1. A separate form must be filed for each claimed right to use public water.
2. A \$10.00 filing fee must accompany each claim.
3. The statement of claim is a sworn affidavit. The statement of claim must be signed by the claimant(s) and must be subscribed and sworn to.
4. The filing of a statement of claim pursuant to this article which knowingly provides for an overstatement of a right either in quantity of water or times of use claimed constitutes a class 3 misdemeanor.

INSTRUCTIONS

STATEMENT OF CLAIM OF RIGHT TO USE PUBLIC WATERS OF THE STATE OF ARIZONA

This claim is for surface water which is defined by statute as "the waters of all sources, flowing in streams, canyons, ravines, or other natural channels, or in a definite underground channel, whether perennial or intermittent, flood, waste or surplus water, and of lakes, ponds and springs on the surface."

The following instructions are referenced by number to the questions on the claim.

1. Complete name of claimant, current mailing address, including zip code and telephone number. If the claimant is a corporation or business, include the name of the authorizing agent.
2. Give the name of the direct source of surface water and the type of source. If known, provide the name of the drainage, creek, etc. to which the source is a tributary.
3. Describe the claimed beneficial uses including the annual quantity of use (in gallons or acre-feet for each type of use), the irrigated acreage for any claimed irrigation use and the months the water is used. A quantity of use must be provided for each beneficial use or the claim will be returned for correction. Per Arizona Revised Statute § 45-181, beneficial use includes but is not limited to, use for domestic, municipal, recreation, wildlife, including fish, agricultural, mining, stockwatering, and power purposes.
4. The date of first beneficial use must be completed or the claim will be returned for correction.
5. Provide the legal land description for the location of the claimed point of diversion from the claimed source. This location must be described to the nearest 40 acre tract ($\frac{1}{4}$, $\frac{1}{4}$) or other appropriate description or the claim will be returned for correction.
6. Provide the legal land description for the location of the place(s) of use. This location must be described to the nearest 40 acre tract ($\frac{1}{4}$, $\frac{1}{4}$) or other appropriate description or the claim will be returned for correction.
7. Provide any information you may have pertaining to the legal basis of the claim. Documentation could include affidavits, homestead documents, a notice of location, notice of appropriation, photographs, etc.

General Instructions:

1. A separate form must be filed for each claimed right to use public water.
2. A \$10.00 filing fee must accompany each claim.
3. The statement of claim is a sworn affidavit. The statement of claim must be signed by the claimant(s) and must be subscribed and sworn to.
4. **The filing of a statement of claim pursuant to this article which knowingly provides for an overstatement of a right either in quantity of water or times of use claimed constitutes a class 3 misdemeanor.**

Nov. 12

PARKS AND PUBLIC LANDS ACT

P.L. 104-388
Sec. 208

"(d) To further the purposes of the monument, the Secretary is also authorized to acquire from willing sellers only, by donation, purchase with donated or appropriated funds, or exchange not to exceed 65 acres outside the boundary depicted on the map referred to in section 301 and develop and operate thereon research, information, interpretive, and administrative facilities. Lands acquired and facilities developed pursuant to this subsection shall be administered by the Secretary as part of the monument. The boundary of the monument shall be modified to include the lands added under this subsection as a non-contiguous parcel."

SEC. 207. WUPATKI NATIONAL MONUMENT BOUNDARY ADJUSTMENT.

16 USC 431 note.

The boundaries of the Wupatki National Monument, Arizona, are hereby revised to include the lands and interests in lands within the area generally depicted as "Proposed Addition 168.89 Acres" on the map entitled "Boundary—Wupatki and Sunset Crater National Monuments, Arizona", numbered 322-80,021, and dated April 1989. The map shall be on file and available for public inspection in the Office of the National Park Service, Department of the Interior. Subject to valid existing rights, Federal lands and interests therein within the area added to the monument by this section are hereby transferred without monetary consideration or reimbursement to the administrative jurisdiction of the National Park Service, to be administered as part of the monument in accordance with the laws and regulations applicable thereto.

SEC. 208. WALNUT CANYON NATIONAL MONUMENT BOUNDARY MODIFICATION.

16 USC 431 note.

(a) PURPOSE.—The purpose of this section is to modify the boundaries of the Walnut Canyon National Monument (hereafter in this section referred to as the "national monument") to improve management of the national monument and associated resources.

(b) BOUNDARY MODIFICATION.—Effective on the date of enactment of this Act, the boundaries of the national monument shall be modified as depicted on the map entitled "Boundary Proposal—Walnut Canyon National Monument, Coconino County, Arizona", numbered 360/80,010, and dated September 1994. Such map shall be on file and available for public inspection in the offices of the Director of the National Park Service, Department of the Interior. The Secretary of the Interior, in consultation with the Secretary of Agriculture, is authorized to make technical and clerical corrections to such map.

