EMERGENCY REGULATION FOR MEASURING AND REPORTING ON THE DIVERSION OF WATER

Governor Edmund G. Brown Jr. signed Senate Bill (SB) 88 on June 24, 2015. Sections 15 through 18 of SB 88 add measurement and reporting requirements for a substantial number of diverters. The State Water Resources Control Board (State Water Board) adopted a regulation to implement the new law at its January 19, 2016 Board Meeting. The regulation will go into effect upon approval by the Office of Administrative Law, which is anticipated to occur in February 2016.

The measurement requirements of the regulation apply to all water right holders who divert 10 acre-feet of water or more per year. The annual reporting requirements in the regulation apply to all statement holders as well as persons authorized to appropriate water under a permit, license, registration (small domestic, small irrigation, or livestock stockpond), or certificate for livestock stockpond use.

Information on the regulation, SB 88, and related documents are available at:

http://www.waterboards.ca.gov/waterrights/water_issues/programs/measurement_regulation/

If you have any questions or concerns, please contact the Division of Water Rights (Division) at:

Key Provisions of Regulation

Annual Water Use Reporting Requirements for Water Right Holders

All water right holders shall report on their diversion and use of water annually, beginning with reports for the 2016 diversion season. Annual water use reports for permits, licenses, registrations and stock pond certificates must be filed by April 1 of each year starting April 1, 2017 for diversions made in 2016. The annual use reports for statements shall be filed prior to July 1 of each year. All reports will continue to document diversions during the prior calendar year. The filing dates are for the annual water use reports are summarized below:

DIVERSION/STORAGE PERIOD	WATER USE REPORT DEADLINES				
	PERMITS	LICENSES	STATEMENTS	REGISTRATIONS	CERTIFICATES
2015	JULY 1, 2016	JULY 1, 2016	JULY 1, 2016	VARIES	NOT REQUIRED
2016	APRIL 1, 2017	APRIL 1, 2017	JULY 1, 2017	APRIL 1, 2017	APRIL 1, 2017

Reporting Requirements for Water Right Holders During Times of Insufficient Supply

When the amount of water available in a surface water source is not sufficient to support the needs of existing water right holders and in-stream uses, the State Water Board may require monthly or more frequent reporting in the affected areas to provide the most accurate assessment of water demand. The State Water Board will notify diverters in affected areas when additional reporting is required.

Deadline for Complying with Measurement and Reporting Requirements

The regulation provides for a phased approach to compliance. The compliance deadlines, by volume of water diverted, are shown in the table below.

Required Accuracy for Measurement and Frequency for Monitoring

SB 88 set expectations for both the accuracy of measurement devices as well as the monitoring frequency of the device. The regulation links both device accuracy and monitoring frequency to the volume categories in the table above. Larger diversions and larger reservoirs or ponds have more stringent measurement and monitoring requirements and more stringent requirements for the installation and certification of measurement devices as described in the table below.

Type of Diversion	Installation Deadline	Required Accuracy	Required Monitoring	Qualifications For Installation And Certification
Direct Diversion ≥ 1,000 afa Storage ≥ 1000 af	January 1, 2017	10%	Hourly	Engineer/Contractor/Professional
Direct Diversion ≥ 100 afa/ Storage ≥ 200 af	July 1, 2017	10%	Daily	Engineer/Contractor/Professional
Direct Diversion > 10 afa/ Storage ≥ 50 af	January 1, 2018	15%	Weekly	Individual experienced with measurement and monitoring
Storage > 10 af	January 1, 2018	15%	Monthly	Individual experienced with measurement and monitoring

Measurement Methods

Diverters may propose a measurement method, in lieu of a measuring device, to comply with measurement and accuracy requirements under the regulation. Examples of measurement methods include:

- Multiple water right holders on a single surface supply can propose a collaborative measurement approach.
- A single water right holder with multiple points of diversion can propose a measurement method that may preclude the need to install a measurement device at each point of diversion.

Alternative Compliance

A water right holder may request an alternative compliance approach when strict compliance is not feasible, would be unreasonable expensive, would unreasonable affect public trust resources, or would result in the waste or unreasonable use of water.

The Division is preparing the forms to request alternative measurement or alternative compliance. All requests must be submitted on the Division's forms. Please note; persons subject to the regulation are not allowed to claim "not locally cost effective".

Certification of Water Measurement Device

The regulation requires that the accuracy of the water measurement device be certified every five years, in accordance with the table above. The regulation calls for an initial certification with the first water use report filed after the device has been installed.

LICENSEE REPORTING FOR 2015

As indicated in the California Code of Regulations title 23, section 847, the State Water Resources Control Board (State Water Board) requires annual reporting of water diversion and use under licenses. California Water Code chapter 2.7 section 348 authorizes the State Water Board to require online reporting of water diversions. Consistent with these requirements, the State Water Board, Division of Water Rights (Division) developed a new online Report Management System (RMS) as a component of the enhanced Water Right Information Management System (eWRIMS). RMS allows electronic submittal of water diversion and use reports, saving both paper and resources. **All reports must be completed online through RMS; paper copies are not available.** To report online, go to **www.waterboards.ca.gov/rms** and login with your User ID and Password. The information required to login and access your online Report of Licensee is:

User ID (Water Right ID): **A013322**
Password (Reporting Identifier): **097124**

IMPORTANT: PLEASE NOTE BELOW

Effective immediately the Division of Water Rights will **NO LONGER** notify you via mail in the future when reporting is due. If you would like to be notified when reporting is due and other reporting related material, please subscribe to our Lyris list (Water Rights Reporting Notification) at:

http://www.waterboards.ca.gov/resources/email_subscriptions/swrcb_subscribe.shtml.

