INTRODUCTION

This form provides diverters a standard method under which to request additional time to comply with the measurement and reporting requirements of Title 23, Division 3, Chapter 2.8, Section 931 through Section 938 of the California Code of Regulations. All extension requests must be accompanied by supporting documentation. Time extension requests are subject to review and approval.

Note: The large text boxes in the form have a character limit of 2000 characters. Responses requiring more than 2000 characters for a particular text box should be submitted as an attachment in Section C of this form.

SECTION A - REASON(S) FOR REQUEST

Complete this form if the time allowed under the regulation will expire prior to completion of the installation of the measurement or monitoring equipment. Provide attachments in Section C, if necessary. Incomplete forms may not be accepted.

(1) Please check the reason(s) you are requesting additional time: *

- [x] Additional time needed to access site due to weather or other on-site conditions
- [ ] Additional time needed to obtain other agency permits
- [ ] Additional time needed to deal with unforeseen circumstances
- [ ] Currently awaiting grant or loan award (answer questions 2 and 3 below)

(2) Funding was requested from the following source:

(3) Funding was requested on:

SECTION B - DETAILED DESCRIPTION

All Requests for Additional Time shall be accompanied by a plan documenting the additional time needed to comply with the measurement and monitoring requirements. All initial Requests for Additional Time will be granted from the installation deadline dates specified in the Regulation, for a maximum of 24 months.

(1) Number of months (24 maximum) extension requested to complete measuring and monitoring: * 24

(2) Describe the actions already taken toward commencing or completing measurement and monitoring. Include the reasons why the measurement and monitoring program has not yet been completed. *

In 1971 the United States purchased a tract of land from Boyd Stewart, acquiring the appurtenant water right. The licensed authorized the appropriation of water from two unnamed streams near Five Brooks to fill a mill pond for recreational use. There are no stream diversions supplying this pond. Five Brooks-Mill Pond is a spring fed pass through pond. The purpose of use is recreational fishing, stock watering, and wildlife habitat. Strict compliance to measuring and reporting is not feasible, would be unreasonably expensive, and would unreasonably affect public trust resources. The dam facilitating the impoundment is currently being assessed for rehabilitation or retirement. SWRCB measuring and reporting compliance is being included in that assessment. An alternative compliance plan is also being considered.

(5000 character max.)

(3) Describe the interim measurement and monitoring practices that will be implemented while compliance with the measurement and monitoring requirements is diligently pursued. *

The Park will continue to visually monitor the water level and estimate beneficial use based on historical practices.

(5000 character max.)

SECTION C - ATTACHMENTS

Each Request for Additional Time shall be accompanied by documentation of grant or loan request or agency permit requests, as applicable. A Request for Additional Time based on unforeseen circumstances shall be accompanied by a showing of good cause and a showing that all reasonable efforts have been made to comply with the established deadlines.

(1) Attach documents that support the Request for Additional Time.

(Uploaded files:)

(2) Provide a brief description of the attached documents.

(5000 character max.)

SECTION D - SIGNATURE

☑ I hereby certify that the above information is true and correct to the best of my knowledge and belief. *

Role * ○ Diverter ○ Agent ◉ Designated Contact

Name * Eric Lord

The State Water Board will review the facts presented to determine whether additional time may be granted. (Cal. Code Regs., tit. 23, § 936.)

The State Water Board will contact the diverter in writing to inform them if additional time is granted.

If additional time is not granted, the State Water Board may initiate enforcement action.

Failure to meet the measurement requirements is a violation subject to civil liability of up to $500 per day pursuant to Water Code section 1846

LICENSEE REPORTING FOR 2015

As indicated in the California Code of Regulations title 23, section 847, the State Water Resources Control Board (State Water Board) requires annual reporting of water diversion and use under licenses. California Water Code chapter 2.7 section 348 authorizes the State Water Board to require online reporting of water diversions. Consistent with these requirements, the State Water Board, Division of Water Rights (Division) developed a new online Report Management System (RMS) as a component of the enhanced Water Right Information Management System (eWRIMS). RMS allows electronic submittal of water diversion and use reports, saving both paper and resources. **All reports must be completed online through RMS; paper copies are not available.** To report online, go to **www.waterboards.ca.gov/rms** and login with your User ID and Password. The information required to login and access your online Report of Licensee is:

User ID (Water Right ID): **A017417**
Password (Reporting Identifier): **568040**

IMPORTANT: PLEASE NOTE BELOW

Effective immediately the Division of Water Rights will **NO LONGER** notify you via mail in the future when reporting is due. If you would like to be notified when reporting is due and other reporting related material, please subscribe to our Lyris list (Water Rights Reporting Notification) at:

http://www.waterboards.ca.gov/resources/email_subscriptions/swrcb_subscribe.shtml.

You are required to complete the online report for 2015 no later than **June 30, 2016.** If you do not have a computer or internet access, you should use a friend's computer, a computer in a public library, or a Division computer to fill out the form. Unfortunately, Division staff cannot fill the form out on your behalf. However, if you wish to seek assistance with the form, you may contact the Division to request a listing of attorneys and consulting firms with water rights experience. You can also review the listing on the Division's Business Information Contacts webpage at: www.waterboards.ca.gov/waterrights/board_info/contacts.shtml.

If you have multiple water rights, please be aware you must report water use separately for each right. Do not list total combined diversions under multiple rights on the form. To document compliance with the conditions of your water right(s), you may use RMS to submit photos (such as staff gages, measuring devices, etc.), documents (California Department of Fish and Wildlife agreements, other agency approvals, etc.), graphs, and spreadsheets.

REQUIRED NOTIFICATION OF CHANGE IN OWNERSHIP

You are required to notify the Division directly of any water right ownership change. Your county assessor's office or title company does not notify the Division of ownership changes. Failure to notify the Division of an ownership change prior to assessment of annual water right fees will result in your liability to pay the annual water right fee even if you transferred the property associated with the water right. Notification to the Division should be made using the Change of Name/Address or Ownership form by clicking on the Water Rights Forms link located at www.waterboards.ca.gov/waterrights/publications_forms/forms/index.shtml.

