Re: Withdrawal of Claim 39-91450

Dear Ms. Logan:

The National Park Service has determined that water use from Black Falls Trading Post Well (Deadman Wash) in Wupatki National Monument was temporary in nature. The well was developed in 1963 by a contractor to provide water during construction of the Sunset Crater – Wupatki Loop Road. With this letter the NPS is hereby withdrawing claim 39-91450.

If you have any questions regarding our request please contact Bill Hansen, of my staff, at (970) 225-3532.

Sincerely,

Charles W. Pettee, Chief
Water Rights Branch

RE: STATEMENT OF CLAIMANT NO. 39

Dear: Claimant,

The Department of Water Resources has received your request to assign/amend a Statement of Claimant filed in the adjudication proceedings. The information you have supplied is **insufficient** to complete your request. **Please provide the information noted in bold below** so that we may continue to process your assignment or amendment.

Please complete the enclosed form(s) and return with all supporting documentation.

We cannot determine what Statement of Claimant is being referenced in your request. Please identify the file reference number (39-_____) of the Statement of Claimant you are assigning or amending.

All signatures must be acknowledged by a Notary Public.

Proof of ownership must be submitted with the original assignment form:
Copy of a RECORDED DEED, TAX VALUATION NOTICE, OR A TAX BILL.

Other:

Sincerely,

Lisa M. Jannusch

Re: Statement Of Claim Of Right To Use Public Waters Of The State Of Arizona – Registry No.s (to be assigned)
Statement Of Claimant Form For Other Uses Amendment – File No.s 39-89220, 39-89222, 39-91444, 39-91445, 39-91446, and 39-91447.

Dear Ms. Hanna:

Attached you will find completed water rights claim forms for Wupatki National Monument, Petrified Forest National Park, Sunset Crater National Monument, and Walnut Canyon National Monument.

"Statement Of Claim Of Right To Use Public Waters Of The State Of Arizona" forms are filed for Peshlaki and Heiser Springs in Wupatki National Monument.

"Statement Of Claimant Form For Other Uses Amendment" forms are filed to amend the claimed priority dates for Peshlaki and Hesier Springs in Wupatki National Monument. Please note the "Registry Number" referred to in Items 2, 3, and 15 must be filled in after your office has processed the "Statement Of Claim" forms and assigned a Registry Number. Amended claims are also filed to amend the quantifiable present and future administrative consumptive uses for Petrified Forest National Park, Sunset Crater National Monument, and Wupatki National Monument, and to amend the boundary description for Walnut Canyon National Monument.

Please return signed and dated copies of the processed claim forms to our office. Contact

Jim Harte (970) 225-3538 with any questions you may have regarding these claims.

Sincerely,

Charles W. Pettee
Chief, Water Rights Branch

STATEMENT OF CLAIMANT FORM
FOR
OTHER USES[1]
AMENDMENT
SUPERIOR COURT OF APACHE COUNTY

File No. 39-
Date Filed:
WFN

1. Claimant Name: United States of America c/o National Park Service (Walnut Canyon NM)
Claimant Address: 1201 Oak Ridge Dr. Suite 250 City Fort Collins
State: Colorado Zip Code 80525-5596 Telephone 970-225-3500

2. Basis of Claim:
A. ☐ Appropriation Right acquired prior to June 12, 1919. 1974 Water Rights Registration Act Registry No. _____
B. ☐ Appropriation Right acquired after June 12, 1919. Application No. _____, Permit No. _____, or Certificate of Water Right No. _____
C. ☐ Decreed water right. Principal litigants, court, date and case no. _____
D. ☐ Right to withdraw groundwater. Grandfathered Right No. _____
E. ☒ Other, describe: (see file No. 39-89220)

3. Claimed Priority Date: ____/____/____(month/day/year) (see File No. 39-89220)-

4. Use:
A. ☐ Municipal
B. ☐ Commerical or Industrial
C. ☐ Mining
D. ☐ Stockwatering other than from a stockpond
E. ☐ Recreation, Fish & Wildlife
F. ☒ Other, describe: (see file No. 39-89220)

5. Source of Water: (see file No. 39-89220)
A. ☐ Stream: name _____, tributary to _____
B. ☐ Spring: name _____, tributary to _____
C. ☐ Lake or Reservoir: name _____, tributary to _____
D. ☐ Groundwater.

6. Legal description of the Point of Diversion: (attach additional sheet if required) (see file No.39-89220)
_____ ¼, _____ ¼, _____ ¼, Section _____, Township _____N/S, Range _____E/W

7. If there are Irrigation, Domestic or Stockpond Uses also supplied from the Point of Diversion, describe: _____

8. Means of Diversion:
A. ☐ Instream pump.
B. ☐ Gravity flow into a ditch, canal or pipeline.
C. ☒ Well: Arizona Department of Water Resources Well Registration No. 55-629093
D. ☒ Other, describe: (see file No. 39-89220)

[1] *See Instructions for explanation of uses in this category*

9. Means of Conveyance:

A. ☐ Ditch, canal or pipeline. If the means of conveyance is owned and/or operated by some other entity, please give name and address: _____

B. ☒ Other, describe: (see file No. 39-89220)

10. Place of Use, if other than point of diversion: (attach additional sheet if required)

County Coconino County

Legal Subdivision	Section	Township	Range
_____	_____	_____ N/S	_____ E/W
_____	_____	_____ N/S	_____ E/W

11. Claimed Right: (see file No. 39-89220) ☐ cubic-feet per second
A. Maximum Flow Rate: _____ ☐ gallons per minute
☐ Arizona miner's inches
B. Annual Volume of Water Use: 12 acre-feet per Annum
C. Storage Right: _____ acre-feet

12. Attach photographs, maps or sketches necessary to show the point of diversion, storage resevoir(s) place(s) of use and means of conveyance.

13. It may be necessary for a representative from the Department of Water Resources to inspect the diversion, conveyance and place of use. Your signature following will grant permission to enter your property for the purpose of inspection: Signature of Claimant _____
(Chuck Pettee, Branch Chief, Water Rights Branch, National Park Service)

14. Should it be necessary for a representative of the Department to contact you as the claimant or your representative, are there any special instructions regarding time of day or address to aid in locating the specified person? Additional contacts include William Hansen (970) 225-3532 and Jim Harte (970) 225-3538.

15. Additional comments: Amends claim No.39-89220 to include Walnut Canyon National Monument boundary modification, Section 208,--P.L.104-333, 110 Stat. 4093, "Walnut Canyon National Monument Boundary Modification", November 12, 1996, published in the Federal Register and included as an attachment to this amendment.

INSTRUCTIONS

STATEMENT OF CLAIM OF RIGHT TO USE PUBLIC WATERS OF THE STATE OF ARIZONA

This claim is for surface water which is defined by statute as "the waters of all sources, flowing in streams, canyons, ravines, or other natural channels, or in a definite underground channel, whether perennial or intermittent, flood, waste or surplus water, and of lakes, ponds and springs on the surface."

The following instructions are referenced by number to the questions on the claim.

1. Complete name of claimant, current mailing address, including zip code and telephone number. If the claimant is a corporation or business, include the name of the authorizing agent.

2. Give the name of the direct source of surface water and the type of source. If known, provide the name of the drainage, creek, etc. to which the source is a tributary.

3. Describe the claimed beneficial uses including the annual quantity of use (in gallons or acre-feet for each type of use), the irrigated acreage for any claimed irrigation use and the months the water is used. A quantity of use must be provided for each beneficial use or the claim will be returned for correction. Per Arizona Revised Statute § 45-181, beneficial use includes but is not limited to, use for domestic, municipal, recreation, wildlife, including fish, agricultural, mining, stockwatering, and power purposes.

4. The date of first beneficial use must be completed or the claim will be returned for correction.

5. Provide the legal land description for the location of the claimed point of diversion from the claimed source. This location must be described to the nearest 40 acre tract (¼,¼) or other appropriate description or the claim will be returned for correction.

6. Provide the legal land description for the location of the place(s) of use. This location must be described to the nearest 40 acre tract (¼,¼) or other appropriate description or the claim will be returned for correction.

7. Provide any information you may have pertaining to the legal basis of the claim. Documentation could include affidavits, homestead documents, a notice of location, notice of appropriation, photographs, etc.

General Instructions:

1. A separate form must be filed for each claimed right to use public water.

2. A $10.00 filing fee must accompany each claim.

3. The statement of claim is a sworn affidavit. The statement of claim must be signed by the claimant(s) and must be subscribed and sworn to.

4. **The filing of a statement of claim pursuant to this article which knowingly provides for an overstatement of a right either in quantity of water or times of use claimed constitutes a class 3 misdemeanor.**

AFFIDAVIT

I, James Babbitt, being duly sworn and more than eighteen years of age, do hereby state and affirm as follows:

1. I am the a DIRECTOR of the CO Bar Ranch, located N. OF FLAGSTAFF, AZ. I have been A DIRECTOR since 1985.

2. Based on my own investigations about the history of water use on the CO Bar Ranch, I believe water from Peshlaki and Heiser Springs was first used for domestic and stockwatering purposes at the original homestead on the ranch in ~~1886~~ 1892.

3. I further believe that since ~~1886~~ 1892 water from Peshlaki and Heiser Springs has been continuously used for domestic and stockwatering purposes by CO Bar Ranch, the Navajo Nation, and the National Park Service.

James E. Babbitt
JAMES BABBITT
DIRECTOR of the CO Bar Ranch

Excepting therefrom a 50.00 foot right-of-way designated as the Walnut Creek Reservoir Pipeline right-of-way in a Quitclaim Deed from The Atchison, Topeka and Santa Fe Railway Company to Warren Stanley Smith, et ux. as recorded in Docket No. 1259, page 512 of the deed records of Coconino County.

The above-described parcel, known as Tract 01-106 and 01-116 of Walnut Canyon National Monument contains a total of 547.00 acres of land, more or less.

JUL-27-1998 13:42 SANTA FE FIELD SOLICITOR 505 9886217 P.02/03

"(d) To further the purposes of the monument, the Secretary is also authorized to acquire from willing sellers only, by donation, purchase with donated or appropriated funds, or exchange not to exceed 65 acres outside the boundary depicted on the map referred to in section 301 and develop and operate thereon research, information, interpretive, and administrative facilities. Lands acquired and facilities developed pursuant to this subsection shall by administered by the Secretary as part of the monument. The boundary of the monument shall be modified to include the lands added under this subsection as a non-contiguous parcel.".

SEC. 207. WUPATKI NATIONAL MONUMENT BOUNDARY ADJUSTMENT. 16 USC 431 note.

The boundaries of the Wupatki National Monument, Arizona, are hereby revised to include the lands and interests in lands within the area generally depicted as "Proposed Addition 168.89 Acres" on the map entitled "Boundary—Wupatki and Sunset Crater National Monuments, Arizona", numbered 322–80,021, and dated April 1989. The map shall be on file and available for public inspection in the Office of the National Park Service, Department of the Interior. Subject to valid existing rights, Federal lands and interests therein within the area added to the monument by this section are hereby transferred without monetary consideration or reimbursement to the administrative jurisdiction of the National Park Service, to be administered as part of the monument in accordance with the laws and regulations applicable thereto.

