*****IMPORTANT: PLEASE NOTE BELOW*****

Beginning January 2016 and every year there after you will be required to file an on-line Supplemental Statement of Water Diversion and Use Report (Supplemental Statement). The Division will **NO LONGER** notify you via mail when the supplemental statement is due. If you would like to be notified when reporting is due and other reporting related material, please subscribe to our Lyris list (Water Rights Reporting Notification) at:

http://www.waterboards.ca.gov/resources/email_subscriptions/swrcb_subscribe.shtml.

Also note, if you reported your water use three years ago you will be required to complete the reports for 2013, 2014 and 2015. If you reported your water use two years ago you will be required to complete the reports for 2014 and 2015 and if you reported your water use a year ago you will be required to complete the 2015 report.

You are required to complete the online report(s) no later than **June 30, 2016**. **If you do not file your Supplemental Statement in a timely manner, you may be subject to civil liability of up to \$1,000 and additional civil liability of \$500 per day for each day the violation continues if you do not file a statement within 30 days after the board calls the violation to your attention.** (Wat. Code, § 5107, subd. (c)(1).)

Division staff cannot fill the form out on your behalf. If you have multiple points of diversion, you must file a separate Supplemental Statement for each point of diversion. (Wat. Code, § 5102.) Do not list total combined diversions from multiple diversion works on one Supplemental Statement.

CHANGES FOR REPORTING AND MEASUREMENT OF DIVERSIONS MADE IN 2016, AND THEREAFTER

- See attached "Fact Sheet" for updates.

SPECIAL REPORTING FEATURES

- It is possible to create one account on the RMS site to report all of your diversions. Please see the RMS login page for more information and instructions. Note: It is not necessary to create an account if you would like to report your diversions individually.
- RMS also includes the capability to amend reports submitted incorrectly or in error. This capability applies to past reports as well.
- RMS includes new on screen help tools and instructions

REQUIRED NOTIFICATION OF CHANGE IN NAME OR ADDRESS OF PERSON DIVERTING WATER

If there has been a change in the name or address of the person diverting the water, you must report that change to the Board. (Wat. Code, § 5104, subd. (b).) Notification to the Division should be made using the Change of Name/Address or Ownership form on the Water Rights Forms link located at www.waterboards.ca.gov/waterrights/publications_forms/forms/index.shtml.

SUPPLEMENTAL STATEMENT OF WATER DIVERSION AND USE

Water Code section 5104 requires diverters to file supplemental statements of water diversion and use (Supplemental Statements) at three-year intervals. Supplemental Statements must be filed on electronic forms provided by the State Water Resources Control Board (State Water Board). (Cal. Code Regs., tit. 23, § 920, subds. a-b.) **All reports must be completed online through the State Water Board's Report Management System (RMS); paper copies are not available.** To report online, go to www.waterboards.ca.gov/rms and login with your user ID and password. The information required to login and access your online Supplemental Statement is:

User ID (Statement ID): **S022954**
Password (Reporting Identifier): **621240**

The Supplemental Statement is associated with the diversion works of **South Hagmaier Pond**. Information about the source, parcel number, county and other summary information is pre-populated on the Supplemental Statement, if the information is available.

You are required to complete the online reports for the current reporting cycle no later than **June 30, 2015**. **If you do not file your Supplemental Statement in a timely manner, you may be subject to civil liability of up to \$1,000 and additional civil liability of \$500 per day for each day the violation continues if you do not file a statement within 30 days after the board calls the violation to your attention.** (Wat. Code, § 5107, subd. (c)(1).)

Division staff cannot fill the form out on your behalf. If you have multiple points of diversion, you must file a separate Supplemental Statement for each point of diversion. (Wat. Code, § 5102.) Do not list total combined diversions from multiple diversion works on one Supplemental Statement.

CHANGES FOR 2015 REPORTING

- Beginning with the 2012 reporting year, diverters are required to report the method(s) used in measuring the amount of water diverted. The reporting form now includes a new section for reporting the methods used in measuring your diversion.
- Diverters are required to report the year a diversion commenced. Water Code Section 5103 subdivision (h) states that each person who files an initial statement of diversion and use is to report the year the diversion commenced as near as is known. The reporting form now includes a required field in part 1 of 7 in which a valid four digit year must be entered before you can continue with the annual report. If the form pre-populates with a year, then no further action is required by the person completing the report.
- Added is an Inactivation Request Box, giving filers the ability to request an inactivation of their statement. If the diversion recently ceased, please complete the years where water was diverted and file the inactivation under the year where the diversion was ceased, if applicable. For example, if the diversion was ceased in 2014 but water was diverted in 2012 and 2013, please complete the reports for 2012 and 2013 and file the inactivation under the 2014 report. (Note: Requesting an inactivation of a statement will be reviewed and processed by staff and could take 4-6 weeks before the inactivation is reflected in our database.)

SPECIAL REPORTING FEATURES

- It is possible to create one account on the RMS site to report all of your diversions. Please see the RMS login page for more information and instructions. Note: It is not necessary to create an account if you would like to report your diversions individually.
- RMS also includes the capability to amend reports submitted incorrectly or in error. This capability applies to past reports as well.

Re: Commencement of Water Use

Dear Mr. Rinker,

As requested in your November 24, 2014 letters, we have provided the requested information through the eWRIMS system. Because the information required estimates, we would like to provide some background in support of our submittals.

Thirteen of the statements were appurtenant to lands transferred to Mojave National Preserve from the US Bureau of Land Management. These rights, as far as we can tell, are rights reserved pursuant to Public Water Reserve No. 107, with an initial date of 1926. This applies to the following:

S012513	S012603	S012607	S012872	S012875
S012514	S012604	S012866	S012873	
S012602	S012606	S012871	S012874	

The remaining 36 statements are associated with water resources on private lands acquired by Point Reyes National Seashore after 1972. These water resources were developed by the previous owners, but were not registered with the state. Personnel at the Seashore estimate that the water resource development occurred soon after World War II, through the early 1950s. Based on this the year of first use is estimated as 1950. The statement numbers are:

S022941	S022949	S022958	S022971	S022977	S023026
S022943	S022951	S022959	S022972	S022978	S023050
S022944	S022952	S022960	S022973	S022979	S023051
S022945	S022954	S022962	S022974	S022980	S023052
S022946	S022956	S022968	S022975	S022981	S023053
S022947	S022957	S022969	S022976	S022982	S023054

We hope this information meets your needs. The United States provides this information to the State in the interest of comity and with respect to the State's desire to understand water uses in the State; however,

by providing this information, the United States does not concede that the State has the power to regulate the rights of the United States to the use of water.

California Water Boards contacted WRB regarding incomplete Initial Statement of Water Diversion and Use forms filed by WRB on behalf of PORE for impoundments located on park property.

Impoundments were made by previous land owners prior to being acquired by the park.

Pore was established in 1972.

Development occurred post World War II into the early 1950s.

The park prefers to use 1950 as year in which water diversion commenced.

Re: Initial Statements of Water Diversion and Use

Dear State Water Resources Control Board,

By letter dated August 20, 2012 from the Board, Point Reyes National Seashore (Point Reyes) was notified that there were a number of impoundments located within the boundary of Point Reyes for which no Statements of Water Diversion and Use had been filed. Please find enclosed the Initial Statements of Water Diversion and Use for the majority of those impoundments identified in the letter. Maps are attached; please note that these were maps prepared by your office to identify the locations of the impoundments.

Upon receipt of the letter from the Board, NPS contacted your office, and Point Reyes staff investigated the identified impoundments through site visits and aerial photographs to determine their existence and nature. Initial Statements are submitted for all impoundments identified in the letter with the following exceptions:

- Reservoir ID # 423: This is the overflow portion of the Drake Beach Visitor Center sewage pond; as part of a waste treatment facility it does not capture any flow.
- Reservoir ID # 444: This one appears to be registered as License 7942.
- Reservoir ID #446: Based on review of aerial photos and a site visit, there is no water impounded at this site.
- Reservoir ID # 676: This impoundment previously breached (more than 10 years ago) and a culvert was installed at that time, and at grade to maintain access across the creek. The culvert conveys flow at grade; no water is stored.
- Reservoir ID # 1263: This is a natural sag pond located on the San Andreas Fault; there is no man-made impoundment at this location.
- Reservoir ID # 1285: This is registered as License 8242 under the name of Joe Lunny. The right should have been transferred to the National Park Service, but this has not yet been done.

The amounts of water impounded were determined by estimates during site visits or from photos. Except as otherwise stated, the impoundments capture wet season flows and are not located on perennial streams.

Consequently, the Statements indicate that flow is impounded during the wet season; amounts in each month are not known. Similarly, the amount of consumptive use is not known; most ponds fill during the wet season and become dry or nearly dry in the Fall; the amount of water consumed by livestock and lost to evaporation is not known.

Please note that the United States provides this information in the interest of comity, and does not concede that the State has the power to regulate the rights of the United States to the use of water.

If you have any questions, please contact Eric Lord at (970) 225-3526, or Brannon Ketcham at (415) 464-5192.

Dear Mr. Vasquez,

The National Park Service received your letter of August 16, 2012 and has reviewed the information regarding water diversions within Point Reyes National Seashore. The NPS maintains a number of water rights on most of the parcels identified. These parcels continue to be actively ranched, and the ponds are integral to the ranching operations. Based on our review of existing USGS topographic maps, it appears that many of the ponds in these parcels were present prior to the acquisition of the lands by the NPS.

Over the past decade, the NPS has worked closely with the National Marine Fisheries Service and US Fish and Wildlife Service on the protection and enhancement of habitat for federally listed coho salmon, steelhead trout, and California red-legged frog. All ponds within Point Reyes National Seashore are identified as critical breeding habitat for federally threatened California red-legged frogs.

Most of the National Park Service units within California coordinate management and reporting of water rights through the NPS Water Rights Resources Division. Our contact, Eric Lord has contacted your office for a map depicting the state water rights reservoir reference numbers but was informed that such a map is not available. The NPS has reviewed existing USGS topographic maps overlain by the identified parcel maps as well as the State Board water rights coverage. In order for the NPS to better understand which ponds have been identified by the SWRCB we would like to coordinate review of the SWRCB maps with the NPS mapping information. Once the physical location of these SWRCB Reservoir Reference Numbers is identified, the NPS can work with the SWRCB to determine the appropriate next steps regarding these facilities.

Because all of these ponds are actively associated with ongoing ranching activities, and all of them provide critical habitat for federally threatened California red-legged frog, the NPS anticipates working with the State to complete authorization of these diversions as appropriate. However we do not have the information necessary to review the information provided. The NPS requests a map depicting the SWRCB Reservoir Reference Numbers and an extension of the review period in order to assess appropriate next steps. The NPS can respond within 30 days of receipt of a map from the SWRCB.

As noted above, our primary water rights contact, Eric Lord, can be reached at 970-225-3526. As noted, once we are able to review a map from the SWRCB, the NPS is prepared to move forward with the permit process.

Sincerely,

~~st~~ Cicely A. Muldoon

Dear Superintendent Muldoon:

**NOTICE OF POTENTIAL UNAUTHORIZED DIVERSION AND USE OF WATER, AND
FAILURE TO FILE A STATEMENT OF WATER DIVERSION AND USE FOR DIVERSION
OF WATER IN MARIN COUNTY**

The State Water Resources Control Board (State Water Board), Division of Water Rights (Division) is investigating the water rights for existing reservoirs in Marin, Mendocino, Napa, Sonoma, and portions of Humboldt Counties. The Division is responsible for the administration of appropriative water rights in California initiated after 1914; commonly referred to as "post-1914 appropriative water rights." In most cases, any reservoir constructed after 1914 that collects surface water for storage requires an appropriative water right issued by the State Water Board.

This investigation is being conducted as part of the State Water Board's continuing authority to protect public trust resources such as the threatened salmon and steelhead fisheries. The diversion of water to storage can lead to dewatering of stream channels and loss of gravel and woody debris critical to fishery habitat. The Division is trying to protect the fishery resources from unauthorized diversions by ensuring that all storage facilities are operating legally.

You are being contacted because Marin County records indicate you own properties on which one or more reservoirs have been identified. These properties and reservoirs are identified by the Assessor Parcel Numbers and Water Rights reservoir reference numbers listed in the attached Table A. Division staff has determined there are no records of appropriative water rights on file authorizing these water diversion facilities. Since we do not have a permit or license on file covering the storage of water, the purpose of this letter is to gather information on the reservoirs in order to determine if the reservoirs are subject to our permitting authority and, if so, inform you of your options.

If the reservoirs on your properties are subject to our permitting authority, then they are unauthorized diversions of water for which you could be subject to liability. An unauthorized diversion of water constitutes a trespass against the State, and the State Water Board may impose a civil liability in an amount not to exceed \$500 for each day that the unauthorized diversion or use of water occurs. (California Water Code § 1052, et seq.)