Fact Sheet

EMERGENCY REGULATION FOR MEASURING AND REPORTING ON THE DIVERSION OF WATER

Governor Edmund G. Brown Jr. signed Senate Bill (SB) 88 on June 24, 2015. Sections 15 through 18 of SB 88 add measurement and reporting requirements for a substantial number of diverters. The State Water Resources Control Board (State Water Board) adopted a regulation to implement the new law at its January 19, 2016 Board Meeting. The regulation will go into effect upon approval by the Office of Administrative Law, which is anticipated to occur in February 2016.

The measurement requirements of the regulation apply to all water right holders who divert 10 acre-feet of water or more per year. The annual reporting requirements in the regulation apply to all statement holders as well as persons authorized to appropriate water under a permit, license, registration (small domestic, small irrigation, or livestock stockpond), or certificate for livestock stockpond use.

Information on the regulation, SB 88, and related documents are available at:

http://www.waterboards.ca.gov/waterrights/water_issues/programs/measurement_regulation/

If you have any questions or concerns, please contact the Division of Water Rights (Division) at:

Email Address: dwr-measurement@waterboards.ca.gov
Phone Number: (916) 341-5300

Key Provisions of Regulation

Annual Water Use Reporting Requirements for Water Right Holders

All water right holders shall report on their diversion and use of water annually, beginning with reports for the 2016 diversion season. Annual water use reports for permits, licenses, registrations and stock pond certificates must be filed by April 1 of each year starting April 1, 2017 for diversions made in 2016. The annual use reports for statements shall be filed prior to July 1 of each year. All reports will continue to document diversions during the prior calendar year. The filing dates are for the annual water use reports are summarized below:

DIVERSION/STORAGE PERIOD	WATER USE REPORT DEADLINES				
	PERMITS	LICENSES	STATEMENTS	REGISTRATIONS	CERTIFICATES
2015	JULY 1, 2016	JULY 1, 2016	JULY 1, 2016	VARIES	NOT REQUIRED
2016	APRIL 1, 2017	APRIL 1, 2017	JULY 1, 2017	APRIL 1, 2017	APRIL 1, 2017

Reporting Requirements for Water Right Holders During Times of Insufficient Supply

When the amount of water available in a surface water source is not sufficient to support the needs of existing water right holders and in-stream uses, the State Water Board may require monthly or more frequent reporting in the affected areas to provide the most accurate assessment of water demand. The State Water Board will notify diverters in affected areas when additional reporting is required.

Deadline for Complying with Measurement and Reporting Requirements

The regulation provides for a phased approach to compliance. The compliance deadlines, by volume of water diverted, are shown in the table below.

Required Accuracy for Measurement and Frequency for Monitoring

SB 88 set expectations for both the accuracy of measurement devices as well as the monitoring frequency of the device. The regulation links both device accuracy and monitoring frequency to the volume categories in the table above. Larger diversions and larger reservoirs or ponds have more stringent measurement and monitoring requirements and more stringent requirements for the installation and certification of measurement devices as described in the table below.

Type of Diversion	Installation Deadline	Required Accuracy	Required Monitoring	Qualifications For Installation And Certification
Direct Diversion ≥ 1,000 afa Storage ≥ 1000 af	January 1, 2017	10%	Hourly	Engineer/Contractor/Professional
Direct Diversion ≥ 100 afa/ Storage ≥ 200 af	July 1, 2017	10%	Daily	Engineer/Contractor/Professional
Direct Diversion > 10 afa/ Storage ≥ 50 af	January 1, 2018	15%	Weekly	Individual experienced with measurement and monitoring
Storage > 10 af	January 1, 2018	15%	Monthly	Individual experienced with measurement and monitoring

Measurement Methods

Diverters may propose a measurement method, in lieu of a measuring device, to comply with measurement and accuracy requirements under the regulation. Examples of measurement methods include:

- Multiple water right holders on a single surface supply can propose a collaborative measurement approach.
- A single water right holder with multiple points of diversion can propose a measurement method that may preclude the need to install a measurement device at each point of diversion.

Alternative Compliance

A water right holder may request an alternative compliance approach when strict compliance is not feasible, would be unreasonable expensive, would unreasonable affect public trust resources, or would result in the waste or unreasonable use of water.

The Division is preparing the forms to request alternative measurement or alternative compliance. All requests must be submitted on the Division's forms. Please note; persons subject to the regulation are not allowed to claim "not locally cost effective".

Certification of Water Measurement Device

The regulation requires that the accuracy of the water measurement device be certified every five years, in accordance with the table above. The regulation calls for an initial certification with the first water use report filed after the device has been installed.

LICENSEE REPORTING FOR 2014

As indicated in the California Code of Regulations title 23, section 847, the State Water Resources Control Board (State Water Board) requires annual reporting of water diversion and use under licenses. California Water Code chapter 2.7 section 348 authorizes the State Water Board to require online reporting of water diversions. Consistent with these requirements, the State Water Board, Division of Water Rights (Division) developed a new online Report Management System (RMS) as a component of the enhanced Water Right Information Management System (eWRIMS). RMS allows electronic submittal of water diversion and use reports, saving both paper and resources. **All reports must be completed online through RMS; paper copies are not available.** To report online, go to **www.waterboards.ca.gov/rms** and login with your User ID and Password. The information required to login and access your online Report of Licensee is:

User ID (Water Right ID): **A017417**
Password (Reporting Identifier): **568040**

You are required to complete the online report for 2014 no later than **June 30, 2015.** If you do not have a computer or internet access, you should use a friend's computer, a computer in a public library, or a Division computer to fill out the form. Unfortunately, Division staff cannot fill the form out on your behalf. However, if you wish to seek assistance with the form, you may contact the Division to request a listing of attorneys and consulting firms with water rights experience. You can also review the listing on the Division's Business Information Contacts webpage at: www.waterboards.ca.gov/waterrights/board_info/contacts.shtml.

If you have multiple water rights, please be aware you must report water use separately for each right. Do not list total combined diversions under multiple rights on the form. To document compliance with the conditions of your water right(s), you may use RMS to submit photos (such as staff gages, measuring devices, etc.), documents (California Department of Fish and Wildlife agreements, other agency approvals, etc.), graphs, and spreadsheets.