SEC. 208. WALNUT CANYON NATIONAL MONUMENT BOUNDARY MODIFICATION. 16 USC 431 note.

(a) PURPOSE.—The purpose of this section is to modify the boundaries of the Walnut Canyon National Monument (hereafter in this section referred to as the "national monument") to improve management of the national monument and associated resources.

(b) BOUNDARY MODIFICATION.—Effective on the date of enactment of this Act, the boundaries of the national monument shall be modified as depicted on the map entitled "Boundary Proposal—Walnut Canyon National Monument, Coconino County, Arizona", numbered 360/80,010, and dated September 1994. Such map shall be on file and available for public inspection in the offices of the Director of the National Park Service, Department of the Interior. The Secretary of the Interior, in consultation with the Secretary of Agriculture, is authorized to make technical and clerical corrections to such map.

(c) ACQUISITION AND TRANSFER OF PROPERTY.—The Secretary of the Interior is authorized to acquire lands and interest in lands within the national monument, by donation, purchase with donated or appropriated funds, or exchange. Federal property within the boundaries of the national monument (as modified by this section) is hereby transferred to the administrative jurisdiction of the Secretary of the Interior for management as part of the national monument. Federal property excluded from the monument pursuant to the boundary modification under subsection (b) is hereby transferred to the administrative jurisdiction of the Secretary of Agriculture to be managed as a part of the Coconino National Forest.

(d) ADMINISTRATION.—The Secretary of the Interior, acting through the Director of the National Park Service, shall manage the national monument in accordance with this title and the provisions of law generally applicable to units of the National Park Service, including "An Act to establish a National Park Service,

110 STAT. 4093
NOV. 12, 1996

NOV-27-1999 13:43 SANTA FE FIELD SOLICITOR 505 9886217 P.03/03

and for other purposes" approved August 25, 1916 (39 Stat. 535; 16 U.S.C. 1, 2–4).

(e) AUTHORIZATION OF APPROPRIATIONS.—There are hereby authorized to be appropriated such sums as may be necessary to carry out this section.

SEC. 209. BUTTE COUNTY, CALIFORNIA LAND CONVEYANCE.

(a) PURPOSE.—It is the purpose of this section to authorize and direct the Secretary of Agriculture to convey, without consideration, certain lands in Butte County, California, to persons claiming to have been deprived of title to such lands.

(b) DEFINITIONS.—For the purpose of this section:

(1) The term "affected lands" means those Federal lands located in the Plumas National Forest in Butte County, California, in sections 11, 12, 13, and 14, township 21 north, range 5 East, Mount Diablo Meridian, as described by the dependent resurvey by the Bureau of Land Management conducted in 1992, and subsequent Forest Service land line location surveys, including all adjoining parcels where the property line as identified by the 1992 BLM dependent resurvey and National Forest boundary lines before such dependent resurvey are not coincident.

(2) The term "claimant" means an owner of real property in Butte County, California, whose real property adjoins Plumas National Forest lands described in paragraph (1), who claims to have been deprived by the United States of title to property as a result of previous erroneous surveys.

(3) The terms "Secretary" means the Secretary of Agriculture.

(c) CONVEYANCE OF LANDS.—Notwithstanding any other provision of law, the Secretary is authorized and directed to convey, without consideration, all right, title, and interest of the United States in and to affected lands as described in subsection (b)(1), to any claimant or claimants, upon proper application from such claimant or claimants, as provided in subsection (d).

(d) NOTIFICATION.—Not later than 2 years after the date of enactment of this Act, claimants shall notify the Secretary, through the Forest Supervisor of the Plumas National Forest, in writing of their claim to affected lands. Such claim shall be accompanied by—

(1) a description of the affected lands claimed;

(2) information relating to the claim of ownership of such lands; and

(3) such other information as the Secretary may require.

(e) ISSUANCE OF DEED.—(1) Upon a determination by the Secretary that issuance of a deed for affected lands is consistent with the purpose and requirements of this section, the Secretary shall issue a quit claim deed to such claimant for the parcel to be conveyed.

(2) Prior to the issuance of any such deed as provided in paragraph (1), the Secretary shall ensure that—

(A) the parcel or parcels to be conveyed have been surveyed in accordance with the Memorandum of Understanding between the Forest Service and the Bureau of Land Management, dated November 11, 1989;

(B) all new property lines established by such surveys have been monumented and marked; and

TOTAL P.03

the proposed projects will be implemented. He will document the decision and reasons for the decision in the Record of Decision. That decision will be subject to Forest Service Appeal Regulations (36 CFR part 215).

Dated: August 17, 1998.

BILLING CODE 3410–11–M

DEPARTMENT OF AGRICULTURE

Forest Service

DEPARTMENT OF THE INTERIOR

National Park Service

USDA, Forest Service, USDI, National Park Service; Notice of Transfer of Administrative Jurisdiction, Coconino National Forest and Walnut Canyon National Monument

SUMMARY: The Forest Service previously had administrative jurisdiction over 1,279 acres, more or less, as depicted on the map entitled, "Boundary Proposal—Walnut Canyon National Monument," numbered 360/80,010, and dated September 1994. The National Park Service formerly had administrative jurisdiction on 54 acres, more or less, as shown on the same map. Notice is hereby given that, pursuant to the provisions of Section 208 of Pub. L. 104–333, 110 Stat. 4093, administrative jurisdiction on the 1,279 acres is now in the National Park Service, and administrative jurisdiction on the 54 acres is now in the Forest Service. Both transfers are subject to prior existing rights and applicable laws and regulations. The specific lands and/or interests, subject to this notice, include both the surface and minerals on 1,279 acres, more or less, and 54 acres, more or less.

SUPPLEMENTARY INFORMATION: The maps and other documents associated with this transfer of lands and minerals may be reviewed at the Intermountain Land Resources Program Center, 1220 South St. Francis Drive, Santa Fe, New Mexico 87504, and at Walnut Canyon National Monument Headquarters, 6400 North Highway 89, Flagstaff, Arizona 86004. The same materials are available at the USDA, Forest Service, Regional Office, 517 Gold Avenue, SW, Albuquerque, New Mexico 87102, and Coconino National Forest, 2323 Greenlaw Lane, Flagstaff, Arizona 86004.

Dated: May 5, 1998.

Eleanor Towns,

Regional Forester, USDA, Forest Service, Region 3.

Dated: July 17, 1998.

John E. Cook,

Regional Director, Intermountain Region, National Park Service.

Title: Approval of Triangular Involving Commodities Covered by a U.S. Import Certificate.

Agency Form Number: None.

OMB Approval Number: 0694–0009.

Type of Request: Extension of a currently approved collection of information.

Burden: 1 hour.

Average Time Per Response: 30 minutes per response.

Number of Respondents: 1.

Needs and Uses: The triangular symbol will be stamped on the certificate as notification to the government of the exporting country that the U.S. importer is uncertain whether the items will be imported into the U.S. or knows that the items will not be imported into the U.S., but that, in any case, the items will not be delivered to any other destination except in accordance with the EAR. This procedure was developed in an effort to increase the effectiveness of controls over international trade in strategic commodities, ensuring that they will not be delivered to any other destination except in accordance with export control regulations.

Affected Public: Individuals, businesses or other for-profit institutions.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Victoria Baecher-Wassmer (202) 395–5871.

Copies of the above information collection proposal can be obtained by calling or writing Linda Engelmeier, DOC Forms Clearance Officer, (202) 482–3272, Department of Commerce, Room 5327, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to Victoria Baecher-Wassmer, OMB Desk Officer, Room 10202, New Executive Office Building, Washington, DC 20230.

Dated: August 18, 1998.

Linda Engelmeier,

Departmental Forms Clearance Officer, Office of the Chief Information Officer.

[FR Doc. 98–22726 Filed 8–24–98; 8:45 a.m.]

BILLING CODE 3510–33–P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce (DOC) has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 USC Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Northeast Region—Gear Identification Requirements.

Agency Form Number(s): None.

OMB Approval Number: None.

Type of Request: New collection.

Burden: 24,518 hours.

Number of Respondents: 3,253 (multiple requirements).

Avg. Hours Per Response: One minute to mark gear.

Needs and Uses: This collection is under the authority of the Magnuson-Stevens Fishery Conservation and Management Act. The regulations specify that federal permit holders using specified fishing gear be marked with the vessels official identification number, Federal permit number, tag number, or some other specified form of identification. The regulations further specify how the gear is to be marked (e.g., location and visibility). This information is used for enforcement purposes and for the identification of gear concerning damage loss or civil proceedings.

