Memorandum

To: Chief, Water Resources Division

From: Superintendent, Point Reyes National Seashore

Subject: PORE Water Rights Dockets

Enclosed are summaries of the priority water rights files which were discussed with you during your August visit. These nine 'Report of Licensee' documents have been thoroughly researched and the data from that research is enclosed. The 'Report of Licensee' forms are not fully completed due to some uncertainty associated with each case. From the data and summary statements enclosed, you should be able to complete the progress reports to your specifications.

It is our goal to continue to finish the remaining six files of the PORE water docket. Once these files are completed we will undertake research and inventory of remaining water rights within PORE and the North District of GOGA. It would be helpful if you could provide us with copies of any water licenses you may possess which are not already contained in the docket files. Finally, we are acquiring the necessary equipment to globally position water amenities and gauge flows as necessary.

Should you have any questions or need additional information you may contact water rights technician, Bryan Leese, at (415) 663-8525.

CLARENCE ROGERS SITUATION

GGNRA
License #10112
Priority date May 10, 1967

License #8611
Priority date Aug. 29, 1962

License 8611 was the initial license, which Mr. Rogers filed with the state, for the reservoir on Mr. Rogers property. Mr. Rogers told me that he did not build the reservoir but that it was there when he bought the ranch in the 50's. Later, in the 60's, Mr. Rogers filed with the state to enlarge the reservoir, this being license 10112. The total amount of water these licenses allowed for diversion was 30 acre feet a year. From inspection reports, on the dam, the estimated holding acreage of the reservoir was 25 acre feet (Mr. Rogers told me that a large amount of silt had build up in the dam over the years).

The reservoir supplied Mr. Rogers ranch operation up until the park purchased his ranch. After the 1981 purchase by the park the dam was breeched and the reservoir drained. With out his reservoir Mr. Rogers, who had always had NMWD water for his domestic use, had to resort to using that water for his Beef Cows as well. Both licenses list domestic use on them, but Mr. Rogers says that he has always had 'city water' for his house.

The area where the reservoir used to be is nothing but a few marsh grasses and large amounts of sediment deposits. Mr. Rogers said that even in the spring run off there is very little or no water coming off the hill. These licenses are definitely abandoned and may have been already revoked by the state.(Mr. Rogers said that the state took them away, but he might be confusing the park with the state?).

Looking at the Report of Licensee forms it was noticed that they had been filled out for the years of 1983-1985. These forms should not have been filled out because the reservoir was deactivated in 1983 Also there is no need to report Mr. Rogers water use, because he does not use any park water only NMWD water.

C. Roger's deactivated dam. GGNRA

Water Inventory Questionnaire

The goal of this plan is to locate and record the source and use of water in the Point Reyes National seashore. All the data collected from this questionnaire will be used to aid the park in the filing of mandatory State Water Licensing forms. Please answer all the questions, and give the most accurate information possible. Please feel free to use the 'Remarks' spaces for any clarification of your responses, such as the area of a garden and lawn, or the separation of cows on more than tract of land and there main source of watering. Thank you.

Water Boards

Fact Sheet

EMERGENCY REGULATION FOR MEASURING AND REPORTING ON THE DIVERSION OF WATER

Governor Edmund G. Brown Jr. signed Senate Bill (SB) 88 on June 24, 2015. Sections 15 through 18 of SB 88 add measurement and reporting requirements for a substantial number of diverters. The State Water Resources Control Board (State Water Board) adopted a regulation to implement the new law at its January 19, 2016 Board Meeting. The regulation will go into effect upon approval by the Office of Administrative Law, which is anticipated to occur in March 2016.

The measurement requirements of the regulation apply to all water right holders who divert more than 10 acre-feet of water per year. The annual reporting requirements in the regulation apply to all statement holders as well as persons authorized to appropriate water under a permit, license, registration (small domestic, small irrigation, or livestock stockpond), or certificate for livestock stockpond use.

Information on the regulation, SB 88, and related documents are available at:

http://www.waterboards.ca.gov/waterrights/water_issues/programs/measurement_regulation/

If you have any questions or concerns, please contact the Division of Water Rights (Division) at:

Email Address: dwr-measurement@waterboards.ca.gov
Phone Number: (916) 341-5300

Key Provisions of Regulation

Annual Water Use Reporting Requirements for Water Right Holders

All water right holders shall report on their diversion and use of water annually, beginning with reports for the 2016 diversion season. Annual water use reports for permits, licenses, registrations and stock pond certificates must be filed by April 1 of each year starting April 1, 2017 for diversions made in 2016. The annual use reports for statements shall be filed prior to July 1 of each year. All reports will continue to document diversions during the prior calendar year. The filing dates are for the annual water use reports are summarized below:

DIVERSION/STORAGE PERIOD	WATER USE REPORT DEADLINES				
	PERMITS	LICENSES	STATEMENTS	REGISTRATIONS	CERTIFICATES
2015	JULY 1, 2016	JULY 1, 2016	JULY 1, 2016	VARIES	NOT REQUIRED
2016	APRIL 1, 2017	APRIL 1, 2017	JULY 1, 2017	APRIL 1, 2017	APRIL 1, 2017

Reporting Requirements for Water Right Holders During Times of Insufficient Supply

When the amount of water available in a surface water source is not sufficient to support the needs of existing water right holders and in-stream uses, the State Water Board may require monthly or more frequent reporting in the affected areas to provide the most accurate assessment of water demand. The State Water Board will notify diverters in affected areas when additional reporting is required.

Deadline for Complying with Measurement and Reporting Requirements

The regulation provides for a phased approach to compliance. The compliance deadlines, by volume of water diverted, are shown in the table below.

Required Accuracy for Measurement and Frequency for Monitoring

SB 88 set expectations for both the accuracy of measurement devices as well as the monitoring frequency of the device. The regulation links both device accuracy and monitoring frequency to the volume categories. Larger diversions and larger reservoirs or ponds have more stringent measurement and monitoring requirements and more stringent requirements for the installation and certification of measurement devices as described in the table below.

Type of Diversion (af = acre-feet)	Installation Deadline	Required Accuracy	Required Monitoring Frequency	Qualifications For Installation And Certification
Direct Diversion ≥ 1,000 af/year Storage ≥ 1000 af	January 1, 2017	10%	Hourly	Engineer/Contractor/Professional
Direct Diversion ≥ 100 af/year Storage ≥ 200 af	July 1, 2017	10%	Daily	Engineer/Contractor/Professional
Direct Diversion > 10 af/year Storage ≥ 50 af	January 1, 2018	15%	Weekly	Individual experienced with measurement and monitoring
Storage > 10 af	January 1, 2018	15%	Monthly	Individual experienced with measurement and monitoring

Measurement Methods

Diverters may propose a measurement method, in lieu of a measuring device, to comply with measurement and accuracy requirements under the regulation. Examples of measurement methods include:

- Multiple water right holders on a single surface supply can propose a collaborative measurement approach.
- A single water right holder with multiple points of diversion can propose a measurement method that may preclude the need to install a measurement device at each point of diversion.

Alternative Compliance

A water right holder may request an alternative compliance approach when strict compliance is not feasible, would be unreasonably expensive, would unreasonably affect public trust resources, or would result in the waste or unreasonable use of water.

The Division is preparing the forms to request alternative measurement or alternative compliance. All requests must be submitted on the Division's forms. Please note; persons subject to the regulation are not allowed to claim "not locally cost effective".

Certification of Water Measurement Device

The regulation requires that the accuracy of the water measurement device be certified every five years, in accordance with the table above. The regulation calls for an initial certification with the first water use report filed after the device has been installed.

LICENSEE REPORTING FOR 2015

As indicated in the California Code of Regulations title 23, section 847, the State Water Resources Control Board (State Water Board) requires annual reporting of water diversion and use under licenses. California Water Code chapter 2.7 section 348 authorizes the State Water Board to require online reporting of water diversions. Consistent with these requirements, the State Water Board, Division of Water Rights (Division) developed a new online Report Management System (RMS) as a component of the enhanced Water Right Information Management System (eWRIMS). RMS allows electronic submittal of water diversion and use reports, saving both paper and resources. **All reports must be completed online through RMS; paper copies are not available.** To report online, go to **www.waterboards.ca.gov/rms** and login with your User ID and Password. The information required to login and access your online Report of Licensee is:

User ID (Water Right ID): **A022784**
Password (Reporting Identifier): **307107**

IMPORTANT: PLEASE NOTE BELOW

Effective immediately the Division of Water Rights will **NO LONGER** notify you via mail in the future when reporting is due. If you would like to be notified when reporting is due and other reporting related material, please subscribe to our Lyris list (Water Rights Reporting Notification) at:

http://www.waterboards.ca.gov/resources/email_subscriptions/swrcb_subscribe.shtml.

You are required to complete the online report for 2015 no later than **June 30, 2016.** If you do not have a computer or internet access, you should use a friend's computer, a computer in a public library, or a Division computer to fill out the form. Unfortunately, Division staff cannot fill the form out on your behalf. However, if you wish to seek assistance with the form, you may contact the Division to request a listing of attorneys and consulting firms with water rights experience. You can also review the listing on the Division's Business Information Contacts webpage at: www.waterboards.ca.gov/waterrights/board_info/contacts.shtml.

If you have multiple water rights, please be aware you must report water use separately for each right. Do not list total combined diversions under multiple rights on the form. To document compliance with the conditions of your water right(s), you may use RMS to submit photos (such as staff gages, measuring devices, etc.), documents (California Department of Fish and Wildlife agreements, other agency approvals, etc.), graphs, and spreadsheets.

