

2024 Pony Express Re-Ride Map Tracker Instructions

To use this map:

The Legend Widget displays the symbols and layers represented within the application. When new layers are activated via the layer list, the legend is updated accordingly. The layers include the Current Rider Location, Past Rider Locations, Exchange Stations, Re-Ride Route, Pony Express NHT, and NOAA Weather.

The Layer List Widget provides a list of layers to display on the map. Each layer can be viewed in the map by checking the box to the left of the symbol. Options to zoom to, set transparency, and move up/down by selecting the drop down arrow to the right of the layer are available.

Zoom Slider Widget allows the user to interactively zoom to the desired scale within the application or use your mouse scroll wheel.

Home Widget zooms to the initial map extent.

My Location Widget allows the network to detect your physical location centering you on the map extent.

The Measurement Widget allows the user to measure areas and distances within the application.

The Basemap Gallery Widget offers a selection of background layers for reference, such as aerial imagery.

Click on the Rider symbol on the map to view a pop-up with the details about ride time and location. Click the  button within a pop-up window to change the layer pop-up.

Click on the Blue Pin  symbol on the map to view the station name