You are required to complete the online report for 2015 no later than **June 30, 2016.** If you do not have a computer or internet access, you should use a friend's computer, a computer in a public library, or a Division computer to fill out the form. Unfortunately, Division staff cannot fill the form out on your behalf. However, if you wish to seek assistance with the form, you may contact the Division to request a listing of attorneys and consulting firms with water rights experience. You can also review the listing on the Division's Business Information Contacts webpage at: www.waterboards.ca.gov/waterrights/board_info/contacts.shtml.

If you have multiple water rights, please be aware you must report water use separately for each right. Do not list total combined diversions under multiple rights on the form. To document compliance with the conditions of your water right(s), you may use RMS to submit photos (such as staff gages, measuring devices, etc.), documents (California Department of Fish and Wildlife agreements, other agency approvals, etc.), graphs, and spreadsheets.

REQUIRED NOTIFICATION OF CHANGE IN OWNERSHIP

You are required to notify the Division directly of any water right ownership change. Your county assessor's office or title company does not notify the Division of ownership changes. Failure to notify the Division of an ownership change prior to assessment of annual water right fees will result in your liability to pay the annual water right fee even if you transferred the property associated with the water right. Notification to the Division should be made using the Change of Name/Address or Ownership form by clicking on the Water Rights Forms link located at www.waterboards.ca.gov/waterrights/publications_forms/forms/index.shtml.

California Water Code chapter 2.7 section 348 authorizes the State Water Board to require online reporting of water diversions. Consistent with these requirements, the State Water Board, Division of Water Rights (Division) developed a new online Report Management System (RMS) as a component of the enhanced Water Right Information Management System (eWRIMS). RMS allows electronic submittal of water diversion and use reports, saving both paper and resources. **All reports must be completed online through RMS; paper copies are not available.** To report online, go to **www.waterboards.ca.gov/rms** and login with your User ID and Password. Amended License for Diversion and Use of Water

APPLICATION 13322 PERMIT 7889 LICENSE 3800

THIS IS TO CERTIFY, That

US National Park Service
Point Reyes National Seashore
1 Bear Valley Road
Point Reyes, CA 94956

has the right to the use of the waters of **Olema Creek** in **Marin County**

tributary to **Lagunitas Creek** thence **Tomales Bay** thence the **Pacific Ocean**

for the purpose of **Domestic, Stockwatering, Fish and Wildlife Preservation and Enhancement, and Recreational uses**.

The Deputy Director for Water Rights finds that: (a) the change will not operate to the injury of any lawful user of water; (b) good cause has been shown for the change; (c) the petition does not constitute the initiation of a new right; and (d) the State Water Resources Control Board (State Water Board) has made the required findings pursuant to the California Environmental Quality Act (CEQA) or the project is exempt from CEQA.

Additionally, the State Water Board has complied with its independent obligation to consider the effect of the proposed project on public trust resources and to protect those resources where feasible. (*National Audubon Society v. Superior Court* (1983) 33 Cal.3d 419 [189 Cal.Rptr. 346], 658 P.2d 709.)

The amended license is being issued in accordance with the redelegations of authority (Resolution No. 2007-0057.) Therefore, an amended license on **Application 13322** filed on **August 31, 1949** has been approved by the State Water Board SUBJECT TO PRIOR RIGHTS and to the limitations and conditions of this amended license.

Amended License 3800 supersedes the license originally issued on **August 17, 1953**, which was perfected in accordance with the laws of California, the Regulations of the State Water Board, or its predecessor, and the terms of **Permit 7889**. The priority of this right dates from **August 31, 1949**. Proof of maximum beneficial use of water under this license was made as of **June 24, 1952** (the date of inspection).

The amount of water to which this right is entitled and hereby confirmed is limited to the amount actually beneficially used for the stated purposes and shall not exceed **a total of thirteen thousand (13,000) gallons per day by direct diversion from January 1 to December 31 of each year as follows: (1) two thousand (2,000) gallons per day by direct diversion for Domestic and Stockwatering uses; and (2) eleven thousand (11,000) gallons per day for instream flow for Fish and Wildlife Preservation and Enhancement and Recreational uses. The maximum diverted under this license shall not exceed fourteen and six-tenths (14.6) acre-feet per year.**

THE POINT OF DIVERSION OF SUCH WATER IS LOCATED:

By California Coordinate System of 1983, Zone 3, North 2,192,925 feet and East 5,911,620 feet, being within SE¼ of NE¼ of projected Section 28, T2N, R8W, MDB&M.

