ACKNOWLEDGEMENT

This material is based upon work assisted by a grant from the Department of the Interior, National Park Service. Any opinions, findings, and conclusions or recommendations expressed in this material are those of the author(s) and do not necessarily reflect the views of the Department of the Interior.

I. INTRODUCTION

Project PRISM (*Preserve Richmond to Interpret & Support Memories*) was an initiative sponsored by the City of Richmond Planning Division to expand knowledge of the historical and physical development of three of the city's oldest neighborhoods, as well as encourage heritage tourism by identifying additional resources that could be incorporated into the Rosie the Riveter/World War II Home Front National Historical Park. The project was funded in part by a Preserve America grant provided by the National Park Service, and additional support was provided by the Richmond Community Redevelopment Agency.

The core of Project PRISM encompassed the development of a historic context statement and reconnaissance-level survey of the Iron Triangle, Santa Fe and Coronado neighborhoods. As stated in the Project PRISM request for proposals:

The goal of the project is two-fold; first, to compile a history of the physical development of each neighborhood and second, to organize and begin the process of identifying historic resources and/or properties located within the study area to pursue designation on the Richmond, California, and National Registers of Historic Places.

This report discusses the fieldwork, documentation and findings of the Project PRISM Historic Resources Survey. It has been produced separately from the *Project PRISM Historic Context Statement*, which organizes the history and development of the Project PRISM survey area into a framework that facilitates identification and evaluation of historic properties. Together, these two documents provide complimentary information designed to help inform decision makers and stakeholders about existing and potential historic resources located within the boundaries of the Project PRISM area.

A. Survey Area

The Project PRISM survey area is located in the western portion of the City of Richmond and encompasses several of the oldest developed neighborhoods within the city. The precise survey boundaries are irregular, but the overall area is roughly triangular in shape and bounded by the Southern Pacific railroad tracks on the east, the Richmond Parkway and Burlington Northern Santa Fe Railroad tracks on the west, and I-580 West on the south (*see map on following page*). A small portion of the survey area also extends beyond the interstate to Wright Avenue, which forms the southernmost boundary. The survey boundaries were determined by the Richmond Planning Department in consultation with the Iron Triangle, Santa Fe and Coronado neighborhood councils.

Project PRISM Survey Richmond, CA

 PRISM Survey Area

0 305 610 1,220 1,830 2,440 Feet

The survey area is largely residential in character, consisting primarily of single-family homes, with some duplexes and medium-scale apartment buildings scattered throughout. Importantly, the area also includes the remnants of Richmond's historic downtown, with Macdonald Avenue serving as the primary east-west commercial corridor. Light and medium-scale industrial facilities are also distributed throughout the Project PRISM survey area, with notable concentrations along Ohio Avenue and south of Cutting Boulevard. The terrain in the area is generally flat, and vegetation consists primarily of sidewalk plantings, private gardens and landscaping in public parks.

B. Summary of Findings

The Project PRISM survey area encompasses a tremendous variety of built resources, including representative examples of nearly every architectural style and building type constructed in the City of Richmond. The majority of the survey area is represented by early 20th century architectural styles, with approximately 1,240 buildings constructed prior to 1940. Surviving representatives of Richmond's World War II boomtown period of 1940 – 1945 include over 530 buildings, most of which are small, single-family houses. As Richmond sought to redefine itself after the war, 410 new buildings, also mostly single-family houses, were constructed within the survey area during the years spanning 1946 – 1958.

Of the 1,350 properties formally documented by Page & Turnbull, Inc. during this survey:

- 6 properties appear to qualify for individual listing in the National Register of Historic Places
- 65 properties appear to qualify for individual listing in the California Register of Historical Resources
- 73 properties appear to qualify for individual listing in the local (City of Richmond) Register

Page & Turnbull also identified two potential historic districts emblematic of the early development of Richmond: a residential historic district centered along Bissell Avenue, and a commercial historic district centered near the axis of Macdonald Avenue and Harbour Way. A discussion and complete list of potential individual historic resources is included in section IV. **POTENTIAL HISTORIC RESOURCES: INDIVIDUAL PROPERTIES**. A discussion and complete list of the potential historic districts is found in section V. **POTENTIAL HISTORIC RESOURCES: HISTORIC DISTRICTS**.

The initial assessments of potential historic resources included in this report should not be construed as final determinations of resource eligibility. Rather, the property assessments serve to identify

potential historic resources for the purposes of informing the Richmond Planning Division. This report does not include completion of California Department of Parks and Recreation DPR 523B (Building, Structure and Object Records), or DPR 523D (District Record) forms. No actual listings on local, state, or national registers are implemented by this report. This report does not preclude further evaluation of surveyed properties on DPR 523 series forms, or listing of surveyed properties on local, state, or national registers.

Further study and evaluation is recommended for the potential historic resources identified in this report. Priority should be given to preparing National Register nomination forms for properties with World War II home front associations, as well as documentation of the potential historic districts. These recommendations are explored at greater length in section VI. **FURTHER STUDY RECOMMENDATIONS.**

II. METHODOLOGY

A. Fieldwork & Photography

The information contained in this report is based on a reconnaissance-level historic resources survey of the Project PRISM area. Principal fieldwork was completed between September 2008 and March 2009 by architectural historians and historians at Page & Turnbull, Inc., all of whom meet the Secretary of the Interior's Standards for Professional Qualifications in Architectural History and/or History. These individuals included Jonathan Lammers (Project Manager), Caitlin Harvey, Cara Bertron, Christina Dikas and Gretchen Hilyard. City of Richmond Planning Division staff member, Lina Velasco, also provided critical assistance in coordinating various aspects of the survey.

The reconnaissance-level property survey included digital photography and an exterior visual inspection of nearly 2,200 buildings constructed prior to 1959 (older than 50 years) within the survey area. In most cases, determination of age-eligibility was based on construction date information provided by the Richmond Planning Division or the Contra Costa County Mapping Information Center. There were, however, certain properties for which no official construction date could be located, or where the date provided by the Planning Division appeared incorrect. In these instances, any property which appeared age-eligible based on visual cues such as style, construction methods or other factors, was photographed. Resources with pre-existing California Historic Resource Status Codes (CHRSC), or those previously examined by other studies produced for the Richmond Planning Division were generally excluded from the field survey.

In total, Page & Turnbull photographed 2,196 buildings (*see map on following page*). All photographs were labeled according to the Assessor's Parcel Number and have been submitted in electronic format to the Richmond Planning Division in conjunction with this report.

B. Production of DPR 523A (Primary Record) Forms

State of California Department of Parks and Recreation (DPR) 523 forms are the official inventory forms used by the State of California's Office of Historic Preservation (OHP) to document historic resources. The minimum documentation required for a resource to be filed with the OHP is a completed DPR 523A (Primary Record) form, which comprises a non-evaluative record of the physical aspects of the resource and a representative photograph.