REQUIRED NOTIFICATION OF CHANGE IN OWNERSHIP

You are required to notify the Division directly of any water right ownership change. Your county assessor's office or title company does not notify the Division of ownership changes. Failure to notify the Division of an ownership change prior to assessment of annual water right fees will result in your liability to pay the annual water right fee even if you transferred the property associated with the water right. Notification to the Division should be made using the Change of Name/Address or Ownership form by clicking on the Water Rights Forms link located at www.waterboards.ca.gov/waterrights/publications_forms/forms/index.shtml.

LICENSEE REPORTING FOR 2013

As indicated in the California Code of Regulations title 23, section 847, the State Water Resources Control Board (State Water Board) requires annual reporting of water diversion and use under licenses. The State Water Board has historically required these reports to be filed once every three years in paper form. California Water Code chapter 2.7 section 348 authorizes the State Water Board to require online reporting of water diversions. Consistent with these requirements, the State Water Board, Division of Water Rights (Division) developed a new online Report Management System (RMS) as a component of the enhanced Water Right Information Management System (eWRIMS). RMS allows electronic submittal of water diversion and use reports, saving both paper and resources. **All reports must be completed online through RMS; paper copies are not available.** To report online, go to **www.waterboards.ca.gov/rms** and login with your User ID and Password. The information required to login and access your online Report of Licensee is:

User ID (Water Right ID): **A022784**
Password (Reporting Identifier): **307107**

You are required to complete the online report for 2013 no later than **June 30, 2014.** If you do not have a computer or internet access, you should use a friend's computer, a computer in a public library, or a Division computer to fill out the form. Unfortunately, Division staff cannot fill the form out on your behalf. However, if you wish to seek assistance with the form, you may contact the Division to request a listing of attorneys and consulting firms with water rights experience. You can also review the listing on the Division's Business Information Contacts webpage at: http://www.waterboards.ca.gov/waterrights/board_info/contacts.shtml.

If you have multiple water rights, please be aware you must report water use separately for each right. Do not list total combined diversions under multiple rights on the form. To document compliance with the conditions of your water right(s), you may use RMS to submit photos (such as staff gages, measuring devices, etc.), documents (California Department of Fish and Wildlife agreements, other agency approvals, etc.), graphs, and spreadsheets.

SPECIAL REPORTING FEATURES:

- It is possible to create one account on the RMS site to report all of your water rights. It is not necessary to create an account if you would like to report your water rights individually. Please see the RMS login page for more information and instructions.
- RMS includes the capability to amend current and past reports. Amendments to credits previously claimed pursuant to Water Code sections 1010, 1011, and 1011.5 are subject to review and may not be accepted.
- Licensees can list all of their reservoirs associated with this license in their report.
- RMS includes new on screen help tools and instructions.

REQUIRED NOTIFICATION OF CHANGE IN OWNERSHIP

You are required to notify the Division directly of any water right ownership change. Your county assessor's office or title company does not notify the Division of ownership changes. Failure to notify the Division of an ownership change prior to assessment of annual water right fees will result in your liability to pay the annual water right fee even if you transferred the property associated with the water right. Notification to the Division should be made using the Change of Name/Address or Ownership form by clicking on the Water Rights Forms link located at www.waterboards.ca.gov/waterrights/board_info.

LICENSEE REPORTING FOR 2011

As indicated in the California Code of Regulations title 23, section 847, the State Water Resources Control Board (State Water Board) requires annual reporting of water diversion and use under licenses. The State Water Board has historically required these reports to be filed once every three years in paper form. California Water Code chapter 2.7 section 348 authorizes the State Water Board to require online reporting of water diversions. Consistent with these requirements, the State Water Board, Division of Water Rights (Division) developed a new online Report Management System (RMS) as a component of the enhanced Water Right Information Management System (eWRIMS). RMS allows electronic submittal of water diversion and use reports, saving both paper and resources. **All reports must be completed online through RMS; paper copies are not available.** To report online, go to **www.waterboards.ca.gov/rms** and login with your User ID and Password. The information required to login and access your online Report of Licensee is:

User ID (Water Right ID): **A022784**
Password (Reporting Identifier): **307107**

You are required to complete the online report for 2011 no later than **June 30, 2012.** If you do not have a computer or internet access, you should use a friend's computer, a computer in a public library, or a Division computer to fill out the form. Unfortunately, Division staff cannot fill the form out on your behalf. However, if you wish to seek assistance with the form, you may contact the Division to request a listing of attorneys and consulting firms with water rights experience. You can also review the listing on the Division's Business Information Contacts webpage at: http://www.waterboards.ca.gov/waterrights/board_info/contacts.shtml.

If you have multiple water rights, please be aware you must report water use separately for

each right. Do not list total combined diversions under multiple rights on the form. To document compliance with the conditions of your water right(s), you may use RMS to submit photos (such as staff gages, measuring devices, etc.), documents (Department of Fish and Game agreements, other agency approvals, etc.), graphs, and spreadsheets.

