Standard Operating Procedure 18: Reporting

The Wetland Monitoring Protocol for Cuyahoga Valley National Park will result in the production of two reports every five years:

1. Wetland condition assessments across Cuyahoga Valley National Park.
2. Evaluation of Important Wetlands at Cuyahoga Valley National Park.

Initial reports will focus on baseline condition and trends will be evaluated in future reports. Reports will follow the standard format required in the CSE Style Manual (2014). The natural resource report template for NPS documents is also required, available at:

<http://www.nature.nps.gov/publications/NRPM/index.cfm> (accessed 8 Mar 2016).