State of California - The Resources Agency DEPARTMENT OF PARKS AND RECREATION		Primary # _____ HPI # _____ Trinomial _____ CHR Status Code: _____
PRIMARY RECORD

*P3a. Description: (Describe resource and major elements. Include design, materials, condition, alterations, size, setting, and boundaries) 118 11th Street is located on a 37' x 112.5' rectangular lot on the east side of 11th Street between Bluff and Chandler Avenues. Built in 1918, 118 11th Street is a 1-story, wood frame, single-family dwelling designed in the Craftsman style. Rectangular in plan, the building is clad in wood shingle novelty siding and capped by a gable roof. The foundation is not visible. The primary facade faces west and includes 3 structural bays, with a full-width recessed porch featuring a centered keystone. An angled bay window is located along the north facade adjacent to a brick chimney. The primary entrance is a partially-glazed wood door with flat board trim. The entry porch is accessed by a short flight of concrete steps flanked by a brick stoop and metal railings. Typical fenestration consists of double-hung wood-sash windows with flat board trim. The porch windows are crowned with narrow transom windows with geometric division. Architectural features include battered wood columns on brick pilasters at the porch corners, and a bank of wood-sash attic windows with geometric division. The roofline features exposed rafters, knee braces and vertical boards pierced with diamonds at the gable peak. A detached frame garage with hinged wood doors is located at the end of a paved 2-track driveway to the north. The building appears to be in good condition.

DPR 523 A (1/95) *Required Information		

Example of a DPR 523A form produced for the Project PRISM survey.

For the Project PRISM historic survey, DPR 523A forms were produced for a total of 1,350 buildings. This number was pre-determined by the Richmond Planning Division, and included all buildings located with the Project PRISM survey area that met at least one of three conditions:

- DPR 523A forms were completed for all properties that appeared to retain at least a fair degree of historic character. As defined by the National Park Service, historic character “refers to all those visual aspects and physical features that comprise the appearance of every

historic building.”¹ Buildings with extensive alterations, such as the removal/replacement of the original cladding, windows and doors, and original decorative elements, were generally excluded.

- DPR 523A forms were completed for all commercial, industrial, civic, religious and social buildings. This was deemed essential in order to document the widest possible range of property types.
- DPR 523A forms were completed for all building constructed prior to 1910. This was deemed essential in order to document the oldest surviving buildings in the Project PRISM survey area.

The DPR 523A forms were completed using a proprietary GIS-based computer program that linked property information provided by the Richmond Planning Division to a Microsoft Access database. For those properties that appeared age-eligible, but for which no official construction date could be located, Sanborn Fire Insurance Co. maps were used to provide an estimated date of construction.

Ten parcels included more than one age-eligible building that received a DPR 523A form. This necessitated appending the Assessor’s Parcel Number with an underscore and numeral (e.g., 538300004_1) in order to document each building separately. Likewise, in certain cases the building address information provided by the Planning Division did not include a street number. For example, the address for the Richmond Museum of History was listed simply as “Fourth Street.” In those instances, the address assigned for the DPR 523A form was based on the number visible on the building, or the historic address as shown on the most recent Sanborn Fire Insurance map from 1951.

Between December 2008 and June 2009, the completed forms were submitted in batches to the Richmond Planning Division for review. The final forms have been submitted in conjunction with this report in electronic format, and are labeled by the Assessor’s Parcel Number (see **APPENDIX A: DPR 523A FORMS**). A map of all properties receiving DPR 523A forms is included on the following page.

¹ National Park Service, Technical Preservation Services. *Preservation Brief 17: Architectural Character*. (US Department of the Interior. Washington D.C.: 1988.

DPR 523 A Forms Completed

C. Historic Context Statement

Concurrent with the reconnaissance-level survey, Page & Turnbull and its sub-consultant, Donna Graves, produced a Historic Context Statement for the Project PRISM area. This narrative included a history of the area, an examination of its physical development, and a guide to important property types and architectural styles. The *Richmond PRISM Historic Context Statement* is structured chronologically, but also explores themes of culture and ethnicity, which are recognized as essential elements of the area's development.

Each major period of development discussed in the Historic Context Statement is accompanied by a section describing the various property types constructed during that era (e.g., residential, commercial, industrial), as well as representative photos and a map showing the distribution of these properties. This information is based on data provided by the Project PRISM historic resources survey, and is accompanied by registration requirements designed to allow City staff and other interested parties to evaluate potential historic properties located within the survey area.

D. Public Outreach

From the outset, Project PRISM sought the input of neighborhood groups and community members in order to present as complete a portrait of the city's development as possible. All households within the Project PRISM survey area were mailed an informational postcard explaining the project's goals, which stated in part that "the history of Richmond is best told by the people who have lived and worked here." A phone number and email address were provided for interested persons to share stories or photos, and a web page was developed to provide additional information, such as links to upcoming Project PRISM events (www.ci.richmond.ca.us/projectprism). Articles about the project also appeared in local newspapers, as well as the National Park Service's Rosie the Riveter/World War II Home Front National Historical Park quarterly newsletter.

**The Project PRISM postcard mailed to Richmond residents.
(Courtesy of the Richmond Planning Department)**

Representatives from Page & Turnbull and the City of Richmond Planning Division gave presentations about Project PRISM to the Iron Triangle Neighborhood Council on September 25, 2008, and the Santa Fe Neighborhood Council on October 23, 2008. The Iron Triangle Neighborhood Council meeting was also attended by staff from the Planning Division and the Rosie the Riveter/World War II Home Front National Historical Park. Each meeting included a brief PowerPoint slideshow discussing the survey area, an outline of the survey process, and an invitation to share stories, historic photos or other ephemera with the survey team.

Meetings were also held with the Project PRISM Advisory Committee, which included representatives from the Richmond Planning Division, Richmond Main Street Initiative, the National Park Service, the Richmond Historic Preservation Advisory Committee and the Iron Triangle Neighborhood Council. A draft copy of the Historic Context Statement was presented to the Richmond Historic Preservation Advisory Committee on August 11, 2009.

In association with the grand opening of Nevin Park, a city park located within the Project PRISM survey area, a photo scanning event was held on January 31, 2009 to collect copies of historic photographs from community members. All scanned photos were labeled by subject and subsequently shared with the Richmond Museum of History and the National Park Service.

Finally, in order to gain a greater understanding of civil rights activities in Richmond, a videotaped oral history interview was conducted with three participants on February 10, 2009 at the offices of

the Richmond Planning Division. A DVD of this interview, as well as an indexed summary of the subjects discussed, is included as an appendix to this report (**APPENDIX B: ORAL HISTORY – CIVIL RIGHTS IN RICHMOND**).

E. Property Information Catalog

At the conclusion of the survey, a Property Information Catalog (Catalog) was created in order to compile baseline information for all properties which received DPR 523A forms, as well as indicate properties located within the Project PRISM survey boundaries that had been previously documented. This Catalog consists of an Excel spreadsheet and is included as an appendix to this report.

Each property that received a DPR 523A form includes the following baseline information within the Catalog:

- Assessor's Parcel Number
- Street Address
- Resource Attribute Code (or codes for buildings with more than one use)
- Year Built (or the estimated date of construction)
- Source Used to Assign Year Built
- Architectural Style

This baseline information is supplemented by fields that refer to each building's retention of historic character, as well as its potential ability to qualify for listing in local, state and/or national historic registers. These ratings are discussed at length in section III. **HISTORIC SIGNIFICANCE & INTEGRITY**, as well as in **APPENDIX C: PROPERTY INFORMATION CATALOG**.