(c) ACQUISITION AND TRANSFER OF PROPERTY.—The Secretary of the Interior is authorized to acquire lands and interest in lands within the national monument, by donation, purchase with donated or appropriated funds, or exchange. Federal property within the boundaries of the national monument (as modified by this section) is hereby transferred to the administrative jurisdiction of the Secretary of the Interior for management as part of the national monument. Federal property excluded from the monument pursuant to the boundary modification under subsection (b) is hereby transferred to the administrative jurisdiction of the Secretary of Agriculture to be managed as a part of the Coconino National Forest.

(d) ADMINISTRATION.—The Secretary of the Interior, acting through the Director of the National Park Service, shall manage the national monument in accordance with this title and the provisions of law generally applicable to units of the National Park Service, including "An Act to establish a National Park Service,

and for other purposes" approved August 25, 1916 (39 Stat. 535; 16 U.S.C. 1, 2-4).

(c) AUTHORIZATION OF APPROPRIATIONS.—There are hereby authorized to be appropriated such sums as may be necessary to carry out this section.

SEC. 208. BUTTE COUNTY, CALIFORNIA LAND CONVEYANCE.

(a) PURPOSE.—It is the purpose of this section to authorize and direct the Secretary of Agriculture to convey, without consideration, certain lands in Butte County, California, to persons claiming to have been deprived of title to such lands.

(b) DEFINITIONS.—For the purpose of this section:

(1) The term "affected lands" means those Federal lands located in the Plumas National Forest in Butte County, California, in sections 11, 12, 13, and 14, township 21 north, range 5 East, Mount Diablo Meridian, as described by the dependent resurvey by the Bureau of Land Management conducted in 1992, and subsequent Forest Service land line location surveys, including all adjoining parcels where the property line as identified by the 1992 BLM dependent resurvey and National Forest boundary lines before such dependent resurvey are not coincident.

(2) The term "claimant" means an owner of real property in Butte County, California, whose real property adjoins Plumas National Forest lands described in paragraph (1), who claims to have been deprived by the United States of title to property as a result of previous erroneous surveys.

(3) The terms "Secretary" means the Secretary of Agriculture.

(c) CONVEYANCE OF LANDS.—Notwithstanding any other provision of law, the Secretary is authorized and directed to convey, without consideration, all right, title, and interest of the United States in and to affected lands as described in subsection (b)(1), to any claimant or claimants, upon proper application from such claimant or claimants, as provided in subsection (d).

(d) NOTIFICATION.—Not later than 2 years after the date of enactment of this Act, claimants shall notify the Secretary, through the Forest Supervisor of the Plumas National Forest, in writing of their claim to affected lands. Such claim shall be accompanied by—

(1) a description of the affected lands claimed;

(2) information relating to the claim of ownership of such lands; and

(3) such other information as the Secretary may require.

(e) ISSUANCE OF DEED.—(1) Upon a determination by the Secretary that issuance of a deed for affected lands is consistent with the purpose and requirements of this section, the Secretary shall issue a quit claim deed to such claimant for the parcel to be conveyed.

(2) Prior to the issuance of any such deed as provided in paragraph (1), the Secretary shall ensure that—

(A) the parcel or parcels to be conveyed have been surveyed in accordance with the Memorandum of Understanding between the Forest Service and the Bureau of Land Management, dated November 11, 1989;

(B) all new property lines established by such surveys have been monumented and marked; and

DEPARTMENT OF AGRICULTURE

Forest Service

DEPARTMENT OF THE INTERIOR

National Park Service

USDA, Forest Service, USDI, National Park Service; Notice of Transfer of Administrative Jurisdiction, Coconino National Forest and Walnut Canyon National Monument

SUMMARY: The Forest Service previously had administrative jurisdiction over 1,279 acres, more or less, as depicted on the map entitled, "Boundary Proposal—Walnut Canyon National Monument," numbered 360/80,010, and dated September 1994. The National Park Service formerly had administrative jurisdiction on 54 acres, more or less, as shown on the same map. Notice is hereby given that, pursuant to the provisions of Section 208 of Pub. L. 104-333, 110 Stat. 4093, administrative jurisdiction on the 1,279 acres is now in the National Park Service, and administrative jurisdiction on the 54 acres is now in the Forest Service. Both transfers are subject to prior existing rights and applicable laws and regulations. The specific lands and/or interests, subject to this notice, include both the surface and minerals on 1,279 acres, more or less, and 54 acres, more or less.

SUPPLEMENTARY INFORMATION: The maps and other documents associated with this transfer of lands and minerals may be reviewed at the Intermountain Land Resources Program Center, 1220 South St. Francis Drive, Santa Fe, New Mexico 87504, and at Walnut Canyon National Monument Headquarters, 6400 North Highway 89, Flagstaff, Arizona 86004. The same materials are available at the USDA, Forest Service, Regional Office, 517 Gold Avenue, SW, Albuquerque, New Mexico 87102, and Coconino National Forest, 2323 Greenlaw Lane, Flagstaff, Arizona 86004.

Dated: May 5, 1998.

Eleanor Towns,
Regional Forester, USDA, Forest Service,
Region 3.

Dated: July 17, 1998.

