ADDRESS REPLY TO
THE SUPERINTENDENT

November 28, 1942.

Bats

MEMORANDUM for the Custodian,
Bandelier National Monument.

Under date of November 18, we have the following memorandum addressed to the Regional Director, Region Three, from Mr. Victor H. Cahalane, in charge of National Park Wildlife:

> "In the report of Bandelier National Monument for August 1942, we noted mention of an important bat flight from a cave in that monument. When convenient, we would be interested to have further information regarding the cave and its bat population, the species of bats, and any of the past history of the bat colony that you might know."

At your convenience, will you please provide us with the information requested in Mr. Cahalane's memorandum so that we may forward it to the Director's Office for Mr. Cahalane?

Charles A. Richey
Superintendent.

cc: The Director.