SPECIAL REPORTING FEATURES:

- It is possible to create one account on the RMS site to report all of your water rights. It is not necessary to create an account if you would like to report your water rights individually. Please see the RMS login page for more information and instructions.
- RMS includes the capability to amend current and past reports. Amendments to credits previously claimed pursuant to Water Code sections 1010, 1011, and 1011.5 are subject to review and may not be accepted.
- Licensees can list all of their reservoirs associated with this license in their report.
- RMS includes new on screen help tools and instructions.

REQUIRED NOTIFICATION OF CHANGE IN OWNERSHIP

You are required to notify the Division directly of any water right ownership change. Your county assessor's office or title company does not notify the Division of ownership changes. Failure to notify the Division of an ownership change prior to assessment of annual water right fees will result in your liability to pay the annual water right fee even if you transferred the property associated with the water right. Notification to the Division should be made using the Change of Name/Address or Ownership form by clicking on the Water Rights Forms link located at www.waterboards.ca.gov/waterrights/publications_forms/forms/index.shtml.

CONTACT INFORMATION

Frequently asked questions pertaining to filling out online reports are posted at the RMS website and we encourage you to read these first. However, if you still have any questions or need assistance completing the report, please contact the Division of Water Rights at (916) 323-9393 or send an email to: ewrims@waterboards.ca.gov.

State Water Resources Control Board

NOTICE OF DELINQUENCY TO FILE REPORT OF LICENSEE

On February 28, 2011, the State Water Resources Control Board (State Water Board), Division of Water Rights (Division) mailed you the enclosed "Notice to Water Right Licensee" notifying you of the requirement to electronically file your Report of Licensee for 2010 no later than July 1, 2011. **To date, the Division has not received your Report of Licensee. This matter requires your immediate attention and you should file your Report of Licensee as soon as possible.**

By not filing your Report of Licensee, you are in violation of the terms and conditions of your license and/or Chapter 2, Article 20, section 847 of the California Code of Regulations. Failure to file the Report of Licensee may result in the State Water Board issuing an order requiring you (or the Licensee you represent) to cease and desist from diverting or storing water under your license. Thereafter, for every day that you continue to divert or store water under your license, but fail to file your Report of Licensee, the State Water Board may issue you an administrative civil liability of up to one thousand dollars ($1,000) per day. The State Water Board will take your response to this Notice of Delinquency into consideration for potential enforcement action.

Please note that this Notice of Delinquency pertains only to the water right license(s) identified on the enclosed "Notice to Water Right Licensee" and not to any other water rights or claims of water right that you may own, including permits, Statements of Water Diversion and Use, and/or Groundwater Recordations. If you reported water diversion and use under a different "ID" number than the one shown on the enclosed notice, you may have more than one water right or claim of water right. You must report your water diversion and use separately for each of your water rights or claims of water rights. Additional information regarding your license reporting requirements is contained in the enclosed notice.

If you have questions or need assistance, please contact the Division at (916) 323-9393 or by email at: ewrims@waterboards.ca.gov. Written correspondences or inquiries should be addressed as follows: State Water Resources Control Board, Division of Water Rights, Attn: Report of Licensee Staff, P.O. Box 2000, Sacramento, CA, 95812-2000.

Sincerely,

ANNUAL LICENSEE REPORTING FOR 2010

The State Water Resources Control Board (State Water Board) has historically required Reports of Licensee to be filed once every three years in paper form. Senate Bill 8, which was signed into law in 2009, authorized the State Water Board to adopt regulations requiring online reporting of water diversions. Consistent with the Senate Bill, the State Water Board has adopted regulations requiring annual reporting of water diversion and use under licenses, and developed a new online Report Management System (RMS) as a component of the enhanced Water Right Information Management System (eWRIMS). The online RMS allows you to electronically submit your water diversion and use report, saving both paper and resources. To report on-line, go to **www.waterboards.ca.gov/rms** and log in with your water right ID and password. The information required to log in and access your online Report of Licensee is:

Water Right ID: **A017417**
Password: **7C2D6B**

You are required to complete the online report for 2010 no later than **July 1, 2011.** You may also submit your record of diversion and use for previous years using the RMS. To maintain a continuous record of water use under your license, Licensees with **Reporting Cycle 1** should report their monthly diversion and use for 2008, 2009, and 2010. Licensees with **Reporting Cycle 2** should report their monthly diversion and use for 2009 and 2010; and Licensees with **Reporting Cycle 3** only need to report monthly diversion and use for 2010. Please note that it is not possible at this time to amend a report submitted through the RMS.

CHANGES FOR 2010 REPORTING:

Question 4 on the previous Report of Licensee form ("Amount of Water Used") has changed. New Question 5c requires you to report both the "*Amount directly diverted and/or collected to storage*" and the corresponding "*Amount used*" for each month. For many direct diversion-only projects, these amounts will be the same and the online form provides a check box for that purpose (Question 5b).

New Questions 6a and 6b on the RMS Report of Licensee requires you to report the maximum instantaneous *rate* of diversion that has occurred in each month under the license, if available.

If your water project is covered by two or more water rights, you should only report your diversion and use of water for the project covered by the license number printed above. The total amount diverted and used under multiple water rights should not be combined and reported on a single

form. In such cases, you should quantify your diversion under each water right, assigning water to the senior-most right first, to the extent allowed under the permit or license.

REQUIRED NOTIFICATION OF CHANGE IN OWNERSHIP

You are required to notify the State Water Board directly of any water right ownership change. Your county assessor's office or title company does not notify us of any ownership updates. Failure to notify the State Water Board of an ownership change prior to assessment of annual water right fees will result in your liability to pay the annual water right fee even if you transferred the property associated with the water right. Notification to the State Water Board should be made using the Change of Name/Address or Ownership form by clicking on the Water Rights Forms link located at www.waterboards.ca.gov/waterrights/board_info

CONTACT INFORMATION

Frequently asked questions pertaining to filling out online reports are posted at the RMS website and we encourage you to read these first. PLEASE ANSWER ONLY THOSE QUESTIONS BELOW THAT ARE APPLICABLE TO YOUR WATER RIGHT PROJECT
(Please note that future amendments to the claims below will not be accepted.)

An appropriative water right can be reduced or revoked through five continuous years of nonuse. However, the California Water Code specifies that under certain conditions no reduction or loss of the appropriative water right shall occur due to: (a) water conservation efforts; (b) use of recycled, desalinated, or polluted water; and/or (c) conjunctive use of groundwater and surface water. You must report the extent and amount of water claimed for credit below. Failure to report the amounts will deprive you of the benefits allowed under the Water Code sections.

CONSERVATION OF WATER: (Water Code section 1011)

7. **[ ] YES [ ] NO** During the period covered by this Report, were you implementing any water conservation efforts? If **YES**, please describe:

_____

8. If **YES** and you want to claim credit for the amount of water conserved towards the water use authorized under your license as allowed under Water Code section 1011, please show the amount of water conserved below:

Future amendments to this claim will not be accepted.	2007	2008	2009
Amount of water conserved. *Specify in acre-feet (AF) or million gallons (MG)*			

WATER QUALITY AND WASTEWATER RECLAMATION: (Water Code section 1010)

9. **[ ] YES [ ] NO** During the period covered by this Report, did you use reclaimed water from a wastewater treatment facility, water from a desalination facility, or water polluted by waste to a degree which unreasonably affects the water for other beneficial uses?

10. If **YES** and you want to claim credit for the substitution of this reclaimed, desalinated, or polluted water in lieu of the surface water authorized under your license as allowed by Water Code section 1010, please show the amount of reclaimed, desalinated, or polluted water used below:

Future amendments to this claim will not be accepted.	2007	2008	2009
Amount of reclaimed, desalinated, or polluted water used. *Specify in acre-feet (AF) or million gallons (MG)*

CONSERVATION OF WATER (WATER PURVEYORS)

17. What measures are you using or planning to reduce water losses in conveyance systems? (1) Seepage or leak detection program [ ]; (2) Lining canals [ ]; (3) Phreatophyte and aquatic vegetation control [ ]; (4) Other (describe in "Remarks") [ ].

18. What measures are used to encourage consumers to conserve water in agricultural use? (1) Program to encourage more efficient irrigation systems (sprinkler, drip, etc.) where applicable [ ]; (2) Return flow systems on individual farms [ ]; (3) Return flow system areawide [ ]; (4) Water pricing to encourage reduced use [ ]; (5) Charges for drainage of irrigated lands [ ]; (6) Other (describe in "Remarks") [ ].

19. What measures are used to encourage municipal and industrial consumers to conserve water? (1) Regulations to control wasteful use [ ]; (2) Public education program on water conservation [ ]; (3) Pricing to encourage reduced use [ ]; (4) Assistance to industry in design of recycle systems [ ]; (5) Other (describe in "Remarks" [ ].

20. What records are maintained on water use and conservation? (1) Loss rate from conveyance system [ ]; (2) Water use for major crops by each farm [ ]; (3) Other (describe in "Remarks") [ ].

CONSERVATION OF WATER (WATER USERS)

21. Describe any water conservation efforts you may have started: _____

22. If credit toward beneficial use of water under this license for water not used due to a conservation effort is claimed under Water Code Section 1011, please show the amounts of water conserved (acre feet or mg.):
1978 _____ 1979 _____ 1980 _____

WATER QUALITY AND WASTEWATER RECLAMATION

23. Describe methods you are using to minimize erosion and to prevent the entry of silt into surface waters: _____

24. After use, the water is (1) retained in reservoir [ ]; (2) discharged into a stream or lake [ ]; (3) discharged into settling ponds [ ]; (4) Other [ ]. Describe: _____

25. Does or will water being discharged contain waste materials? YES [ ] NO [ ].
(1) Domestic [ ]; (2) Municipal [ ]; (3) Industrial [ ]; (4) Agricultural [ ]; (5) Other [ ]. Describe: _____

26. Does or will water being discharged contain any specific material which is deleterious to fish and wildlife or which would impair the water for beneficial uses? YES [ ] NO [ ]. Describe: _____

TO THE EXTENT THE FOLLOWING QUESTIONS APPLY TO YOUR LICENSE, PLEASE ANSWER IN REMARKS SECTION BELOW.

27. Are you now or have you been using reclaimed water from a wastewater treatment facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES [ ] NO [ ].

If credit toward use under this water right through substitution of reclaimed or polluted water in lieu of appropriated water is claimed under Section 1010 of the Water Code, please show amounts of reduced diversion and amounts of reclaimed water used.

28. Are you now or have you been reclaiming or reusing any of the water appropriated under this right? YES [ ] NO [ ]. If yes, please describe. _____

29. What is present availability or current potential for using reclaimed water from a wastewater treatment plant or polluted water in place of the appropriated water to satisfy all or part of your water needs?

30. What is the current potential for reusing the appropriated water to satisfy part of your water needs?

31. If you produce reclaimed water, or polluted water, is there a potential for others to use it?

APPLICATION 17417 PERMIT 11498 LICENSE 6748

THIS IS TO CERTIFY, *That* Boyd Stewart, Joseffa Stewart and Jo Ann Stewart
c/o Pillsbury, Madison and Sutro
225 Bush Street
San Francisco, California
have made proof as of May 18, 1962,

Notice of Change (Over)

(the date of inspection) to the satisfaction of the State Water Rights Board of a right to the use of the water of
two unnamed streams in Marin County

tributary to Olema Creek

for the purpose of industrial use
under Permit 11498 *of the State Water Rights Board and that said right to the use of said water has been perfected in accordance with the laws of California, the Rules and Regulations of the State Water Rights Board and the terms of the said permit; that the priority of the right herein confirmed dates from* January 7, 1957, *and that the amount of water to which such right is entitled and hereby confirmed, for the purposes aforesaid, is limited to the amount actually beneficially used for said purposes and shall not exceed* one-tenth (0.1) cubic foot per second from point (1) and six-hundredths (0.06) cubic foot per second from point (2) by direct diversion to be diverted from January 1 to December 31 of each year and thirty-five (35) acre-feet per annum by off-stream storage to be collected from about November 1 of each year to about May 31 of the succeeding year; provided however that no water shall be diverted under this license from about June 1 to about October 31 of each year except the amount reasonably required to offset evaporation and seepage losses from licensees' log pond.

The maximum rate of diversion to off-stream storage has been 0.2 cubic foot per second.

