Docket No: 27

OLEMA CREEK LICENSE#:003827 AND APPL#:A013473

Preliminary Docket Information

01-01-1993: Narration - Lupton Situation

LUPTON SITUATION

License 3827
Priority date Nov. 18, 1949
Issued to J.R. Denman

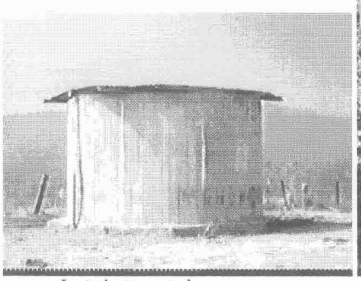

This license was first believed to belong to Body Stewart and the Five Brooks Mill Pond, but this was not the case. Mr. Denman, who received this license in 1953, happens to be the Grandfather of Mr. Lupton. After doing some interviewing with Mr. Stewart it was realized that this area could not be associated with the Mill Pond because the diversion point was too far north. I later discovered that Mr. Stewart had also diverted water from the Olema Creek not far from where Mr. Denman's license was. Mr. Stewart's use of this water was to irrigate 20 acres of corn. This irrigation was stopped in the early 1970's. This confusion between Mr. Steward's unappropriated diversion and Mr. Denman's license are what caused the two to be combined in the PORE Docket. Under the Denman license was listed Mr. Stewart's use and Mr. Denman's use when they were never connected by any other means than by close proximimty to each other.

Mr. Lupton, the inheritor of his grandfather's ranch still uses this license for stock watering and domestic use. He has a large pump which pushes the water 300 in elevation up to a 10,000 gallon tank about a mile east of the diversion. The actual diversion is on the east side of Highway One and is really just a bend in the creek where the meandering has caused a low, collective spot. Once the water is pumped to the tank it is than gravity fed to stock troughs, the main house, and a ranch hand's home.

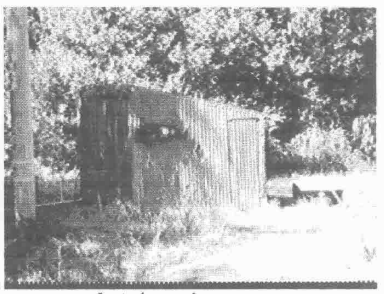

Lupton Ranch Estimated Water Use

55 beef cows
3 residences
300 sq ft of garden

Total estimated water use = 1,106 gpd

LICENSEE REPORTING FOR 2015

As indicated in the California Code of Regulations title 23, section 847, the State Water Resources Control Board (State Water Board) requires annual reporting of water diversion and use under licenses. California Water Code chapter 2.7 section 348 authorizes the State Water Board to require online reporting of water diversions. Consistent with these requirements, the State Water Board, Division of Water Rights (Division) developed a new online Report Management System (RMS) as a component of the enhanced Water Right Information Management System (eWRIMS). RMS allows electronic submittal of water diversion and use reports, saving both paper and resources. **All reports must be completed online through RMS; paper copies are not available.** To report online, go to **www.waterboards.ca.gov/rms** and login with your User ID and Password. The information required to login and access your online Report of Licensee is:

User ID (Water Right ID): **A013473**
Password (Reporting Identifier): **909619**

IMPORTANT: PLEASE NOTE BELOW

Effective immediately the Division of Water Rights will **NO LONGER** notify you via mail in the future when reporting is due. If you would like to be notified when reporting is due and other reporting related material, please subscribe to our Lyris list (Water Rights Reporting Notification) at:

http://www.waterboards.ca.gov/resources/email_subscriptions/swrcb_subscribe.shtml.

You are required to complete the online report for 2015 no later than **June 30, 2016.** If you do not have a computer or internet access, you should use a friend's computer, a computer in a public library, or a Division computer to fill out the form. Unfortunately, Division staff cannot fill the form out on your behalf. However, if you wish to seek assistance with the form, you may contact the Division to request a listing of attorneys and consulting firms with water rights experience. You can also review the listing on the Division's Business Information Contacts webpage at: www.waterboards.ca.gov/waterrights/board_info/contacts.shtml.

