Memorandum

To: Superintendent, Craters of the Moon National Monument

From: Acting Associate Regional Director, Professional Support,
Pacific Northwest Region

Subject: Archeological investigations at Craters of the Moon

During my recent visit to the monument I inspected a number of archeological sites in the vicinity of Grassy Cone in order to evaluate the proposal for investigations which you submitted last summer. Assuming the sites I visited are typical of the area, further investigations would not appear to be necessary. The material is very thinly scattered and appears to be all on the surface, and it appears unlikely that excavation or intensive surface collection would contribute much.

If information for use in interpretive talks or other media is needed, I would be happy to check the existing literature or direct you to the best sources.
