Redwood National Park
South Operation Center
P.O. Box 7
Orick, CA 95555

Hi Baker,

Here's a list of what we found at the three sites that we visited within the park last week.

Site R-6U, Redwood creek at Tall Trees, UTM N 4562567 E 415354

Rana boylei - 16 adults, 27 subadults, 6000 larvae, 41 egg masses
Rana aurora - 202 larvae
Hyla regilla - 20 larvae
Bufo boreas - 2 subadults

Site R-7A, Redwood Creek oxbow at the visitor's center, UTM N 4571152 E 409056

Rana aurora - 1 subadult, 142 larvae
Bufo boreas - 3 adults, 875 larvae
Hyla regilla - 2 adults, 55 larvae

Site R-13A, Unmapped ponds N of Skunk Cabbage Rd., UTM N 4573419 E 412416

Hyla regilla - 160 subadults, 766 larvae
Rana aurora - 6 adults, 1 subadult, 480 larvae
Ambystoma gracile - 17 larvae
Taricha granulosa - 8 larvae

The two ponds at this site are seasonal and will probably dry up over the next few months.

It was good to meet you and I'm glad that you could come out with us on Redwood creek. If you have any questions about these surveys don't hesitate to contact me.

Sincerely,

Patrick Kleeman
