STATE OF CALIFORNIA—STATE WATER RIGHTS BOARD

License for Diversion and Use of Water

APPLICATION 18544PERMIT 11980LICENSE 7358

Lucille Skinner, John K. Skinner and Ada H. Twisselmann
 dba Valley View Ranch
 General Delivery
 Cima, California

Notice of Change (Over)

THIS IS TO CERTIFY, That

(the date of inspection) to the satisfaction of the State Water Rights Board of a right to the use of the water of
 China Spring in San Bernardino County

tributary to Wheaton Wash thence Ivanpah Lake

for the purpose of stockwatering use
 under Permit 11980 of the State Water Rights Board and that said right to the use of said water has been
 perfected in accordance with the laws of California, the Rules and Regulations of the State Water Rights Board and the
 terms of the said permit; that the priority of the right herein confirmed dates from February 20, 1959,
 and that the amount of water to which such right is entitled and hereby confirmed, for the purposes aforesaid, is limited
 to the amount actually beneficially used for said purposes and shall not exceed two hundred (200) gallons
 per day to be diverted from January 1 to December 31 of each year.

The point of diversion of such water is located :

North one thousand two hundred (1200) feet and east two hundred (200) feet from
 SW corner of Section 20, T15 $\frac{1}{2}$ N, R14E, SBB&M, being within SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of said
 Section 20.

A description of the lands or the place where such water is put to beneficial use is as follows:

Within SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of Section 20, T15 $\frac{1}{2}$ N, R14E, SBB&M.

Licensee shall not construct or maintain fences or other works which may prevent
 access to water from the source hereunder by the public or wildlife.

All rights and privileges under this license including method of diversion, method of use and quantity of water
 diverted are subject to the continuing authority of the State Water Rights Board in accordance with law and in the
 interest of the public welfare to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of
 diversion of said water.

Reports shall be filed promptly by licensee on appropriate forms which will be provided for the purpose from time
 to time by the State Water Rights Board.

The right hereby confirmed to the diversion and use of water is restricted to the point or points of diversion herein
 specified and to the lands or place of use herein described.

This license is granted and licensee accepts all rights herein confirmed subject to the following provisions of the Water Code:

Section 1625. Each license shall be in such form and contain such terms as may be prescribed by the board.

Section 1626. All licenses shall be under the terms and conditions of this division (of the Water Code).

Section 1627. A license shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code) but no longer.

Section 1628. Every license shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a license is issued takes the license subject to the conditions therein expressed.

Section 1629. Every licensee, if he accepts a license does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any license granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any licensee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any licensee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

Section 1630. At any time after the expiration of twenty years after the granting of a license, the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State shall have the right to purchase the works and property occupied and used under the license and the works built or constructed for the enjoyment of the rights granted under the license.

Section 1631. In the event that the State, or any city, city and county, municipal water district, irrigation district, lighting district, or political subdivision of the State so desiring to purchase and the owner of the works and property cannot agree upon the purchase price, the price shall be determined in such manner as is now or may hereafter be provided by law for determining the value of property taken in eminent domain proceedings.

DataStore - Activation: California Desert Protection Act of 1994 – June 3, 1995 (nps.gov)

The purpose of this memorandum is to outline the actions that need to be taken to implement the California Desert Protection Act of 1994 and indicate the responsible officials. Its primary audience is park managers, staff, and the interested public. Its objectives are to provide an administrative history, outline steps for activating the act's provisions, and clarify the responsibilities of federal and state officials. Key aims include designating and managing new wilderness areas and national parks, protecting natural resources, preserving traditional land uses like grazing, and coordinating law enforcement and land management activities. The document is crucial for guiding the effective management and preservation of the protected areas.

Description

Report on the formation and management of Mojave National Preserve. Information on mining issues, resources, and threats to the Preserve are included.

Chapter 8 – Administrative History (excerpt)

For Mojave National Preserve, grazing is a controversial and important issue that cannot be ignored. Widespread political and cultural overtones help make grazing a sensitive issue for everyone involved. As such, park management tread carefully but deliberately in the arena of grazing management. The Park Service has long viewed grazing as antithetical to its mission, permitting the activity in certain parks only when political circumstances absolutely required it. Park Service culture and policy have historically limited grazing in national parks, initially to differentiate itself from the Forest Service, and in later years to help maintain ecosystems. The long history of grazing in Mojave National Preserve and permission for its continuation in perpetuity by legislative action complicates natural resource decisions, making the goal of a functioning pre-grazing ecosystem frustratingly difficult to achieve.

At the time Mojave National Preserve was established, all or part of eleven BLM grazing allotments, established under the 1934 Taylor Grazing Act, were included within the park. Superintendent Marvin Jensen brought a background in range conservation with him and established a friendly management tone toward grazers. All existing operations were issued NPS permits to continue with their ranching activity, and management of the range did not differ substantially from BLM activity.

The Park Service also took concrete steps toward limiting grazing when possible, providing that the situation was politically feasible. The portion of the Piute allotment within the park was for ephemeral forage only and was in desert tortoise habitat. Management decided that any ephemeral forage must, at behest of the Desert Tortoise Recovery Plan, be used by the desert tortoise, so a permit to graze ephemeral forage would never be issued. A second allotment, Crescent Peak, was owned by a conservation group, who had purchased it as part of a move to

eliminate grazing in southern Nevada. Since no active grazing was taking place, the permit was retired. Not long after the creation of the Preserve, the rancher who held the Clark Mountain grazing allotment passed away, and Park Service regulations forbid the issue of a permit for renewed operations there. Irene Ausmus held the Round Valley allotment, just large enough for her to keep her two pet cows in feed, but not so big as to cause significant resource issues for the park.

Major cattle operations in Mojave National Preserve were essentially controlled by three groups. The Overson family was responsible for the largest share of the acreage, with the OX and Kessler Springs ranches owned by Gary and Linda Overson, and the Granite Mountains ranch owned by their son, Clay Overson. Next in size were the Valley View and Valley Wells allotments, both owned by Richard Blincoe, an Idaho agriculturalist, and managed by Tim Overson. The Blair family operated the 7IL Ranch on the Colton Hills and Gold Valley allotments. During the CDPA debate, the Blairs worked to preserve their ranching way of life, and an original clause that specified a twenty five year sunset on Mojave ranching was removed from the bill largely as a result of their efforts. In 2001, the park concluded an arrangement begun in 1998 where the 40 acres of park land that included the 7IL Ranch headquarters were swapped to the Blairs for 40 acres of undisturbed land in critical desert tortoise habitat owned by the ranching family. Touted as a "win-win" situation for the Blairs and the Park Service, the deal also showed locals that the government was not out to destroy family ranchers in the Preserve.

Ranch lands are identified in the California Desert Protection Act as top priorities for acquisitions. In contrast to the Blairs' opposition to the CDPA, Gary Overson specifically requested that his ranchlands be included in the park, to guarantee an acceptable purchase price should he decide to sell his property. Beginning in 1995, Deputy Superintendent Mary Martin worked to coordinate the sale of Overson's ranch to the National Parks Conservation Fund, but after years of contract negotiations, the deal fell through at least in part as a result of strict timelines and reluctance on the part of BLM. Undaunted, Martin sought another donor, but Overson doubted the ability of the Park Service to complete a buyout, as a result of the earlier failed experiment. Overson looked for another private buyer for his ranch, but the park made it clear to the buyer that issuance of a new grazing permit "is not certain" and that "the application process ... is subject to lengthy and potentially costly delays and complex administrative and legal procedures and challenges." As a trial run, Mojave National Preserve and the National Park Foundation worked to move the Granite Mountains Ranch, owned by Overson's son, to NPS control. The deal was completed in April 2000, and set the stage for the park's successful acquisition of Gary Overson's holdings in January 2001. In 2002, Blincoe also agreed to sell his ranches to the park.

