

Brent,
At the Kingman marsh restoration meeting in February you had asked me if I had any sightings outside the seasons from your checklist for Anacostia Park and Kenilworth Aquatic Gardens. I know you are leaving and might not have time for this but if you don't then you can pass this on to whoever may fill your vacancy. Some sightings are for Kingman (Langston Golf Course) so I don't know if you want to include that or not. My seasons correspond with your seasons by months. Most sightings are only a few times (uncommon or rare). Let me know if you need specific dates or number of occurrences.

- ✓ Snowy Egret - Fall 2001- KAG 9/7/01, 9/12/01 KAG
- ✓ Tricolored Heron - not on your list - sighted at KAG Spring 2001 5/18/01 KAG

Today's pigs may be fed on their own excrement. Feedlot cattle are fed sawdust, newspapers, poultry litter, and industrial sewage. According to the USDA, cement dust may become a feed additive in the future because it produces 30% faster weight gain than regular feed. Yummm!!!