F. Primary References

Numerous resources were consulted during the production of this report, but the following publications provided primary guidance:

- National Park Service, *National Register Bulletin: How to Apply the National Register Criteria for Evaluation* (rev. 2002)
- National Park Service, *National Register Bulletin: Defining Boundaries for National Register Properties* (1995, rev. 1997)
- National Park Service, *National Register Bulletin 24: Guidelines for Local Surveys: A Basis for Preservation Planning* (1977, rev. 1985)
- State of California, Office of Historic Preservation, Department of Parks and Recreation, *Instructions for Recording Historical Resources* (1995)
- State of California, Office of Historic Preservation, Department of Parks and Recreation, *California Office of Historic Preservation Technical Assistance Series #6, California Register and National Register: A Comparison (for purpose of determining eligibility for the California Register)* (14 March 2006)
- State of California, Office of Historic Preservation, Department of Parks and Recreation, *California Office of Historic Preservation Technical Assistance Series #7, How to Nominate a Resource to the California Register of Historical Resources* (4 September 2001)
- City of Richmond, California. *Historic Structures Code*, Chapter 6.06 of the Richmond Municipal Code (November 2000)
- Donna Graves, *Mapping Richmond's World War II Home Front* (July 2004)

Other relevant publications that provided assistance in the identification and evaluation of surveyed properties included *A Field Guide to American Houses* (1984) by Virginia & Lee McAlester; *Classy City: Residential Realms of the Bay Region* (2002 Rev.) by Richard Walker; *Architecture & Ornament* (1990) by Antony White and Bruce Robertson; and *Images of America – Richmond* (2003) by Donald Bastin. Historic photos available through *Calisphere*, an online service of University of California Libraries, were also examined throughout the project.

III. HISTORIC SIGNIFICANCE & INTEGRITY

Historic significance and integrity are two interrelated concepts that provide the foundation for identifying historic resources. The following pages include discussions of significance and integrity based on National Register and California Register guidelines, as well as the Richmond Historic Structures Code. Also included are discussions of how these concepts were applied during the Project PRISM historic resources survey.

A. Historic Significance

Typically, resources over fifty years of age are eligible for listing in the National Register of Historic Places if they meet any one of four criteria of significance, as well as retain sufficient historic integrity. However, resources under fifty years of age can be determined eligible if it can be demonstrated that they are of “exceptional importance,” or if they are contributors to a potential historic district. The California Register of Historical Resources follows nearly identical guidelines to those used by the National Register, but identifies the criteria for evaluation numerically.

The four criteria under which a structure, site, building, district, or object can be considered eligible for listing in the National Register (Criteria A, B, C, or D) or California Register (Criteria 1, 2, 3, or 4) are as follows:

- Criterion A/1 (Event): Properties associated with events that have made a significant contribution to the broad patterns of our history;
- Criterion B/2 (Person): Properties associated with the lives of persons significant in our past;
- Criterion C/3 (Design/Construction): Properties that embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant distinguishable entity whose components lack individual distinction; and
- Criterion D/4 (Information Potential): Properties that have yielded, or may be likely to yield, information important in prehistory or history.

The City of Richmond’s historic preservation ordinance (known as the “Historic Structures Code”) states that “... a structure, site, or other improvement, not already designated as such, may be designated a historic resource within the City or may be designated an historic district if it meets any of the following criteria:

1. It exemplifies or reflects valued elements of the City's cultural, social, economic, political, aesthetic, engineering, archaeological, or architectural history;
2. It is identified with persons or events important in local, state, or national history;
3. It reflects significant geographical patterns, including those associated with different eras of settlement and growth, particular transportation modes, or distinctive examples of park or community planning;
4. It embodies distinguishing characteristics of an architectural style, type, period, or method of construction, or is a valuable example of the use of indigenous materials or craftsmanship;
5. It is representative of the notable work of a builder, designer, or architect whose style influenced the City's architectural development; or
6. A structure, site, or other improvement which meets any of the above criteria at the highest level, and whose loss would be a major loss to the City, may be designated an outstanding historical resource.”²

B. Determining Historic Significance in the Project PRISM Survey Area

The primary source used to assess the potential historic significance of properties located in the Project PRISM survey area was the *Project PRISM Historic Context Statement*, which outlines the major periods of development, important historic themes, events, patterns, and associated property types that occur within the survey area, as well as guidelines for determining resource eligibility.

Page & Turnbull identified the following contextual themes—which are described in the historic context statement—as applicable to surveyed properties:

- City Development (encompasses residential, commercial, industrial, civic, social & religious development, as well as resources associated with the World War II boomtown period)
- Architecture

In order to assess properties, Page & Turnbull organized these contextual themes according to the National Register of Historic Places (NR) Criteria for Evaluation, the California Register of Historical Resources (CR) Criteria for Designation, and the City of Richmond Historic Structures Code (RHSC).

² City of Richmond Municipal Code Chapter 6.06.060 accessed at <http://bpc.iserver.net/codes/richmond/index.htm>

Page & Turnbull identified NR/CR Criterion A/1, as well as RHSC Criteria 2 and 3 as applicable to this survey project. These criteria are associated with properties significant for their association with historic events. In Richmond, this might include events such as the development of the city's earliest neighborhoods, the emergence of Macdonald Avenue as the city's primary commercial thoroughfare, and the World War II home front effort.

Page & Turnbull also identified NR/CR Criterion C/3, as well as RHSC Criteria 1, 4, and 5 as applicable to this survey project. These criteria are generally associated with properties significant for their design or construction, or for their association with a prominent architect. In Richmond, this might include properties deemed significant as examples of early 20th century architectural styles, or that display high artistic values.

Properties were not evaluated as potential historic resources under NR/CR/RHSC Criterion B/2/2, which deal with properties significant for their association with the lives of persons important to local, state, or national history. Further detailed study of individual properties, which is beyond the scope of this report, may document potential historic significance of properties according to NR/CR Criterion B/2.

Properties were also not evaluated as potential historic resources under NR/CR Criterion D/4, which is typically reserved for archaeological resources. Further detailed study of individual properties, which is beyond the scope of this report, may document potential archeological resources according to NR/CR Criterion D/4.

C. Integrity

In addition to qualifying for listing under at least one of the National Register/California Register criteria, a property must be shown to have sufficient historic integrity. This is defined by the California Office of Historic Preservation as "the authenticity of an historic resource's physical identity evidenced by the survival of characteristics that existed during the resource's period of significance."³ The National Park Service states that "the evaluation of integrity is sometimes a subjective judgment, but it must always be grounded in an understanding of a property's physical features and how they relate to its significance."⁴

³ California Office of Historic Preservation, *Technical Assistant Series No. 7, How to Nominate a Resource to the California Register of Historic Resources* (Sacramento, CA: California Office of State Publishing, 4 September 2001) p.11

⁴ U.S. Department of the Interior, National Park Service. *National Register Bulletin: How to Apply the National Register Criteria for Evaluation* (rev, 2002).

The process of determining integrity is nearly identical for both the National Register and the California Register. Each uses the same seven variables or aspects that define integrity: location, design, setting, materials, workmanship, feeling and association. According to the *National Register Bulletin: How to Apply the National Register Criteria for Evaluation*, these seven characteristics are defined as follows:

- Location is the place where the historic property was constructed.
- Design is the combination of elements that create the form, plans, space, structure and style of the property.
- Setting addresses the physical environment of the historic property inclusive of the landscape and spatial relationships of the building(s).
- Materials refer to the physical elements that were combined or deposited during a particular period of time and in a particular pattern of configuration to form the historic property.
- Workmanship is the physical evidence of the crafts of a particular culture or people during any given period in history.
- Feeling is the property's expression of the aesthetic or historic sense of a particular period of time.
- Association is the direct link between an important historic event or person and a historic property.

The Richmond Historic Structures Code follows similar guidelines, but does not formally define integrity. Instead, the following statements are included in the terminology section for historic districts (which also apply to the designation of individual historic resources):

- A building contributing to the historic significance of a district is one which by location, design, setting, materials, workmanship, feeling and association adds to the district's sense of time and place and historical development.
- A building not contributing to the historic significance of a district is one which does not add to the district's sense of time and place and historical development; or one where the location, design, setting, materials, workmanship, feeling and association have been so altered or have so deteriorated that the overall integrity of the building has been irretrievably lost.”⁵

⁵ Richmond Historic Structures Code Chapter 6.06.030-4A and 6.06.030-4B

D. Determining Integrity in the Project PRISM Survey Area

A full assessment of integrity for each individual building was not within the scope of the Project PRISM historic resources survey. However, each property that was documented with a DPR 523A form was assigned a rating by Page & Turnbull based upon its retention of historic character. The concept of historic character is closely related to integrity, but focuses primarily on the physical attributes of a building. As mentioned previously, the National Park Service defines character as “all those visual aspects and physical features that comprise the appearance of every historic building.”⁶ These historic character ratings were based exclusively on visual inspection of building exteriors, and refer to the retention of historic design, materials, and workmanship.

Design, materials, and workmanship are most associated with the appearance of an individual building, and as such were combined into the assessment of each property’s retention of historic character. The other aspects of overall integrity—location, setting, feeling and association—were scrutinized separately in cases of properties associated with non-architectural themes (such as historic events), or for groups of properties that appeared to form potential historic districts.

Each surveyed property was assigned one of three possible ratings in the Property Information Catalog for retention of historic character: *High* (indicating greater retention of historic character), *Medium* (indicating fair retention of historic character) or *Low* (indicating minimal retention of historic character). The guidelines for assigning these ratings are defined below:

High

- Historic form, massing, and design/style is retained.
- Historic roofline/cornice/parapet is retained.
- Majority of historic details and cladding are retained.
- Window/door replacement can be acceptable if subordinate to the overall character of the property.
- Garage additions can be acceptable if subordinate to the overall character of the property.
- In commercial or mixed-use buildings, the majority of historic storefront details, materials and cladding are retained and/or the majority of historic details are retained on the upper floors (in cases of multi-story commercial or mixed use buildings).

Medium

- Historic form, massing, and design/style is largely retained.

⁶ National Park Service, Technical Preservation Services. *Preservation Brief 17: Architectural Character*. (US Department of the Interior. Washington D.C.: 1988.

- Historic roofline/cornice/parapet is largely retained.
- Some historic details, materials and/or cladding are retained.
- Windows/doors may be non-historic.
- Garage additions may be present.
- In commercial or mixed-use buildings, some historic storefront details and/or historic materials are retained (either at the storefront level, or on the upper floors in cases of multi-story buildings).

Low

- Historic form, massing or design is altered.
- Historic roofline/cornice/parapet is altered/removed.
- Most or all historic details, materials, cladding, and windows/doors are altered/removed.

IV. POTENTIAL HISTORIC RESOURCES: INDIVIDUAL PROPERTIES

Historic eligibility is contingent upon fulfillment of one or more of the NR/CR/RHSC evaluative criteria, as well as retention of sufficient integrity to convey historic significance. Based upon Page & Turnbull's determinations of potential significance in relation to the Historic Context Statement for the survey area, as well as each building's retention of historic character, Page & Turnbull identified individual properties that appeared to qualify as potential historic resources. These evaluations were based on NR/CR/RHSC Criteria A/1/2,3 (Events) and NR/CR/RHSC Criteria C/3/1,4,5 (Design/Construction), which were determined to be most applicable to the survey area.

In making these preliminary assessments, Page & Turnbull accounted for advanced age and/or relative scarcity of properties. In general, assessments of older, rarer property types in the survey area, such as those associated with pre-1910 neighborhood development, included a greater degree of latitude for historic and/or compatible replacement of original materials. This included replacement of the original windows, which is near universal in the survey area (it is estimated that less than three percent of all buildings constructed before 1945 still retain all their original windows). Conversely, younger and/or more common property types within the survey area, such as those associated with postwar redevelopment, were held to stricter standards of physical condition that allowed for fewer alterations and greater retention of original materials.

In total, Page & Turnbull identified 144 properties as potential individual historic resources within the survey area (*see map on following page*). This total included:

- 6 properties that appear eligible for individual listing on the National Register of Historic Places*
- 65 properties that appear eligible for individual listing on the California Register of Historical Resources
- 73 properties that appear eligible for individual listing on the local (City of Richmond) register.

*National Register eligible properties are considered automatically eligible for the California Register of Historical Resources.

Project PRISM Survey Richmond, CA

Potential Historic Resources

- National Register
- California Register
- Local Register

0 300 600 1,200 1,800 2,400 Feet

These preliminary assessments have been incorporated into the Property Information Catalog using a coding system to indicate the apparent level of eligibility. These coded ratings are summarized as follows:

- NR: Appears to be individually eligible for listing on the National Register of Historic Places.
- CR: Appears to be individually eligible for listing on the California Register of Historical Resources.
- LR: Appears to be individually eligible for listing on the local (City of Richmond) register.

All buildings identified as potential individual historic resources are further identified in the Property Information Catalog as candidates for DPR 523B form documentation. Similarly, several properties that did not appear to qualify as individual historic resources during this initial assessment, but which otherwise appeared to have some potential for historic designation, were likewise identified as DPR 523B form candidates. A full discussion of all the various fields used in the Catalog is included in **APPENDIX C: PROPERTY INFORMATION CATALOG.**

The following pages include lists of properties identified by Page & Turnbull as potential individual historic resources. The lists are organized by apparent level of eligibility for listing/designation, and include photos of representative properties.

A. Properties Appearing Eligible for Individual Listing on the National Register

The U.S. Post Office at 1025 Nevin Avenue (1939) is an example of a property that appears individually eligible for the National Register. It was headquarters for a special census conducted during World War II, and is a superb example of the Art Deco architectural style (Page & Turnbull).

B. Properties Appearing Eligible for Individual Listing on the California Register

606 Maine Avenue (1905) is an example of a property that appears to be individually eligible for the California Register. It retains nearly all of its original materials and decorative details, such as the scrolled porch brackets, and is an excellent example of a modest Queen Anne style cottage (Page & Turnbull).

C. Properties Appearing Eligible for Individual Listing on the City of Richmond Register

166 2nd Street (1912) is an example of a property that appears individually eligible for the City of Richmond register. It is a good example of a modest Craftsman cottage and retains many original details. But all the windows have been replaced with aluminum-sashes (Page & Turnbull).

D. World War II Era Houses as Potential Historic Resources

Ten properties identified as eligible for the local register are World War II era single-family “defense homes.” As mentioned in the *Project PRISM Historic Context Statement*, thousands of these small cottages were constructed in Richmond, and it appears that most were constructed outside the Project PRISM survey area. Because these types of buildings are relatively common, caution was exercised in evaluating their integrity. The World War II era houses identified as potential historic resources above appear to be the most intact examples in the Project PRISM survey area, and were chosen because of their retention of key character-defining elements, such as the original windows and decorative shutters.

While several concentrations of these buildings exist within the PRISM survey area, the overall level of integrity within these collections did not appear sufficient for identification of a potential historic district. Thus, further research on World War II era houses located outside the Project PRISM survey area is recommended to identify concentrations that may be suitable for interpretation as part of the Rosie the Riveter/World War II Home Front National Historical Park (see **VI. FURTHER STUDY RECOMMENDATIONS**).