The effect of the Overson and Blincoe allotment acquisitions cannot be overstated. Total grazing in the Mojave National Preserve was reduced from some 37,000 Animal Unit Months (AUMs) to approximately 4,000 AUMs, leaving the 7IL as the only major cattle ranch in the Preserve. The elimination of grazing will move the formerly grazed lands closer toward a goal of a more naturally functioning ecosystem. The Park Service also gained control of a tremendous number and variety of structures associated with cattle ranching in the eastern Mojave desert. In 2002, a consultant produced a National Register district nomination for the Overson properties, signifying their historic importance to the east Mojave; future plans may include interpretive programs and utilizing some structures for NPS employee housing. The ranches acquired by Mojave National Preserve included some private lands among the holdings, but the most valuable assets to the park were the grazing permits and the ranchers' water rights.

**Agreement to Conditions for Donation
Fee Lands
Mojave National Preserve**

WHEREAS, the National Park Foundation is donating funds towards the National Park Service's acquisition of certain fee lands from Richard D. and Betty Blincoe, and Blincoe Farms, Inc. ("Sellers"), as set forth in the Contract for Sale, Valley View and Valley Wells Allotments in the Mojave National Preserve, between Sellers and the National Park Foundation, and amendment(s) thereto.

WHEREAS, said fee lands are set forth on Exhibit A attached to and incorporated and made a part of this Agreement ("fee lands").

WHEREAS, the funds donated by the National Park Foundation for this acquisition are equal to one hundred percent of the portion of the Purchase Price set forth in the Contract for Sale between Sellers and the National Park Foundation which is attributable to the acquisition of the fee lands.

WHEREAS, it is the intent of the National Park Foundation and its donors, as acknowledged by Richard D. and Betty Blincoe, and Blincoe Farms, Inc., that no future grazing will be permitted or otherwise authorized by the National Park Service on the fee lands, and that water rights thereon shall be forever conserved by the National Park Service in accordance with National Park Service laws, the mandates set forth in Mojave National Preserve law, and the terms of this Agreement.

WHEREAS, it is the intent of the National Park Foundation and its donors that the National Park Service prevent any permanent structures or alterations upon the fee lands unless

necessary for public health and safety or for permanent preservation of natural resources by the National Park Service.

WHEREAS, it is the intent of the National Park Foundation and its donors that each and every water resource and related improvement on the fee lands, including but not limited to facilities relating to livestock watering, be restored (either actively or passively) to a natural condition, removed, or maintained in such a condition as to be consistent with the promotion of natural population levels and habitat for native species.

WHEREAS, it is the intent of the donors to the National Park Foundation for this acquisition that use of the water resources and improvements on the fee lands be only for preserving natural native resources and natural population levels of native species.

WHEREAS, the National Park Service will administer the fee lands in accord with the terms of this Agreement, the California Desert Protection Act, the National Park Service Organic Act and all laws applicable to the Mojave National Preserve.

WHEREAS, the National Park Service's acceptance of each and every condition of this Agreement and this Agreement is an inducement to the National Park Foundation to make the donation, and the Foundation and its donors would not have made the donation without the National Park Service's acceptance of each and every condition described in this Agreement.

WHEREAS, in making this Agreement, and accepting the donation, through the National Park Foundation, the National Park Service acknowledges that the measure of the value to the National Park Foundation and its donors of the National Park Service committing to permanently prohibiting any future grazing-related uses upon the fee lands and carrying out each of the additional duties in this Agreement includes not only any monetary benefit that the Foundation

may obtain, if any, but also other benefits, including but not limited to the benefits of ensuring the permanent restoration and preservation of all the land resources, water resources, and scenic, aesthetic, and environmental values associated with the fee lands.