If you have multiple water rights, please be aware you must report water use separately for each right. Do not list total combined diversions under multiple rights on the form. To document compliance with the conditions of your water right(s), you may use RMS to submit photos (such as staff gages, measuring devices, etc.), documents (California Department of Fish and Wildlife agreements, other agency approvals, etc.), graphs, and spreadsheets.

REQUIRED NOTIFICATION OF CHANGE IN OWNERSHIP

You are required to notify the Division directly of any water right ownership change. Your county assessor's office or title company does not notify the Division of ownership changes. Failure to notify the Division of an ownership change prior to assessment of annual water right fees will result in your liability to pay the annual water right fee even if you transferred the property associated with the water right. Notification to the Division should be made using the Change of Name/Address or Ownership form by clicking on the Water Rights Forms link located at www.waterboards.ca.gov/waterrights/publications_forms/forms/index.shtml.

As indicated in the California Code of Regulations title 23, section 847, the State Water Resources Control Board (State Water Board) requires annual reporting of water diversion and use under licenses. The State Water Board has historically required these reports to be filed once every three years in paper form. California Water Code chapter 2.7 section 348 authorizes the State Water Board to require online reporting of water diversions. Consistent with these requirements, the State Water Board, Division of Water Rights (Division) developed a new online Report Management System (RMS) as a component of the enhanced Water Right Information Management System (eWRIMS). RMS allows electronic submittal of water diversion and use reports, saving both paper and resources. **All reports must be completed online through RMS; paper copies are not available.** To report online, go to **www.waterboards.ca.gov/rms** and login with your User ID and Password. The information required to login and access your online Report of Licensee is:

User ID (Water Right ID): **A013473**
Password (Reporting Identifier): **909619**

You are required to complete the online report for 2013 no later than **June 30, 2014.** If you do not have a computer or internet access, you should use a friend's computer, a computer in a public library, or a Division computer to fill out the form. Unfortunately, Division staff cannot fill the form out on your behalf. However, if you wish to seek assistance with the form, you may contact the Division to request a listing of attorneys and consulting firms with water rights experience. You can also review the listing on the Division's Business Information Contacts webpage at: http://www.waterboards.ca.gov/waterrights/board_info/contacts.shtml.

If you have multiple water rights, please be aware you must report water use separately for each right. Do not list total combined diversions under multiple rights on the form. To document compliance with the conditions of your water right(s), you may use RMS to submit photos (such as staff gages, measuring devices, etc.), documents (California Department of Fish and Wildlife agreements, other agency approvals, etc.), graphs, and spreadsheets.

SPECIAL REPORTING FEATURES:

- It is possible to create one account on the RMS site to report all of your water rights. It is not necessary to create an account if you would like to report your water rights individually. Please see the RMS login page for more information and instructions.
- RMS includes the capability to amend current and past reports. Amendments to credits previously claimed pursuant to Water Code sections 1010, 1011, and 1011.5 are subject to review and may not be accepted.
- Licensees can list all of their reservoirs associated with this license in their report.
- RMS includes new on screen help tools and instructions.

REQUIRED NOTIFICATION OF CHANGE IN OWNERSHIP

You are required to notify the Division directly of any water right ownership change. Your county assessor's office or title company does not notify the Division of ownership changes. Failure to notify the Division of an ownership change prior to assessment of annual water right fees will result in your liability to pay the annual water right fee even if you transferred the property associated with the water right. Notification to the Division should be made using the Change of Name/Address or Ownership form by clicking on the Water Rights Forms link located at www.waterboards.ca.gov/waterrights/board_info.

THIS IS TO CERTIFY, That

US National Park Service
Point Reyes National Seashore
1 Bear Valley Road
Point Reyes, CA 94956

has the right to the use of the waters of **Olema Creek** in **Marin County**

tributary to **Lagunitas Creek** thence **Tomales Bay** thence the **Pacific Ocean**

for the purpose of **Fish and Wildlife Preservation and Enhancement and Recreational uses**.

The Deputy Director for Water Rights finds that the State Water Resources Control Board (State Water Board) and/or the licensee have met the following requirements for Change Petition approval: (a) the change will not operate to the injury of any lawful user of water; (b) good cause has been shown for the change; (c) the petition does not constitute the initiation of a new right; and (d) demonstrated that the requirements of the California Environmental Quality Act (CEQA) have been met or that the project is exempt from CEQA.