V. POTENTIAL HISTORIC RESOURCES: HISTORIC DISTRICTS

As with individual resources, the assessment of potential historic districts is contingent upon fulfillment of one or more of the NR/CR/RHSC evaluative criteria, as well as retention of integrity sufficient to convey historic significance. In a historic district, a grouping of thematically related properties can also collectively attain historic status, even though these properties may not individually qualify as historic resources.

Identification of historic districts primarily involves assessment of integrity in the aspects of location, setting, feeling and association for the grouping of properties, in addition to the integrity of design, workmanship and materials of individual properties. Page & Turnbull staff identified potential historic districts by analyzing GIS maps that showed the locations and distributions of surveyed properties based on features such as construction dates, property types, and retention of historic character—as well as the ability of these groupings to collectively convey historic significance in relation to the Historic Context Statement for the survey area.

Each potential historic district was assessed for its eligibility for listing at the local, state and/or national level according to NR/CR/RHSC Criterion A/1/2,3 and NR/CR/RHSC Criterion C/3/1,4,5 which were determined to be most applicable to the survey. Page & Turnbull's identification and preliminary assessments of potential historic districts may be verified with further study.

In total, Page & Turnbull identified two potential historic districts which have been organized by apparent level of eligibility for listing/designation below:

Historic Districts Appearing Eligible for Listing in the California Register of Historical Resources:

- Bissell Avenue Historic District

Historic Districts Appearing Eligible for Listing in the City of Richmond Register:

- Macdonald Avenue Historic District

The following pages include summary descriptions of the potential historic districts. The summary descriptions include apparent resource eligibility, associated theme(s), periods of significance, and narratives that further define the features and contributors of the potential historic districts. The summary descriptions also include a map providing an initial outline of the district boundaries. These

boundaries—as well as the designation of contributing and non-contributing properties—should be verified through further study and recordation with California Department of Parks and Recreation DPR 523D (District Record) forms.

Aerial overview of the Bissell Avenue Historic District (Bing.com map altered by Page & Turnbull)

A. Bissell Avenue Historic District

Boundaries: Primarily properties on the south side of Bissell Avenue between First and Seventh streets, with small extensions to the south along intersecting streets; also the north side of Bissell Avenue between Third and Fourth Street.

Period of Significance: ca. 1900 – ca. 1935.

Theme(s): Residential Development (NR/CR/RHSC Criterion A/1/2,3); Architecture (NR/CR/RHSC Criterion C/3/1,4,5)

Apparent Eligibility: California Register of Historical Resources

This potential district includes the largest and most intact concentration of residential buildings dating to the pre-war “Industrial Era” period of development in Richmond. It includes fine examples of nearly all architectural styles prevalent during this period, including Craftsman, Classical Revival Queen Anne and vernacular single-family dwellings, as well as several small apartment buildings and flats.

Historically, this was one of the earliest residential areas to develop in Richmond, being located a block away from the burgeoning commercial strip on Macdonald Avenue, as well as in close proximity to the shops of the Santa Fe Railroad. Sanborn Fire Insurance maps from 1905 and 1909

indicate that the area between First and Fourth Street was approximately 25 percent built out at that time, almost exclusively with single-family homes. To the east, the south side of Bissell Avenue between Fourth and Seventh Street included only a handful of small houses and a small church at the corner of Sixth Street and Bissell Avenue. By 1916, the area was approximately 50 percent built out—again with the blocks to the west showing more intense construction activity.

Nearly all potential contributors to this district were in place by 1930, when Sanborn maps show that Bissell Avenue and the intersecting side streets were almost fully-lined with houses. Nevertheless, scattered vacant lots persisted, as well as individual properties standing on large lots that would eventually be subdivided.

Highlights of this potential district include several finely crafted single-family houses near the intersection of Bissell Avenue and Third Street, a collection of Craftsman style single-family homes at the north end of Second Street, and a concentration of well-preserved flats and apartment buildings on the south side of Bissell Avenue between Fourth and Sixth Street. A large lot on the southwest corner of Sixth Street and Bissell Avenue also contains the Elisabeth Missionary Baptist Church (formerly the First Christian Church), which is perhaps the finest example of Craftsman style architecture in the PRISM survey area.

As previously stated, the boundaries of this potential district—as well as the designation of contributing properties—should be verified through further study and recordation with a DPR 523D form.

Aerial overview of the Macdonald Avenue Historic District (Bing.com map altered by Page & Turnbull)

B. Macdonald Avenue Historic District

Boundaries: Primarily properties located at the intersection of Macdonald Avenue and Harbour Way, with small extensions west to 8th Street, east to 11th Street, and north to Nevin Avenue.

Period of Significance: ca. 1915 – ca. 1939

Theme(s): Commercial Development (NR/CR/RHSC Criterion A/1/2,3); Architecture (NR/CR/RHSC Criterion C/3/1,4,5)

Apparent Eligibility: City of Richmond Historic Register

This potential district includes the largest and most intact concentration of buildings that once comprised the “heart” of downtown Richmond, which was historically centered at the intersection of Macdonald Avenue and Harbour Way. As stated in the *Project PRISM Historic Context Statement*:

By the 1920s, four large buildings concentrated around Tenth Street (now Harbour Way) and Macdonald showed that this intersection had become the business center for Richmond. Although the Elk’s Club building (completed in 1914) was later demolished, three of the four still stand: the American Trust Building at 1001

Macdonald, the New Carquinez Hotel at 1000 Nevin Avenue, and the Winters Building at 1031 Macdonald [now 113 11th Street] ... In fact, a healthy number of structures near the historic intersection of Macdonald Avenue and Harbour Way still stand, although many have been remodeled to varying degrees over the years. 1009 - 1011 Macdonald, just east of the American Trust Building, was built ca. 1920 by John F. Galvin as home to the *Richmond Independent*, one of two daily papers of the era, which had outgrown rented space at 515 Macdonald Avenue. Within a few years, Galvin moved the Independent offices and printing plant into a larger building next door at 1017 - 1021 Macdonald Avenue. The last structure connecting the American Trust and Winters buildings was constructed at 1025 Macdonald Avenue in 1920 as a store with a residence above.⁷

The majority of buildings located within this potential district were constructed during the 1920s, a decade marked by considerable growth and optimism about Richmond's future. In addition to the buildings mentioned above, this period also saw the construction of the Mechanics Bank at 830 Macdonald Avenue (1920); a large store at 322 Harbour Way (1924); and a drugstore and shops at 920 Macdonald Avenue (1925). The decision to extend the period of significance to 1939 was driven primarily by the presence of an outstanding representative of Richmond's downtown development: the Art Deco styled U.S. Post Office at 1025 Nevin Avenue (1939).

Beginning in the late 1960s, Macdonald Avenue began to experience a period of decline, cemented by the completion of the Hilltop Mall in 1976, which shifted Richmond's commercial focus away from downtown. In subsequent years, many properties became vacant and were acquired or demolished by the Richmond Redevelopment Agency. Thus, although scattered remnants of historic commercial development are still extant along the west end of Macdonald Avenue, they are separated from this potential district by large areas of non-historic infill or vacant lots. Accordingly, these buildings do not appear eligible for inclusion as part of a discontinuous district. According to the *National Register Bulletin: How to Apply the National Register Criteria for Evaluation* (1997):

It is not appropriate to use the discontinuous district format to include an isolated resource or small group of resources which were once connected to the district, but have since been separated either through demolition or new construction. For example, do not use the discontinuous district format to nominate individual buildings of a downtown commercial district that have become isolated through demolition.⁸

It should be noted that the storefronts of several buildings located along Macdonald Avenue within this potential district's boundaries are currently boarded up. These include 816 – 822 Macdonald

⁷ Page & Turnbull with Donna Graves. *Project PRISM Historic Context Statement*. 2009: p.38 - 40.