NOW THEREFORE, in consideration of and as an express condition of this Agreement and the donation, the National Park Service, on behalf of itself, and its successors, assigns, and contractors, if any, will not allow or permit livestock or feral animal grazing uses on the fee lands. Further, the National Park Service agrees to take any and all further measures, as necessary, to ensure permanent cancellation and termination of any grazing leases, permits, and allotments that may be associated with the fee lands. The National Park Service agrees that the fee lands and all estates, rights, privileges, and interests that are part of or associated with the fee lands shall be forever conserved and used in perpetuity for the preservation of natural habitat consistent with the conservation and preservation purposes of the Mojave National Preserve.

Further, the National Park Service will convert all water rights that are part of or associated with the fee lands into conservation and/or reserved water rights of the Preserve as recognized under California water law and/or mandated in the California Desert Protection Act (16 U.S.C. 410aaa-76). Further, the National Park Service will curtail groundwater extraction upon the fee lands, except to the extent necessary to provide water for conservation purposes of the Mojave National Preserve. The National Park Service will not allow water resources and water rights that are within the Preserve boundary and subject to this Agreement to be used outside the Preserve boundary, nor allow the fee lands to be used for transmission of water between locations outside of the Preserve. Further, the National Park Service will restore (either actively or passively) to a natural condition, remove, or maintain in such a condition as to be

consistent with the promotion of natural population levels and habitat for native species each and every water resource and related improvement on the fee lands, including but not limited to facilities relating to livestock watering.

Further, the National Park Service will not introduce nor authorize the introduction of non-native species (except at historic sites in connection with approved treatment plans consistent with the General Management Plan for the Mojave National Preserve as adopted pursuant to the 2001 record of decision and published April 2002 (the "General Management Plan")) upon the fee lands.

Further, in compliance with the conditions of this Agreement and the donation, the National Park Service will expressly incorporate into a grazing management plan or other activity plan or specific plan for the Mojave National Preserve a commitment that the fee lands will not be subject to any grazing or grazing-related use in the future. Further, the National Park Service will deliberately seek the special regulations to limit hunting, fishing and trapping, as committed to in the General Management Plan, and such regulations shall not be inconsistent with the conditions of this Agreement. Further, the National Park Service will prevent any permanent alterations structures or other physical improvements, and will remove from the Mojave National Preserve all range improvements or range developments upon the fee lands, unless necessary to provide for employee-related housing within or upon the site of structures currently suitable to that use, or unless essential to meet public health and safety needs or, consistent with preservation purposes, native species and habitat needs. For the purpose of preventing trespass cattle, the National Park Service will fence the perimeter of the Mojave National Preserve's satellite unit in the manner set forth in the General Management Plan.

The National Park Service agrees to these conditions by executing an acceptance below. Should the National Park Service not adhere to any of these conditions, the National Park Foundation and/or its donors, through their authorized agent, shall be entitled to pursue any and all legal remedies in equity and law.

This agreement may be signed in original counterparts, each of which shall be considered an original and which together will constitute one and the same agreement.

Water Resources Scoping Report, Mojave National Preserve, 1999

National Park Service. 1999. Water Resources Scoping Report, Mojave National Preserve. NPS/NRWRD/NRTR-99/225. National Park Service, Water Resources Division. Fort Collins, Colorado
IRMA – Data Store – Published Report – (Code: 2174498)
[DataStore - Water Resources Scoping Report, Mojave National Preserve \(nps.gov\)](#)

The purpose of this report is to describe how the park was conceived and established and how it has been managed to the present day. Its primary audience is park managers and staff, but it is also directed to the interested public. The report aims to be as comprehensive as possible while emphasizing management issues of ongoing concern. It is essentially a chronological narrative with the selection of topics and the amount of detail weighted somewhat more heavily toward the recent past. While the administrative history covers many diverse management issues, its core objective is to distinguish those historical themes that most ably explain this national park's unique character and course of development.
