To: Alice Chung-MacCoubrey, KLMN Program Manager

From: Larry Whalon, Lava Beds National Monument Superintendent

Subject: Handling of protected natural resource data

The Superintendent of Lava Beds National Monument has identified resources that are rare, threatened, endangered, or commercially valuable. Information about these resources (the specific location, abundance, presence, or absence), if released to the public or other unapproved audiences, has been determined to potentially result in harm, theft, or destruction. To ensure data are appropriately protected in accordance with park management priorities, the following rules must be followed when disseminating natural resource information collected through inventory, monitoring, or other related scientific activities.

Type of Data	Level of Protection	Rules for Dissemination
Resource Data and Information		
Location Data and Information		
Cave Entrances	Legally Protected	Cave entrance locations will not be released to the public. Any such data collected will be redacted from publicly released datasets. This will be done indefinitely.

For *[Signature]*, Natural Resource Program Manager 12-12-2018

Looks good to me.

Hi Katrina. I am attaching the protected data memo that we need to get the superintendent to sign. We were hoping to discuss this but since the BOD meeting is before the TC meeting, we won't be able to do that and still get signatures. Can you please look at the memo and let me know if you approve? Then Alice can ask Larry to sign it tomorrow.

Thanks!
Allison