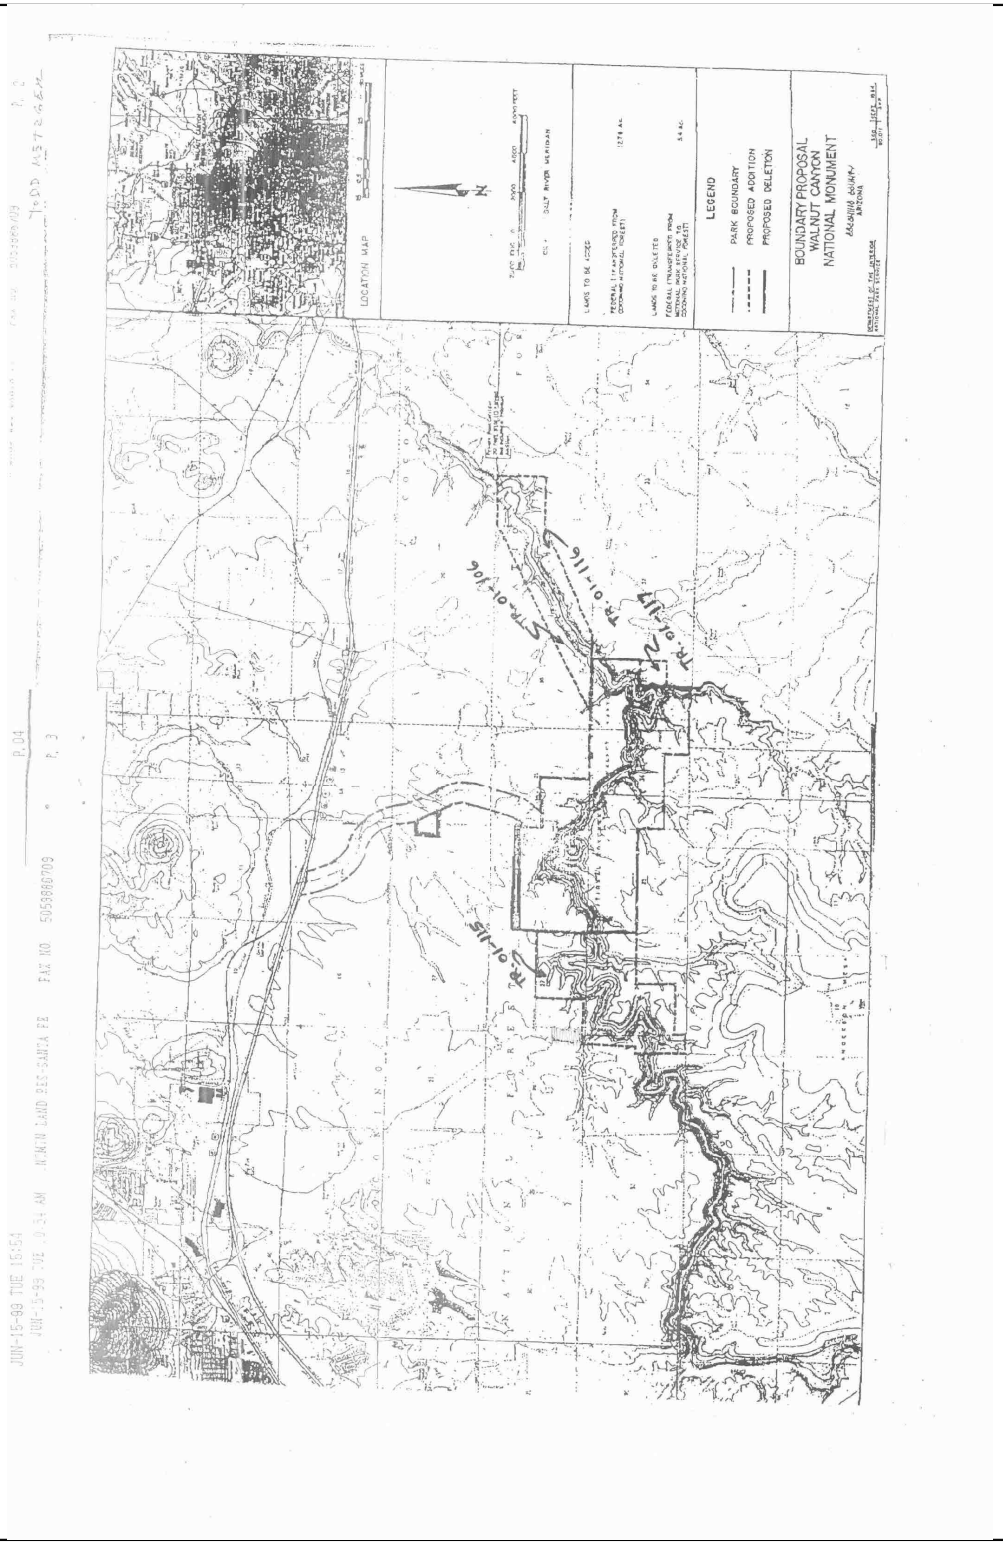

Affected Public: Businesses or other for-profit organization, individuals.

Frequency: Recordkeeping.

Respondent's Obligation: Mandatory.

OMB Desk Officer: David Rostker, (202) 395–3897.

Copies of the above information collection proposal can be obtained by calling or writing Linda Engelmeier, DOC Forms Clearance Officer, (202) 482–3272, Department of Commerce,

Memorandum

To: Director

From: Regional Director

Subject: Special Use Permit 14-10-0333-999, Black Falls Trading Post, Paul E. Knee, Wupatki National Monument

Mr. Lee's memorandum of April 25 enclosed copies of correspondence from Senator Barry Goldwater and Mr. Knee relating to the Black Falls Trading Post, Wupatki National Monument.

The Black Falls Trading Post occupies about 1 acre of land in the $SE^{\frac{1}{4}}SE^{\frac{1}{4}}$ of Section 2, T. 25 N., R. 10 E., Wupatki National Monument. It was formerly state land and under the terms of the original state lease the permittee had 90 days to remove the buildings after title to the land passed to the United States.

Soon after we acquired the title to the land because the Navajos desired service, our Service issued a special use permit for the continued occupancy of the land and trading post and there has been a succession of permittees over the years until Mr. Knee acquired interest in the trading post from Mr. Edward J. Bergman on or about January 1, 1957.

The first permit issued by this Service to Mr. Knee was in January, 1957, and covered a two-year period. This permit, which expired December 31, 1959, had no restrictions.

In July-September 1959, Superintendent Mahan began receiving complaints from local Navajos regarding the treatment they received at the trading post from Mr. Knee. There was alleged misplacement of Indian pawn which was not satisfactorily explained but our files indicate that no formal complaints against Mr. Knee were registered with either representatives of the Navajo Tribe or the Bureau of Indian Affairs until August 18, 1960, when Eugene Hinds, Supervisory Soil Conservationist, Leupp, Arizona advised the Superintendent, Tuba City Sub-agency, of alleged dissatisfaction. At that time several persons also registered complaints with Mr. Paul Jones, Chairman of the Navajo Tribed, Window Rock.

Memorandum

To: Assistant to the Secretary Orren Beaty, Jr.

From: ACTING ASSISTANT DIRECTOR

Subject: Operation of Black Falls Trading Post, Wupatki National Monument

This is in response to your communication of February 8 relating to Mr. Paul Knee's operation of the Black Falls Trading Post, Wupatki National Monument, Arizona.

Mr. Knee acquired his interest in the trading post in January 1957, and a special use permit to operate the facility was issued by the Service. As is the case with all permits issued by the National Park Service, the permit under which Mr. Knee has operated the trading post in the past conferred operating privileges only and vested no property interest in the land or improvements in the permittee. The permit provided that the permittee could remove any improvements owned by him within 90 days after termination of the permit; otherwise they would become the property of the United States.

Prior to Mr. Knee's operation of the facility in 1957 there is no record or recollection of any dissension or difficulty with neighboring Navajos or National Park Service officials in relation to the operation of the post. However, Paul Knee has been a source of dissension and discredit to this Service from the outset of his operation and management of the post because of his abusive behavior with the Navajos, poor upkeep of the premises, and frequent drunkenness. The sale of alcoholic beverages has never been allowed at the post, and our field people advise that Mr. Knee has sold it under the counter to the Indians. Unfortunately, that is a point which we cannot prove. Because of these difficulties Mr. Knee's permit was renewed in March 1960 with a restriction against the sale of alcoholic beverages. This permit expired on December 31, 1962, and Mr. Knee has made no effort to remove improvements, although notice to do so was given him. The post has not been operating since that time and is in a shambles. Since that time Mr. Knee has with regularity communicated with the Department and Members of Congress to have the intoxicating beverage restriction removed from the permit

before he will accept a renewal of it. We have refused to allow such sale as in the best interest of our administration of the National Monument and in concurrence with the wishes of the Navajo officials, as alcoholic beverages are not sold on the reservation a mile away.

The road leading to the trading post is a sparsely used, minimum type, graded natural material road. When visitors and Indians use the road it is necessary to maintain it by running a grader over it about four times a year. As in the past, the road presently is used primarily by the Navajos to cross the Little Colorado River to reach Highway 89 in the western part of the Monument. Mr. Bulow is quite right in stating that the road should be maintained for the convenience of the Navajos. This is precisely what we are doing now and plan to continue doing as the Service enjoys a very fine relationship with the Indians.

There are few ruins in the trading post area to attract visitors, and since prime ruins are located on better and more easily accessible roads elsewhere in the Monument, visitor demand for the use of the road is little and would be virtually nonexistent if the post were not there.

If visitor use of the road can be completely terminated and its use more or less restricted to Indians only, there would be less need for repair, and maintenance would amount to about two gradings a year instead of four.

The operation of the trading post is marginal at best, and profits cannot be realized without the sale of intoxicating beverages. No benefit derives from the continued operation of the trading post, and we believe its existence only serves as an affront to the integrity of the National Park Service. In the circumstances, we feel that we must maintain our position that the best interest of the United States and the visiting public would be served by the demolition of the Black Falls Trading Post. Mr. Knee's former attorney, Mr. Dempsey, was so advised in this Department's letter of December 8, 1964.

The enclosures accompanying your note are returned.

10-22-1964: memorandum to superintendent, wupatki from regional director regarding data of establishment, black falls trading po

Southwest Region
Santa Fe, New Mexico
OCT 22 1964

L3035
Black Falls

Memorandum October 7, 1964

To: Superintendent, Wupatki

From: Regional Director

Subject: Data of Establishment, Black Falls Trading Post, Wupatki

Under separate cover we have mailed you a copy of my memorandum of October 22 transmitting a joint report on the Black Falls Trading Post prepared by Messrs. Kell and Williams of this office.

We have enclosed a copy of a letter of October 16 and a note of October 19 from Ned Denson relating to the establishment of Black Falls Trading Post. Our best evidence thus far indicates the trading post was established in 1940 or 1941 although Denson's note of October 19 suggests the trading post was built around 1938.

Mr. Pomeroy's letter of September 16 to Assistant Secretary Carver, second page, paragraph 1, says, "This building was originally built on Hopi tribal land and did not become a part of the National Monument until years after it was first built." It is imperative that we pin down, if possible, the month and year the trading post was built. As long as Emmett Kellam is near you at Cameron, we think you should immediately obtain the requested statement from Mr. Kellam so that we can make a proper reply to Mr. Pomeroy.

The area including the trading post was added to Wupatki National Monument by Proclamation No. 2245 of July 9, 1937. The state exchange as you know, was acquired by deed of December 18, 1948 and accepted May 9, 1949. The requested statement from Mr. Kellam should establish the date the trading post was built.

Memorandum

To: Regional Director, Southwest Region

From: Superintendent, Wupatki-Sunset Crater

Subject: Black Falls Trading Post

Attached hereto is a list of items gleaned from old Monthly Narrative Reports by Archeologist Morris, many of which have a bearing on the establishment and operation of the Black Falls Trading Post.

This should answer some of the questions posed in Mr. Miller's memorandums of September 25th to the State Land Commissioner and the Bureau of Land Management.

Mr. Emmett Kellam, original operator of the Post is still in the country and we will try to contact him within the next week to supplement this information.

Mention of Black Falls in connection with filming of Navajoes

COPY

Following is a synopsis of material relating to Black Falls Trading Post found in Monthly Narrative Report from June, 1936 through December, 1955.

June 23, 1936 - About Navahoes

"Several Soil Conservation men have tole (sic) us that the Indians in Wupatki Basin are as primitive as any on the reservation. This is probably due to three things. . . (2) The great distance from the nearest trading store (40 miles);"

May 24, 1940

First mention of the Black Falls Irrigation Project

June 23, 1940

"The Navajo Service engineering crew completed their survey of the Black Falls dam site on the 18th. This project will not effect any of the lands within the Monument, but it has been suggested that our boundary along the Little Colorado be fenced to prevent Navajo sheep from straying across the river to this area.

July 24, 1940

Further mention of the Black Falls Irrigation Project

August 26, 1940

Further mention of the Black Falls Irrigation Project

September 25, 1940

Further mention of the Black Falls Irrigation Project

November 24, 1940

Further mention of the Black Falls Irrigation Project

April 24, 1941 - Administrative

"A trading post is being built on state owned lands within the boundaries near the Little Colorado river. Emmett Kellum, formerly with the Indian Service, is the owner and plans to do business with the Navajos employed on the Black Falls Irrigation Project. A camp for the Navajos has been established on the other side of the river and at present the irrigation ditches are being excavated."

COPY

August 28, 1941

Mention of Black Falls in connection with riding of Navajoes

November 25, 1941 - General

"Emmett Kellum, who owns the trading post on the monument near Black Falls, has purchased the one established by the Taylors on the reservation side of the Little Colorado. He is now running both of them to see which is the best business location. My guess is that he will maintain the one on the monument.