Additionally, the State Water Board has complied with its independent obligation to consider the effect of the proposed project on public trust resources and to protect those resources where feasible. (*National Audubon Society v. Superior Court* (1983) 33 Cal.3d 419 [189 Cal.Rptr. 346], 658 P.2d 709.)

The amended license is being issued in accordance with the redelegations of authority (Resolution No. 2007-0057.) Therefore, an amended license on **Application 13473** filed on **November 18, 1949** has been approved by the State Water Board SUBJECT TO PRIOR RIGHTS and to the limitations and conditions of this amended license.

Amended License 3827 supersedes the license originally issued on **September 17, 1953**, which was perfected in accordance with the laws of California, the Regulations of the State Water Board, or its predecessor, and the terms of **Permit 8069**. The priority of this right dates from **November 18, 1949**. Proof of maximum beneficial use of water under this license was made as of **June 24, 1952** (the date of inspection).

The amount of water to which this right is entitled and hereby confirmed is limited to the amount actually beneficially used for the stated purposes and shall not exceed **(a) eleven thousand five hundred (11,500) gallons per day by direct diversion from March 15 to October 15 of each year for Fish and Wildlife Preservation and Enhancement and Recreational uses, and (b) one thousand four hundred (1,400) gallons per day by direct diversion from October 16 to March 14 of each succeeding year for Fish and Wildlife Preservation and Enhancement and Recreational uses. The maximum amount diverted under this license for all uses shall not exceed four and eighty five hundredths (4.85) acre-feet per year.**

THE POINT OF DIVERSION OF SUCH WATER IS LOCATED:

By California Coordinate System of 1983, Zone 3, North 2,193,963 feet and East 5,912,077 feet, being within NE¼ of SE¼ of projected Section 20, T2N, R8W, MDB&M.

A DESCRIPTION OF THE LANDS OR THE PLACE WHERE SUCH WATER IS PUT TO BENEFICIAL USE IS AS FOLLOWS:

At stream segment between the Point of Diversion located by California Coordinate System of 1983, Zone 3, North 2,193,963 feet and East 5,912,077 feet, being within NE¼ of SE¼ of projected Section 20, T2N, R8W, MDB&M (upstream limit), and the confluence of Lagunitas Creek and Tomales Bay (downstream limit), as shown on map on file with the State Water Board.

The right hereby confirmed to the diversion and use of water is restricted to the point or points of diversion herein specified and to the lands or place of use herein described.

Reports shall be filed promptly by the licensee on the appropriate forms which will be provided for the purpose from time to time by the State Water Board.

Licensee shall allow representatives of the State Water Board and other parties, as may be authorized from time to time by the State Water Board, reasonable access to project works to determine compliance with the terms of this license.

Pursuant to Water Code sections 100 and 275 and the common law public trust doctrine, all rights and privileges under this license, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the State Water Board may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirement for the authorized project. No action will be taken pursuant to this paragraph unless the State Water Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the State Water Board also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the State Water Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution article X, section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.

The quantity of water diverted under this license is subject to modification by the State Water Board if, after notice to the licensee and an opportunity for hearing, the State Water Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the State Water Board finds that: (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

This license does not authorize any act which results in the taking of a threatened or endangered species or any act which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish and Game Code sections 2050 to 2089) or the federal Endangered Species Act (16 U.S.C.A. sections 1531 to 1544). If a "take" will result from any act authorized under this water right, the licensee shall obtain authorization for an incidental take prior to construction or operation of the project. Licensee shall be responsible for meeting all requirements of the applicable Endangered Species Act for the project authorized under this license.

If construction or rehabilitation work is required for the diversion works covered by this license within the bed, channel, or bank of the affected water body, the licensee shall enter into a streambed or lake alteration agreement with the State Department of Fish and Game. Licensee shall submit a copy of the agreement, or waiver thereof, to the Division of Water Rights prior to commencement of work. Compliance with the terms and conditions of the agreement is the responsibility of the licensee.

This license is granted and the licensee accepts all rights herein confirmed subject to the following provisions of the Water Code:

Section 1625. Each license shall be in such form and contain such terms as may be prescribed by the State Water Board.

Section 1626. All licenses shall be under the terms and conditions of this division (of the Water Code).