John E. Cook,
Regional Director, Intermountain Region,
National Park Service.

BILLING CODE 4310-70-P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce (DOC) has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of Export Administration (BXA).

Title: Approval of Triangular Involving Commodities Covered by a U.S. Import Certificate.

Agency Form Number: None.

OMB Approval Number: 0694-0009.

Type of Request: Extension of a currently approved collection of information.

Burden: 1 hour.

Average Time Per Response: 30 minutes per response.

Number of Respondents: 1.

Needs and Uses: The triangular symbol will be stamped on the certificate as notification to the government of the exporting country that the U.S. importer is uncertain whether the items will be imported into the U.S. or knows that the items will not be imported into the U.S., but that, in any case, the items will not be delivered to any other destination except in accordance with the EAR. This procedure was developed in an effort to increase the effectiveness of controls over international trade in strategic commodities, ensuring that they will not be delivered to any other destination except in accordance with export control regulations.

Affected Public: Individuals, businesses or other for-profit institutions.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Victoria Baecher-Wassmer (202) 395-5871.

Copies of the above information collection proposal can be obtained by calling or writing Linda Engelmeier, DOC Forms Clearance Officer, (202) 482-3272, Department of Commerce,

Room 5327, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to Victoria Baecher-Wassmer, OMB Desk Officer, Room 10202, New Executive Office Building, Washington, DC 20230.

Dated: August 18, 1998.

Linda Engelmeier,

Departmental Forms Clearance Officer, Office of the Chief Information Officer.

[FR Doc. 98-22726 Filed 8-24-98; 8:45 a.m.]

BILLING CODE 3510-33-P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce (DOC) has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 USC Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Northeast Region—Gear Identification Requirements.

Agency Form Number(s): None.

OMB Approval Number: None.

Type of Request: New collection.

Burden: 24,518 hours.

Number of Respondents: 3,253

(multiple requirements).

Avg. Hours Per Response: One minute to mark gear.

Needs and Uses: This collection is under the authority of the Magnuson-Stevens Fishery Conservation and Management Act. The regulations specify that federal permit holders using specified fishing gear be marked with the vessels official identification number, Federal permit number, tag number, or some other specified form of identification. The regulations further specify how the gear is to be marked (e.g., location and visibility). This information is used for enforcement purposes and for the identification of gear concerning damage loss or civil proceedings.

Affected Public: Businesses or other for-profit organization, individuals.

Frequency: Recordkeeping.

Respondent's Obligation: Mandatory.

OMB Desk Officer: David Rostker,

(202) 395-3897.

Copies of the above information collection proposal can be obtained by calling or writing Linda Engelmeier, DOC Forms Clearance Officer, (202) 482-3272, Department of Commerce,

RE: STATEMENT OF CLAIMANT NO. 39

Dear: Claimant,

The Department of Water Resources has received your request to assign/amend a Statement of Claimant filed in the adjudication proceedings. The information you have supplied is **insufficient** to complete your request. **Please provide the information noted in bold below** so that we may continue to process your assignment or amendment.

Please complete the enclosed form(s) and return with all supporting documentation.

We cannot determine what Statement of Claimant is being referenced in your request. Please identify the file reference number (39-) of the Statement of Claimant you are assigning or amending.

All signatures must be acknowledged by a Notary Public.

Proof of ownership must be submitted with the original assignment form:
Copy of a RECORDED DEED, TAX VALUATION NOTICE, OR A TAX BILL.

Other:

Sincerely,

Lisa M. Jannusch

Memorandum

To: General Superintendent, Navajo Lands Group
From: Associate Regional Director, Park Operations, SWR
Subject: Water Resources Investigations

The status of all water resources and water rights activities in each of the parks within the Group is as follows:

El Morro

The monument's "Declaration of Owner of Underground Water Right" was accepted for filing by the State of New Mexico on January 18, 1977 and has been assigned Declaration No. Misc. 32-5.

The above declaration claims a total of 13-acre feet of water per annum for municipal purposes with a priority date of 1906. The usual disclaimer clauses are included.

Additional work to be done, and is reflected in this Region's long-range program, includes:

- 1) Water Resources Management Plan
- 2) Quantification of Reserved Water Rights
- 3) Water Resources/Water Rights Study

Aztec Ruins

Project for drilling of observation wells authorized by Account #7075-70001-585 has been completed on July 15, 1979. Four observation wells were drilled to depths varying from 10 to 35 feet. The purpose of the wells is to measure and record fluctuations in ground water levels found within the monument. The objective of the study is to develop alternating ways in preventing fluctuating ground waters from endangering excavated and unexcavated archaeological ruins of the monument. Preliminary results indicate that the monument is underlain by two

shallow ground water zones which are separated by an impermeable clay zone. The deeper water zone (23 to 30 feet), eastern end of monument, is found in gravel deposits of an ancient stream. It is our opinion, based on limited data, that waters from these deposits do not surface into the ruins within the monument. The upper or shallower water zone (within the upper 10 feet of surface) occurs intermittently and is recharged by local precipitation and from percolated irrigation water from the field located to the north and uphill from the monument. In addition surface runoff from a neighboring pond inundates the north-eastern portion of the monument. Waters from this source are responsible for a swampy and densely vegetated area in the vicinity of the ruins referred to as: Mounds A, B, C, D, and Earl Morris Ruins. This Office is planning to install water level recording gages on each observation well recently drilled and to run a resistivity survey of the monument. All of the above data including alternatives with cost estimates to prevent surface, shallow and ground waters from endangering the archaeological ruins, will be completed by December 1979.

