

(Field Note)

Eureka File

CDFG

Tributary to:

Prarie Creek. Humboldt County

T. 11N. R. 1E. NW $\frac{1}{4}$ S 14.

Date of Survey:

5-10-77

Purpose of Survey:

Survey aquatic life in proposed timber harvest area

Location:

B.E. corner, section 18, where road crosses creek to
a point $\frac{1}{4}$ mile upstream.

Method of Survey:

Visual observation while hiking.

Equipment Used:

Surveyors :

Steve Dinardi

Observations:

The section of stream surveyed was in an area of dense
alder growth along with 2nd growth redwood trees. The
stream width was an average of 18", with an average depth
of 5-6". Log jams also create good cover for any resident
fish which my be present. The area appears to be
adequate for resident cutthroat trout, although no fish
were observed due to slightly murky conditions cause&—
by recent precipitation.