Section 1627. A license shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code) but no longer.

Section 1628. Every license shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article (of the Water Code) and the statement that any appropriator of water to whom a license is issued takes the license subject to the conditions therein expressed.

Section 1629. Every licensee, if he accepts a license, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefore shall at any time be assigned to or claimed for any license granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any licensee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any licensee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

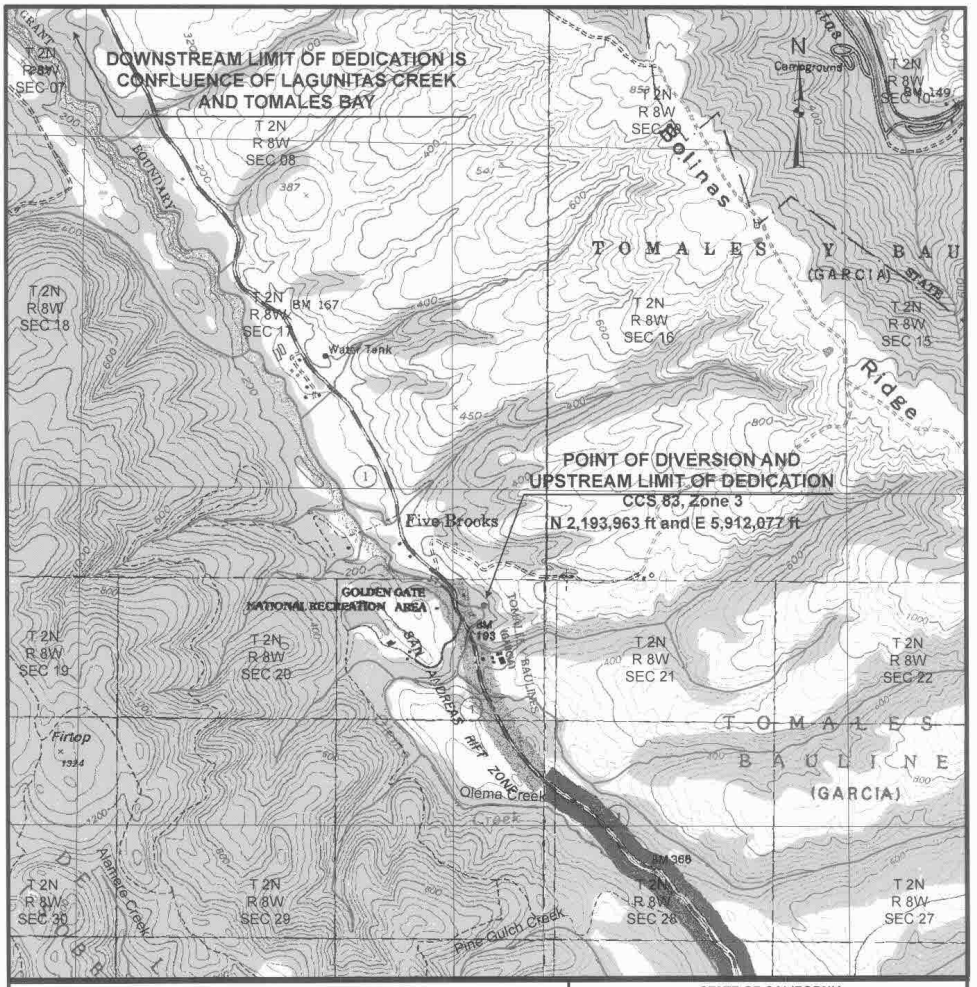

Section 1630. At any time after the expiration of twenty years after the granting of a license, the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State shall have the right to purchase the works and property occupied and used under the license and the works built or constructed for the enjoyment of the rights granted under the license.

Section 1631. In the event that the State, or any city, city and county, municipal water district, irrigation district, lighting district, or political subdivision of the State so desiring to purchase and the owner of the works and property cannot agree upon the purchase price, the price shall be determined in such manner as is now or may hereafter be provided by law for determining the value of property taken in eminent domain proceedings.

ANNUAL LICENSEE REPORTING FOR 2010

The State Water Resources Control Board (State Water Board) has historically required Reports of Licensee to be filed once every three years in paper form. Senate Bill 8, which was signed into law in 2009, authorized the State Water Board to adopt regulations requiring online reporting of water diversions. Consistent with the Senate Bill, the State Water Board has adopted regulations requiring annual reporting of water diversion and use under licenses, and developed a new online Report Management System (RMS) as a component of the enhanced Water Right Information Management System (eWRIMS). The online RMS allows you to electronically submit your water diversion and use report, saving both paper and resources. To report on-line, go to **www.waterboards.ca.gov/rms** and log in with your water right ID and password. The information required to log in and access your online Report of Licensee is:

Water Right ID: **A013473**
Password: **2N8R9H**

You are required to complete the online report for 2010 no later than **July 1, 2011.** You may also submit your record of diversion and use for previous years using the RMS. To maintain a continuous record of water use under your license, Licensees with **Reporting Cycle 1** should report their monthly diversion and use for 2008, 2009, and 2010. Licensees with **Reporting Cycle 2** should report their monthly diversion and use for 2009 and 2010; and Licensees with **Reporting Cycle 3** only need to report monthly diversion and use for 2010. Please note that it is not possible at this time to amend a report submitted through the RMS.

CHANGES FOR 2010 REPORTING:

Question 4 on the previous Report of Licensee form ("Amount of Water Used") has changed. New Question 5c requires you to report both the "*Amount directly diverted and/or collected to storage*" and the corresponding "*Amount used*" for each month. For many direct diversion-only projects, these amounts will be the same and the online form provides a check box for that purpose (Question 5b).

New Questions 6a and 6b on the RMS Report of Licensee requires you to report the maximum instantaneous *rate* of diversion that has occurred in each month under the license, if available.

If your water project is covered by two or more water rights, you should only report your diversion and use of water for the project covered by the license number printed above. The total amount diverted and used under multiple water rights should not be combined and reported on a single

form. In such cases, you should quantify your diversion under each water right, assigning water to the senior-most right first, to the extent allowed under the permit or license.

REQUIRED NOTIFICATION OF CHANGE IN OWNERSHIP

You are required to notify the State Water Board directly of any water right ownership change. Your county assessor's office or title company does not notify us of any ownership updates. Failure to notify the State Water Board of an ownership change prior to assessment of annual water right fees will result in your liability to pay the annual water right fee even if you transferred the property associated with the water right. Notification to the State Water Board should be made using the Change of Name/Address or Ownership form by clicking on the Water Rights Forms link located at www.waterboards.ca.gov/waterrights/board_info

NOTICE OF PETITIONS FOR CHANGE FOR LICENSES 9730, 4324A, 3827, AND 3800 (APPLICATIONS 21371, 13965A, 13473, AND 13322, RESPECTIVELY) TO DEDICATE WATER TO ENHANCE INSTREAM FISH HABITAT (WATER CODE SECTION 1707)

COUNTY: Marin STREAM SYSTEM: Lagunitas Creek

The U. S. National Park Service - Point Reyes National Seashore (Petitioner) has filed four petitions for change in place and purpose of use, pursuant to California Water Code Section 1707. The Petitioner proposes to dedicate water diverted under Licenses 9730, 4342A, 3827, and 3800 to instream use to enhance the flow of three creeks, Lagunitas, Olema, and an Unnamed Stream (aka Fish Hatchery Creek) located within Point Reyes National Seashore, for the benefit of fish, wildlife, and recreation. The dedication of two of the existing water right licenses (4342A and 9730) to instream use is part of the Giacomini Wetland Restoration Project (Project), which involves restoring ranchland to active floodplain or wetlands. All structural diversions have been or will be removed and there will be no construction or re-grading as a result of these petitions. The impacts of the Project are addressed in the *Final Giacomini Wetland Restoration Project Environmental Impact Statement/Environmental Impact Report (2007 (Giacomini EIS/EIR))*, on file at the Division of Water Rights. Any correspondence directed to the Petitioner should be mailed to Eric Lord, 1201 Oak Ridge Drive Ste 250, Fort Collins, CO 80525, or by email at Eric_Lord@nps.gov.