February 22, 1942

Further mention of the Black Falls Irrigation Project

June 25, 1942 - Black Falls Irrigation Project

"The floodwater irrigation project is being abondoned (sic) for the present due to the fact that additional CCC-ID funds are not available. The diversion dam is completed and the greater portion of the canal has been dug and a few headgates installed. However, there are no laterals and unless the individual Navajos want to dig their own laterals the area cannot be used for farming. Indian trader Kellum is somewhat concerned, as the families which would have furnished him a good business cannot settle along the river until the project is completed."

Mr. Tom Hagan
P.O. Box 5
Flagstaff, Arizona

Dear Mr. Hagan:

On July 29, 1963 our office issued Special Use Permit No. 14-10-0333-1116 covering approximately one acre of land in the NE¼SE¼ of Section 2, T. 25 N., R. 10 E., Wupatki National Monument, for the purpose of operating the Black Falls Trading Post which you purchased from Mr. Paul Knee in 1963. This permit expired December 31, 1963 and has not been renewed.

We have enclosed a copy of a letter dated August 21, 1964 addressed to Mr. Knee. Since the trading post has not been in operation for more than a year and since your permit expired December 31, 1963 we must consider that the trading post has been abandoned and steps will be taken to dispose of the improvements on the land in accordance with Special Condition No. 7 of the permit.

You will be granted a period of thirty (30) days from the date of receipt of this letter to remove any personal property you may have at the Black Falls Trading Post. If the personal property is not removed within a thirty (30) day period any personal property remaining on the premises will be considered abandoned. Title 36 CFR 1.5 prohibits the abandonment of any personal property in any park or monument.

Sincerely,

SIGNED

George W. Miller

ENLARGING THE WUPATKI NATIONAL MONUMENT—ARIZONA

DEED 1
19,882.37
ACRES

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION NO. 2243

WHEREAS certain land contiguous to the Wupatki National Monument, established by Proclamation of December 9, 1924 (43 Stat. 1977), have situated thereon prehistoric and archaeological ruins of historic and scientific interest; and

WHEREAS there are other lands contiguous to the said Monument which are necessary for the proper care, management, and protection of the prehistoric ruins situated on the lands now included in the aforesaid Monument and on the additional lands above referred to; and

WHEREAS it appears that it would be in the public interest to reserve such lands as an addition to the Wupatki National Monument:

NOW, THEREFORE, I, FRANKLIN D. ROOSEVELT, President of the United States of America, under and by virtue of the authority vested in me by section 2 of the act of June 8, 1906, ch. 3060, 34 Stat. 225 (U.S.C., title 16, sec. 431), do proclaim that, subject to the withdrawal made by order of the Secretary of the Interior of July 9, 1934, in aid of the consolidations authorized by the act of June 14, 1934, ch. 521, 48 Stat. 960, and subject to all valid existing rights, the following-described lands in Arizona are hereby reserved and added to and made a part of the Wupatki National Monument:

Memorandum

To: Superintendent, Wupatki

From: Acting Regional Director

Subject: Black Falls Trading Post Operations

Reference your memorandum of June 27 on the same subject.

In any negotiations concerning water rights in Arizona we should remember that the law of prior appropriation always applies. There are certain stipulations in Chapter 75, Article I, Arizona Code Annotated, dated 1939 which applies to application and perfection of water rights. The gist of these is that the water belongs to the public and is subject to appropriation and beneficial use by anyone who follows correct filing procedures. As of this time, because we have not filed on nor used the water in question, we do not now have a valid water right.

In your discussion with Mr. Hagan we think it advisable to call his attention to items 7 and 8 of the permit. We suggest in addition the following stipulation in the Special Use Permit: "The Permittee will be allowed to utilize a water source within the boundaries of Wupatki National Monument. The water right will be filed by the United States of America and nothing herein shall be construed to grant any right, title or interest in said water right to the permittee. Plans of the installation including pump, supply line and storage tanks will be approved by the National Park Service prior to the construction. Any structures and improvements placed upon any lands within the Monument for the purpose of transporting the water described above to the premises shall be subject to the right of the permittee to move the structures and improvements as set forth in condition No. 7 in this permit. Nothing herein constitutes a waiver of any right to any source of water which the United States of America may have." You should then caution Mr. Hagen that the water system cannot be constructed until approval of our right is received from the State Land Commission.

We feel that if this statement is incorporated in the Special Use Permit, the needs of Mr. Hagen will be satisfied and our rights to the water will be protected. As soon as possible this office will make the necessary filings to the State Land Commissioner so that the water right will be in the name of the United States of America and any beneficial use therefrom will be to our advantage.

If we can be of future assistance in this matter do not hesitate to call.

APR 26 1958

Memorandum

To: Regional Director, Region Three

From: Acting Chief of Land Planning

Subject: Acquisition of land in Wupatki National Monument

There are attached three copies of form NPS-L-1 relating to an acquisition of land in Wupatki National Monument.

This land, 7,289.34 acres, was acquired in part by exchange under Section 8 of the Taylor Grazing Act and in part by Bureau of Land Management Clear Lists. Copies of the deed and various Clear Lists have been placed in the National Park Service files, and have been designated as Wupatki National Monument, Deed No. 5.

Will you please have entered upon the three copies of the form the estimated value, the physical characteristics, the improvements on the land at the time of acquisition, existing reservations, easements or rights, if any, and return the original to this Office.

03-21-1952: memorandum to director from chief counsel regarding ownership of improvements erected by e.a. kellam

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
WASHINGTON 25, D. C.

In reply refer to: L2219 NUPA-C

Memorandum

MAR 21 1952

To: Director

From: Chief Counsel

Subject: Ownership of Improvements Erected by Emmett A. Kellam in Wupatki National Monument

Consideration has been given to the question of the ownership of certain buildings erected and used as a trading post by Emmett A. Kellam on former State-owned lands within Wupatki National Monument which were acquired by the United States upon approval of State Indemnity application, Phoenix 060718. As shown by Custodian Jones' memorandum of August 14, 1946, the Kellam trading post then consisted of a small store, a small house, a stock corral, and a cow shed.

Although the question of the ownership of the Kellam improvements arose some years ago, consideration of the problem has been deferred pending the time when title to the former State-owned lands upon which the trading post is situated should become vested in the United States. In this connection, it should be noted that the SE¼ SE¼ of Section 2, T. 25 N., R. 10 E., which includes the approximately one acre of land on which the Kellam trading post is situated, was included as base in Arizona Indemnity School Land Selections--Clear List No. 227, approved November 2, 1949. It is apparent, therefore, that title to the land became vested in the United States as of November 2, 1949. See 40 L. D. 444, 46 L. D. 27, 48 L. D. 114, 19 Comp. Gen. 222, 225.

A review of the files discloses pertinent facts with respect to this matter. The first indication of Kellam's occupancy of a portion of the land now comprising a part of the Monument came in November 1943. The Regional Director reported that when the State of Arizona proffered the land on which the trading post was located as base for Federal lieu land, it overlooked the fact that it had on April 5, 1941, leased the land to Emmett A. Kellam for a period of five years. The Regional Director, assuming that the exchange had been effected, proposed the issuance of a special use permit to Mr. Kellam. (Regional Director's memorandum of November 11, 1943, attached to which was the original of the

lease.) The Acting Director's reply of December 18, 1943, informed the Regional Director that official notice of the consummation of the exchange had not been received from the then General Land Office.

On December 16, 1943, the then General Land Office was advised of the existence of the lease and was asked whether such lease was taken into consideration in consummating the exchange. A reply to this inquiry apparently was never received. Also, a recent review of the records of the Bureau of Land Management relating to the land concerned does not indicate that consideration was given to the lease. On the contrary, it appears that the exchange was effected purely on an acreage basis without regard to any improvements on the base land.

The Chief, Concessions Division, Region Three, wrote to the Director on August 29, 1946, about granting a permit and referred to a memorandum of August 14, 1946, from the Custodian concerning Mr. Kellam's anxiety regarding a permit and his right to sell the buildings erected by him. Again the Region was advised that notice of consummation of the exchange had not been received.

A memorandum of March 6, 1947, from the Acting Director to the Bureau of Land Management asked if the Bureau objected to the issuance of a permit prior to the time the land exchange was consummated. The Bureau's reply of April 18, 1947, pointed out that the State's deed had not been accepted, nor had the exchange been consummated, and that title to the proffered base lands would not vest in the Government until the Department's final approval of the selection. The Bureau's position was explained to the Regional Director in a memorandum of May 12, 1947, and it was requested that Custodian Jones advise Mr. Kellam informally concerning the reason why a permit could not be issued to him at that time.

There is a general rule of law that permanent improvements placed on the land of another become a part of the realty and the property of the owner of the fee. This rule may be rendered inapplicable, however, by an agreement between the parties.

A discussion of the terms of the lease entered into between the State of Arizona and Emmett A. Kellam, and of the statutes of the State governing such leases is helpful to a complete understanding of the problem. The lease for one acre of State land within SE¼ SE¼ of Section 2, T. 25 N., R. 10 E., was

executed on April 5, 1941, to cover the five-year period ending April 4, 1946. Pertinent paragraphs of the lease are as follows:

"That the lessor saves and reserves the right to relinquish to the Federal Government, at any time, the State's right or claim to any part of the land described herein." (Paragraph (H).)

"That the State of Arizona shall be forever wholly absolved from any liability for damages which might result to the lessee herein on account of this lease having been cancelled, forfeited, or terminated prior to the expiration of the full time for which it is issued." (Paragraph (J).)

"If the lessee desires to place improvements on the land described herein the approval of the State Land Commissioner must first be obtained." (Paragraph (N).)

"That if at any time after the execution of this lease, it is shown to the satisfaction of the State Land Commissioner, that the lessee herein has misrepresented, by implication or otherwise, the value of the improvements placed upon the land herein embraced, by a former lessee, or any other person or persons and the lessee herein not being the owner of said improvements at the time of the execution of this lease, this lease shall be null and void, at the option of the State Land Commissioner, in so far as it relates to the land upon which said improvements are situated." (Paragraph (Q).) (Emphasis supplied.)

"This lease is executed, without appraisement, at the request of the lessee upon the condition that lessee will pay such a rental as may be fixed by the State Land Commissioner based upon a reappraisement made during the term hereof, from time so fixed and that he will pay in accordance with the provisions of law for any improvements placed upon said land by a prior lessee thereof or surrender premises leased." (Paragraph (K).) (Emphasis supplied.)

Under further provisions of the lease it is agreed: "The terms, conditions and covenants of this lease are subject to present laws relating to State lands * * * and no provisions of this lease shall create any vested right in either party hereto."