CHANGES FOR 2011 REPORTING:

- It is possible to create one account on the RMS site to report all of your water rights. It is not necessary to create an account if you would like to report your water rights individually. Please see the RMS login page for more information and instructions.

- RMS includes the capability to amend current and past reports. Amendments to credits previously claimed pursuant to Water Code sections 1010, 1011, and 1011.5 are subject to review and may not be accepted.

- Licensees can list all of their reservoirs associated with this license in their report.

- RMS includes new on screen help tools and instructions.

REQUIRED NOTIFICATION OF CHANGE IN OWNERSHIP

You are required to notify the Division directly of any water right ownership change. Your county assessor's office or title company does not notify the Division of ownership changes. Failure to notify the Division of an ownership change prior to assessment of annual water right fees will result in your liability to pay the annual water right fee even if you transferred the property associated with the water right. Notification to the Division should be made using the Change of Name/Address or Ownership form by clicking on the Water Rights Forms link located at www.waterboards.ca.gov/waterrights/board_info.

Frequently asked questions pertaining to filling out online reports are posted at the RMS website and we encourage you to read these first. ANNUAL LICENSEE REPORTING FOR 2010

The State Water Resources Control Board (State Water Board) has historically required Reports of Licensee to be filed once every three years in paper form. Senate Bill 8, which was signed into law in 2009, authorized the State Water Board to adopt regulations requiring online reporting of water diversions. Consistent with the Senate Bill, the State Water Board has adopted regulations requiring annual reporting of water diversion and use under licenses, and developed a new online Report Management System (RMS) as a component of the enhanced Water Right Information Management System (eWRIMS). The online RMS allows you to electronically submit your water diversion and use report, saving both paper and resources. To report on-line, go to **www.waterboards.ca.gov/rms** and log in with your water right ID and password. The information required to log in and access your online Report of Licensee is:

Water Right ID: **A022784**
Password: **7C2D6B**

You are required to complete the online report for 2010 no later than **July 1, 2011.** You may also submit your record of diversion and use for previous years using the RMS. To maintain a continuous record of water use under your license, Licensees with **Reporting Cycle 1** should report their monthly diversion and use for 2008, 2009, and 2010. Licensees with **Reporting Cycle 2** should report their monthly diversion and use for 2009 and 2010; and Licensees with **Reporting Cycle 3** only need to report monthly diversion and use for 2010. Please note that it is not possible at this time to amend a report submitted through the RMS.

CHANGES FOR 2010 REPORTING:

Question 4 on the previous Report of Licensee form ("Amount of Water Used") has changed. New Question 5c requires you to report both the "*Amount directly diverted and/or collected to storage*" and the corresponding "*Amount used*" for each month. For many direct diversion-only projects, these amounts will be the same and the online form provides a check box for that purpose (Question 5b).

New Questions 6a and 6b on the RMS Report of Licensee requires you to report the maximum instantaneous *rate* of diversion that has occurred in each month under the license, if available.

If your water project is covered by two or more water rights, you should only report your diversion and use of water for the project covered by the license number printed above. The total amount diverted and used under multiple water rights should not be combined and reported on a single

form. In such cases, you should quantify your diversion under each water right, assigning water to the senior-most right first, to the extent allowed under the permit or license.

REQUIRED NOTIFICATION OF CHANGE IN OWNERSHIP

You are required to notify the State Water Board directly of any water right ownership change. Your county assessor's office or title company does not notify us of any ownership updates. Failure to notify the State Water Board of an ownership change prior to assessment of annual water right fees will result in your liability to pay the annual water right fee even if you transferred the property associated with the water right. Notification to the State Water Board should be made using the Change of Name/Address or Ownership form by clicking on the Water Rights Forms link located at www.waterboards.ca.gov/waterrights/board_info

6. For Storage Projects only:	2007	2008	2009
6.a. Did your reservoir(s) spill?			
6.b. If **No**, how many feet vertically below the spillway was the water level at maximum storage?			
6.c. Have you emptied the reservoir(s)?			
6.d. If **No**, how many feet vertically below the spillway was the water level(s) at minimum storage?			

PLEASE ANSWER ONLY THOSE QUESTIONS BELOW THAT ARE APPLICABLE TO YOUR WATER RIGHT PROJECT
(Please note that future amendments to the claims below will not be accepted.)

An appropriative water right can be reduced or revoked through five continuous years of nonuse. However, the California Water Code specifies that under certain conditions no reduction or loss of the appropriative water right shall occur due to: (a) water conservation efforts; (b) use of recycled, desalinated, or polluted water; and/or (c) conjunctive use of groundwater and surface water. You must report the extent and amount of water claimed for credit below. Failure to report the amounts will deprive you of the benefits allowed under the Water Code sections.