An appropriative water right can be reduced or revoked through five continuous years of nonuse. However, the California Water Code specifies that under certain conditions no reduction or loss of the appropriative water right shall occur due to: (a) water conservation efforts; (b) use of recycled, desalinated, or polluted water; and/or (c) conjunctive use of groundwater and surface water. You must report the extent and amount of water claimed for credit below. Failure to report the amounts will deprive you of the benefits allowed under the Water Code sections.

FISH AND GAME ENVIRONMENTAL FILING FEE

Section 10005 of the Public Resources Code requires the California Department of Fish and Game (DFG) to impose an $850 filing fee on any user of water who files an application for a water right permit with the State Water Resources Control Board. The Division has received a letter from DFG pursuant to the subject petitions for change stating that the DFG has waived the filing fee per Public Resources Code section 1005 (d)(4).

All petition for change filing fees for Licenses 3800, 4324A, 3827, and 9730 have been paid in full. No additional payment is required at this time. Please be advised that in addition to the

above fees, all active applications, petitions for change, permits and licenses may be subject to annual fees. These fees are based upon the acre-foot per annum requested under the application or authorized under the permit or license. If a fee is required, the Division will calculate the annual fee, and the State Board of Equalization will send you a Notice of Determination requesting payment. If you have any questions regarding the calculation or payment of fees, please contact our fee line at 916-341-5431.

The Division will prepare a public notice of your petitions for change. Any party may submit a protest during the public noticing period. A protest may be based on impacts to existing water rights or impacts to the environment. You will be advised of any actions that you must take after the petition is noticed to respond to protests.

The Division of Water Rights (Division) received notification on September 8, 2009 that you are now the owner of the property covered by water right Licenses 3800 and 3827, a property previously held by U.S. National Parks Service. As such, unless we hear to the contrary within 30 days, we will update our records and show the ownership of water right Licenses 3800 and 3827 as follows:

Primary Owner:
Point Reyes National Seashore

Point Reyes, CA 94956

Agent:
Eric Lord
1201 Oak Ridge Drive, Suite 250

Please note that California law requires the State Water Resources Control Board's (State Water Board) water rights program to be supported by fees. Consequently, as an owner of the above-mentioned water right, you, or your designated representative, are responsible for paying the annual fees for each fiscal year following the date we received notification that you own the water right. The fiscal year runs from July through June of the following year.

You should also note that the California Code of Regulations requires you to immediately inform the State Water Board of any change in address. The State Water Board will mail any notice(s), including fee notice(s), to the most recent address supplied. The State Water Board's regulations require a water right holder to immediately file a statement informing the State Water Board of any change in ownership of the application, permit, or license. The statement shall refer to the number of the water right, and identify the name and address of the new owner. This is important because failure to supply this information could result in your liability to pay water right fee(s), including penalty and interest for late payment, even after you have sold the property served by the water right(s). A list of frequently asked questions regarding the fee is located on the State Water Board's Division of Water Rights website at www.waterboards.ca.gov/waterrights.

If you have any questions regarding your water rights, please contact the Division at (916) 341-5300 or email me at emorland@waterboards.ca.gov.

Subject: Fee Waiver for the National Park Service on Section 1707 Petitions for License Numbers 9730, 4324A, 3800, and 3827 on Lagunitas and Olema Creeks in the Point Reyes National Seashore, Marin County

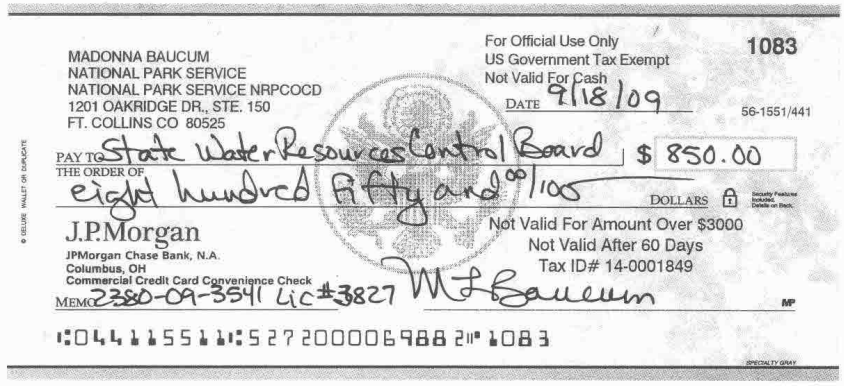

The Department of Fish and Game (DFG) is requesting that the State Water Resources Control Board accept the four 1707 petitions from the National Park Service without the DFG filing fee required by Public Resources Code 10005. Per Section 10005 (d)(4) of the Public Resources Code, DFG is waiving the fee requirement for the four 1707 petitions referenced above on Lagunitas and Olema creeks because the purpose of the filings is to change the licenses from consumptive use to instream use for the benefit of fish and wildlife resources.

