

Product Label and MSDS/SDS Resources

Pesticide Label Databases:

[Pesticide Product Label System \(PPLS\)](#) - Environmental Protection Agency (EPA) - Search for pesticide product labels by Product Name, Company Name, or EPA Registration Number.

[NPIRS Pesticide Products Information System \(PPIS\)](#) - Purdue University - The National Pesticide Information Retrieval System (NPIRS) uses data from U.S. EPA's Pesticide Product Information System (PPIS) to retrieve information on EPA-registered and cancelled pesticide products, chemical ingredients, and firms/registrants. Search for federally active pesticide products using one of the following methods: EPA Registration Number, Product Name, Company Name or Active Ingredient.

[Crop Data Management Systems Inc. \(CDMS\)](#) - CDMS's Label Database contains product labels and material data safety sheets for over 60 different manufacturers. The database is searchable by both brand name and manufacturer.

[Household Products Database](#) - National Library of Medicine - Information in the Household Products Database links over 15,000 consumer brands from a variety of publicly available sources including brand-specific labels and Material Safety Data Sheets when available from manufacturers and manufacturers' web sites.

[National Pesticide Information Center \(NPIC\)](#) - Oregon State University - NPIC provides science-based information about pesticides and pesticide-related topics to enable people to make informed decisions about pesticides and their use. Search for product information, low-risk products, A.I fact sheets, and for other pesticide databases maintained by NPIC.

[CDPR Databases](#) - California Department of Pesticide Regulation (CDPR) - Search for chemical ingredients, pesticide products, labels and registrant information for pesticide products registered in California.

[PAN Pesticide Database](#) - Pesticide Action Network North America - The Pesticide Action Network (PAN) Pesticide Database is a great resource for toxicity and regulatory information for pesticides. Note: this resource does not offer downloadable product labels for all products but offers links to sites that do.