Licensees shall at all times so limit their diversions from their northerly unnamed source (Point 2) as to permit the satisfaction of such prior rights as Frank Santori or his successors may possess to divert from that stream for use on his property

The points of diversion of such water are *located* :

(1) South thirty-nine degrees thirty minutes west (S39°30'W) forty-five (45) feet from NE corner of Lot 40, Fivebrooks Subdivision One, being within NW¼ of projected Section 20, T2N, R8W, MDB&M.

(2) South eighty-eight degrees forty-five minutes west (S88°45'W) sixty-five (65) feet from most easterly corner of Lot 16, Fivebrooks Subdivision One, being within NW¼ of projected Section 20, T2N, R8W, MDB&M.

A description of the lands or the place where such water is put to beneficial use is as follows:

Within NW¼ of projected Section 20, T2N, R8W, MDB&M.

All rights and privileges under this license including method of diversion, method of use and quantity of water diverted are subject to the continuing authority of the State Water Rights Board in accordance with law and in the interest of the public welfare to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.

Reports shall be filed promptly by licensee on appropriate forms which will be provided for the purpose from time to time by the State Water Rights Board.

The right hereby confirmed to the diversion and use of water is restricted to the point or points of diversion herein specified and to the lands or place of use herein described.

This license is granted and licensee accepts all rights herein confirmed subject to the following provisions of the Water Code:

Section 1625. Each license shall be in such form and contain such terms as may be prescribed by the board.

Section 1626. All licenses shall be under the terms and conditions of this division (of the Water Code).

Section 1627. A license shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code) but no longer.

Section 1628. Every license shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a license is issued takes the license subject to the conditions therein expressed.

Section 1629. Every licensee, if he accepts a license does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any license granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any licensee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any licensee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

Section 1630. At any time after the expiration of twenty years after the granting of a license, the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State shall have the right to purchase the works and property occupied and used under the license and the works built or constructed for the enjoyment of the rights granted under the license.

Section 1631. In the event that the State, or any city, city and county, municipal water district, irrigation district, lighting district, or political subdivision of the State so desiring to purchase and the owner of the works and property cannot agree upon the purchase price, the price shall be determined in such manner as is now or may hereafter be provided by law for determining the value of property taken in eminent domain proceedings.

Application Received March 1, 1957

I, Boyd Stewart, Joseffa Stewart and Jo Ann Stewart
Name of applicant or applicants

of Olema County of Marin
Address

State of California, do hereby make application for a permit to appropriate the following described unappropriated waters of the State of California, *SUBJECT TO VESTED RIGHTS:*

Source, Amount, Use and Location of Diversion Works

1. **The source** of the proposed appropriation is two (2) unnamed streams
Give name of stream, lake, etc., if named; if unnamed state nature of source and that it is unnamed

located in Marin County, tributary to Olema Creek

2. **The amount of water** which applicant desires to appropriate under this application is as follows:

(a) For diversion to be directly applied to beneficial use 0.4* cubic feet per
1 cubic foot per second equals 40 statute miner's inches or 646,317 gallons per day

second, to be diverted from January 1 to December 31 of each year.
Beginning date Closing date

(b) For diversion to be stored and later applied to beneficial use 35 acre-feet
1 acre-foot equals 325,851 gallons

per annum, to be collected between November 1 and May 31 of each season.
Beginning date Closing date

NOTE.—Answer *(a)* or *(b)* or both *(a)* and *(b)* as may be necessary. If amount under *(a)* is less than .025 cubic foot per second, state in gallons per day. Neither the amount nor the season may be increased after application is filed. If underground storage is proposed a special supplemental form will be supplied by the State Water Rights Board upon request.

3. **The use** to which the water is to be applied is industrial
Domestic, irrigation, power, municipal, mining, industrial, recreational

purposes.

4. **The point of diversion** is to be located S 39° 30" W 45' from NE corner Lot 40, Fivebrooks
State bearing and distance or coordinate distances from section or quarter section corner

S88° 45'W 65' from most easterly cor. Lot 16, Fivebrooks, Sub. One
Projected Section 20, T2N, R8W, MDB&M
being within the (This area not sectionalized) - NW-1/4 .)
State 40-acre subdivision of public land survey or projection thereof

of Section 20, T. 2N, R. 8W, MD B. & M., in the County of Marin
(This area not sectionalized - See Map.)

5. **The main conduit** terminates in of Sec. 20, T. 2N, R. 8W, MD B. & M.
State 40-acre subdivision of U. S. Government survey or projection thereof

Description of Diversion Works

NOTE.—An application cannot be approved for an amount grossly in excess of the estimated capacity of the diversion works.

6. **Intake or Headworks** (fill only those blanks which apply)

(a) Diversion will be made by pumping from sump in most southerly stream
Sump, offset well, unobstructed channel, etc.

(b) Diversion will be by gravity, the diverting dam being 3 feet in height (stream bed to level of overflow); 10 feet long on top; and constructed of wood core & Earth in northerly stream bottom
Concrete, earth, brush, etc.

(c) The ~~storage dam~~ will be 20 1/2 feet in height (~~stream bed~~ to overflow level); 1500 feet long on top; have a freeboard of 2 feet, and be constructed of earth
Concrete, earth, etc.

7. Storage ~~Reservoir~~ Mill pond
~~Mill pond~~ Name

The storage ~~reservoir~~ will flood lands in as shown on Map in projected Section 20, T2N MDB&M
Indicate section or sections, also 40-acre subdivisions unless shown upon map

It will have a surface area of 5 acres, and a capacity of 35 acre-feet.

☞ In case of insufficient space for answers in form, attach extra sheets at top of page 3 and cross reference.

FORM 1

8. Conduit System (describe main conduits only)

(a) Canal, ditch, flume: Width o. .op (at water line) ..... feet; w n bottom .....
Cross out two not used

feet; depth of water ..... feet; length ..... feet; grade ..... feet per 1,000 feet; materials of construction .....
Earth, rock, timber, etc.

(b) Pipe line: Diameter 4 inches; length 1200 feet; grade 13.3 feet per 1,000 feet; total fall / lift from intake to outlet 16' feet; kind transite
Riveted steel, concrete, wood-stave, etc.

NOTE.—If a combination of different sizes or kinds of conduit is to be used, attach extra sheets with complete description, also show location of each clearly on map.

9. **The estimated capacity** of the ~~diversion conduit~~ or pumping plant proposed is 0.2 cubic foot per second each
State cubic feet per second or gallons per minute

The estimated cost of the diversion works proposed is Pipe - $4,200; Pump - $350.00; Mill pond - $20,000.00
Give only cost of intake, or headworks, pumps, storage reservoirs and main conduits described herein

Completion Schedule

10. **Construction work** will begin on or before July 20, 1956

Construction work will be completed on or before April 1, 1957

The water will be completely applied to the proposed use on or before - exact date unknown - No water is now being diverted

Description of Proposed Use

11. **Place of Use.** NW 1/4 of projected Section 20, T2N, R8W, MDB&M (Area not sectionalized)
State 40-acre subdivisions of the public land survey. If area is unsurveyed indicate the location as if lines of the public land survey were projected. In the case of irrigation use state the number of acres to be irrigated in each 40-acre tract, if space permits. If space does not permit listing of all 40-acre tracts, describe area in a general way and show detail upon map.

Do(es) applicant(s) own the land whereon use of water will be made? Yes (Yes or No) Jointly? Yes (Yes or No)

If applicant does not own land whereon use of water will be made, give name and address of owner and state what arrangements have been made with him.

12. **Other Rights.** Describe all rights except those on file with the State Water Rights Board under which water is served to the above named lands.

Nature of Right (riparian, appropriative, purchased water, etc.)	Year of First Use	Use made in recent years including amount if known	Season of Use	Source of Other Supply
1. Riparian	about 1940	watering cattle	all	some streams and
2.				Olema Creek
3.				
4.				

Attach supplement at top of page 3 if necessary.

13. **Irrigation Use.** The area to be irrigated is ..... acres.
State net acreage to be irrigated

The segregation of acreage as to crops is as follows: Rice ..... acres; alfalfa ..... acres; orchard ..... acres; general crops ..... acres; pasture ..... acres.

NOTE.—Care should be taken that the various statements as to acreage are consistent with each other, with the statement in Paragraph 11, and with the map.

The irrigation season will begin about ..... (Beginning date) and end about ..... (Closing date)

14. **Power Use.** The total fall to be utilized is ..... feet.
Difference between nozzle or draft tube water level and first free water surface above

The maximum amount of water to be used through the penstock is ..... cubic feet per second.

The maximum theoretical horsepower capable of being generated by the works is ..... horsepower.
Second feet × fall ÷ 8.8

The use to which the power is to be applied is .....
For distribution and sale or private use, etc.

The nature of the works by means of which power is to be developed is .....
Turbine, Pelton wheel, etc.

The size of the nozzle to be used is ..... inches.

The water will / will not be returned to ..... (Name stream) in ..... (State 40-acre subdivision) of Sec. ....., T. ....., R. ....., ... B. & M.

SUPPLEMENT

17. The water to be diverted arises from springs on the applicants' property. The applicants own all the property shown on the map, except Mr. Frank Santori's lot (on which he maintains only a residence) on the northerly of the two unnamed streams and the land on the west side of Olema Creek, which is owned by Mr. John Denman. Enough water will remain in the northerly stream to supply Mr. Santori's domestic uses.

The water is to be diverted to a mill pond, as shown on a map, and will eventually return to Olema Creek. The mill pond is located in the Olema Creek watershed.

SUPPLEMENT AMENDING 2(a)

2(a). For diversion to be directly applied to beneficial use 0.15 cubic foot per second each creek or a total of 0.3 cubic foot per second to be diverted from November 1 to May 31 of each year, and 0.2 cubic foot per second each creek for a total of 0.4 cubic foot per second to be diverted from June 1 to October 31 of each year.

15. **Municipal Use.** This application is made for the purpose of serving _____ (Name city or cities, town or towns. Urban areas only) having a present population of _____

The estimated average daily consumption during the month of maximum use at the end of each five-year period until the full amount applied for is put to beneficial use is as follows:

16. **Mining Use.** The name of the mining property to be served is _____ (Name of claim) and the nature of the mines is _____ (Gold placer, quartz, etc.)

The method of utilizing the water is _____

It is estimated that the ultimate water requirement for this project will be _____ (Cubic feet per second, gallons per minute. State basis of estimate)

The water will / will not be polluted by chemicals or otherwise _____ (Explain nature of pollution, if any)

and it will / will not be returned to _____ (Name stream) in _____ (State 40-acre subdivision) of Sec. _____, T. _____, R. _____, _____ B. & M.

17. **Other Uses.** The nature of the use proposed is industrial (Industrial, recreational, domestic, stockwatering, fish culture, etc.)

State basis of determination of amount needed. _____ (Number of persons, residences, area of domestic lawns and gardens, number and kind of stock, type industrial use, and unit requirements)

See attached sheet

General

18. Are the maps as required by the Rules and Regulations filed with Application? Yes (Yes or No). If not, state specifically the time required for filing same _____

19. Does the applicant own the land at the proposed point of diversion? Yes (Yes or No). If not, give name and address of owner and state what steps have been taken to secure right of access thereto Boyd Stewart

20. What is the name of the post office most used by those living near the proposed point of diversion?

Olema, Marin County, California

21. What are the names and addresses of claimants of water from the source of supply below the proposed point of diversion? John R. Denman, Olema, Marin County, California
Frank Santori, Olema, Marin County, California

PERMIT No. 11498

This is to certify that the application of which the foregoing is a true and correct copy has been considered and approved by the State Water Rights Board SUBJECT TO VESTED RIGHTS and the following limitations and conditions:

1. The amount of water appropriated shall be limited to the amount which can be beneficially used, and shall not exceed 0.3 cubic foot per second by direct diversion to be diverted from about November 1 to about May 31, and 0.4 cubic foot per second by direct diversion to be diverted from about June 1 to about October 31 of each season; and 35 acre-feet per annum by offstream storage to be collected from about November 1 of each year to about May 31 of the succeeding year; provided however that no water shall be diverted under thus permit from about June 1 to about October 31 of each year except the amount reasonably required to offset evaporation and seepage losses from permittee's log pond.

