## Note to File

Date: June 14, 2017
From: Joseph Chafey, WRB Hydrologist
File: SEKI Claims S024915, S024916, S024919, S024921, S024923 & S024926
Subject: Preliminary Information (In-side Front Cover)
Supplemental Statements of Diversion and Use

These claims are pre-code (1914) riparian with regulatory storage (less than 30 days) not legal (true) storage.

Supplemental Statements of Diversion and Use (2013, 2014 & 2015): the type of diversion and the amount of water diverted and used was inadvertently entered as *Diversion to Storage Only* and *Amount diverted or collected to storage (Acre-Feet)* respectively.

For these claims the correct type of diversion is *Direct Diversion Only* and the amount of water diverted and used is *Amount directly diverted (Acre-Feet)*.

MEMO TO FILE

In 2014, the State of California suffered the third consecutive year of extreme drought. In January 2014, the Governor declared a drought emergency. The State Water Resources Control Board issued projections for the summer of 2014 as to likely calls for curtailment in the state's major watersheds.

In response, WRB contacted all of the NPS units in California regarding the drought and offered WRB's services to assist in preparations for potential calls for curtailment. A few parks responded, and WRB prepared drought assessments for SEKI, YOSE, and LAVO, and also worked with PINN and WHIS. The drought assessments included an inventory of the park's rights and uses, an assessment of the relative seniority of the parks rights, and an estimation of the likelihood of the park's rights being called for curtailment. In spring 2014, WRB sent to SEKI, YOSE, and LAVO the drought assessments with recommendations to ensure that park water needs were protected.

In summer 2014, the Board did issue calls for curtailment of post-1914 rights in order to protect the diversions of senior rights (pre-1914 and riparian). In addition, the State legislature passed laws regarding the management of groundwater—the first legislation regarding groundwater in the State's history. As a result of these developments, WRB updated the drought assessment and provided a final hardcopy to SEKI, LAVO, and YOSE, reflecting these developments.

**Given the size of the drought assessment, one hard copy was put into Docket #1 of each park listed above in the section "Other Supporting Information". In the remaining dockets, this Memo to File has been placed, referring readers to the drought assessment located in Docket #1.**

**In addition, the Drought Assessment is cross referenced as a .PDF in IRMA (Code No. 2242660) in each applicable docket.**

8. Measurement Device Description

Method used to measure water diverted (select one)

(●) Water directly diverted and/or diverted to storage was measured with a measuring device. (if checked, proceed to section 8a and skip section 8b)

( ) Direct measurement using a device listed in Section 8a is not locally cost effective for water directly diverted and/or diverted to storage. (If checked, skip section 8a and proceed to section 8b).

List the make, model number, and last calibration date of your measuring device(s), if available:

8b. Explanation of why use of a measuring device is "not locally cost effective"

Indicate why you concluded that direct measurement using a device listed in Section 8a is not locally cost effective (check all that apply)

- [ ] Diversion is small or minimal in size
- [ ] Diversions are infrequent
- [ ] Ungauged Siphon
- [ ] No power at diversion point
- [ ] Other: _____

Indicate method(s) used as an alternative to direct measurement in order to complete this report (check all that apply)

- [ ] Electricity records dedicated to the pump
- [ ] Total facility electricity records minus estimated non-pump electricity
- [ ] Engine fuel use or hour meter records
- [ ] Crop duty estimates/consumptive use estimates
- [ ] Power generation estimates
- [ ] Other water duty estimates other than for crops
- [ ] Modeled/estimated flows
- [ ] Remote satellite imaging
- [ ] Pipe/trajectory method
- [ ] Bucket and stopwatch
- [ ] Float and stopwatch
- [ ] Other: _____

Explain your measurement alternatives:
