

Sequoia and Kings Canyon National Parks California

Park Atlas Project Basics

The Sequoia and Kings Canyon Park Atlas is configured in GeoCortex Essentials Manager with services hosted through ArcGIS Online. The end-user product can be viewed here: <http://imgis.nps.gov/html/seki>

Materials

All materials and products associated with Park Atlas are located on the J drive:

[J:\\seki\\park_programs\\Data\\cartography\\Projects\\ParkAtlas](J:\\seki\\park_programs\\Data\\cartography\\Projects\\ParkAtlas)

Documents: Source files for presentation materials, user guides, and other help documents.

Original: Materials used to inform unique datasets (shuttle maps, overlook maps); and informational materials.

Products: Master MXD's used to publish services, final copies of support documents, and data layer report.

ArcGIS Online

Services are published publicly through NPS AGOL: <http://nps.maps.arcgis.com/home/index.html>

Feature services are broken into four groups. They are hosted by SEKI GIS staff and located here:
