

Visitor Center Parking Area Traffic Counts 2013

Visitor Center Gazebo and Island Explorer Bus

Charles Jacobi, Natural Resource Specialist
December 2013
ANP Natural Resource Report 2012 - 11

Executive Summary

Peak entry time and peak occupancy for the parking lot vary slightly (10:00am vs. midday), suggesting that some cars are staying longer because visitors are exploring the park via the Island Explorer bus and biking and walking on the carriage roads. Nonetheless, the parking lot never filled. The data suggest that on a typical summer day in July and August there are 30 – 60 spaces available for cars at any given time. It is of course possible that our sampling of only eight days did not capture the true peak use and availability of parking spaces for cars. There are about two to three peak days of overall park visitation in July around the July 4 holiday and about seven in August. On these days, parking spaces at the Visitor Center may be the most limited, and may fill completely.

INTRODUCTION

The objective of this small scale project in the summer of 2013 was to determine the available capacity of the Visitor Center parking area on the busiest days of the summer season to help guide the operation of the Island Explorer bus. More specifically, park managers wanted to know if the parking lot could be used as a staging area for more vehicles (and how many more) if the Jordan Pond bus route were changed and visitors were encouraged to park there for that bus route. The data would provide more general information about parking lot use as well. The Visitor Center parking lot is used for access to the Visitor Center, but also for carriage road access and Island Explorer bus access.

METHODS

We used two methods to understand Visitor Center parking. The first was a series of parking lot occupancy counts by an observer on eight days in August from either 12:00pm – 3:00pm (August 4, 5, 6) or 10:00am – 1:00pm (August 11, 12, 22, 23, 24). Counts were made every 30 minutes and only on days with very good weather.

The second was the resurrection of the Intelligent Transportation System (ITS) traffic counter at the site. The system has not worked the way it was intended but the traffic counter at the site could be used with data downloaded manually. There are some problems with the counter because of the orientation of the loop detectors in the pavement. Traffic does not always maintain lane discipline and oversize vehicles confound the counts at times. Nonetheless, the accuracy was sufficient for the purposes of this study. The traffic counter data does not tell us anything about lot occupancy, but does tell us about the volume of traffic entering the lot by time of day. Coupled with the occupancy data we can get a reasonable idea of how the lot is used.

RESULTS

The capacity of the Visitor Center parking lot is 265 cars and 11 large RVs or buses, and there are two spots for the Island Explorer bus to drop off and pick up passengers. Results were as follows:

- The lot never filled during our counts.
- The most cars counted was 231 on August 12 at noon, for an occupancy rate of 87% with 34 spaces available.
- The most RVs/buses counted was 9, for an occupancy rate of 82% with two spaces available. The observer noted that often cars park in the oversize spaces because it is closer to the Visitor Center.
- The most total vehicles counted (cars and RVs/buses) was 234, again on August 12 at noon, for an occupancy rate of 85%.
- The time of peak occupancy appears to be from about 11:30 am to 12:30 pm based on the two different times our counts started. On a busy day, these three counts (11:30 am,

12:00 pm, and 12:30 pm) are usually above 200 vehicles, or about a 75% occupancy rate, with 65 or fewer spaces available for cars.

- August 6 was the busiest day on which we counted (12:00 pm – 3:00 pm). Every count was above or just barely below 200 cars. This tells us that the 75% occupancy can be extended well past 12:30 pm. One other count showed 75% occupancy as early as 11:00 am.

Traffic counter data show a slightly different pattern that is likely the result of the average length of stay at the Visitor Center (30 minutes or less per Supervisor Betty Lyle), and perhaps visitors taking the Island Explorer bus to various destinations and walking and biking on the nearby carriage roads as well.

- The busiest entry hour is strongly consistent in July and August—it's 10:00 am to 11:00 am.
- On 11 days, vehicle entries were well over 300 per hour (July 5, 24, 30; August 5, 6, 10, 11, 12, 19, 20) from 10:00 am to 11:00 am, with a peak at 354 on July 5. Capacity is 265 cars, so this is where the short average length of stay seems to result in available spaces in spite of the heavy traffic volume entering the lot.
- Vehicle entries on busy days were consistently greater than 200 per hour for 1 – 3 hours after 10:00 am in August.
- Visitor Center supervisor Betty Lyle confirms that when the Center opens at 8:00 am, their busiest time inside is from 10:00 am – 11:00 am.

SUMMARY

Peak entry time and peak occupancy for the parking lot vary slightly (10:00am vs. midday), suggesting that some cars are staying longer because visitors are exploring the park via the Island Explorer bus and biking and walking on the carriage roads. Nonetheless, the parking lot never filled. The data suggest that on a typical summer day in July and August there are 30 – 60 spaces available for cars at any given time. It is of course possible that our sampling of only eight days did not capture the true peak use and availability of parking spaces for cars. There are about two to three peak days of overall park visitation in July around the July 4 holiday and about seven in August. On these days, parking spaces at the Visitor Center may be the most limited, and may fill completely.

APPENDIX 1: VISITOR TRAFFIC COUNTER DATA 6/11 – 9/21, 2013

Ch. 1 and Ch. 2 are entry lane loop, Ch. 3 and Ch. 4 are exit lane loops. As a pair they should match up fairly close except when lane discipline and oversize vehicles confound the data.

Percentages refer to each day's traffic.
