Introduction

For more than 40 years the Washington Natural Heritage Program (WNHP) has maintained a list of Washington plant species of conservation concern. Each of these species is ranked at the global and state scale following the standardized protocol of the NatureServe network. Although WNHP is not a regulatory agency, the program's list and rankings help inform conservation decisions relating to rare plants on federal, state, private, and tribal lands (WDNR 2018).

The WNHP list is periodically updated as new information becomes available on the status and distribution of rare plants in Washington. The following is an update of the June 2018 list (WNHP 2018). No species have been dropped from the previous list, but 13 have been added. New species are indicated by a * preceding the species name (status changes are underlined or crossed through). Additional information is provided on distribution pattern within Washington (local endemic, peripheral, disjunct, etc.) and by county, ecoregion, and major managed area (such as national forest, national park, or state lands).

Each of the main headings in the species list and their codes are briefly described below:

Species/Common Name: Species are organized alphabetically by their scientific name. Nomenclature mostly follows Hitchcock and Cronquist (2018). Pertinent synonyms are included in parentheses. Common names follow the USDA Plants database (<http://plants.usda.gov>) or NatureServe (<http://explorer.natureserve.org>).

Heritage Rank: WNHP uses the ranking system developed by NatureServe to assess global and state conservation status of each plant species, subspecies, and variety. Taxa are ranked on a scale of 1 to 5 (from highest to lowest conservation concern).

G = Global Rank: rangewide status of a full species

T = Trinomial Rank: rangewide status of a subspecies or variety

S = State Rank: status of a species, subspecies, or variety within the state of Washington

1 = Critically Imperiled – at very high risk of extirpation due to very restricted range, very few occurrences, very steep declines, very severe threats, or other factors

2 = Imperiled – at high risk of extirpation due to restricted range, few occurrences, steep declines, severe threats, or other factors

3 = Vulnerable – at moderate risk of extirpation due to a fairly restricted range, relatively few occurrences, recent and widespread declines, threats, or other factors

4 = Apparently secure – at fairly low risk of extirpation due to an extensive range or many occurrences, but with possible cause for some concern as a result of local recent declines, threats, or other factors

5 = Secure – at very low risk of extirpation due to a very extensive range, abundant occurrences, and little to no concern from decline or threats

H = Historical – known from only historical occurrences (prior to 1978) but still with some hope of rediscovery

X = Presumed Extirpated – not relocated since 1978 despite intensive searches and virtually no likelihood of rediscovery

U = Unrankable – lack of information or substantially conflicting information about status
NR = Not Ranked – rank not assessed yet
Q = Questionable - questions exist about the taxonomic validity of a species, subspecies, or variety
? = Questionable – questions exist about the assigned G, T, or S rank of a taxon

State Status: Washington state status is assigned by WNHP. Factors considered include abundance, distribution patterns, number of extant occurrences, vulnerability, threats, existing protection, and taxonomic distinctness. Categories include:

Endang = Endangered, in danger of becoming extinct or extirpated from Washington
Threat = Threatened, likely to become Endangered in Washington
Sens = Sensitive, vulnerable or declining and could become Threatened or Endangered in Washington
Extirp = possibly extinct or extirpated in Washington (includes state historical species)

Federal Status: Under the US Endangered Species Act (ESA), the US Fish and Wildlife Service recognizes four categories:

Endang = Endangered. A species, subspecies, or variety in danger of extinction throughout all or a significant portion of its range.
Threat = Threatened. A species, subspecies, or variety likely to become Endangered in the foreseeable future
Prop = Proposed. A species, subspecies, or variety formally proposed for listing as Endangered or Threatened (a proposal has been published in the Federal Register, but not a final rule)
Cand = Candidate. A species, subspecies, or variety being evaluated by USFWS for potential listing as Threatened or Endangered under the ESA, but no formal proposal has been published yet.

The Interagency Special Status and Sensitive Species Program (ISSSSP) of the US Forest Service (USFS) and Bureau of Land Management (BLM) in Washington and Oregon recognize two categories of species of concern (ISSSSP 2019). Strategic species, defined as sensitive species that might potentially occur on BLM or USFS-managed lands, are no longer being recognized in the 2019 ISSSSP list.

B-Sens = BLM Sensitive; all USFWS candidate and delisted species and WNHP species of concern ranked S1, S1S2, S1S3, S2, or S2S3 found on at least one BLM managed area in Washington.
F-Sens = Forest Service Sensitive: all USFWS candidate and delisted species and WNHP species of concern ranked S1, S1S2, S1S3, S2, or S2S3 found on at least one USFS managed area in Washington.

Distribution (Dist.) Pattern: Species rarity is often correlated with geographic distribution patterns. The following patterns can be recognized in Washington:

LocEnd = Local Endemic; global range of taxon is less than 16,500 km² or about 1 degree of latitude x 2 degrees of longitude (about the size of an average county)

RegEnd = Regional Endemic; global range of taxon is between 16,500 to 250,000 km² (or an area about the size of the state of Washington)

Disjunct = Disjunct; globally widespread but state population is isolated from the main contiguous range by a gap or more than 500 km

Periph = Peripheral; globally widespread but Washington population is at the margin of the main contiguous range of the taxon

Sparse = Sparse; widely distributed across the state but with relatively few populations (less than 20)

Widesp = Widespread; widely distributed globally and in Washington, with more than 20 populations in the state.

County: Three-letter codes are used to document the distribution of plant species by county. Vague or unsubstantiated reports are indicated by ?.

Ada = Adams

Grh = Grays Harbor

Pie = Pierce

Aso = Asotin

Isl = Island

Saj = San Juan

Ben = Benton

Jef = Jefferson

Skg = Skagit

Che = Chelan

Kin = King

Skm = Skamania

Clm = Clallam

Ktp = Kitsap

Sno = Snohomish

Clk = Clark

Ktt = Kittitas

Spo = Spokane

Col = Columbia

Kli = Klickitat

Ste = Stevens

Cow = Cowlitz

Lew = Lewis

Thu = Thurston

Dou = Douglas

Lin = Lincoln

Whk = Wahkiakum

Fer = Ferry

Mas = Mason

Waw = Walla Walla

Fra = Franklin

Oka = Okanogan

Whc = Whatcom

Gar = Garfield

Pac = Pacific

Wht = Whitman

Gra = Grant

Peo = Pend Oreille

Yak = Yakima

Ecoregion: Ecoregions are biologically-defined geographic areas with similar environmental, physiographic, or vegetation patterns. We follow the classification of Camp and Gamon (2011). Two-letter codes are used for ecoregion names. Vague or unsubstantiated reports are indicated by ?.

BM = Blue Mountains

EC = East Cascades

PC = Pacific Northwest Coast

CP = Columbia Plateau

NC = North Cascades

PT = Puget Trough

CR = Canadian Rockies

OK = Okanogan

WC = West Cascades

Washington Counties

Washington Ecoregions

Managed Area: Major Washington state, federal, or tribal land management areas are included when known. Blank listings indicate that a species is only known from private lands or state trust lands. “?” indicates that presence within a management area is not confirmed. Complete managed area information, or data specific to individual plant occurrences, can be obtained from WNHP (www.dnr.wa.gov/natural-heritage-program). The following abbreviations are used:

- AFB = Air Force Base (Dept. of Defense)
- BLM = Bureau of Land Management
- CF = Community Forest
- ERP = Environmental Research Park (nuclear reservation)
- JB = Joint Base (Dept. of Defense)
- NAP = Natural Area Preserve (Washington Dept of Natural Resources)
- NF = National Forest
- NHP = National Historical Park
- NM = National Monument
- NP = National Park
- NRCA = Natural Resources Conservation Area (Washington Dept of Natural Resources)
- NRA = National Recreation Area
- NSA = National Scenic Area
- NVM = National Volcanic Monument
- NWR = National Wildlife Refuge
- PUD = Public Utility District
- SP = State Park
- SWA = State Wildlife Area (Washington Dept of Fish & Wildlife)
- TC = Training Center (Dept of Defense)
- WA = Wilderness Area

Name Changes: The following species names have been changed to follow the revised taxonomy of Hitchcock and Cronquist (2018):

2018 List

Astragalus multiflorus
Cheilanthes feei
Chylismia scapoidea ssp. *scapoidea*
Coeloglossum viride var. *virescens*
Collinsia sparsiflora var. *bruceae*
Lycopodium dendroideum
Minuartia nuttallii var. *fragilis*
Minuartia pusilla
Monolepis spathulata
Myosurus clavicaulis
Orobanche californica ssp. *grayana*
Ranunculus cooleyae
Tauschia hooveri
Tauschia tenuissima
Trillium parviflorum

2019 List

Astragalus tenellus
Myriopteris gracilis
Chylismia scapoidea ssp. *brachycarpa*
Dactylorhiza viridis
Collinsia sparsiflora var. *sparsiflora*
Dendrolycopodium dendroideum
Sabulina nuttallii var. *fragilis*
Sabulina pusilla
Blitum spathulatum
Myosurus alopecuroides
Aphyllon californicum
Arcteranthis cooleyae
Lomatium lithosolamans
Lomatium tenuissimum
Trillium albidum ssp. *parviflorum*