CONSERVATION OF WATER: (Water Code section 1011)

7. **[ ] YES [ ] NO** During the period covered by this Report, were you implementing any water conservation efforts? If **YES,** please describe:

_____

8. If **YES** and you want to claim credit for the amount of water conserved towards the water use authorized under your license as allowed under Water Code section 1011, please show the amount of water conserved below:

Future amendments to this claim will not be accepted.	2007	2008	2009
Amount of water conserved. *Specify in acre-feet (AF) or million gallons (MG)*			

WATER QUALITY AND WASTEWATER RECLAMATION: (Water Code section 1010)

9. **[ ] YES [ ] NO** During the period covered by this Report, did you use reclaimed water from a wastewater treatment facility, water from a desalination facility, or water polluted by waste to a degree which unreasonably affects the water for other beneficial uses?

10. If **YES** and you want to claim credit for the substitution of this reclaimed, desalinated, or polluted water in lieu of the surface water authorized under your license as allowed by Water Code section 1010, please show the amount of reclaimed, desalinated, or polluted water used below:

Future amendments to this claim will not be accepted.	2007	2008	2009
Amount of reclaimed, desalinated, or polluted water used. *Specify in acre-feet (AF) or million gallons (MG)*			

CONJUNCTIVE USE OF GROUNDWATER AND SURFACE WATER: (Water Code section 1011.5)

11. **[ ] YES [ ] NO** During the period covered by this Report, were you using groundwater in lieu of the surface water authorized under your license?

12. If **YES** and you want to claim credit for the groundwater used in lieu of the surface water authorized under your permit as allowed under Water Code section 1011.5, please show the amount of groundwater used below:

Future amendments to this claim will not be accepted.	2007	2008	2009
Amount of groundwater used in lieu of surface water. *Specify in acre-feet (AF) or million gallons (MG)*

NOTE: The following questions relate to the Board's continuing responsibility to insure that appropriated water is best developed, conserved, and utilized in the public interest as required by the Water Code. Please answer those questions which are applicable to your project.

CONSERVATION OF WATER (WATER PURVEYORS)

17. What measures are you using or planning to reduce water losses in conveyance systems? (1) Seepage or leak detection program [ ]; (2) Lining canals [ ]; (3) Phreatophyte and aquatic vegetation control [ ]; (4) Other (describe in "Remarks") [ ].

18. What measures are used to encourage consumers to conserve water in agricultural use? (1) Program to encourage more efficient irrigation systems (sprinkler, drip, etc.) where applicable [ ]; (2) Return flow systems on individual farms [ ]; (3) Return flow system areawide [ ]; (4) Water pricing to encourage reduced use [ ]; (5) Charges for drainage of irrigated lands [ ]; (6) Other (describe in "Remarks") [ ].

19. What measures are used to encourage municipal and industrial consumers to conserve water? (1) Regulations to control wasteful use [ ]; (2) Public education program on water conservation [ ]; (3) Pricing to encourage reduced use [ ]; (4) Assistance to industry in design of recycle systems [ ]; (5) Other (describe in "Remarks" [ ].

20. What records are maintained on water use and conservation? (1) Loss rate from conveyance system [ ]; (2) Water use for major crops by each farm [ ]; (3) Other (describe in "Remarks") [ ].

CONSERVATION OF WATER (WATER USERS)

21. Describe any water conservation efforts you may have started: _____

22. If credit toward beneficial use of water under this license for water not used due to a conservation effort is claimed under Water Code Section 1011, please show the amounts of water conserved (acre feet or mg.):
1978 _____ 1979 _____ 1980 _____

WATER QUALITY AND WASTEWATER RECLAMATION

23. Describe methods you are using to minimize erosion and to prevent the entry of silt into surface waters: _____

24. After use, the water is (1) retained in reservoir [ ]; (2) discharged into a stream or lake [ ]; (3) discharged into settling ponds [X]; (4) Other [ ]. Describe: _____

25. Does or will water being discharged contain waste materials? YES [X] NO [ ].
(1) Domestic [ ]; (2) Municipal [ ]; (3) Industrial [ ]; (4) Agricultural [X]; (5) Other [ ]. Describe: _____

26. Does or will water being discharged contain any specific material which is deleterious to fish and wildlife or which would impair the water for beneficial uses? YES [ ] NO [X]. Describe: _____

TO THE EXTENT THE FOLLOWING QUESTIONS APPLY TO YOUR LICENSE, PLEASE ANSWER IN REMARKS SECTION BELOW.

27. Are you now or have you been using reclaimed water from a wastewater treatment facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES [ ] NO [X].

If credit toward use under this water right through substitution of reclaimed or polluted water in lieu of appropriated water is claimed under Section 1010 of the Water Code, please show amounts of reduced diversion and amounts of reclaimed water used.

28. Are you now or have you been reclaiming or reusing any of the water appropriated under this right? YES [ ] NO [X]. If yes, please describe. _____

29. What is present availability or current potential for using reclaimed water from a wastewater treatment plant or polluted water in place of the appropriated water to satisfy all or part of your water needs?

