To: Alice Chung-MacCoubrey, KLMN Program Manager

From: Jim Richardson, Lassen Volcanic National Park Superintendent

Subject: Handling of protected natural resource data

The Superintendent of Lassen Volcanic National Park has identified resources that are rare, threatened, endangered, or commercially valuable. Information about these resources (the specific location, abundance, presence, or absence), if released to the public or other unapproved audiences, has been determined to potentially result in harm, theft, or destruction. To ensure data are appropriately protected in accordance with park management priorities, the following rules must be followed when disseminating natural resource information collected through inventory, monitoring, or other related scientific activities.

Type of Data	Level of Protection	Rules for Dissemination
Resource Data and Information		
Sierra Nevada red fox (<i>Vulpes vulpes necator</i>)	Operationally Protected	Specific locations of red fox dens will not be released to the general public. Any such data collected will be redacted from publicly released datasets. This will be done indefinitely.
Location Data and Information		

JIM RICHARDSON
Superintendent, Lassen Volcanic National Park