If you have questions regarding this protest, please contact Mr. Greg Martinelli, Water Conservation Supervisor, at (707) 944-5570; or by writing to DFG at the memorandum address listed above.

Re: Request for Fee Waiver

Dear Mr. Armor,

The Water Resources Division of the National Park Service is in process of filing 4 petitions pursuant to Cal. Water Code § 1707 with the State Water Resources Control Board. The purpose of the filings is to change the 4 licenses from consumptive use of water to instream use in support of fish and wildlife.

Through this letter, we are requesting, pursuant to Cal. Public Resources Code § 10005(d)(4), that the fee payable to the Cal. Department of Fish and Game be waived. Eric Lord of my office has provided draft copies of this project to your office for review and determination of the benefit to fish and wildlife.

If you need further information or have other questions, please contact Eric Lord of my staff at (970) 225-3526. I appreciate your consideration of this matter.

Sincerely,

Action taken:

Honorable Rogers C. B. Morton
Secretary of the Interior
Washington, D. C.

My dear Mr. Secretary:

A re-examination has been made of the title data relating to 836.46 acres of land, more or less, Tract No. 04-109, Golden Gate National Recreation Area Project in Marin County, California. This land was conveyed to the United States of America under the provisions of existing legislation by Bank of America National Trust and Savings Association, Trustee, under grant deed dated March 25, 1974, filed for record on March 27, 1974, and recorded among the land records of the county in Book 2776 of Deeds at page 606. Your reference is L1425(WR)ML and the file number of this Department is 33-5-2706-21.

The land is described in the aforesaid grant deed, which recites a consideration of $754,250.00.

The title insurance policy, No. 50293, dated as of February 27, 1973, extended by endorsement to March 27, 1974, was prepared by Transamerica Title Insurance Company and is satisfactory.

The title insurance policy, recorded grant deed and accompanying data disclose valid title to be vested in the United States of America, subject to:

1. Existing easements for public roads and highways, rights of way for railroads, pipelines and public utilities, including those easements noted at items 4, 5, 6, 7 and 8, Schedule B of the title policy.

2. Easement rights for a water course over that portion of the subject premises lying within the lines of the creek, noted at item 3, Schedule B of the title policy.

3. Rights of third parties to divert water as contained in the license filed September 30, 1953, under Recorder's Serial No. 16960, as noted at item 9, Schedule B of the title policy.

4. Reservation by the grantor of the right of use and occupancy for noncommercial residential purposes, for a term of twenty-five years, of the residence located on the property and approximately 3 acres of land surrounding the residence as presently fenced as set forth in the deed to the United States.

5. Any change in the southwesterly line of the subject property by reason of it being the center line of a creek, which is a meander line, subject to change by slow and natural means.

Your Department has advised that objections 1, 2, 3, 4 and 5 will not interfere with the contemplated use of the land.

The title insurance policy, grant deed and related papers have been retained in the files of this Department.

Sincerely yours,

William B. Darbe

Attorney General

Memorandum

To: Superintendent, Point Reyes National Seashore

From: Chief, Water Rights Branch

Subject: California State Water Resources Control Board Progress Reports and Reports of Licensee

We have reviewed the thirteen reports of licensee and one progress report by permittee (attached) mailed to us in a letter dated October 6, 1997. There is missing information or discrepancies in all of the reports between the authorized beneficial purposes and the reported water uses. Before we can finalize the reports and sign them, we would like your assistance in clarifying these discrepancies. Please review our comments below and return the completed reports and/or call Bill Hansen, of my staff, at (970) 225-3532 to discuss the need for filing change applications so we are in compliance with the conditions of each permit.

Our concerns are listed below and referenced by application and permit number:

Application A029021, Permit 020434, Use of Water (5): Has use of water commenced? If so, is any irrigation use and/or recreational use occurring?

Application A021954, Permit 009630: There is a conflict between the authorized purpose which is stockwatering and the actual uses shown on page 2. If this water is being used for domestic purposes we are in non-compliance with the permit and should file a change application to add domestic use. No Use

Application A019955, Permit 007931: What type of recreational use is occurring (i.e., fishing, boating, etc.)? ?

Application A019953, Permit 007929: There is a conflict between the authorized purposes which are domestic, recreational, and stockwatering and the actual uses shown on page 2. Is this water is being used for domestic purposes? If not, will it be in the future or should we file a change application to subtract domestic use? What type of recreational use is occurring (i.e., fishing, boating, etc.)?

Application A019952, Permit 007928: There is a conflict between the authorized purpose which is stockwatering and the actual uses shown on page 2. If recreational use is occurring we should file a change application. If it is not, we should not show this use on page 2.

Application A019951, Permit 007927: Is recreational use occurring? If so, what type and it should be shown on page 2.

Application A019950, Permit 007926: There is a conflict between the authorized purposes which are recreational and stockwatering and the actual uses shown on page 2. Is there actually 280 acres being irrigated, or was it intended to show 280 head of stock being watered. If irrigation is occurring we are in non-compliance with our permit. Is recreational use occurring? If so, what kind. If these discrepancies are real we will need to file a change application.

Application A020021, Permit 007941: There is a conflict between the authorized purpose which is stockwatering and the actual uses shown on page 2. If domestic use is occurring we need to file a change application to be in compliance with our permit.

Application A020022, Permit 007942: There is a conflict between the authorized purpose which is stockwatering and the actual uses shown on page 2. If domestic use is occurring we need to file a change application to be in compliance with our permit.

Application A021277, Permit 009049: There is a conflict between the authorized purposes which are recreational and stockwatering and the actual uses shown on page 2. If domestic use is occurring we need to file a change application to be in compliance with our permit. Is recreational use occurring? If so, what type and it should be shown on page 2.

Application A013473, Permit 003827: Are uses occurring in November, December, January, and February? Is irrigation occurring? If not, should we file a change application to be in compliance with our permit?

Application A013322, Permit 003800: Does use occur in January? There is a conflict between the authorized purposes which are domestic and industrial and the actual uses shown on page 2. It appears that the purpose should be changed to stockwatering since this is a beef cattle operation. Was this water used at one time for a dairy operation and the original permittee issued for industrial uses associated with dairy farming?

Application A017417, Permit 006748: There is a conflict between the authorized purpose which is recreational and the actual uses shown on page 2. If horses are being watered we are in non-compliance with our permit and should either discontinue stockwatering or file a change application to add stockwatering. ~ Mayneed change application

Application A019954, Permit 007930: What types of recreational use are occurring?

Dear Rancher:

The State of California's Water Commission has informed us that we must inventory our water use within the park. The Water Commission was created by the Water Commission Act and was given the task of licensing the water use in the state. This licensing process is important to protect your water supply from intrusions. Point Reyes National Seashore is required to comply with regulations concerning water use. To comply with the Water Commissions request we are asking that you fill out a brief *Water Inventory Questionnaire.* The prompt completion of this questionnaire will help us comply with the state requirements and ensure the security of your water.

The questionnaire is composed of fill-in-the-blank questions. Please follow the instructions and fill out the questionnaire as accurately as possible. Once the questionnaire is completed please return it promptly in the self-addressed and stamped envelope provided. If you have any questions please feel free to contact us. All questions should be directed to Bryan Leese at 663-8525.

Again, we hope that you will complete and return this form as quickly as possible. Your quick response will insure, for the park as well as for you, a secure and continuous supply of water for the future.

Thank You,

John L. Sansing

Water Inventory Questionnaire

The goal of this plan is to locate and record the source and use of water in the Point Reyes National seashore. All the data collected from this questionnaire will be used to aid the park in the filing of mandatory State Water Licensing forms. Please answer all the questions, and give the most accurate information possible. Please feel free to use the 'Remarks' spaces for any clarification of your responses, such as the area of a garden and lawn, or the separation of cows on more than tract of land and there main source of watering. Thank you.