♻️ RECYCLED PAPER

AUGUST 16 2012

In addition, California Water Code section 5101 requires, with minor exceptions, that a person who diverts water from a stream in the absence of a permit, license, or registration must file a Statement of Water Diversion and Use (Statement) with the State Water Board. If you have diverted water since 2009, then you are required to report your diversion and use to the State Water Board by filling a Statement unless that diversion falls within one of the limited exceptions provided for in California Water Code section 5101. If you have multiple diversion locations (i.e., you directly divert from a stream as well as impound water at the dam), a separate Statement is required for each diversion. If you have any questions as to how many diversion points your project covers, please contact the Division.

The State Water Board may administratively impose a civil liability in the amount of \$1,000 for the failure to file a Statement for diversions that have occurred since 2009, plus \$500 per day for each additional day on which the violation continues if the person fails to file a Statement within 30 days after the State Water Board has called the violation to the attention of that person. (California Water Code § 5107, subd. (c)(1).) This letter constitutes your notice of the Statement filing requirements and the fact that, as of the date of this letter, the Division has not received a Statement for the reservoir identified on your property. If you have diverted water in 2009, 2010, or 2011, then you have 30 days from the date that you receive this letter to file the necessary Statement(s). If your Statement(s) are not received within 30 days from the date you receive this letter, then you are subject to an additional \$500 per day potential liability for each additional day the violation continues in accordance with California Water Code section 5107 (c)(1).

The State Water Board has discretion when considering enforcement action and shall take into consideration any corrective actions taken in response to this notice in determining whether and what civil liability is appropriate for any violations. Therefore, this matter requires your immediate attention.

Your response may be one of the following:

1. If you believe you have been contacted in error, recently sold the listed property, or do not have a pond or reservoir on the identified property, please immediately contact Division staff at the number on page 3 to rectify Division records accordingly.
2. If a pond or reservoir exists on your property, but you have or are claiming an existing basis of water right, or have been filling the facility with purchased water, groundwater, or other water not subject to the State Water Board's permitting authority, you should submit any information that supports these facts to the State Water Board within 30 days of the date of this letter. You must also submit a Statement within 30 days of this letter, unless your claimed basis of right falls within one of the limited exceptions provided for in California Water Code section 5101. Division staff may schedule an inspection of the reservoir site to confirm these facts before closing the matter. For a list of frequently asked questions and additional information about water subject to the State Water Board's permitting authorities, please see:
http://www.waterboards.ca.gov/waterrights/board_info/. Or
3. If the pond or reservoir on your property does collect water subject to the State Water Board's water right permitting authority, you will need to take corrective actions to prevent continued unauthorized diversions. Corrective actions may vary, depending on site location, reservoir size and use of water, stream classification, and State laws and regulations. Normally, an unauthorized diversion can be stopped, removed, rendered incapable of storing water, or legalized through the appropriate water right permit

process. Please note that the filing of a water right application to appropriate water does not authorize diversion of water unless and until the State Water Board issues a permit for that application. Additionally, an application for water right is subject to filing and annual fees, public notice, and environmental review under the California Environmental Quality Act (CEQA). The option to file an application to appropriate water in this case may be restricted under the State Water Board's North Coast Instream Flow Policy, which was adopted May 4, 2010. This Policy guides State Water Board staff in the processing of applications based on the classification of the stream upon which the reservoir is constructed. Within 30 days of the date of this letter, you should submit a Statement to the State Water Board. Within 60 days of the date of this letter, you should submit a corrective action that identifies the action to be taken to correct the unauthorized diversion, and a schedule for completion of the corrective actions to the State Water Board.

You may want to consult with an attorney or consultant familiar with water right laws before selecting a corrective action or providing a response. The State Water Board maintains a list of attorneys and consultants on its website at:

http://www.waterboards.ca.gov/waterrights/board_info/contacts.shtml.

Additionally, Statement(s) can be filed using the form available at:

http://www.waterboards.ca.gov/waterrights/water_issues/programs/diversion_use/docs/intl_stmtnt_fm.pdf.

Information relating to the filing of a Statement, a discussion of the various types of water rights that exist in California, and the associated procedures for either obtaining a water right or documenting that a water right already exists is available on our website at:

www.waterboards.ca.gov/waterrights/.

If you have any questions, please refer to our website for general water right information, or contact the Division Enforcement Section at (916) 323-9407. Written correspondence should be addressed as follows:
