REMARKS The Westlake Diversion lies within Hydrologic Basin Unit No. 18020006

NARRATIVE:

Lewis J. Westlake and Arnold and Betty Zehnle appled to the State of California on July 2, 1962 (Application No. 20837) to appropriate 15 acre feet from an unnamed stream tributary to Brandy Creek to be stored in the Westlake Reservoir. The water was to be collected between November 1 and June 1 each year and to be used for domestic homes, cabin sites, a small fishing reservoir and a boys camp.

On July 11, 1967m the Westlakes sold their property to the U.S. "together with all water and water rights appurtenant thereto..." including application No. 20837. Mr. Westlake and the Zehnle's later filed a Notice of Assignment to the State Water Rights Board for this application. In 1968 the park obtained a three year extension of time to complete construction. On June 19, 1969, after an inspection made by a Mr. C.H. Dabney of the State Water Rights Board, Mr. L.J. Mitchell, Superintendent of Whiskeytown, filed a request for a license for the above application(Permit No. 13876) for 6.1 acre fee collected between November 1 and June 1 each season and to be used for recreational purposes. On April 9, 1970, the State issued License No. 9292 to the NPS as a result of the above request. The Report of Licensee filed by the Water Resources Division for the years 1970 to 1972 states that the water was used for 6 horses, a fishing pond, fire protection, and for domestic use by five people.

NOTICE OF UNAVAILABILITY OF WATER AND IMMEDIATE CURTAILMENT FOR THOSE DIVERTING WATER IN THE SACRAMENTO RIVER WATERSHED WITH A POST-1914 APPROPRIATIVE RIGHT

On January 23, 2015 and again on April 2, 2015, the State Water Resources Control Board (State Water Board) issued a Notice of Surface Water Shortage and Potential for Curtailment due to dry conditions throughout the State. On April 1, 2015, the Governor issued an executive order, order B-29-15, continuing the state of emergency, initially enacted on January 17, 2014, due to drinking water shortages, diminished water for agriculture production, degraded habitat for fish and wildlife, increased wildfire risk and the threat of saltwater contamination to fresh water supplies in the Sacramento-San Joaquin Delta.

Curtailment of Post-1914 Water Rights:
Based upon the most recent reservoir storage and inflow projections, along with forecasts for future precipitation events, the State Water Board has determined that the existing water supply in the Sacramento River watershed is insufficient to meet the needs of all water rights holders. With this notice, the State Water Board is notifying all holders of post-1914 appropriative water rights within the Sacramento River watershed of the need to immediately stop diverting under their post-1914 water rights, with the exceptions discussed below. Please be advised that, if you continue to divert under a claim of pre-1914 right, most or all pre-1914 rights in the Sacramento River watershed are likely to be curtailed later this year due to the extreme dry conditions. This condition of curtailment will continue until water conditions improve. Even if there is water physically available at your point of diversion, that water is necessary to meet senior water right holders' needs or is water released from storage that you are not entitled to divert. If precipitation occurs in the following weeks or months, you should not commence diversion before being notified by the State Water Board that water is legally available for diversion under your priority of right.

Permission to initiate diversions during or following significant rainfall events may be posted at: http://www.waterboards.ca.gov/waterrights/water_issues/programs/drought/index.shtml#notices. You can get immediate email updates from the State Water Board about these notices by subscribing to "Drought Updates" at: http://www.waterboards.ca.gov/resources/email_subscriptions/

Compliance Certification Required:
Curtailed post-1914 diverters are required to document receipt of this notice by completing an online Curtailment Certification Form (Form) within seven days. The Form confirms your cessation of diversion under the specific post-1914 water right, and, if applicable, identifies the alternate water supply you will use in lieu of the curtailed water right. Completion of the Form is mandatory to avoid unnecessary potential enforcement proceedings. You are required to complete the Form for each post-1914 water right identified through this curtailment at:
http://www.waterboards.ca.gov/waterrights/water_issues/programs/ewrims/curtailment/2015curt_form.php

Exceptions to Curtailment:
If your diversion is for hydroelectric generation by direct diversion only and all water diverted is returned to the same stream system, you may continue to divert under your post-1914 permit or license. If you continue to divert under the above circumstances, you must identify that on the Form and provide the information requested. If you have previously collected water to storage in a reservoir covered by a post-1914 right prior to this curtailment notice, you still may beneficially use that previous stored water consistent with the terms and conditions of your post-1914 water right. However, you must bypass all inflow into the reservoir at all times during the curtailment.

No Exception for Health and Safety:
There is no exception to the curtailment notice for health and safety needs. However, we are aware that some water users must comply with directives issued by the Division of Drinking Water (DDW), or local health or drinking water regulation to provide continued water service to meet minimum health and safety standards. Should you continue to divert water under a curtailed water right to meet human health and safety needs, you must complete the Form identifying your health and safety needs, whether there is an applicable DDW, state or local regulation and your attempts at securing an alternate water supply. The State Water Board will carefully analyze the non-exempted continued diversions for minimum health and safety needs on a case-by-case basis.

Potential Enforcement:
Those who are found to be diverting water beyond what is legally available to them may be subject to administrative fines, cease and desist orders, or prosecution in court. The State Water Board may levy fines of $1,000 per day of violation and $2,500 for each acre-foot diverted or used in excess of a valid water right. (See Water Code, §§ 1052,1055.) Additionally, if the State Water Board issues a Cease and Desist Order against an unauthorized diversion, violation of any such order can result in a fine of $10,000 per day. (See Water Code,

§§1831, 1845.)

The State Water Board is encouraging diverters to work together to reach local voluntary agreements that not only provide solutions that help local communities with water shortages, but also prevent impacts to other legal users of water and do not cause unreasonable effects on fish and wildlife. If you have any questions, please call our Curtailment Hotline at (916) 341-5342, contact us by email at: SWRCB-Curtailment-Certification@waterboards.ca.gov, or review our drought year webpage at:
http://www.waterboards.ca.gov/waterrights/water_issues/programs/drought/index.shtml

The State Water Board also encourages water right holders to assist in the prevention of unlawful diversion of water and in discouraging any waste or unreasonable use of water.
To assist the State Water Board, you may file a complaint at:
http://www.dtsc.ca.gov/database/CalEPA_Complaint/index.cfm.

We recognize the burden and loss this notice creates for you during the drought, and want to assure that others do not illegally benefit from your curtailments.

Sincerely,

Thomas Howard

Thomas Howard
Executive Director

WHIS/WR # 4 Brandy Creek - Westlake Diversion

The area in near proximity to these water rights was operated as a horse renting stables. Corals and a large "A" frame house are still present. NPS plans call for the removal of the house in the near future.

Westlake Resevoir is complete with dam and ponded water of approximately 2 acres surface area. Upon inspection it was found that no springs or streams were flowing into the pond, however, discharge through the overflow culvert was estimated at 10 gpm. This outflow is believed to be from ground water recharge.

Nick Reeves, Chief, Environmental Protection Division, informed me that the Westlake - Zehnle property had extended down Brandy Creek for some distance to the northeast - downstream. He stated that no diversonary works were known to exist on Brnady Creek. It therefore appears that the diversion of Brandy Creek water was only planned and never actually initiated. The exact location which was contemplated by the owners is unknown.

No domestic or stock use of water at this time.