The monument enjoys an adjudicated water rights to 4.8 acre feet of water on 1.6 acres of land for irrigation purposes. The monument obtains its water from the Farmer's Ditch Company which enjoys a priority date of 1892 or earlier.

Chaco Canyon

Water Resources-Water Rights

- 1) U. S. Geological Survey Draft Report titled "Report of effects and recommended monitoring of energy-related development on water resources in the San Juan Basin at Chaco Canyon National Monument," was completed and draft comments submitted. The final report is scheduled for completion by December 1979.
 - 2) Observation well named Aggravation No. 1, located to the south of the monument was perforated on August 4. Pressure monitoring recorders have been delivered to the monument.
- The observation well was perforated from 3957 to 3987 feet below ground level. The purpose of the monitoring program is to determine the effects of nearby energy related activities on the West water Canyon member of the Morrison Formation. The results, in raw and uninterpreted form, will be made available to all upon written request to the Regional Office.

3) Tritium analysis for selected wells including "Fields Well" at the monument has been completed by the University of California at San Diego. Additional tritium and Carbon 14 analysis is being discussed with the same University. We anticipate that this study will be initiated in August with a report submitted by December 1979.

4) Geohydrological report has been contracted with Dr. Zane Spiegel of Santa Fe. This report is overdue and we are following up on it.

5) Temperature-Depth profile data was collected by Dr. Marshall Reiter of New Mexico Bureau of Mines and Mineral Resources on May 17, 1979. Results of the survey with interpretation is expected this fall.

6) To date, the National Park Service has protested four industrial applications for water rights within the San Juan Basin. This course of action is expected to continue.

7) Surface water monitoring, chemical and sediment analysis program is being discussed with the U. S. Geological Survey and is in progress of being implemented.

At Chaco Canyon two declarations of Owner of Underground Water Rights have been accepted for filing by the State of New Mexico on May 18, 1977 and have been assigned Declaration Nos. SJ-324 and SJ-325. The above declarations are for 100 and 20 acre feet of water per annum respectively for municipal purposes with a priority date of March 11, 1907. The usual disclaimer clauses are included.

Additional work to be done includes:

- 1) Water Resources Management Plan
- 2) Quantification of Reserved Water Rights
- 3) Water Rights Study for Court and/or Administrative Hearings

Hubbell Trading Post

The State of Arizona has passed an Act requiring registration of water rights with the appropriate State Office. Legal inquiry suggests that the U. S. rights to the Ganado Irrigation System at this Trading Post fits into the State's definition of requiring them to be registered.

Recent telephone conversations with the Field Solicitor in Phoenix recommend that the NPS not file with the State as it is untimely and will in all probability not serve any useful purpose, as any conflicts over water will be with the Navajo Nation where the Secretary of Interior will make a decision and not the State.

Additional work to be done includes:

- 1) Water Resources Management Plan
- 2) Quantification of Reserved Water Rights
- 3) Water Resources/Water Rights Study

Sunset Crater and Wupatki

A replacement well is being drilled at Sunset Crater. Hydrologist Paul Christensen, a graduate cooperative student from NAU is inspecting the project. The well is being drilled by Perry Brothers Well Drilling Company. The project is experiencing great difficulty thus far. We expect this project to be completed before the end of August.

In addition to the above, Mr. Christensen has elected to make a detailed geology map of both areas as partial fulfillment of his thesis for a Master's Degree.

The following work is also being planned:

- 1) Water Resources Management Plan
- 2) Quantification of Reserved Water Rights
- 3) Water Resources/Water Rights Study

A survey is being made of the Cameron Uranium field north of Wupatki to determine the possible geohydrological effects on Wupatki if uranium mining is reactivated.

Navajo National Monument

Enclosed is a report prepared by the U. S. Geological Survey titled "Ground Water in the Navajo Sandstone in the Black Mesa Area, Arizona." In addition discussions have been held with representatives of Peabody Coal Mining Operations and with U. S. Geological Survey. Admittedly, the Company and U. S. G. S. are quiet on the entire subject on how the mining activity will affect the monument's water supply. This Office, however, has made a study based on published or soon to be published data and is in process of interpreting the information. This report will be completed by the end of August. U. S. G. S. puts out limited number of copies of observation well data in the mining area. Peabody Coal Mining Company has been extremely cooperative and interested in determining if their operation will affect existing water table conditions in the Region.

Additional work programmed is:

- 1) Water Resources Management Plan
- 2) Quantification of Reserved Water Rights
- 3) Water Resources/Water Rights Study

Canyon de Chelly

All water rights for this monument must be claimed as Indian Water Rights, as such, it is mandatory that the U. S. apply the Indian formula to any claims for water. This Office with your assistance will contact the Navajo Nation to file the monument's claim for Indian water under the reservation doctrine.

In addition the following is planned:

- 1) Water Resources Management Plan
- 2) Water Resources/Water Rights Study
- 3) Quantification of Reserved (Indian) Water Rights

This information is supplied for your information. Should you have any questions, please contact Garland Moore of this office.

(Sgd.) Leslie P. Arnberger

CONSTRUCTION NARRATIVE

Water and Sewer System - Wupatki National Monument

Contract 14-10-111-438. Perry Brothers Drilling Company, Flagstaff, Arizona. Contract awarded September 17, 1958. Work started October 3, 1958. Struck water at 801' on October 23rd in Coconino Sandstone. Depth extended to 904'. Casing installed, 10 inch, between November 14th and 21st. Static water level 780'. Desired yield pump test at 50 gallons per minute for 24 hours showed maximum draw down of 45'. Reaming and grouting completed on December 16th. Job accepted December 19, 1958.

Contract 14-10-111-479. Arizona Mining Supply Corporation, Prescott, Arizona. Contract awarded February 20, 1959. Work started on March 23rd, 1959 and was completed on June 18, 1959. Work included installation of a 55,000 gallon steel reservoir and pumping system, 1370 lin. ft. of 6" asbestos cement pipe supply and distribution lines, service connections to three buildings and fire protection lines and facilities. The Sewer System included a metal septic tank approximately 5' x 21' and disposal field, 1112' of 6" and 8" vitrified clay pipe distribution lines and 4 manholes to serve present and future facilities. Trouble was experienced with the submersible pump on water pumping system on June 21st and this trouble was not overcome until November 23, 1959. Since that time this system has functioned in a satisfactory manner.

Memorandum

To: Director

From: Assistant Regional Director, Operations

Subject: Transmittal of material for Docket No. 3, Wupatki

We are enclosing for insertion in your copy of the subject docket the Drawdown Recovery Curve and Completion Report of the Construction Project pertaining to the Headquarters Well and Water System at Wupatki.

By copies of this memorandum we are sending these to Chief, WODC and Superintendent, Wupatki for insertion in their docket.

Memorandum

To: Regional Director, Southwest Region

From: Chief, Branch of Water Resources

Subject: Dockets numbered 3 and 4, Wupatki

We are in receipt of a docket labeled Docket No. 4 for the subject area. The folders intended for the Superintendent and WDC were inadvertently included and are forwarded by copy of this memorandum to them.

A review of past correspondence seems to indicate that no Docket No. 3 was distributed, though Mr. Dunn's last memorandum on the subject left it to field personnel to decide whether headquarter's wall data should be so docketed or added as a partitioned section of Docket No. 1. We have no record of having received a folder for a Docket No. 3. If one exists of it we would like to receive a complete copy and to assure that ours and field copies agree we would also appreciate a copy of the table of contents of Docket No. 1 as it now exists.

Memorandum

To: Regional Director, Region Three
From: Chief, Water Resources Section
Subject: Well Log, Pump Test, and Docket Assemblies, Wupatki

From the information with your memorandum of November 13, 1959, I favor one Docket No. 1, Headquarters Water System, with Part I for Wupatki Spring, and Part II for the new well; and Docket 2, Heiser Spring Water System. However, there are also potential future developments which might make it desirable to keep the records of Wupatki Spring in its individual Docket 1, and set up Docket 3, Headquarters Water System, as a new one. You and the Superintendent should agree on the procedure you prefer, for local administrative purposes.

There is no question about Docket 2, and the need for establishing rights by filing an application as soon as all data can be supplied. The claim should be to the maximum past spring flow, or portion which has or probably will be used, rather than to the flow now found. The flow may increase again by the time proof of use is required, and we should establish rights to that amount if needed. Of course, the domestic use should be limited to firm flow, which may be that now found, and the rest of the right should be for water for Indian stock and wildlife when available. This right will only have priority of date application is filed under State law, but may have successorship priority of earlier use under claim in Arizona vs. California.

Docket 1, or 3, Headquarters Water System, should be the record of right to use water for the designated purposes under priority of first withdrawal and reservation of the Monument area, as that right may be defined in Arizona vs. California. Filing the records and rights to Wupatki Spring in that docket, will make the history of the water use more complete. No application is now needed for the well use, but the reports on well drilling, pump test, pump installation and capacity, and pipeline and reservoir construction, with map and dates, should be filed.

Whether filed as independent Docket 1 or part of Docket for Headquarters Water System, an application should be filed to establish priority under State surface water rights, claiming maximum past flow or use, whichever is less. However, the first complication in filing a claim for Headquarters domestic use is that no proof for license can be made unless the standby pump and pipeline connection is restored and maintained. It may be preferable to include only the map of the old system and a historical statement of past use in Part I of the Docket 3 for Headquarters Water System.

If Docket 1 is to cover only the spring, the application to be filed with the State and in Docket 1, could claim only future use by wildlife and Indian stock, through some simple stock watering facilities to be provided at the spring. The application should be filed as soon as possible to establish the date of State priority, and should indicate the date of first development for past domestic use even though the State will not grant the retroactive priority.

The applications for the two springs should include the statement that nothing in the application constitutes waiver of other rights the U.S. may have to the same water.

Memorandum

To: Regional Director, Region Three

From: Chief, Water Resources Section

Subject: Well Log, Pump Test, etc., Wupatki Headquarters Water System, Docket 1, Wupatki

Reference is to your memorandum of November 13, 1959, and related data subsequently received. Since Docket 1, Part II, presently refers to a proposed standby, we suggest altering the tab to read "Part II - Spring Source" and adding a Part III for the "new well source". This should contain (a) map of water system (with pipe layout and tie to well); (b) log of well; (c) pump data; (d) record of pump tests; and (e) completion report which you sent us on June 3.

We are missing parts a and c and would appreciate being supplied. The closing paragraphs of my memorandum of January 14 relate to the importance of a filing for the surface rights for Part II even though it is only for standby purposes.

Please supply us with the new Part III tab and the missing data as time permits.

NOV 13 1959

Memorandum

To: Director
From: Regional Director
Subject: Well log, Pump Test, Wupatki National Monument

This refers to your memorandum of October 19, 1959 concerning the above subject.

Regional Chief of Lands Hall and Civil Engineer Fields visited Wupatki on October 26 and checked Wupatki Springs and Heiser Springs. At that time they found the pump at Wupatki Springs had been removed and the spring was not flowing.

Present plans do not show the incorporation of the Wupatki Springs system into the overall Monument supply with the well. However, there is attached a letter from Superintendent Mahan which requests that the Spring system be kept as a standby system.

In our opinion there is no need for a Docket No. 3 and we concur in the proposal by Mr. Dunn in his memorandum of October 19 that Docket No. 1 could be divided into Part I - Wupatki Springs Supply and Part II - Well Supply.

As soon as we are advised how Mr. Dunn wishes to divide the material, we will make the necessary adjustment.

Memorandum

To: Regional Director, Region Three
From: Chief, Water Resources Section
Subject: Well Log, Pump Test, Wupatki National Monument

We are temporarily filing our copies of the well log and pump test in our correspondence files. If the well is tied into the existing spring system, with the spring system being used as a standby water supply, we should divide Docket 1 into Part I-Wupatki Spring Supply and Part II, Well Supply. However, if the well supply is to be a system apart from the spring system, we should assemble records as a Docket 3. Please advise, so that we can make the proper assembly of records.

Memorandum

To: Regional Director
From: Superintendent, Wupatki - Sunset Crater
Subject: Log of Well, Pump Tests, Wupatki

Reference is made to Mr. Dunn's memorandum of July 10th
and Mr. Canfield's of July 22nd to WODC regarding the above subject.

Copy of report of chemical analysis of water from the
Wupatki well was sent you with our memorandum of November 7, 1958,
D-5039. Regarding log and pump test reports, these came in while
this Superintendent was on annual leave but should have been sent
to your office with the final payment voucher, see our memorandum
of December 2, 1958, D-5015. If you did not receive them they must
have gone to WODC in error.

We can loan you our file copy for duplicating if WODC
cannot produce.

Memorandum *with Attachment*

To: Acting Regional Chief of Operations
From: Regional Chief of Lands
Subject: Location of Well and Water System Including Wupatki Spring System, Docket No. 1, Wupatki

Before Regional Engineer Wohlbrandt went on annual leave, he advised that Engineers McCabe and Johnston might be available for assistance and field surveying before June 30, if needed.

At Wupatki National Monument we have a new well which should be tied to a section corner in order to show or calculate the relationship of the well, the 55,000 gallon storage tank and the distribution lines. Much of this information is shown on Sheet 4 of 5, Drawing NM-WUP-3103. However, this sheet does not show the location of the new well and its relationship to existing buildings and a section corner.

If Messrs. McCabe and Johnston can be made available, they should obtain the following information:

1. Tie from the center of the well by bearing and distance to a Bureau of Land Management section corner or quarter corner.
2. Bearings and distances connecting the water well, storage tank, and new lines as constructed. They should also make ties to the existing buildings in order that they may be plotted in relation to the new water system.
3. If time permits they should also recheck the distribution system and ties to Wupatki Spring or present source of water at the headquarters area. Engineer George Johnston made this original survey in January 1954 but additional information should be

obtained if time permits. This information, with course, bearings and ties as established by Mr. Johnston in 1954, is shown on the attached unnumbered drawing. This drawing shows the Wupatki Spring layout which has been the only water system for the headquarters area prior to drilling of the "new well".

It is requested that enough information be obtained, if possible, to tie both systems together showing course, bearing and distance. We should also have information regarding the pump, size, name, type, serial number, etc. of the existing "old" Wupatki system.