30. What is the current potential for reusing the appropriated water to satisfy part of your water needs?

31. If you produce reclaimed water, or polluted water, is there a potential for others to use it?

REMARKS: (Identify the item you are explaining. Additional pages may be attached.)

29. No potential.

Licensee shall allow representatives of the Board and other parties, as may be authorized from time to time by the Board, reasonable access to project works to determine compliance with the terms of this license.

All rights and privileges under this license, including method of diversion, method of use and quantity of water diverted are subject to the continuing authority of the Board in accordance with law and in the interest of the public welfare to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.

~~*This continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this license with a view to minimizing waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement such programs as (1) reusing or reclaiming the water allocated; (2) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow, (3) suppressing evaporation losses from water surfaces, (4) controlling phreatophytic growth, and (5) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.*~~

Reports shall be filed promptly by licensee on appropriate forms which will be provided for the purpose from time to time by the Board.

The right hereby confirmed to the diversion and use of water is restricted to the point or points of diversion herein specified and to the lands or place of use herein described.

This license is granted and licensee accepts all rights herein confirmed subject to the following provisions of the Water Code:

Section 1625. Each license shall be in such form and contain such terms as may be prescribed by the Board.

Section 1626. All licenses shall be under the terms and conditions of this division (of the Water Code).

Section 1627. A license shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code) but no longer.

Section 1628. Every license shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a license is issued takes the license subject to the conditions therein expressed.

Section 1629. Every licensee, if he accepts a license does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any license granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any licensee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any licensee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

Section 1630. At any time after the expiration of twenty years after the granting of a license, the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State shall have the right to purchase the works and property occupied and used under the license and the works built or constructed for the enjoyment of the rights granted under the license.

Section 1631. In the event that the State, or any city, city and county, municipal water district, irrigation district, lighting district, or political subdivision of the State so desiring to purchase and the owner of the works and property cannot agree upon the purchase price, the price shall be determined in such manner as is now or may hereafter be provided by law for determining the value of property taken in eminent domain proceedings.

I, Clarence R. Rogers and Rosilda E. Rogers
Name of applicant

Box 7 Olema California
Address City or Town State Zip Code

do hereby make application for a permit to appropriate the following described unappropriated waters of the State of California, SUBJECT TO VESTED RIGHTS:

1. The source of the proposed appropriation is Unnamed Stream
Give name of stream, lake, etc., if named. If unnamed, state nature of source and that it is unnamed.

located in Marin County, Tributary to Olema Creek thence Lagunitas Creek thence Tomales Bay thence Pacific Ocean

2. The amount of water which applicant desires to appropriate under this application is as follows:

(a) To be directly applied to beneficial use _____ cubic feet per second / _____ gallons per day
16,000 gallons per day is approximately 0.025 cubic foot per second. Use gallons per day if less than 0.025 c.f.s.

to be diverted from _____ to _____ of each year.
Beginning date Closing date

(b) To be stored and later applied to beneficial use 20.0 acre-feet per annum, to be collected

between October 1 to April 30 of each season.
Beginning date Closing date

If offstream storage is proposed, maximum rate of diversion to storage will be _____ c.f.s.

NOTE.—Neither the amount nor the season may be increased after application is filed. If underground storage is proposed a special supplemental form will be supplied by the State Water Rights Board upon request.

3. The use to which the water is to be applied is Stockwatering, domestic and recreational

_____ purposes.
Domestic, irrigation, power, municipal, mining, industrial, recreational, stockwatering, fish culture, etc. Describe more fully in paragraphs 13, 14, 15, 16 and/or 17.

4. The point(s) of diversion is (are) to be located as follows:

08-19-1993: Letter to rancher regarding Water Inventory Questionnaire

United States Department of the Interior

NATIONAL PARK SERVICE
Point Reyes National Seashore
Point Reyes, California 94956

IN REPLY REFER TO:

L54

August 19, 1993

Mr. Clarence Rogers
State Route One
Olema, CA 94950

Dear Rancher:

The State of California's Water Commission has informed us that we must inventory our water use within the park. The Water Commission was created by the Water Commission Act and was given the task of licensing the water use in the state. This licensing process is important to protect your water supply from intrusions. Point Reyes National Seashore is required to comply with regulations concerning water use. To comply with the Water Commissions request we are asking that you fill out a brief *Water Inventory Questionnaire.* The prompt completion of this questionnaire will help us comply with the state requirements and ensure the security of your water.

The questionnaire is composed of fill-in-the-blank questions. Please follow the instructions and fill out the questionnaire as accurately as possible. Once the questionnaire is completed please return it promptly in the self-addressed and stamped envelope provided. If you have any questions please feel free to contact us. All questions should be directed to Bryan Leese at 663-8525.

Again, we hope that you will complete and return this form as quickly as possible. Your quick response will insure, for the park as well as for you, a secure and continuous supply of water for the future.