2. The maximum amount herein stated may be reduced in the license if investigation so warrants.

~~[illegible] and shall thereafter be prosecuted with reasonable diligence and if not so commenced and prosecuted this permit may be revoked.~~

3. Said construction work shall be completed on or before December 1, 1960.

4. Complete application of the water to the proposed use shall be made on or before December 1, 1961.

5. Progress reports shall be filed promptly by permittee on forms which will be provided annually by the State Water Rights Board until license is issued.

6. All rights and privileges under this permit including method of diversion, method of use and quantity of water diverted are subject to the continuing authority of the State Water Rights Board in accordance with law and in the interest of the public welfare to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.

7. Permittees shall at all times so limit their diversions from their northerly unnamed source as to permit the satisfaction of such prior rights as protestant Frank Santori may possess to divert from that stream.

This permit is issued and permittee takes it subject to the following provisions of the Water Code:

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

01-06-1972: Re-examination of title data

222 RW2

Office of the Attorney General
Washington, D. C.

January 6, 1972

Honorable Rogers C. B. Morton
Secretary of the Interior
Washington, D. C.

My dear Mr. Secretary:

A re-examination has been made of the title data relating to 301.15 acres of land, more or less, Tract No. 03-120, Point Reyes National Seashore Project in Marin County, California. Fee title to a portion of this land and an easement over the balance were conveyed to the United States of America under the provisions of existing legislation by Boyd Stewart, et al., under deed dated September 29, 1971, filed for record on September 30, 1971, and recorded among the land records of the county in Book 2506 at page 298. Your reference is L1425 (WR)ML PORE and the file number of this Department is 33-5-2295-187.

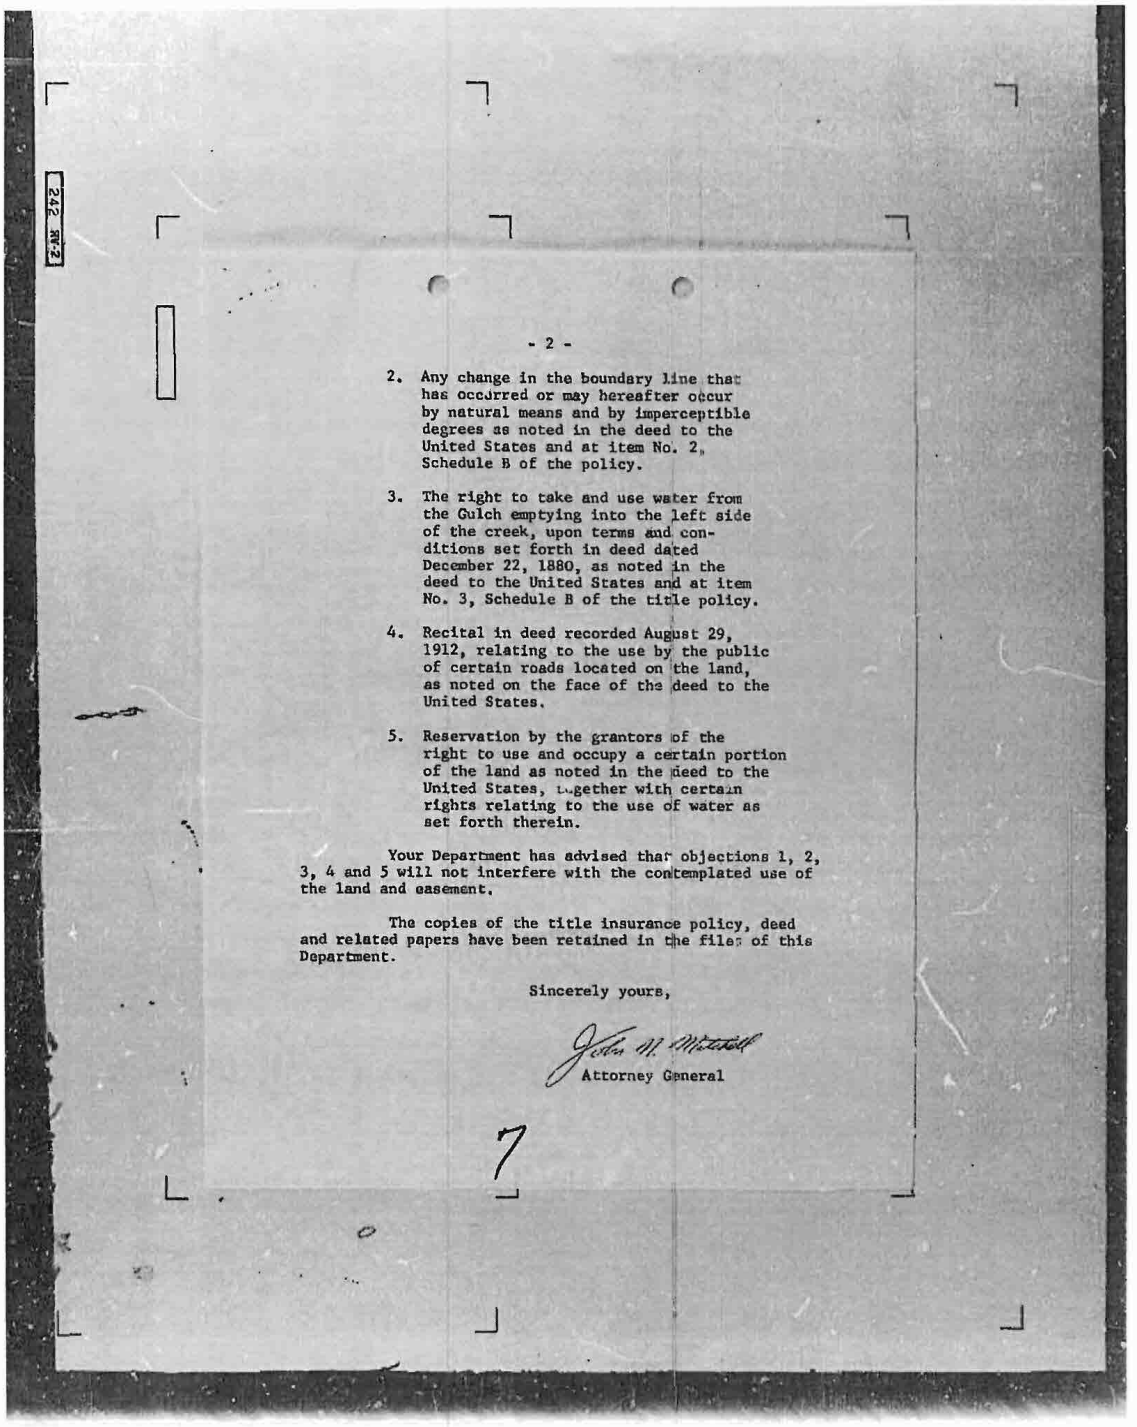

The land and easement are described in the aforesaid deed, which recites a consideration of $400,000.00.