Therefore, while the lease does not expressly cover the ownership of improvements placed upon the State land by the lessee, paragraphs (G) and (K), particularly, when read in the light of the Arizona statutes hereinafter mentioned, indicate that he had certain rights in the improvements which he could alienate to a subsequent lessee. The State Constitution assures that such lessees shall be protected in their rights to their improvements and implementing statutes have been enacted. The Constitution provides:

> "The legislature shall provide by proper laws for the sale of all state lands or the lease of such lands, and shall further provide by said laws for the protection of the actual bona fide residents and lessees of said lands, whereby such residents and lessees of said lands shall be protected in their rights to their improvements (including water rights) in such manner that in case of lease to other parties the former lessee shall be paid by the succeeding lessee the value of such improvements and rights * * *." (Underscoring supplied.) Arizona Const., Art. 10, Sec. 10.

Chapter 11 of the Arizona Code annotated, 1939, dealing with the Public Lands of the State, contains a number of sections designed to afford a measure of protection to lessees who place improvements upon State lands. The term "improvements" as used in this Chapter is defined in Section 11-101 as "anything permanent in character, the result of labor or capital expended on State land in its reclamation or development, and the appropriation of water thereon, which has enhanced the value of the same, * * *." Section 11-312 provides that leases shall be cancelled only after a public hearing. It further provides that the improvements shall be forfeited to the State if the lease was procured through fraud, deceit, or willful misrepresentation; but should the lease be cancelled for any other reason, the lessee shall be permitted to remove his improvements at any time within 60 days.

Section 11-315 provides as follows:

> "Improvements - Taxation - Removal. - All improvements placed upon State lands, shall, until they become the property of the State, be subject to assessments for taxes, in the name of the owner, as other property. The lessee, within sixty (60) days prior to, or ninety (90) days following the expiration of his lease, may remove from the land the removable improvements belonging to him and the removal of which will not injure

the land. Wells, embankments or dams, designed for the development, storage or conservation of water, shall not be taken away, destroyed or injured, but shall remain as appurtenant to the land, to be removed, destroyed or altered only by the authority of the Commissioner. The retiring lessee may, with the written consent of the Commissioner, and within the time for removal, sell his improvements to the succeeding lessee. Every lessee shall, on or before the first day of July of each year, file with the Commissioner, a sworn statement, setting forth therein the character of improvements and the actual cash value thereof. (Laws 1915 (2nd S. S.), ch. 5, secs. 39, 41, p. 13; 1921, ch. 79, sec. 3, p. 153; cons. & rev., R. C. 1926, sec. 2975.)" (Emphasis supplied.)

In Section 11-316 provision is made whereby the lessee of State lands shall be reimbursed by a succeeding lessee for improvements which are not removable. Should they fail to agree on the value of such improvements, either party may apply to the State Land Commissioner for an appraisal, the amount of which, when so established, shall be paid in accordance with specific terms set out in the section.

In addition, Chapter 11 affords protection to the owners of improvements located on those State lands which are offered for sale. Section 11-413 provides that where State lands are offered for sale to someone other than the owner of the improvements, the owner thereof who is entitled to be compensated shall receive the appraised value of his improvements. Provision is made whereby the purchaser may, under given circumstances, pay by installments and the State will make advances of the unpaid balance to the owner.

Applying the provisions of the lease and the State statutes which govern the situation, we find that Mr. Kellam placed the improvements in question on the former State-owned land in circumstances which accorded to him a right (1) to remove the improvements within sixty days prior to or ninety days following the expiration of the term of his lease from the State, or (2) sell his improvements to a succeeding lessee, or (3) to receive compensation for such improvements in the event of the sale of the land by the State. By its terms the Kellam lease expired on April 4, 1946. Mr. Kellam remained in possession of the premises, however, and so far as disclosed by the record, the State made no demand on him for the surrender of possession or for the payment of rental. The State's apparent failure to re-enter the premises or to enter into a new lease

agreement with Mr. Kellam undoubtedly is traceable to the fact that the State believed that it had lost control of the land by virtue of its exchange deed, recorded in Coconino County on December 9, 1942, by which it attempted to convey the affected lands, among others, to the United States in connection with the State's then pending exchange application. In the circumstances, and by virtue of Mr. Kellam's having remained in possession of the property after April 4, 1946, he thereupon became a tenant by sufferance. See Tiffany, Real Property, 3rd ed., sec. 174. As we view the matter, Mr. Kellam's continued occupancy of the property as a tenant by sufferance operated to suspend the running of the ninety-day period allowed by State statute in which to remove his improvements or to dispose of them to a successor lessee.

It is our opinion that the same conditions obtained at the time the title to the affected land became vested in the United States on November 2, 1949, the date of approval of the State's Indemnity School Land Selection. As a consequence, the United States acquired title to the land subject to the rights accorded Mr. Kellam by State law to remove his improvements therefrom within the prescribed period, to obtain reimbursement therefor, or to be compensated for the improvements at the time of the sale of the land. At all times subsequent to November 2, 1949, the effective date as of which the United States succeeded the State of Arizona in the ownership of the land, Mr. Kellam has been a tenant by sufferance of the United States under virtually the same conditions which were applicable during the time he held the land as a tenant of the State.

In view of the foregoing, we see no objection from a legal standpoint to recognizing the continuance of those rights in the improvements which were conferred upon Mr. Kellam under the terms of the expired lease agreement and applicable laws of Arizona. To hold otherwise would be unconscionable and would disregard the efforts made by Mr. Kellam to safeguard and preserve his interest in the improvements placed by him upon the land. These efforts began as early as 1943, following the execution of the deed by the State proffering the affected land to the United States, when Mr. Kellam expressed a desire to obtain a special use or concession permit from this Service allowing him to continue operating the trading post. Again, some time prior to August 14, 1946, Mr. Kellam expressed concern over the matter and asked whether he might not enter into some arrangement allowing him to continue to operate the trading post. This action on the part of Mr. Kellam

clearly negatives any intention on his part to abandon or surrender his rights in the improvements and demonstrates that he did everything which might reasonably be expected of him to preserve and protect his rights.

Moreover, to hold at this time that these improvements have become the property of the United States on the basis that they are affixed to the land and constitute a part of the realty would, in effect, result in unjust enrichment to the United States to the extent of the value of the improvements, since the record shows that the State exchange was effected wholly on an acreage basis and without regard to the value of any improvements on the base land. Administratively, it would appear to be more advantageous to the Government if the improvements are deemed to be subject to removal by Mr. Kellam since they have no value for monument purposes and if not ultimately removed by Mr. Kellam, their removal in all probability would have to be accomplished at Government expense.

In the light of all the circumstances, we know of no objection to the issuance of a business concession permit to Mr. Kellam at this time allowing him to continue to operate the trading post, the fee to be charged therefor to be based solely on the value of the use of the land without regard to the buildings and structures thereon. If such a permit is to be issued, there should be included, in addition to the usual provision concerning buildings or structures which may subsequently be erected under the permit, a provision expressly recognizing Mr. Kellam's rights of ownership in the existing buildings and structures. In keeping with such recognition, there should also be included in any concession permit issued to Mr. Kellam provisions to the effect that in the event a new permit is not given to him upon expiration of the permit now proposed, he may, within three months of such expiration, sell the buildings and structures to a new permittee or he may remove them within the three months' period, failing which he will be presumed to have abandoned the improvements and they will become the absolute property of the United States.

SPECIAL USE PERMIT

PERMIT NO.	EXPIRES
14-10-0333-884	12/31/63

PREVIOUS PERMIT NO. 14-10-333-589

Ira Paul Kelley and Roy Schubert, Partners (Area) of 7646 N. Coolidge, Phoenix, Arizona is hereby authorized during the period from May 15, 1963, to use the following-described land in the above-named area:

A tract of land approximately one acre in size located in the SE¼SE¼ of Section 2, T. 25 N., R. 10 E., Gila and Salt River Meridian Wupatki National Monument. This is the area known as the Black Falls trading post.

for the purpose of operating a trading post primarily to serve the Navajo Indians and the use of the area for the incidental purchasing of livestock from the Navajo Indians

subject to the conditions on the reverse hereof and attached pages and to the payment to the Government of the United States of the sum of Twenty-Five ($25.00), in advance (Monthly, semiannually, etc.) or as follows: $25.00 upon execution of this permit for the remainder of the 1962 calendar year; $25.00 on January 1, 1963. Payment to be made on basis of year or fraction of a year and will not be prorated.

payment to be made to the Superintendent by Express or Postal Money Order, Certified Check, or Draft payable to the National Park Service, or Cash.

Issued at (City) this 29 day of May, 1962.

Superintendent.

Russell L. Dahan

The undersigned hereby accepts this permit subject to the terms, covenants, obligations, and reservations, expressed or implied, therein.

CONDITIONS OF THIS PERMIT

1. **Regulations.**—The permittee shall exercise this privilege subject to the supervision of the Superintendent, and shall comply with the regulations of the Secretary of the Interior, or other authorized officer of the Government, governing the area.

2. **Definition.**—The term "Director, National Park Service" as used herein shall include the appropriate Regional Director or Superintendent as the representative of the Director.

3. **Rights of the Director.**—Use by the permittee of the land covered hereby is subject to the right of the Director, National Park Service, to establish trails, roads, and other improvements and betterments over, upon, or through said premises, and further to the use by travelers and others of such roads and trails as well as of those already existing. If it is necessary to exercise such right, every effort will be made by the National Park Service to refrain from unduly interfering or preventing use of the land by the permittee for the purpose intended under this permit.

4. **Nondiscrimination.**—If use of the land covered by the permit will involve the employment by the permittee of a person or persons, the permittee agrees to observe the following nondiscrimination provisions in connection with the use to which the lands covered by this permit may be devoted:

In connection with the performance of work under this contract, the contractor agrees not to discriminate against any employee or applicant for employment because of race, religion, color, or national origin. The aforesaid provision shall include, but not be limited to, the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rate of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post hereafter in conspicuous places, available for employees and applicants for employment, notices to be provided by the contracting officer setting forth the provisions of the nondiscrimination clause.

The contractor further agrees to insert the foregoing provisions in all subcontracts hereunder, except subcontracts for standard commercial supplies or raw materials. (Executive Order 10557, September 3, 1954.)

5. **Damages.**—The permittee shall pay the United States for any damage resulting from this use which would not reasonably be inherent in the use which the permittee is authorized to make of the land described in this permit.

6. **Construction.**—No building or other structure shall be erected under this permit except upon prior approval of plans and specifications by the Director, National Park Service, and the premises and all appurtenances thereto shall be kept in a safe, sanitary, and sightly condition.

7. **Removal of structures and improvements.**—Upon the expiration of this permit by limitation of time or its termination for any reason prior to its expiration date, the permittee, if all charges due the Government hereunder have been paid, shall remove within such reasonable period as is determined by the Superintendent, but not to exceed 90 days unless otherwise stipulated in this permit, all structures and improvements placed on the premises by him, and shall restore the site to its former condition under the direction of the Superintendent. If the permittee fails to remove all such structures and improvements within the aforesaid period, they shall become the property of the United States, but that will not relieve the permittee of liability for the cost of their removal and the restoration of the site.

8. **Water Rights.**—The United States reserves the rights to perfect title to all rights for water which may be developed or used in connection with this permit and shall furnish water to the permittee, when available, at reasonable rates to be approved by the Director, National Park Service. Should such water service be unavailable or inadequate, the permittee may, with prior approval of the Director, provide the same at his own expense, subject to such special requirements as may be prescribed.

