Re: Acadia National Park  
Transportation Data Collection  
Parking Data

---

Attached are parking occupancy counts collected at Acadia National Park. The data were collected by VHB during the August 5-11, 2014 site visit. Hourly parking counts were conducted each day from 8:00 am to 4:00 pm at 24 parking lots, along the roadside of Lower Mountain Road, and along the right-lane of the one-way section of Park Loop Road.

The parking data are presented separately for the parking lots and the roads. Hourly and peak occupancy counts for each day at each parking area are presented in Tables A.1 to A.8. The counts along the roads are presented in Tables B.1 to B.8.

Some general observations are as follows.

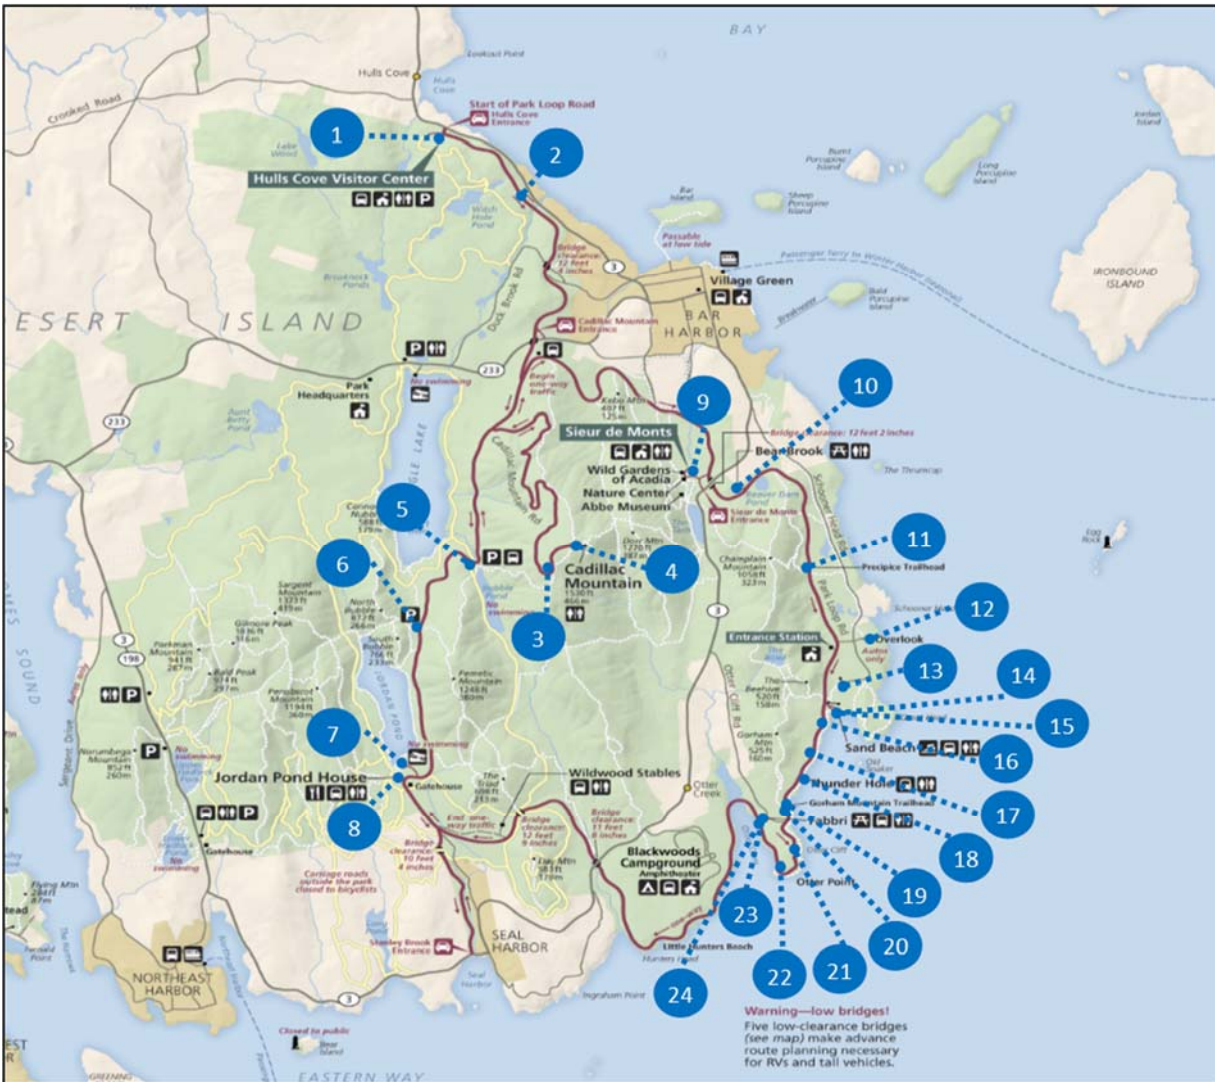

- Parking counts are lower on the Wednesday due to there being rain in the morning. Weather on the other days was generally sunny and warm, with late afternoon showers on Thursday and Friday.
- We surveyed parking occupancy in 1,232 parking spaces among 24 parking lots. At some point during the week almost every parking lot was at or above capacity.
- Only two parking lots always had more than a few empty parking spaces – Bear Brook Picnic Area (15 spaces available) and Schooner Head Overlook (18 spaces available).
- There were as many as 505 cars parked along the roads, including approximately 425 parked along the one-way section of the Park Loop Road.
- The majority of parking along the right-lane on the one-way section of the Park Loop Road occurred between Sand Beach and just prior to Gorham Mountain Trail South parking lot. As many as 275 vehicles were observed parking along this segment of the road.