Memorandum

To: Acting Chief of Operations
From: Superintendent, Wupatki - Sunset Crater
Subject: Pump Capacities as Measure of Water Right and Part of Water System Design Record.

The following is information requested in your memorandum of March 3rd regarding pumping equipment being installed in the new well at Wupatki Headquarters.

Submersible Pump:

1. Manufacturer - Pacific Pumping Company
2. Type of Pump - Submersible Electric, Model DD42-252
3. Intake pipe diameter - none
4. Outlet pipe diameter - 1-1/4 inches
5. Power Unit Rating - Franklin Electric Co. Motor: 2 H.P., 230 volts, 11 amps., single phase, 60 cycle, Model G1043 VB3 (SF120-ES)
6. Serial Number - Motor - WK1466. Pump - 1 R15560
7. Installed head in feet - From pump suction to floor of pump house - 854 ft. Floor of pump house to storage tank - 200 ft.
8. Rating of pump in gallons per minute under existing head - 5 gallons.

Centrifugal Pump:

1. Manufacturer - Pacific Pumping Company
2. Type of pump - Centrifugal, Model R4SBF
3. Intake pipe diameter - 1-1/4 in.
4. Outlet pipe diameter - 1-1/4 in.
5. Power Unit Rating - GE Capacitor Motor Model 5XC 184 AG201A, 1-1/2 H.P., 1715 r.p.m., 115 - 230 volt, Amp. 18.4/9.2, type EC, 60 cycle.
6. Serial Number - Motor - none; pump - 1 DR15561
7. Installed head in feet - Booster pump to push water approximately 200 ft. in elevation to storage tank.
8. Rating of pump in gallons per minute under existing head - 5 gallons.

The contractor is installing the submersible today and should be able to make tests the first part of next week.

Russell L. Mahan
Superintendent

Memorandum

To: Stan Ponce
From: Walter Rusinek
Subject: Water rights status at Wupatki and Sunset Crater
National Monuments

Sunset Crater National Monument

In 1985, we filed claims for water rights in SUCR as part of the general adjudication of the Little Colorado River system in Arizona. The case is currently before the Apache County Superior Court. The claims filed were:

- 1.) Reserved rights -- non-quantifiable claim for non-consumptive use of all water within the Monument above reserved consumptive claims. Use is any water use necessary to fulfill the purposes of the Monument, and to provide for fire protection, watershed protection or reclamation, road construction and other administrative needs. Claim includes instream flows.
- 2.) Reserved rights -- present and future consumptive use of 20 AFY from unnamed surface and groundwater sources for administrative and other Park purposes.
- 3.) State appropriative rights:
 - a.) Headquarters Well #1 -- 65 AFY, priority March 7, 1965 for municipal and emergency uses.
 - b.) Headquarters Well #2 -- 65 AFY, priority December 1, 1979 for municipal uses.

Well #2 replaces well #1 which remains to provide an emergency back-up water system. Well #2 is registered under Arizona law, #649813, filed June 14, 1982.
 - c.) Black Falls Trading Post Well -- 90 gpm, priority June 12, 1963 for municipal and recreational, fish and wildlife uses.

Wupatki National Monument

A claim was also filed for WUPA water rights in the Little Colorado River adjudication. These claims include:

- 1.) Reserved rights -- non-quantifiable claim for all non-consumptive use of water within the Monument above reserved consumptive claims. Use is any use necessary to fulfill the purposes of the Monument, and to provide for fire protection, watershed reclamation or protection, road construction or other administrative needs. Claim includes instream flow.
- 2.) Reserved rights -- present and future consumptive use of 17 AFY from Citadel Ruin well, headquarters well, Wupatki Springs and other surface and groundwater sources for administrative and other Park purposes.
- 3.) State appropriative rights:
 - a.) Heiser Spring -- 2.5 AFY, priority August 23, 1942 for irrigation, stock watering, fish and wildlife, recreation and municipal uses.
 - b.) Peshlaki (Cottonwood) Spring -- 0.5 AFY, priority December 31, 1983 for recreation, fish and wildlife, and municipal uses.
- 4.) The docket contains draft copies of applications to appropriate water in Arizona for both Heiser and Wupatki springs dated March 7, 1955. It does not appear the applications were ever filed.
- 5.) Citadel Ruin Well and Headquarters Well both are registered under Arizona law, filing date June 14, 1982. Citadel Ruin well is # 649814, maximum capacity 17.6 gpm; Headquarters Well is # 649816, maximum capacity 16 gpm.

JUN 14 1982

Mr. Wesley E. Steiner, Director
State of Arizona
Department of Water Resources
99 East Virginia Avenue
Phoenix, Arizona 85004

Dear Mr. Steiner:

Enclosed are the completed forms to register all production and observation wells administered by the Southwest Region of the National Park Service located in Santa Fe, New Mexico, as required by Arizona Groundwater Management Act (1980), A.R.S. 45-493.

The following production and observation wells are to be registered:

Hubbell Trading Post - one production well
Wupatki National Monument - one production well and one observation well
Sunset Crater National Monument - one production well and one observation well

The following wells are also reported as a matter of comity:

Canyon de Chelly National Monument - 1 well
Navajo National Monument - 2 wells

Should you have any questions with regards to this matter, or if we can be of further assistance, please contact Garland Moore of this office at (505) 988-6368.

Sincerely yours,

/s/ Robert L. Kerr

From: Hydraulic Engineer, Water Resources, SWRO
Subject: Well Schedule and Test Pumping Data, Headquarters Well

Enclosed is subject for inclusion in Water Right Docket #1, Wupatki. Preliminary estimates place the maximum yield of the well at about 70 gpm. Additional analysis will be made as time allows.

Memorandum

To: Regional Director, Region Three
From: Chief, Water Resources Section
Subject: Water Development and Water Rights, Wupatki

I have just learned that Perry Brothers Drilling Company, Flagstaff, was awarded a contract to start well drilling at Wupatki within 15 days at bid price of \$13,153. Assuming that the Company is licensed it will have to comply with state water laws which are given in your copy of Arizona Administrative Procedure Act, Title 25, Land Department, 1953, beginning at page 178. We should have four copies of all filings with the State Land Department, and particularly the log and record of pump test, for a water right docket.

My tentative calculations, which provide for no irrigation, indicate that maximum August pumping to supply about 6,340 gpd in 1956 would have been about 13 gpm if all water were pumped in 8-hour work day. I also estimate that with about 100,000 annual visitors sometime between 1966 and 1975, the peak day water demand will be about 22,360 gallons, which could be pumped at 47 gpm during 8 hours.

Rule 2, page 178, specifies filing of notice of intention to drill if there is an intent to pump at more than 100 gpm. Apparently there is no need for filing the notice unless there is planned irrigation to at least double the demand, even if negligible storage is to be provided. However, we should have the statement as to the pumping rates, annual and daily water demands, and the basis of the design as WDC is planning them.

This leaves the unresolved question as to what use is to be made of the waters of the two springs. The answer may depend on the results of the well drilling, but an answer should be supplied so that we may proceed with water right applications, of which drafts are in the various assemblies of Dockets 1 and 2. Heiser Spring, at least, is approximately a mile from the Superintendent's present residence and the presumed wellsite and is used by the Indians and their goats as well as temporarily serving a CCC building which has been used as an employee's residence, and by visitors. Our records show the following available supplies:

<u>Source</u>	<u>Daily Flow</u>	<u>Average Flow</u>	<u>Annual Flow</u>
Heiser Spring	600-3,000 gpd	1,100 gpd	401,500 gals.
Wupatki Spring	150-1,500 gpd	600 gpd	219,000 gals.
Total		1,700 gpd	620,500 gals.

Since presenting our testimony in Arizona vs. California, it has become important that we file applications for the appropriation of all claimed water as rapidly as possible, where filings are needed, and to have the data available for groundwater appropriation if the water laws are amended to require it. Applications for the appropriation of Heiser and Wupatki Springs should have been made before this. In fact, it would have been easier to make proof and obtain licenses before the supplemental supply becomes available.

Whether the plans for the new water system call for pumping in excess of 100 gpm or not, we should obtain the log and pump test records, and other data for which provision is made on the Record of Well form, with which you have been provided. The driller's reports to the state will be better if they are made and cover the same data.

Memorandum

To: Acting Regional Chief of Operations
From: Regional Chief of Lands
Subject: Location of Well and Water System Including Wupatki Spring System, Docket No. 1, Wupatki

Before Regional Engineer Wohlbrandt went on annual leave, he advised that Engineers McCabe and Johnston might be available for assistance and field surveying before June 30, if needed.

At Wupatki National Monument we have a new well which should be tied to a section corner in order to show or calculate the relationship of the well, the 55,000 gallon storage tank and the distribution lines. Much of this information is shown on Sheet 4 of 5, Drawing NM-WUP-3103. However, this sheet does not show the location of the new well and its relationship to existing buildings and a section corner.

If Messrs. McCabe and Johnston can be made available, they should obtain the following information:

1. Tie from the center of the well by bearing and distance to a Bureau of Land Management section corner or quarter corner.
2. Bearings and distances connecting the water well, storage tank, and new lines as constructed. They should also make ties to the existing buildings in order that they may be plotted in relation to the new water system.
3. If time permits they should also recheck the distribution system and ties to Wupatki Spring or present source of water at the headquarters area. Engineer George Johnston made this original survey in January 1954 but additional information should be

obtained if time permits. This information, with course, bearings and ties as established by Mr. Johnston in 1954, is shown on the attached unnumbered drawing. This drawing shows the Wupatki Spring layout which has been the only water system for the headquarters area prior to drilling of the "new well".

It is requested that enough information be obtained, if possible, to tie both systems together showing course, bearing and distance. We should also have information regarding the pump, size, name, type, serial number, etc. of the existing "old" Wupatki system.
