History

In order to address the need to provide baseline inventories of the biological and geophysical resources for all natural resource parks through the Inventory and Monitoring (IandM) Program, the park service entered a multi-year partnership with the United States Geological Survey's (USGS) Biological Resources Division (BRD) to map the vegetation resources of 235 national parks, monuments, and historic sites.

Goals of the USGS-NPS Vegetation Mapping Program include the following:

- Provide support for NPS Resources Management
- Promote vegetation-related research for both NPS and USGS/BRD
- Provide support for NPS Planning and Compliance
- Add to the information base for NPS Interpretation
- Assist in NPS Operations