⁸ Page 6.

Avenue (1919); 824 Macdonald Avenue (1928); 910 Macdonald Avenue (1921); 912 - 916 Macdonald Avenue (1916); and 920 Macdonald Avenue (1925). Because large portions of these buildings' facades were not visible during the survey, a full assessment of their integrity and ability to contribute to this potential district requires further research. Likewise, the boundaries of this potential district—as well as the designation of contributing properties—should be verified through further study and recordation with a DPR 523D form. The completion of this form should include a thorough review of the *Project PRISM Historic Context Statement*, which devotes considerable attention to the development of Macdonald Avenue.

VI. FURTHER STUDY RECOMMENDATIONS

The research and survey efforts undertaken during Project PRISM represent a tremendous advance in understanding the development of the Iron Triangle, Santa Fe and Coronado neighborhoods—as well as the crucial role these areas played during the World War II home front effort. It has also provided a firm basis for the City of Richmond’s ongoing efforts to preserve and promote its historic resources through heritage tourism and collaboration with the Rosie the Riveter/World War II Home Front National Historical Park. The following sections outline Page & Turnbull’s recommendations for future historic preservation work, including the preparation of National Register nominations, the designation of historic districts, and further historic resources surveys.

A. Preparation of National Register Nominations

Four of the six properties that appear eligible for the National Register have clear connections to the World War II home front effort. These include the former office of the U.S. Maritime Commission at 1801 Cutting Boulevard, which was reportedly a location where housing assignments were made. Also included is the U.S. Post Office at 1025 Nevin Avenue, which served as headquarters for a special wartime census which showed that Richmond’s population had soared from 23,000 in 1940 to 114,899 just two years later. Importantly, the list also includes two educational facilities constructed or enlarged in order to accommodate the massive increase in enrollment during the war years: the Richmond Unified School District building at 1108 Bissell Avenue, as well as Gompers High School (formerly Roosevelt Junior High School) at 157 9th Street.

As a group, these properties are outstanding representatives of Richmond’s World War II home front efforts and offer excellent opportunities for heritage tourism through interpretation by the Rosie the Riveter/ World War II Home Front National Historical Park. Thus, it is recommended that National Register nominations be pursued for these properties. Similarly, National Register nominations should also be prepared for two additional outstanding representatives of Richmond’s development: the former Mechanics Bank at 830 Macdonald Avenue, and the former Carnegie Library (now the Richmond Museum of History) at 400 Nevin Avenue.

B. Further Study of Potential Historic Districts

Page & Turnbull recommends further investigation of the two potential historic districts outlined in this report, including the preparation of DPR 523D forms. This effort should draw heavily on information presented in the *Project PRISM Historic Context Statement*, including the integrity considerations for potential contributing/non-contributing properties. Likewise, the district boundaries should be verified and refined through field investigations.

Priority should be given to those areas that appear most susceptible to changes in zoning controls and/or redevelopment. In particular, the potential Macdonald Avenue historic district contains several properties that are currently vacant and potentially subject to demolition, redevelopment or continued deterioration due to neglect.

C. Further Study of World War II Era Properties

The Project PRISM Historic Resources Survey identified approximately 550 buildings constructed during Richmond's World War II boomtown period of 1940 – 1945. Nearly all of these buildings appear to be small, single-family houses constructed by private builders. However, according to the 1944 publication, *An Avalanche Hits Richmond*, over 6,000 units of private housing were constructed in Richmond between 1940 and 1944.⁹ This would appear to indicate that a substantial number of privately-developed World War II era properties are still extant in Richmond outside of the Project PRISM survey area—but as yet no systematic research has been performed to indicate where these buildings were constructed, nor have these private builders been identified. Further study along these lines is recommended in order to expand current knowledge about World War II era housing in Richmond, as well as identify concentrations of resources that may be suitable for interpretation by the Rosie the Riveter/World War II Home Front National Historical Park. This research should also include a comparative analysis of individual properties located both within and outside the Project PRISM survey boundaries in order to refine the integrity thresholds necessary for identifying World War II era properties as potential historic resources.

D. Additional Historic Resources Survey Work

A preliminary windshield survey of areas in close proximity to the boundaries of the Project PRISM survey area has revealed the potential for additional concentrations of historic resources. These areas appear to share much of the same development history and associated property types as those

⁹ McVittie, James. *An Avalanche Hits Richmond*. City of Richmond, 1944. p. 30.

identified in the *Project PRISM Historic Context Statement*, and thus are recommended for future historic survey work. These areas include:

- The area immediately east of the Project PRISM survey boundaries, particularly those blocks bounded by Macdonald Avenue on the north; Ohio Avenue on the south; Marina Way on the west; and the Southern Pacific Transportation Company/BART railroad tracks on the east.
- The area immediately northeast of the Project PRISM survey boundaries, particularly those blocks bounded by Pennsylvania and Grant avenues on the north; Macdonald Avenue on the south; 23rd Street on the east; and the Southern Pacific Transportation Company/BART railroad tracks on the west.

APPENDIX A: DPR 523A (PRIMARY RECORD) FORMS

The Project PRISM historic resources survey produced DPR 523A forms for a total of 1,350 buildings. As mentioned previously, this number was pre-determined by the Richmond Planning Department, and included all buildings located within the Project PRISM survey area that met at least one of three conditions:

- DPR 523A forms were completed for all properties that appeared to retain at least a fair degree of historic character. Buildings with extensive alterations, such as the removal/replacement of the original cladding, windows and doors, and original decorative elements, were generally excluded.
- DPR 523A forms were completed for all commercial, industrial, civic, religious and social buildings. This was deemed essential in order to document the widest possible range of property types.
- DPR 523A forms were completed for all buildings constructed prior to 1910. This was deemed essential in order to document the oldest surviving buildings in the Project PRISM survey area.

A CD containing all 1,350 DPR 523A forms in electronic (PDF) format is included at the end of this report. All forms are labeled according to the Assessor's Parcel Number.

APPENDIX B: ORAL HISTORY — CIVIL RIGHTS IN RICHMOND

The following is an index and summary of a videotaped discussion about civil rights struggles in Richmond during the 1950s – 1970s. This oral history interview was conducted on February 10, 2009 at the Richmond Planning Department conference room. Donna Graves (DG) served as the interviewer, and the participants included:

- Charlsetta Braggs-Ford (CBF)
- Savannah Bello (SB)
- James McMillan (JM)

A DVD of the interview is included at the end of this report. Additional copies have been provided to the Richmond Museum of History and the Rosie the Riveter/World War II Home Front National Historical Park. The DVD is arranged in two parts, and the times shown on the index relate to the approximate times of the conversation as viewed on the DVD.

SECTION I of the DVD

(1:00)

Informal talk about some of the touchstones of civil rights struggles in Richmond and the activities of C.O.R.E. (Congress of Racial Equity)

- C.O.R.E. activities during public meetings at the Richmond Unified School District building.
- The NAACP and the Black Panthers met at the Mt. Carmel Baptist Church on Bissell Avenue.
- Efforts to integrate schools and improve academics.
- The Housing Authority sit-in at 28th Street and Maine Avenue.

(2:30)

Discussion of protests at the Bank of America building.