9. **Disposal of refuse.**—The permittee shall dispose of brush and other refuse as required by the Superintendent.

10. **Timber cutting.**—No timber may be cut or destroyed without first obtaining a permit therefor from the Director, National Park Service.

11. **Fire prevention and suppression.**—The permittee and his employees shall take all reasonable precautions to prevent forest, brush, grass, and structural fires and also shall assist the Superintendent in extinguishing such fires in the vicinity of any tract which may be used hereunder.

12. **Soil erosion.**—The permittee shall take adequate measures, as directed and approved by the Superintendent to restrict and prevent soil erosion on the lands covered hereby and shall so utilize such lands as not to contribute to erosion on adjoining lands.

13. **Benefit.**—Neither Members of, nor Delegates to Congress, or Resident Commissioners shall be admitted to any share or part of this permit or derive, either directly or indirectly, any pecuniary benefit to arise therefrom: *Provided however*, That nothing herein contained shall be construed to extend to any incorporated company, if the permit be for the benefit of such corporation.

14. **Assignment.**—This permit may not be transferred or assigned without the consent of the Director, National Park Service, in writing.

15. **Revocation.**—This permit may be terminated upon breach of any of the conditions herein or at the discretion of the Director, National Park Service.

Form 10-275
(Rev. 5/61)

U. S. DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

SUPPLEMENTAL GENERAL PROVISIONS (Contracts)

The following provisions supersede Section 18 of Standard Form 32 "NON-DISCRIMINATION IN EMPLOYMENT". "In connection with the performance of work under this contract, the contractor agrees as follows:

(1) The contractor will not discriminate against any employee or applicant for employment because of race, creed, color, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, creed, color, or national origin. Such action shall include, but not be limited to, the following: employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the contracting officer setting forth the provisions of this non-discrimination clause.

(2) The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, creed, color, or national origin.

(3) The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the agency contracting officer, advising the said labor union or workers' representative of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The contractor will comply with all provisions of Executive Order No. 10925 of March 6, 1961, and of the rules, regulations, and relevant orders of the President's Committee on Equal Employment Opportunity created thereby.

(5) The contractor will furnish all information and reports required by Executive Order No. 10925 of March 6, 1961, and by the rules, regulations, and orders of the said Committee, or pursuant thereto, and will permit access to his books, records and accounts by the contracting agency and the Committee for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the contractor's non-compliance with the non-discrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be cancelled in whole or in part and the contractor may be declared ineligible for further Government contracts in accordance with procedures authorized in Executive Order No. 10925 of March 6, 1961, and such other sanctions may be imposed and remedies invoked as provided in the said Executive Order or by rule, regulation, or order of the President's Committee on Equal Employment Opportunity, or as otherwise provided by law.

(7) The contractor will include the provisions of the foregoing paragraphs (1) through (6) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the President's Committee on Equal Employment Opportunity issued pursuant to section 303 of Executive Order No. 10925 of March 6, 1961, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the contracting agency may direct as a means of enforcing such provisions, including sanctions for non-compliance; PROVIDED, HOWEVER, that in the event the contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the contracting agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States."

Permit No. 14-10-0333-884

XXX 2-A

Ira P. Kelley, Partner
215 West Vista, Phoenix, Ariz.
and
Roy Schubert, Partner
3646 West Coolidge, Phoenix, Ariz

The following provision is substituted for paragraphs 3 and 4 of the Terms and Conditions on the back of the October 1957 editions of Standard Form 33:

LATE BIDS AND MODIFICATIONS OR WITHDRAWALS

"Bids and modifications or withdrawals thereof received at the office designated in the invitation for bids after the exact time set for opening of bids will not be considered unless they are received before award and (a) submitted by mail (or by telegraph, if authorized) and (b) it is determined by the Government that late receipt was due solely to either (1) delay in the mails (or by the telegraph company, if telegraphic bids are authorized) for which the bidder was not responsible, or (2) mishandling by Government after receipt at the Government installation. However, a modification which is received from an otherwise successful bidder and which makes the terms of the bid more favorable to the Government will be considered at any time it is received and may thereafter be accepted."

FEDERAL, STATE, AND LOCAL TAXES

(a) As used throughout this clause, the term "tax inclusive date" means the date of negotiated contracts and the date set for the opening of bids for contracts entered into through formal advertising. As to additional supplies or services procured by modification to this contract, the term"tax inclusive date" means the date of such modification.

(b) Except as may be otherwise provided in this contract, the contract price includes all Federal, State, and local taxas and duties in effect and applicable to this contract on the tax inclusive date, except taxes from which the Government, the Contractor, or the transactions or property covered by this contract are then exempt. Unless specifically excluded, duties are included in the contract price.

(c) (1) If the Contractor is required to pay or bear the burden (i) of any tax or duty, which either was not to be included in the contract price pursuant to the requirements of paragraph (b), or was specifically excluded from the contract price by a provision of this contract; or (ii) of an increase in rate of any tax or duty, whether or not such tax or duty was excluded from the contract price; or of any interest or penalty thereon, the contract price shall be correspondingly increased: PROVIDED, That the Contractor warrants in writing that no amount for such tax, duty or rate increase was included in the contract price as a contingency reserve or otherwise: AND PROVIDED FURTHER, That liability for such tax, duty, rate increase, interest, or penalty was not incurred through the fault or negligence of the Contractor or its failure to follow instructions of the Contracting Officer.

(2) If the Contractor is not required to pay or bear the burden, or obtains a refund or drawback, in whole or in part, of any tax, duty, interest, or penalty which (i) was to be included in the contract price pursuant to the requirements of paragraph (b), (ii) was included in the contract price, or (iii) was the basis of an increase in the contract price, the contract price shall be correspondingly decreased or the amount of such relief, refund, or drawback shall be paid to the Government, as directed by the Contracting Officer. The contract price also shall be correspondingly decreased if the Contractor through its fault or negligence or its failure to follow instructions of the Contracting Officer, is required to pay or bear the burden, or does not obtain a refund or drawback of any such tax, duty, interest, or penalty. Interest paid or credited to the Contractor incident to a refund of taxes shall inure to the benefit of the Government to the extent that such interest was earned after the Contractor was paid or reimbursed by the Government for such taxes.

(3) Invoices or vouchers covering any adjustment of the contract price pursuant to this paragraph (c) shall set forth the amount thereof as a separate item and shall identify the particular tax involved.

16. Trade in annuities or gratuities prohibited. Traders are forbidden to buy, trade for, or have in their possession any annuity or other goods of any description which have been purchased or furnished by the Government for the use or welfare of the Indians.

17. The sale of tobacco to any Indian under 18 years of age is prohibited.

18. The sale or furnishing of any alcoholic beverage to the Indians will be cause for revocation of this permit.

19. The traders will not keep for sale, or sell, give away or use any opium, chloral, cocaine, peyote or mescal bean, hashish or Indian hemp or marihuana, or any compound containing either ingredient, and for violation hereof the traders' permit shall be revoked.

20. Gambling, by dice, cards or in anyway whatever, is strictly prohibited.

21. Credit given Indians will be at the traders' own risk, and no assistance will be given by the Government in the collection of debts against Indians.

22. The traders must not pay Indians in tokens, tickets, store orders, or anything else of that character. Payment must be made in money, or in credit if the Indian is indebted to the traders.

23. The traders shall not deal in objects of antiquity removed from any historic or prehistoric ruin or monument on land owned or controlled by the Government.

24. Any livestock purchased from the Indians will be kept in the existing corral on the premises until removed to market.

25. This permit does not authorize the construction of any new corrals or holding pens on the area covered by this permit.

26. No grazing is authorized on monument lands.

27. This permit expires December 31, 1963. At that time, provided the operation has been conducted in a satisfactory manner, a new permit for an additional period of two years will be considered.

GROUNDWATER NEAR THE LITTLE COLORADO RIVER

Groundwater occurs in the alluvium, volcanics and Moenkopi Formation along the course of the Little Colorado River at the eastern boundary of Wupatki National Monument. At present, the groundwater in the area is not exploited.

Geology

Five geologic units occur along the river: alluvium, a basalt flow of Merriam-age, gravel terraces, Chinle Formation and Moenkopi Formation. Alluvium occurs in both the lower portions of Deadman and Kana'a Washes as well as along the course of the river. Alluvium in the upper portion of Deadman Wash has been dissected in places down to the Moenkopi sandstones and is no more than 15 feet thick. The alluvium consists of reddish-brown pebbly sand, sand, silt and clay. Basaltic pyroclastics are common. The depth of the dissection decreased downstream to a dashed line drawn in Figure 18 in the NE¼ of section 11. Aggradation occurs beyond the line towards the Little Colorado River.

Along the course of the Little Colorado River near the mouth of the Little Colorado River, the river has cut through about 15 feet of alluvium. The alluvium there consists of light brown pebbly sand and sand. Deadman Wash has no defined course near the river. Sediment is dropped before reaching the river. The alluvium near the river in Deadman Wash is covered by a thin veneer of windblown sand. Two small outcrops of Moenkopi on the east side of the river channel, across the

02-00-1982: hydrogeology of the sunset crater and wupatki national monuments, page 3cont

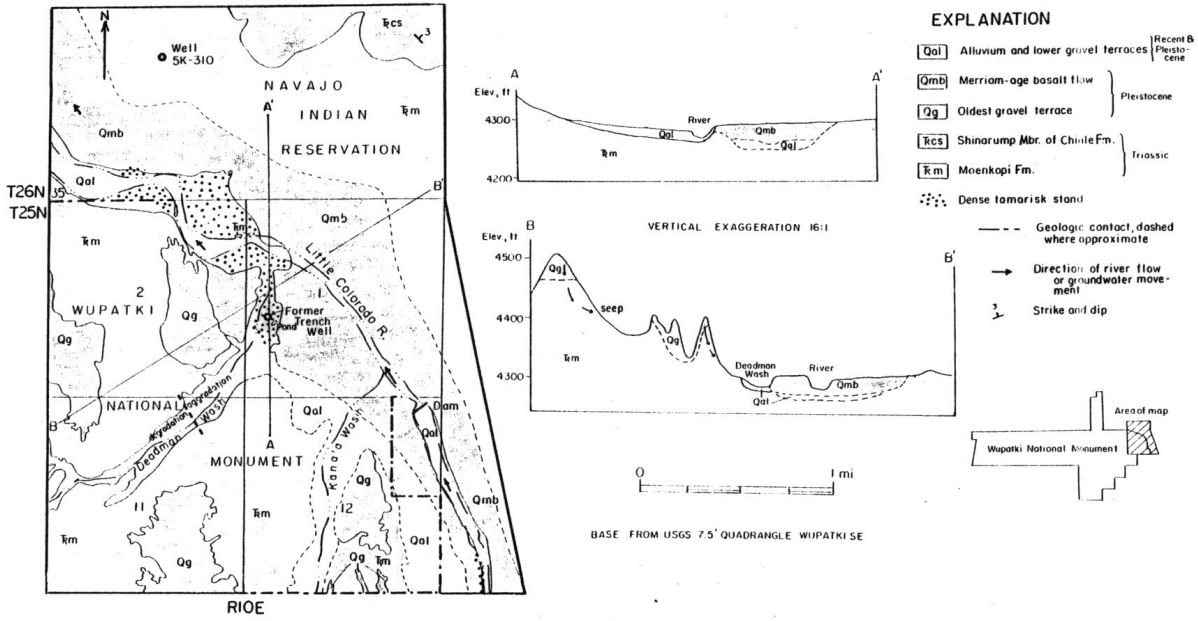

Figure 18. Geology of the Eastern End of Wupatki National Monument.

mouth of Deadman Wash, suggest that the alluvium deposited after the basalt flow is less than 25 to 30 feet thick.

Basalt of Merriam-age flowed down an older channel of the river, possibly covering alluvium in the channel. The flow is over 20 feet thick. The river has eroded a new channel around and on the flow. A discontinuous veneer of eolian and fluvial silt and sand covers the flow.

Quaternary gravel deposits (terraces) occur at three levels. The highest terrace lies approximately 100 to 150 feet above the river and caps mesas along the river. The terrace is perhaps more than 50 feet thick in places and consists of pebbly sands and gravels. The top of these terraces are often characterized by desert pavement. The higher gravels are composed of a variety of rock types including petrified wood. The two younger terraces are located at elevations between 10 to 20 feet, and 40 to 50 feet above the river. The terraces are poorly exposed, spotty and often covered by slopewash, making contacts hard to distinguish. In Deadman Wash the higher of the two terraces occurs in small scattered remnants. The terraces are mapped as alluvium near the river, and are composed of sand and gravel. These gravels are dominated by Kaibab Formation and basaltic rocks.

The Shinarump Member of the Chinle Formation is exposed east of the river. The Moenkopi Formation is exposed over most of the area. All three members of the formation are present.

Groundwater Hydrology

During the construction of a portion of the Sunset-Crater-Wupatki Loop Road in 1963, the contractor dug a narrow trench well (A-25-10)1cb 10 to 12 feet deep and 145 feet long in the alluvium in Deadman Wash.

Water was pumped from the trench into a pond. Between 30,000 and 40,000 gallons of water were removed from the trench each working day for a month, giving a total use of less than 4 A-ft.

Tamarisks have overrun the area near the mouth of Deadman Wash and other areas near the river (Figure 18). The phreatophytes denote the presence of water near the surface. The tamarisks were not observed growing along the river in the basalt, but in alluvium. The dense stands mapped require groundwater to be within about 20 feet of the surface (Horton and Campbell, 1974). Where tamarisks are scattered, the plants derive water from floods and rainfall. The tamarisks dominate the area around the location of the trench well. A pond is located near the destroyed trench well and it bears water much of the year. Tamarisks consume up to five feet of water a year in dense stands (Horton and Campbell, 1974).

The fracturing of partially solidified lava in the last stages of movement, shrinkage cracking and rubble at the base of the flow account for most of the effective porosity of a basalt flow (Davis and DeWiest, 1966, p. 333). Large quantities of water could be exploited from beneath and at the base of the flow.

The Moenkopi Formation acts as an aquitard, deterring the movement of water downwards out of the alluvium and basalt. Water infiltrates through the river channel into the volcanics and alluvium. Surface water flowing down the washes disappears into the alluvium. Discharge occurs through the migration of water downstream in the alluvium and volcanics, through leakage into the Moenkopi Formation and through evapotranspiration.

Well 5K-310 produces water from the Moenkopi Formation and has a total depth of 193 feet. The aquifer in the Moenkopi, according to the drilling log, is a seven-foot thick, coarse, gravelly sand 163 feet beneath the surface. The driller pumped the well at a discharge rate of 12 gpm. Static water level lies 35 feet beneath surface level. The aquifer is perched and artesian. The well is not used and was drilled in 1940 as part of an irrigation project on the Navajo Reservation. A dam built on the river in the early 1940's for irrigation rapidly filled up with sediment. The project has been abandoned.

Notable seeps occur in the Moqui Member of the Moenkopi Formation beneath the highest gravel terraces. The seeps are denoted by the presence of water-loving shrubs, by a white residue of salts on the surface and by moist exposed rock or soil. The lower terraces are not known to yield water to seeps and phreatophytes.

Flow in the Little Colorado River, which is the primary source of recharge for the alluvial and volcanic aquifer along the river, fluctuates greatly. Heaviest flows occur in winter due to snowmelts or heavy rainfall in the summer. The river bed is often dry, but does contain some small ponds that cattle utilize as a water source.

Water Chemistry

The water from the trench well is of the Ca-Na-SO_4 type (Table 9). The high sulfate content is attributable to the occurrence of the gypsiferous Moqui Member which is exposed along the course of the Little Colorado River. The water is of very poor quality and very hard.

Water from well 3K-310 is of the Na-SO_4-Cl type (Figure 5) and has a total dissolved solid content of 4,200 ppm. Waters high in dissolved

solids used in irrigation leave most of the soluble material behind and the excess salts will render the land unfarmable in time (Walton, 1970, p. 459).

11-20-1963: memorandum to director from assistant regional director regarding shallow well, black falls trading post

663-11-26-63

W Rec'd 11/26/63

Southwest Region
Santa Fe, New Mexico

Memorandum

NOV 20 1963

To: Director

From: Assistant Regional Director, Resource Planning

Subject: Shallow Well, Black Falls Trading Post, Wupatki

During the month of July, Hydraulic Engineer William E. Fields traveled to Wupatki to check and survey the location of a new water source discovered near Black Falls Trading Post in the subject area. The well was located by a road contractor and utilized as a water source during the construction of the road from Wupatki to Sunset Crater.

Subsequent to his return, Mr. Fields received an analysis of the water which indicates that it is a very poor water source for domestic use. It is especially high in sulfate content.

Disposition of this source is not known at this time; however, a special use permit has been issued which would allow the proprietor of Black Falls Trading Post to utilize this water for domestic purposes.

Consequently we have started a new docket and have inserted the chemical analysis of the water and a copy of Mr. Fields trip report. We have not filed with the State of Arizona Land Office for this source but as soon as its ultimate use is decided we will make a filing with that office.

By copy of this memorandum we are sending the new dockets to WODC and the Superintendent, Wupatki, for their files.

00-00-0000: memorandum to stan ponce from walter rusinek regarding water rights status at wupatki and sunset crater

Memorandum

To: Stan Ponce

From: Walter Rusinek

Subject: Water rights status at Wupatki and Sunset Crater National Monuments

Sunset Crater National Monument

In 1985, we filed claims for water rights in SUCR as part of the general adjudication of the Little Colorado River system in Arizona. The case is currently before the Apache County Superior Court. The claims filed were:

1.) Reserved rights -- non-quantifiable claim for non-consumptive use of all water within the Monument above reserved consumptive claims. Use is any water use necessary to fulfill the puposes of the Monument, and to provide for fire protection, watershed protection or reclamation, road construction and other administrative needs. Claim includes instream flows.

2.) Reserved rights -- present and future consumptive use of 20 AFY from unnamed surface and groundwater sources for administrative and other Park purposes.

3.) State appropriative rights:

a.) Headquarters Well #1 -- 65 AFY, priority March 7, 1965 for municipal and emergency uses.

b.) Headquarters Well #2 -- 65 AFY, priority December 1, 1979 for municipal uses.

Well #2 replaces well #1 which remains to provide an emergency back-up water system. Well #2 is registered under Arizona law, #649813, filed June 14, 1982.

c.) Black Falls Trading Post Well -- 90 gpm, priority June 12, 1963 for municipal and recreational, fish and wildlife uses.

Wupatki National Monument

A claim was also filed for WUPA water rights in the Little Colorado River adjudication. These claims include:

1.) Reserved rights -- non-quantifiable claim for all non-consumptive use of water within the Monument above reserved consumptive claims. Use is any use necessary to fulfill the purposes of the Monument, and to provide for fire protection, watershed reclamation or protection, road construction or other administrative needs. Claim includes instream flow.

2.) Reserved rights -- present and future consumptive use of 17 AFY from Citadel Ruin well, headquarters well, Wupatki Springs and other surface and groundwater sources for administrative and other Park purposes.

3.) State appropriative rights:

   a.) Heiser Spring -- 2.5 AFY, priority August 23, 1942 for irrigation, stock watering, fish and wildlife, recreation and municipal uses.

   b.) Peshlaki (Cottonwood) Spring -- 0.5 AFY, priority December 31, 1983 for recreation, fish and wildlife, and municipal uses.

4.) The docket contains draft copies of applications to appropriate water in Arizona for both Heiser and Wupatki springs dated March 7, 1955. It does not appear the applications were ever filed.

5.) Citadel Ruin Well and Headquarters Well both are registered under Arizona law, filing date June 14, 1982. Citadel Ruin well is # 649814, maximum capacity 17.6 gpm; Headquarters Well is # 649816, maximum capacity 16 gpm.

Memorandum

To: Director

From: Assistant Regional Director, Resource Planning

Subject: Shallow Well, Black Falls Trading Post, Wupatki

During the month of July, Hydraulic Engineer William E. Fields traveled to Wupatki to check and survey the location of a new water source discovered near Black Falls Trading Post in the subject area. The well was located by a road contractor and utilized as a water source during the construction of the road from Wupatki to Sunset Crater.

Subsequent to his return, Mr. Fields received an analysis of the water which indicates that it is a very poor water source for domestic use. It is especially high in sulfate content.

Disposition of this source is not known at this time; however, a special use permit has been issued which would allow the proprietor of Black Falls Trading Post to utilize this water for domestic purposes.

Consequently we have started a new docket and have inserted the chemical analysis of the water and a copy of Mr. Fields trip report. We have not filed with the State of Arizona Land Office for this source but as soon as its ultimate use is decided we will make a filing with that office.

By copy of this memorandum we are sending the new dockets to WODC and the Superintendent, Wupatki, for their files.

Leslie P. Arnberger

Memorandum

To: Regional Director, Southwest Region

From: Chief, Branch of Water Resources

Subject: Dockets numbered 3 and 4, Wupatki

We are in receipt of a docket labled Docket No. 4 for the subject area. The folders intended for the Superintendent and WSDC were inadvertently included and are forwarded by copy of this memorandum to them.

A review of past correspondence seems to indicate that no Docket No. 3 was distributed, though Mr. Dunn's last memorandum on the subject left it to field personnel to decide whether headquarter's well data should be so docketed or added as a partitioned section of Docket No. 1. We have no record of having received a folder for a Docket No. 3. If one exists of it we would like to receive a complete copy and to assure that ours and field copies agree we would also appreciate a copy of the table of contents of Docket No. 1 as it now exists.

Memorandum

To: Regional Director

From: Superintendent, Wupatki-Sunset Crater

Subject: Water Supply, Black Falls.

WEFacta 8/27 ~~Keck~~

~~Fields~~ WEF 8/27

Reference is made to Acting Regional Director Miller's memorandum of August 16th requesting additional information regarding the source of water found on Monument lands by a sub-contractor working with the Copper State Construction Company on the construction of a portion of the Wupatki-Sunset Crater loop road.

