

Wildlife Check List

Craters of the Moon National Monument

This list was prepared for the use of visitors who have an interest in the wildlife of Craters of the Moon. It is based on authoritative observations, not scientific research and is intended to aid visitors in identifying the wildlife of the monument. All wildlife has been classified as common (Category I), or uncommon (Category II).

Category I: Wildlife that is quite common within the boundaries of the monument at some time during the year. This may include resident, migrant and breeding animals.

Category II: Wildlife that has been observed within the monument only on an infrequent basis. Verified sightings of these animals (or animals not on the list), should be reported to the monument staff for documentation.