- C.O.R.E. held regular weekend meetings to picket.
- Protests were done in conjunction with demonstrations across California.
- Protest tactics included slowing down bank operations.
- The protests were designed to embarrass the bank for their employment policies. BofA did not hire African Americans except as janitors; the janitors would report back to members of C.O.R.E. about what bank executives were saying in relation to the protests.

(6:30)

Discussion of how Charlesetta Braggs-Ford came to Richmond.

- CBF's father was recruited to work at the Kaiser Shipyards; the post-war layoffs were traumatic.
- They lived in war housing in San Pablo. Furniture was provided for her family. It was a village atmosphere.

(9:00)

James McMillan arrives.

- Introductions and signing of a videotape release.

(12:00)

James McMillan shares some photos from the early 1960s

- There is an informal discussion of the photos, which include images of a civil rights protest.
- JM mentions opening his business on 10th Street in 1961; it was a converted delicatessen.

(14:00)

Formal introduction of participants and a discussion with James McMillan about his experiences as a pharmacist and public health issues in the 1950s.

- JM started as a pharmacist in San Pablo at Brookside Hospital, working from 1954 – 1956. In 1956 he began working at the 8th Street Clinic located at 8th Street and McDonald Avenue.
- Very few African Americans were on staff at Brookside Hospital; black doctors could not treat people in the emergency room unless they were already one of their patients.

(17:00)

Discussion of gradual changes in racial attitudes among the medical community.

- Doctors pressured for changes in policy. This was mainly a coalition of Jewish and African American doctors.
- JM states that Jewish doctors helped him get his first job, as well as co-sign his home-loan.

(20:00)

Discussion of George Degnan who ran medical services for Contra Costa County and started an outpatient clinic.

- Degnan was born in Richmond and attended Richmond High School; he was also a veteran of World War II
- Degnan was well respected and loved by many in the community.
- Degnan helped fund C.O.R.E., as well as Booker T. Anderson's (a former city councilman and Richmond mayor) first campaign.

(26:00)

Discussion with James McMillan about the 8th Street Clinic, and his move into private practice.

- Degan felt people should be treated where they live.
- JM worked for 3 years at the 8th Street Clinic and then went into private practice. He describes the loan process for opening a private pharmacy.
- Dr. Hans Benedict co-signed the loan from Central Valley Bank; Dr. Benedict thought the Mechanics Bank was too conservative.

(32:00)

Discussion of African American owned businesses and the 1950s downtown.

- African American owners included Dr. Robinson, attorney George Carroll, Neitha Williams and the Cotright Store.
- There were several African American beauticians. A beauty shop was located at 2nd Street & Macdonald Avenue in the 1940s and 1950s: the Silhouette House of Beauty owned by Velma Ford.
- Charles Stewart's funeral home was located at Nevin Avenue and 7th Street. It was and still is called the Rose Manor Funeral Home. The funeral home started late 1940s or early 1950s.

(38:00)

Discussion with James McMillan about moving his pharmacy to a new location.

- Dr. Sam Weeks purchased a building on 10th Street between Barrett and Pennsylvania avenues to open an office and pharmacy.
- The building had been an Italian delicatessen—many Italians lived in Richmond and North Richmond.
- JM moved to the new location in 1961, and later to a new office on Cutting Boulevard in 1968 as the area along Macdonald Avenue near his office was deteriorating.

(41:30)

James McMillan discusses a police traffic stop in 1956 and subsequently being taken to jail.

- It was dark and the policeman did not know JM was African American at first; the policeman subsequently became rude when he looked at the license.
- Richmond police would not accept JM's check.
- JM had to wait to be bailed out of jail by Rev. Booker T. Anderson.

(45:00)

Discussion of Reverend Booker T. Anderson and the activities of local civil rights organizations.

- Booker T. Anderson introduced JM to Willie Brown.
- The NAACP met in various churches; there was no permanent meeting place.
- Organizations of the era included PEC (Political Education Committee). Once a month they would send out mailers covering current political issues to ministers and other organizations.

- Dr. P.T. Robinson paid for most of the mailings. One of his offices was at 6th Street and Nevin Avenue.

(49:00)

Discussion of how JM purchased his first house and where African Americans lived in Richmond.

- There was a limit to where African Americans could work and live; they lived in pockets.
- JM's first house was in the Richmond Annex. He had difficulty purchasing it.
- In the late 1950s and early 1960s, African Americans could not live east of 23rd Street in South Richmond. Later they were able to move beyond 23rd Street, but at the time they did not live near Civic Center at all.
- In the late 1940s through the early 1960s African Americans were concentrated in North Richmond.
- The first big neighborhood transition for African Americans was moving to the area off Cutting Boulevard east of 23rd Street. People would move wherever they could.

(52:30)

Discussion of whites moving to the suburbs, how African Americans purchased homes and where racial lines were drawn.

- 1952 cross burning at Wilbur Gary's place.
- Sympathetic whites would buy houses and resell to African Americans.
- Housing was a pivotal issue for African Americans. It had effects on school districts and segregation.
- African Americans couldn't purchase homes because of restrictive covenants.
- CBF lived in San Pablo; it was intertwined with Richmond.

(57:00)

Discussion of how Savannah Bello and Charlesetta Braggs-Ford met, and their experiences attending nursing school.

- Met in 1960 while studying nursing at Contra Costa College.
- They both realized they were not afraid to speak up and challenge authority.

1:00:48 Pause to move to next tape

SECTION II of the DVD

- CBF and SB both studied nursing for a year. Their nursing class was half black and half white.
- Both were single mothers with several children. CBF worked at Brookside Hospital; SB worked at County Hospital in Martinez.

(1:30)

Discussion of Savannah Bello meeting Booker T. Anderson circa 1963

- They met at a school board meeting.
- SB was there to protest to protest discrimination against African Americans who were attempting to become cheerleaders at Harry Ells School. She was also there to protest a book at Roosevelt High School that said blacks were happy in slavery.
- Booker T. Anderson was there to discuss problems with the basketball team.
- Harry Ells was considered a good school. People bragged about it.

(4:00)

Discussion of how Charlesetta Braggs-Ford came to join C.O.R.E.

- CBF read an article in the Richmond Independent newspaper about a C.O.R.E. meeting at Mt. Carmel Baptist Church.
- Iona White chaired the meeting. Other participants included Maxine Eason. Ms. White was autocratic, and there was some discord at the meeting.
- Later Iona White left the group and it reformed with new leadership.
- CBF was galvanized by her participation in the organization.
- CBF and SB set up bylaws and fees to charter Richmond C.O.R.E.

(7:30)

Discussion of C.O.R.E. picketing Lucky's and Safeway grocery stores.

- This was their first direct action. Lucky's would not hire blacks.
- Picketers were told how to act and dress, and only one person was designated to speak.
- They met at a Safeway store in San Pablo and marched and sang.
- "We shall Overcome" was the main protest song at the time. Later, new songs came in as they met people from other parts of the country.

(9:30)

Discussion of Savannah Bello meeting with the San Francisco C.O.R.E. group.

- San Francisco C.O.R.E. was very organized, and SB hoped to learn techniques that could help Richmond's organization.
- Early protests were hard. They were hurt and angry at being called communists by other African Americans as they marched through North Oakland.
- SB felt she was ignored by the San Francisco C.O.R.E. leadership; instead of being disappointed she came back energized and wanting to change things immediately.
- C.O.R.E. had both national and local projects; they tended to support state and local issues.