We will start from the beginning as far as the discovery of the water source is concerned. On April 26, 1963, bids were opened on the construction of the Coconino County portion, 4.75 miles, of the Wupatki-Sunset Crater Loop Road. The contract was awarded to the Copper State Construction Company of Phoenix, Arizona, with work to be supervised by the Arizona State Highway Department.

On May 5th we were approached by a Mr. R.N. Cochran of Flagstaff, Arizona, who stated he was going to sub-contract the furnishing and hauling of water and wanted to haul water from the Little Colorado River. He requested permission to use Monument roads for said water haul. There was water in evidence in one spot in the riverbed about ½ mile south of the Black Falls Trading Post. Mr. Cochran requested permission to excavate a test trench on Monument land just away from the riverbed figuring that the water would percolate into this trench and he would not be bothered by high water in the riverbed in case of storm. This is an isolated and out of the way portion of the monument, and was the site Max Dunlap used in obtaining water for the Wupatki road contract accomplished in the fall of 1961. He was given permission to do this trenching with the understanding that the site be bought back to normal at the completion of the job. He was not successful in finding water at this site and the test was abandoned. Shortly thereafter the job superintendent, Mr. Don Burton, advised us that Cochran had evidently given up and they were looking for another sub-contractor on the water.

L54 cwfa

The next word we had regarding the water requirements for this job was when we were approached by representatives of the Navajo Tribe for permission to transport well pulling and pumping equipment to reactivate a well on the Navajo Reservation to furnish water for the contractor. Mr. Cochran had found this old well about three miles north and east of Black Falls and had made arrangements with the Tribe to buy water from them. The superintendent visited the well on May 20th with Robert Best, State Highway engineer on the job. There was no activity at the well site as they had to change pumps. They put this well in operation sometime before May 31st and were hauling water for the job to storage tanks on the project right-of-way and it was our understanding that they had their water problems solved. On June 13th we learned that Mr. Cochran had been prospecting for water north of the Black Falls Trading Post on Monument land and had discovered a source of water at that point. I investigated this activity on June 14th and found that he had bulldozed a road north of the post to the river and had found an excellent source of water, all of this having been done without the permission of this superintendent. He had started hauling water from this source on June 11th or 12th. I met Mr. Cochran and Mr. Hayes, foreman for the contractor, and discussed the matter. The damage had been done and I asked Mr. Hayes if the well on the reservation was furnishing enough water for the job and he stated that it was not. This road is going to greatly benefit both Wupatki and Sunset Crater and they were given permission to use this source of water with the understanding that the scar caused by their activity would be eliminated upon completion of the job. This agreement was reached in discussion with a representative of the prime contractor, the sub-contractor and the superintendent. Mr. Cochran was also given permission to dig a storage reservoir at the site. The site of this source of water is completely surrounded by a heavy growth of Tamarisk and is not noticeable from the post or road to the reservation and is not in an area that will probably ever be used by visitors. Nothing was said by this superintendent about payment for this water as it was figured that they found an excellent supply of water for the Government, one that we would probably never have found for ourselves, and we might as well let them use it. As far as Service requirements are concerned, can see no use we will have for this source in the immediate future with the exception of serving the trading post but it will be a good standby source in case our well should go dry, or our requirements should get extremely heavy.

We realize that we did not make a written report on this matter but the site was visited in company with Mr. Moran on June 19th and we assumed that he would report same to the proper parties in your office and we would then get instructions as to how to proceed.

Mr. Miller refers to our telephone conversation of July when we asked for permission for the new operator of Black Falls Trading Post to use a newly discovered source of water to serve the post. He states that permission was requested "to tap this small spring or seep with a small pipe to supply water to the trading post." We are positive that we mentioned nothing regarding the size of this supply and would certainly not call it a small spring or seep after having visited the site several times and witnessed the pump throwing a continuous 2½" diameter stream into the storage reservoir. The previous operator had at one time talked about trying to develop a small seep he had discovered about 1 mile south and west of the post but nothing was ever started on this project.

In a recent discussion with this sub-contractor, he advised us that he was pumping on an average of 70,000 gallons per day from this source and he was sure that with proper development it would be capable of producing from 150,000 to 170,000 gallons per day. The prime contractors representative advised us that they have used approximately 3,600,000 gallons of water to date, the biggest percentage of which came from this source, and that the total contract calls for approximately 4,700,000 gallons of water for the project.

This superintendent did not realize that it was such an urgent matter in proving up on water rights as long as this was included within the boundaries and on Government land. We did,however, check the land records and assumed that this was on land acquired from the Santa Fe Railroad Company and could find no evidence of water or mineral rights being retained by the previous owner.

Hope that this information will help to clarify this matter.

Memorandum

To: Superintendent, Wupatki

From: Acting Regional Director

Subject: Water Supply, Trading Post

There has just come across my desk a report from Engineer Fields in regards to the water supply located near the Black Falls Trading Post on which we plan to file with the State Engineer.

Not too long ago when the trading post was being considered for new ownership, you telephoned me in regard to permitting the new owner to tap this small spring or seep with a small pipe to supply water to the trading post. This permission was granted with the understanding that the water, if any, would be filed on in the name of the United States.

It appears from the report as submitted by Engineer Fields that this office was not furnished all of the necessary information pertaining to this water supply and therefore we would like to have further information from you as to your part in permitting the road contractor to excavate for this water and for the construction of a holding tank.

Based on Mr. Field's report, a copy of which was forwarded to you, the contractor has pumped anywhere from 30,000 to 85,000 gallons of water per day with no evident drawdown of the supply.

Will you please advise us whether you permitted the contractor to excavate for the water supply and the construction of the pond. If not, when was the availability of this water called to your attention? What are your plans now for covering the use of this water? What effect is the supply going to have on the Trading Post operations? And further, was there any reason as to why this office should not have been notified immediately following the discovery of this evident tremendous water source.

L54
wrpa

All of us realize the importance of water in and around the Wupatki area and believe that detailed action on your part should have been taken to keep us informed so that proper precaution to protect the rights of the Federal Government could have been initiated promptly.

Hydraulic Engineer

Trip to Wupatki to Locate Water Source for Filing With State Engineer

I departed from Santa Fe at 2:30 P.M. July 16. I arrived at Wupatki at noon, July 17 after stopping at Walnut Canyon National Monument to deliver some right-of-way documents. I was accompanied by Clyde Arquero.

After orientation by the Superintendent we proceeded to the water source. Contrary to advance information which I had, this was not a spring or surface source, but a shallow well or underground source. It lies near the Little Colorado River behind an impervious lava dike. This dike serves as an underground dam and holds the underground drainage back as a lake.

This source was developed on our land by a road contractor. He dug a narrow trench about 10-12 feet deep and 145 feet long. Adjacent to this, a large holding tank was constructed. From the trench the water is pumped through a 2 1/2" pipe to the pond. Estimated rate of flow while I was there was 80-90 g.p.m. From talking to the tank truck drivers I found that they have pumped from 30,000 to 85,000 gallons of water a day from this source for at least a month.

I took pictures of the installation and then proceeded with the survey location

We found the Southwest section corner of Section 1, but that afternoon we looked all over section 1 and found no other corners. Consequently we searched until dark and because of rain and heavy cloudiness, I could not take a sun shot. That night, after the sky cleared, I took a bearing reading from the Star Polaris. Using this bearing I was able to locate the south one-quarter corner of section 2 and then was able to tie the water source with both bearing and distance to the section corner common to sections 1, 2, 11 and 12. This tie from the source to the section corner is S. 19° 49' W., 2,263.7 feet.

We departed from Wupatki at 2:30 on July 18 and after staying overnight in Gallup we arrived in Santa Fe on Friday afternoon.

JUN 15 1963

Memorandum

To: Superintendent, Wupatki

From: Acting Regional Director

Subject: Black Falls Trading Post Operations

Reference your memorandum of June 27 on the same subject.

In any negotiations concerning water rights in Arizona we should remember that the law of prior appropriation always applies. There are certain stipulations in Chapter 75, Article I, Arizona Code Annotated, dated 1939 which applies to application and perfection of water rights. The gist of these is that the water belongs to the public and is subject to appropriation and beneficial use by anyone who follows correct filing procedures. As of this time, because we have not filed on nor used the water in question, we do not now have a valid water right.

In your discussion with Mr. Hagan we think it advisable to call his attention to items 7 and 8 of the permit. We suggest in addition the following stipulation in the Special Use Permit: "The Permittee will be allowed to utilize a water source within the boundaries of Wupatki National Monument. The water right will be filed by the United States of America and nothing herein shall be construed to grant any right, title or interest in said water right to the permittee. Plans of the installation including pump, supply line and storage tanks will be approved by the National Park Service prior to the construction. Any structures and improvements placed upon any lands within the Monument for the purpose of transporting the water described above to the premises shall be subject to the right of the permittee to move the structures and improvements as set forth in condition No. 7 in this permit. Nothing herein constitutes a waiver of any right to any source of water which the United States of America may have." You should then caution Mr. Hagen that the water system cannot be constructed until approval of our right is received from the State Land Commission.

Copy NL3035 wupa Black Falls

L 54 wupa

We feel that if this statement is incorporated in the Special Use Permit, the needs of Mr. Hagen will be satisfied and our rights to the water will be protected. As soon as possible this office will make the necessary filings to the State Land Commissioner so that the water right will be in the name of the United States of America and any beneficial use therefrom will be to our advantage.

If we can be of future assistance in this matter do not hesitate to call.

Memorandum

To: Regional Director, Southwest Region

From: Superintendent, Wupatki-Sunset Crater

Subject: Black Falls Trading Post Operations

Paul Knee has again come up with a prospective buyer who has evinced an interest in purchasing Knee's rights in the post and the operation of same. He is Mr. Tom Hagen, who has been buying stock on various parts of the Navajo Reservation. His home is Yuma, Arizona. The stipulation regarding the sale of liquor does not bother him, as it did Knee, but he would want permission to develop a source of water which has been found about ½ mile north of the site of the post. This would entail installation of a pump, supply lines and a storage tank at the post. This would be accomplished by the permittee.

Can foresee no complications in the matter as long as the water rights stipulation is embodied in the conditions of the permit and it would certainly improve the living conditions for the permittee.

The matter was discussed with him on June 18th and he was supposed to have returned on the week-end of June 22nd but did not show up. Will take no steps to check on his qualifications until he returns for further talks but would like to have your reaction to this matter of water development as this is bound to come up regardless of who operates this post.

Memorandum

To: Superintendent, Wupatki/Sunset Crater NM

From: Hydraulic Engineer, Water Resources, SWRO

Subject: Well Schedule - Test Pumping Data, Citadel Well, Wupatki NM

Enclosed is subject received from USGS, Flagstaff, to be added to Water Right Docket #4. Analysis of the pump data is complicated by the presence of a nearby fault zone and several severe storms which occurred during the test. As a result, the time drawdown cuve has numerous changes of slope which are difficult to interpret.

Recovery data also indicates various permeabilities with the aquifer. The early part of the curve indicates an apparent transmissivity of 2,430 gallons per day per foot. The later portion with an apparent transmissivity of 1,250 gallons per day per foot is probably reflective of aquifer conditions. The well can produce at least 50 gpm from a pump setting of 1,700 feet BTC.