Thank You,

John L. Sansing
Superintendent

Water Inventory Questionnaire

The goal of this plan is to locate and record the source and use of water in the Point Reyes National seashore. All the data collected from this questionnaire will be used to aid the park in the filing of mandatory State Water Licensing forms. Please answer all the questions, and give the most accurate information possible. Please feel free to use the 'Remarks' spaces for any clarification of your responses, such as the area of a garden and lawn, or the separation of cows on more than tract of land and there main source of watering. Thank you.

Excepting and reserving, however, only the following rights and interests unto the Vendors herein, their assigns and successors in interest, pursuant to Public Law, which law included the subject and other lands within the boundaries of Golden Gate National Recreation Area, the right of use and occupancy of the land herein conveyed, for livestock ranching purposes, for a term of twenty-five (25) years, subject to the following terms and conditions:

1. Definitions: Within the meaning of this instrument, "The Reservor" is the person or persons conveying the land covered by this instrument to the United States and reserving a right of use and occupancy for livestock ranching purposes only over all or part of it. The reservor shall not permit the land to be overgrazed. The determination of whether there is overgrazing shall be made by the Superintendent or his designated representative in conjunction with the Soil Conversation Service and his decision shall be final. Supplemental feeding shall begin when stubble length is reduced to a three inch minimum. If it is determined that overgrazing is or has occurred, the Superintendent reserves the right to regulate the number of livestock on the land.

2. Use: During the term of this livestock ranching reservation, the Reservor shall use the reserved premises for livestock ranching purposes and shall not plant, cultivate, or harvest crops on said premises or alter the surface of any lands or fields on said premises. The reserved premises shall not be used for any overnight camping or residential, commerical, industrial, mining or similar use. The Reservor shall cut no timber, conduct no mining operations, construct no structures, buildings, or residences, or in any manner substantially change the contour or condition of the premises hereby reserved. The Reservor in the use of the premises shall conform to all applicable laws, ordinances, and regulations in effect in the area, including but not limited to all applicable general National Park Service regulations and general and special regulations for the area in particular.

3. Maintenance of Reserved Premises: The Reservor shall keep the grounds and outbuildings of the reserved premises in a neat and clean condition and shall maintain all fences in good repair. The Reservor is responsible for all costs arising out of the reserved premises; including all costs of maintenance and repair and all utility charges. The United States has no responsibility for any charges or expenses in connection with the reserved premises. The outbuildings reserved for use are the various barns and sheds as shown on the attached sketch. Buildings or sheds which are not usable or not required by the Reservor may be removed with the permission of the Superintendent in accordance with National Park Service policies and regulations.

4. Precautions: The Reservor and his employees shall take all reasonable precautions to prevent forest, brush or grass fires and shall take reasonable care to avoid damage to adjacent or nearby Federal lands or property through the spread of fire originating on the reserved premises, or by any other activities representing a nuisance or hazard to adjacent or nearby Federal lands or property.

5. Taxes: The Reservor is responsible for the payment of any taxes or assessments that may be levied against his interest in the reserved premises.

6. Liability: The Reservor shall hold the United States harmless for any liability arising out of the use of the reserved premises by the Reservor. The Reservor shall at his expense carry such public liability insurance as is customary, providing such insurance is available.

7. Transfer: The reserved premises may be conveyed or subleased for not less that 90 days by the Reservor or his successors or assigns provided the instrument of conveyance or sublease imposes on the new Reservor all of the restrictions and requirements of these provisions. A copy of any such conveyance or sublease shall be furnished the National Park Service prior to the effective date of such conveyance.

8. Expiration of term: The Reservor, his assigns and successors, shall peacefully relinquish possession and control of the reserved premises upon the expiration of the term of the right of use and occupancy. He shall leave the reserved premises in a neat and clean condition. He shall not remove any improvements which are permanently affixed to the realty unless proper arrangements, with adequate consideration for such removal, have been made with the National Park Service. Any personal property left on the reserved premises upon the expiration of the term may be disposed of by the National Park Service.

9. Dam: The Reservor agrees to take corrective action in order that the earthen dam (east of Benchmark 54 as shown on the 7.5 minute Inverness, California U. S. Geological Survey Map) will meet Federal Dam Safety Standards, or to siphon the water and breach the dam and discontinue its use. Reservor understands the preliminary Federal Dam Inspection Report lists the dam in the critical safety hazard category and substantial repairs with substantial costs may be required to meet Federal dam safety requirements.

10. Access: That use by the Vendor of the land, buildings, and improvements reserved hereby is subject to the right of the Director or his representative to establish trails, roads, and other improvements over, upon or through said premises. The public shall have access to such roads and trails as well as of those already existing; provided that in exercising such right the United States will refrain from materially interfering or perventing the use of the land by the vendor for the purpose intended under this reservation.