(14:00)

Discussion of C.O.R.E. involvement with public housing protests

- Discrimination by the Richmond Housing Authority was the focus of early protests.
- Easter Hill had a black quota, which left houses reserved for whites empty.
- Campus C.O.R.E. from U.C. Berkeley came in to help with protests.
- Richmond C.O.R.E. had about 12 members at this time. Members recognized each other on the street.

(18:00)

Discussion of training for C.O.R.E. members.

- They had sensitivity training on how to deal with and be open with each other.
- Being on the picket line gave members a sense of kinship. Members were not afraid to go to jail.
- Brief mention of protests at Barry Goldwater's nominating convention at the Cow Palace; members dressed as if they were delegates, but were thrown out.

(20:45)

Discussion of 1964 sit-in at the Richmond Housing Authority.

- Housing for African Americans received less maintenance.
- Members would put their name on RHA meeting agendas, but the RHA would try to move the agenda.
- C.O.R.E. members tried to disrupt meetings with singing and passively blocking the way out for board members.
- The sit-in lasted all night; C.O.R.E. groups from all over came and helped.
- African American neighbors brought food for the protesters.
- Members said they would not be moved.

(25:00)

Discussion of harassment of C.O.R.E. members.

- U.S. Senator William Knowland would come and personally harass C.O.R.E. members at Jack London Square.
- A C.O.R.E. member was beaten at the Oakland jail; when C.O.R.E. members went to the jail to bail him out they were surrounded by police with bayonets.

(27:00)

Discussion of Bank of America and Lucky's picketing.

- During one BofA picket in Richmond, the police had to intervene because people were planning to hurt the protesters.
- The Longshoreman supported C.O.R.E.
- The African American community did not always come out, but helped in other ways.
- None of the group believes that Safeway and BofA were picketed as early as the late 1940s.

(29:30)

Discussion of national civil rights coordination during the 1950s and early 1960s.

- The Montgomery bus boycott was the initial catalyst. People were recruited for the Freedom bus rides.
- Churches were the main source of information about civil rights activities early on.
- SB was upset at African American ministers because they didn't stand up after the war or during the 1950s; the ministers had a national organization but they didn't use it.

(32:00)

Discussion of early supporters of Richmond C.O.R.E. and where they met.

- Supporters included Booker T. Anderson and the Easter Hill Methodist Church; Reverend Brock from the Providence Church; Leon and Jan Riley from the Bissell Avenue Church (Elisabeth Baptist Church).
- Rev. Guthrie Williams provided a place to meet.
- They met in different houses to prevent police monitoring.

(33:40)

Discussion of police monitoring of civil rights groups.

- J. Edgar Hoover and the F.B.I. thought civil rights activists were communists.
- CBF states the F.B.I. came to her house to investigate Eldridge Cleaver.
- SB received telephone threats.
- JM remembers the first time he encountered a sit-in.
- NAACP was initially conservative about protests.
- SB and CBF give their views on President Obama.

(38:30)

Savannah Bello has to leave for an appointment.

(39:00)

Charlesetta Braggs-Ford discusses education

- CBF was one of the few blacks in her elementary school.
- After being repeatedly taunted, she struck back at a boy. The following year she was elected class president.
- After World War II the demographics shifted in her school, as well as the curriculum. The teachers were still all white.

(42:30)

Discussion of deteriorating educational standards.

- CBF felt that C.O.R.E. had to speak up because education for African Americans was deteriorating.
- They wanted children to be exposed to the highest level of education possible.

- JM discusses his experiences at Oregon State after the War. Racial tensions were more subtle than open.

(46:00)

Discussion of schools in Richmond.

- Conditions have not changed much. The notion of a quality education has been lost.
- Leaders were not skilled enough to truly address the inadequacy of education.

(47:30)

Discussion of the 1968 downtown riot and the Denzel Dowell shooting.

- The shooting of a young African American, Denzel Dowell, led to a riot in downtown Richmond.
- JM feels that most African Americans today can't recall much about the incident.
- Damage was relatively isolated except for a fire that completely destroyed Travalini's furniture store.
- There is a mythology associated with the shooting; it is rarely discussed but there are rumors and suspicions that the riot was opportunistic, particularly since the worst damage was confined to Travalini's store.
- Both CBF and JM said they didn't think about it much afterward. The fires did not seem like a watershed event when they occurred.
- JM feels that downtown Richmond had already declined by that point.

(53:00)

Discussion of the protest photos brought by JM.

- The photos date to the early 1960s and were taken by James Powell.
- They were taken outside a fundraiser at the Galileo Club for Jim Kenny and George Miller, Sr., and they were picketing it.
- The Richmond Independent newspaper editor, Elton Brombacher, and his son Kurt are in the photos. JM says that Brombacher was a decent man who defended Wilbur Gary and supported Booker T. Anderson when he ran for office.
- Brief discussion of the photo showing the broken window at Neitha William's real estate office.

(57:30)

The Civil Rights photos are taken for scanning. CBF and JM informally discuss their backgrounds

- CBF was born in Boley, Oklahoma, and later moved to Tulsa. CBF mentions that SB was also born in Oklahoma.
- Discussions of various people they may have known

(1:01:00)

Donna Graves has to leave.

(1:02:24)

Tape ends.

APPENDIX C: PROPERTY INFORMATION CATALOG

The Property Information Catalog is an Excel spreadsheet containing 2,212 entries. This number reflects all properties that were photographed for the Project PRISM historic resources survey, all properties that received DPR 523A forms, and all properties located within the survey area that were previously assigned California Historic Resource Status Codes. An electronic copy of this Catalog has been submitted to the City of Richmond in conjunction with this report.

The Catalog has been sorted first by properties that received DPR 523A forms, then sub-sorted according to the address. These entries are followed by all properties that were photographed for the survey, which are also sub-sorted according to their address. The following section includes a discussion of all column headings used in the Catalog.

Baseline Information Included for All Properties:

- APN: Assessor Parcel Number assigned by the Contra Costa County Assessor. (For parcels with more than one building on the lot, the APN for the additional building(s) is designated by appending the APN with an underscore and numeral, such as 538300004_1)
- From: Street address starting number
- To: Street address ending number
- Street: Street name
- Photo Taken: Identifies properties that were photographed by the Project PRISM Historic Resources Survey
- DPR 523 A Form Done: Identifies properties documented with a California Department of Parks & Recreation DRR 523A (Primary Record) form
- Resource Attribute Code (1): Resource Attribute Code defined by State of California OHP
- Resource Attribute Code (2): Additional Resource Attribute Code (if applicable)
- Year Built: Date of construction or estimated date of construction determined by Page & Turnbull
- Year Built Source: Source for determining date of construction (if different from construction date provided by the Richmond Planning Department)
- Architectural Style: Architectural style or era determined by Page & Turnbull

- Retention of Historic Character: Apparent retention of design, materials and workmanship based on exterior visual observation (rated as either high, medium or low)

Supplementary Fields Used for Select Properties:

- B Form Candidate: Identifies properties as candidates for DPR 523B form documentation
- Prior Survey Evaluation: Identifies any previously assigned California Historical Resource Status Code or the name of the report identifying the property
- Building Moved Onto Lot: Indicates buildings that appear to have been relocated onto to their present lot after being constructed elsewhere
- Individual Evaluation: Preliminary assessment of potential individual historic significance, rated as either NR (National Register), CR (California Register) or LR (Local Register)
- Notes: Covers various subjects such as the existence of multiple buildings on the lot, the presence of water towers, stables or other notable outbuildings, or the name of the builder if known.