The title insurance policy, No. 50146, dated as of November 16, 1970, and extended to September 30, 1971, by endorsement was prepared by Transamerica Title Insurance Company and is satisfactory.

The title insurance policy, recorded deed and accompanying data disclose valid title to be vested in the United States of America, subject to:

1. Existing easements of record for public roads and highways, public utilities, railroads, pipelines, ditches and canals.

6

242 MM 242

2. Any change in the boundary line that has occurred or may hereafter occur by natural means and by imperceptible degrees as noted in the deed to the United States and at item No. 2, Schedule B of the policy.

3. The right to take and use water from the Gulch emptying into the left side of the creek, upon terms and conditions set forth in deed dated December 22, 1880, as noted in the deed to the United States and at item No. 3, Schedule B of the title policy.

4. Recital in deed recorded August 29, 1912, relating to the use by the public of certain roads located on the land, as noted on the face of the deed to the United States.

5. Reservation by the grantors of the right to use and occupy a certain portion of the land as noted in the deed to the United States, together with certain rights relating to the use of water as set forth therein.

Your Department has advised that objections 1, 2, 3, 4 and 5 will not interfere with the contemplated use of the land and easement.

The copies of the title insurance policy, deed and related papers have been retained in the files of this Department.

Sincerely yours,

John M. Mitchell

Attorney General

Application A019953, Permit 007929: There is a conflict between the authorized purposes which are domestic, recreational, and stockwatering and the actual uses shown on page 2. Is this water is being used for domestic purposes? If not, will it be in the future or should we file a change application to subtract domestic use? What type of recreational use is occurring (i.e., fishing, boating, etc.)?

Application A019952, Permit 007928: There is a conflict between the authorized purpose which is stockwatering and the actual uses shown on page 2. If recreational use is occurring we should file a change application. If it is not, we should not show this use on page 2.

Application A019951, Permit 007927: Is recreational use occurring? If so, what type and it should be shown on page 2.

Application A019950, Permit 007926: There is a conflict between the authorized purposes which are recreational and stockwatering and the actual uses shown on page 2. Is there actually 280 acres being irrigated, or was it intended to show 280 head of stock being watered. If irrigation is occurring we are in non-compliance with our permit. Is recreational use occurring? If so, what kind. If these discrepancies are real we will need to file a change application.

Application A020021, Permit 007941: There is a conflict between the authorized purpose which is stockwatering and the actual uses shown on page 2. If domestic use is occurring we need to file a change application to be in compliance with our permit.

Application A021277, Permit 009049: There is a conflict between the authorized purposes which are recreational and stockwatering and the actual uses shown on page 2. If domestic use is occurring we need to file a change application to be in compliance with our permit. Is recreational use occurring? If so, what type and it should be shown on page 2.

Application A013473, Permit 003827: Are uses occurring in November, December, January, and February? Is irrigation occurring? If not, should we file a change application to be in compliance with our permit?

Application A013322, Permit 003800: Does use occur in January? There is a conflict between the authorized purposes which are domestic and industrial and the actual uses shown on page 2. It appears that the purpose should be changed to stockwatering since this is a beef cattle operation. Was this water used at one time for a dairy operation and the original permittee issued for industrial uses associated with dairy farming?

Application A017417, Permit 006748: There is a conflict between the authorized purpose which is recreational and the actual uses shown on page 2. If horses are being watered we are in non-compliance with our permit and should either discontinue stockwatering or file a change application to add stockwatering. Pursued change application

Dear Mr. Chavez:

Please refer to our telephone conversation earlier this week concerning the license to appropriate water formerly owned by Boyd Stewart, Joseffa Stewart and Jo Ann Stewart which permits the diversion of a small quantity of water from two unnamed creeks in order to fill the mill pond on the property recently acquired by the United States from the Stewarts. Enclosed is the original and copy of a "Report of Licensee for 1969, 1970, 1971" addressed to the State Water Resources Control Board, Division of Water Rights, which is required under the terms of the Stewart license. Persuant to my conversation with you, the Stewarts have not completed the report and have not communicated with the Division of Water Rights. It is my understanding that you will take such steps as you deem advisable to protect the rights of the United States as assignee of the water license. Needless to say, the Stewarts will cooperate in supplying you with any necessary information. If further inquiry is made to the Stewarts by the Division of Water Rights, we shall advise the Division that the property has been acquired by the United States, and that we understand that the Federal Government will handle any necessary report.

If the foregoing is not completely satisfactory, please let me know.

Yours very truly,

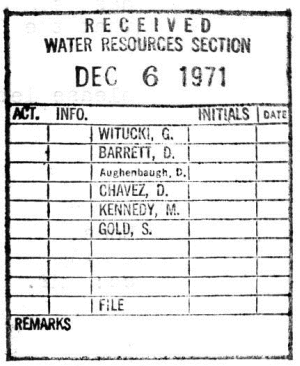

L. F. Kuechler

From: Superintendent, Point Reyes National Seashore

Subject: Report of Water Use, Parcel No. 03-120

We have been informed by Mr. Larry Kuechler, an attorney with the firm of Pillsbury, Madison and Sutro, that an annual report of water use is due for diversions serving a mill pond on Parcel 03-120, recently acquired from Boyd Stewart.

Mr. Kuechler said that he does not know if the federal government is required to submit such an annual report, but that with the scarcity of water in West Marin, it is likely that riparian owners downstream on Olema Creek would file on this water if they had the opportunity. He has offered to assist in any way possible, and has the files concerning previous reports at his office. His telephone number is 421-6133.

We will appreciate your having someone in the water rights division look into this. The mill pond at Five Brooks, while not a natural body of water, is scenic and we feel it should be maintained. Its only source of water is from these diversions, which feed the pond through pipes. If any more information is needed from here, please let us know.