CLARENCE ROGERS SITUATION

GGNRA
License #10112
Priority date May 10, 1967

License #8611
Priority date Aug. 29, 1962

License 8611 was the initial license, which Mr. Rogers filed with the state, for the reservoir on Mr. Rogers property. Mr. Rogers told me that he did not build the reservoir but that it was there when he bought the ranch in the 50's. Later, in the 60's, Mr. Rogers filed with the state to enlarge the reservoir, this being license 10112. The total amount of water these licenses allowed for diversion was 30 acre feet a year. From inspection reports, on the dam, the estimated holding acreage of the reservoir was 25 acre feet (Mr. Rogers told me that a large amount of silt had build up in the dam over the years).

The reservoir supplied Mr. Rogers ranch operation up until the park purchased his ranch. After the 1981 purchase by the park the dam was breeched and the reservoir drained. With out his reservoir Mr. Rogers, who had always had NMWD water for his domestic use, had to resort to using that water for his Beef Cows as well. Both licenses list domestic use on them, but Mr. Rogers says that he has always had 'city water' for his house.

The area where the reservoir used to be is nothing but a few marsh grasses and large amounts of sediment deposits. Mr. Rogers said that even in the spring run off there is very little or no water coming off the hill. These licenses are definitely abandoned and may have been already revoked by the state.(Mr. Rogers said that the state took them away, but he might be confusing the park with the state?).

Looking at the Report of Licensee forms it was noticed that they had been filled out for the years of 1983-1985. These forms should not have been filled out because the reservoir was deactivated in 1983 Also there is no need to report Mr. Rogers water use, because he does not use any park water only NMWD water.

Attached are completed Report of Licensee forms for 1985, 1986 and 1987 water usage for water rights at Death Valley NM, Lassen Volcanic NP, Point Reyes NS, Redwoods NP, Sequoia-Kings Canyon NP, Whiskeytown NRA, and Yosemite NP. The Water Rights Branch of the Water Resources Division prepared the forms based upon information received from the respective park units.

The forms need to be transmitted to the State Water Resources Control Board from your office as soon as possible. We have attached proposed letters of transmittal to accompany each park unit's set of forms.

If you have any questions regarding the forms or their transmittal, please contact Pat Larson of the Water Rights Branch at 303/221-5341.

PROJECT Reports of Licensee - PORE

NPS PERSON ON CALL: Pat Larson ☒ I CALLED ☐ S/HE CALLED

PERSON Jack Williams, Chief of Maintenance

ORGANIZATION Point Reyes National Seashore

ADDRESS Point Reyes, CA 94956

TELEPHONE NO. (415) 663-8522 EXT.

SUBJECTS DISCUSSED Initially I asked Mr. Williams about water right records regarding the Park. He said they are non-existent and very little is known about the Park's water rights. Then, I asked if the two Rogers' properties are still supporting cattle, particularly:

WR#9- Unnamed Stream, Appl #20021, License #7941, 130 dairy cattle

WR#10- Unnamed Stream, Appl # 20022, License #7942, 130 dairy cattle

(Both on lands previously owned by Mary G. Rogers)

WR#14- Unnamed Stream, Appl #22784, License # 10112, 100 beef cattle

(On lands previously owned by Clarence and Rosilda Rogers)

After consulting with John Sansing, Superintendent, PORE, Mr. Williams confirmed that both operations are still active. We agreed that the Reports of Licensee for these three water rights should be submitted the same as the previous reports. No record has been found regarding a water right for stockwatering from an Unnamed Stream, Appl # 25498, License # 11635, at either the Park or the Water Resources Division.

(Continued on blank page following.)

ACTION TO BE TAKEN Prepare the Reports of Licensee for WR#9, #10 and #12 for Stan Ponce's signature and send them to Dave Cherny for transmittal to the State Water Resources Control Board. For the unknown water rights I will consult with Gerry Witucki and Dave Cherny or Merf Kolipinski to see if anyone has additional information or documentation regarding these water rights.

PORE - Reports of Licensee (continued)

I asked about a water right for which we need to complete a "Progress Report By Permittee." The project is listed as 21.6 acre-feet, for domestic, irrigation, recreation, and stockwatering from an unnamed stream and it was supposed to be completed 12/1/84. (Appl # 25504, Permit # 18061) Mr. Williams said the only possible water project he could think of was the dam that Niman and Schell were building about that time.

I also asked Mr. Williams about three "Supplemental Statements of Water Diversion" for diversions from an unnamed stream that is tributary to Papermill Creek (listed as "Peppermill Creek" on the forms but an accompanying memo from John Sansing states that it should be "Papermill Creek"). He said he knew nothing about them. I noted that we have until July 1, 1988, to file these three forms.

2/16/88	Originally called Superintendent Sansing, but he referred me to Jack Williams, Chief of Maintenance. I told him I needed to know if water use has changed for the three applications. He consulted Superintendent Sansing and they confirmed that both cattle operations were still operating so water use remained the same as the last report. (Appl # 20021 and # 20022 are for a cattle ranch on lands previously owned by Mary G. Rogers. Appl # 22784 is for a cattle ranch on lands previously owned by Clarence and Rosilda Rogers.)