A DESCRIPTION OF THE LANDS OR THE PLACE WHERE SUCH WATER IS PUT TO BENEFICIAL USE IS AS FOLLOWS:

For Domestic and Stockwatering use at residence and grounds located within SE¼ of NW¼ of projected Section 28, T2N, R8W, MDB&M; and for Fish and Wildlife Preservation and Enhancement and Recreational use at stream segment between the Point of Diversion located by California Coordinate System of 1983, Zone 3, North 2,192,925 feet and East 5,911,620 feet, being within SE¼ of NW¼ of projected Section 28, T2N, R8W, MDB&M (upstream limit), and the confluence of Lagunitas Creek and Tomales Bay (downstream limit), as shown on map on file with the State Water Board.

No water shall be diverted under this license except through a fish screen on the intake to the diversion structure, satisfactory to meet the physical and operational specifications of the Department of Fish and Game, the U.S. Fish and Wildlife Service and the National Marine Fisheries Service, to protect Central California Coast Coho salmon (*Oncorhynchus kisutch)*, Central Coast steelhead (*Oncorhynchus mykiss irideus)* and Chinook salmon (*Oncorhynchus tshawytscha)*, listed as endangered or threatened under the California Endangered Species Act (Fish and Game Code sections 2050 to 2098 and the federal Endangered Species Act (16 U.S.C.A. sections 1531 to 1544). Construction, operation and maintenance costs of the required facility are the responsibility of the licensee.

(0000214)

Licensee shall install and maintain devices, satisfactory to the Deputy Director for Water Rights, to measure the instantaneous rate of diversion and cumulative quantity of water diverted under this license. A record of such measurements shall be maintained by the licensee for ten years from the date of collection, and made available to the Deputy Director for Water Rights, upon request.

(000000R)

Licensee shall not use more water under the basis of riparian right on the Place of Use authorized by this license than licensee would have used absent the appropriation authorized by this license. Based on the information in the Division of Water Right's files, riparian water has not been used on the Place of Use. Therefore, consistent with this term, licensee may not divert any additional riparian water for use on the Place of Use authorized by this license under basis of riparian right. With the Deputy Director for Water Rights' approval, this information may be updated, and licensee may use water under basis of riparian right on the authorized Place of Use, provided that licensee submits reliable evidence to the Deputy Director for Water Rights quantifying the amount of water that licensee likely would have used under the basis of riparian right absent the appropriation authorized by this license. The Deputy Director for Water Rights is hereby authorized to approve or reject any proposal by licensee to use water under the basis of riparian right on the Place of Use authorized by this license. Licensee shall report any non-compliance with the terms of the permit to the Deputy Director for Water Rights within three days of identification of the violation.

(0560300b)

The right hereby confirmed to the diversion and use of water is restricted to the point or points of diversion herein specified and to the lands or place of use herein described.

Reports shall be filed promptly by the licensee on the appropriate forms which will be provided for the purpose from time to time by the State Water Board.

Licensee shall allow representatives of the State Water Board and other parties, as may be authorized from time to time by the State Water Board, reasonable access to project works to determine compliance with the terms of this license.

Pursuant to Water Code sections 100 and 275 and the common law public trust doctrine, all rights and privileges under this license, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the State Water Board may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirement for the authorized project. No action will be taken pursuant to this paragraph unless the State Water Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the State Water Board also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the State Water Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution article X, section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.

The quantity of water diverted under this license is subject to modification by the State Water Board if, after notice to the licensee and an opportunity for hearing, the State Water Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the State Water Board finds that: (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

This license does not authorize any act which results in the taking of a threatened or endangered species or any act which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish and Game Code sections 2050 to 2089) or the federal Endangered Species Act (16 U.S.C.A. sections 1531 to 1544). If a "take" will result from any act authorized under this water right, the licensee shall obtain authorization for an incidental take prior to construction or operation of the project. Licensee shall be responsible for meeting all requirements of the applicable Endangered Species Act for the project authorized under this license.

If construction or rehabilitation work is required for the diversion works covered by this license within the bed, channel, or bank of the affected water body, the licensee shall enter into a streambed or lake alteration agreement with the State Department of Fish and Game. Licensee shall submit a copy of the agreement, or waiver thereof, to the Division of Water Rights prior to commencement of work. Compliance with the terms and conditions of the agreement is the responsibility of the licensee.

This license is granted and the licensee accepts all rights herein confirmed subject to the following provisions of the Water Code:

Section 1625. Each license shall be in such form and contain such terms as may be prescribed by the State Water Board.

Section 1626. All licenses shall be under the terms and conditions of this division (of the Water Code).

Section 1627. A license shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code) but no longer.

Section 1628. Every license shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article (of the Water Code) and the statement that any appropriator of water to whom a license is issued takes the license subject to the conditions therein expressed.

Section 1629. Every licensee, if he accepts a license, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefore shall at any time be assigned to or claimed for any license granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any licensee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any licensee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

Section 1630. At any time after the expiration of twenty years after the granting of a license, the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State shall have the right to purchase the works and property occupied and used under the license and the works built or constructed for the enjoyment of the rights granted under the license.

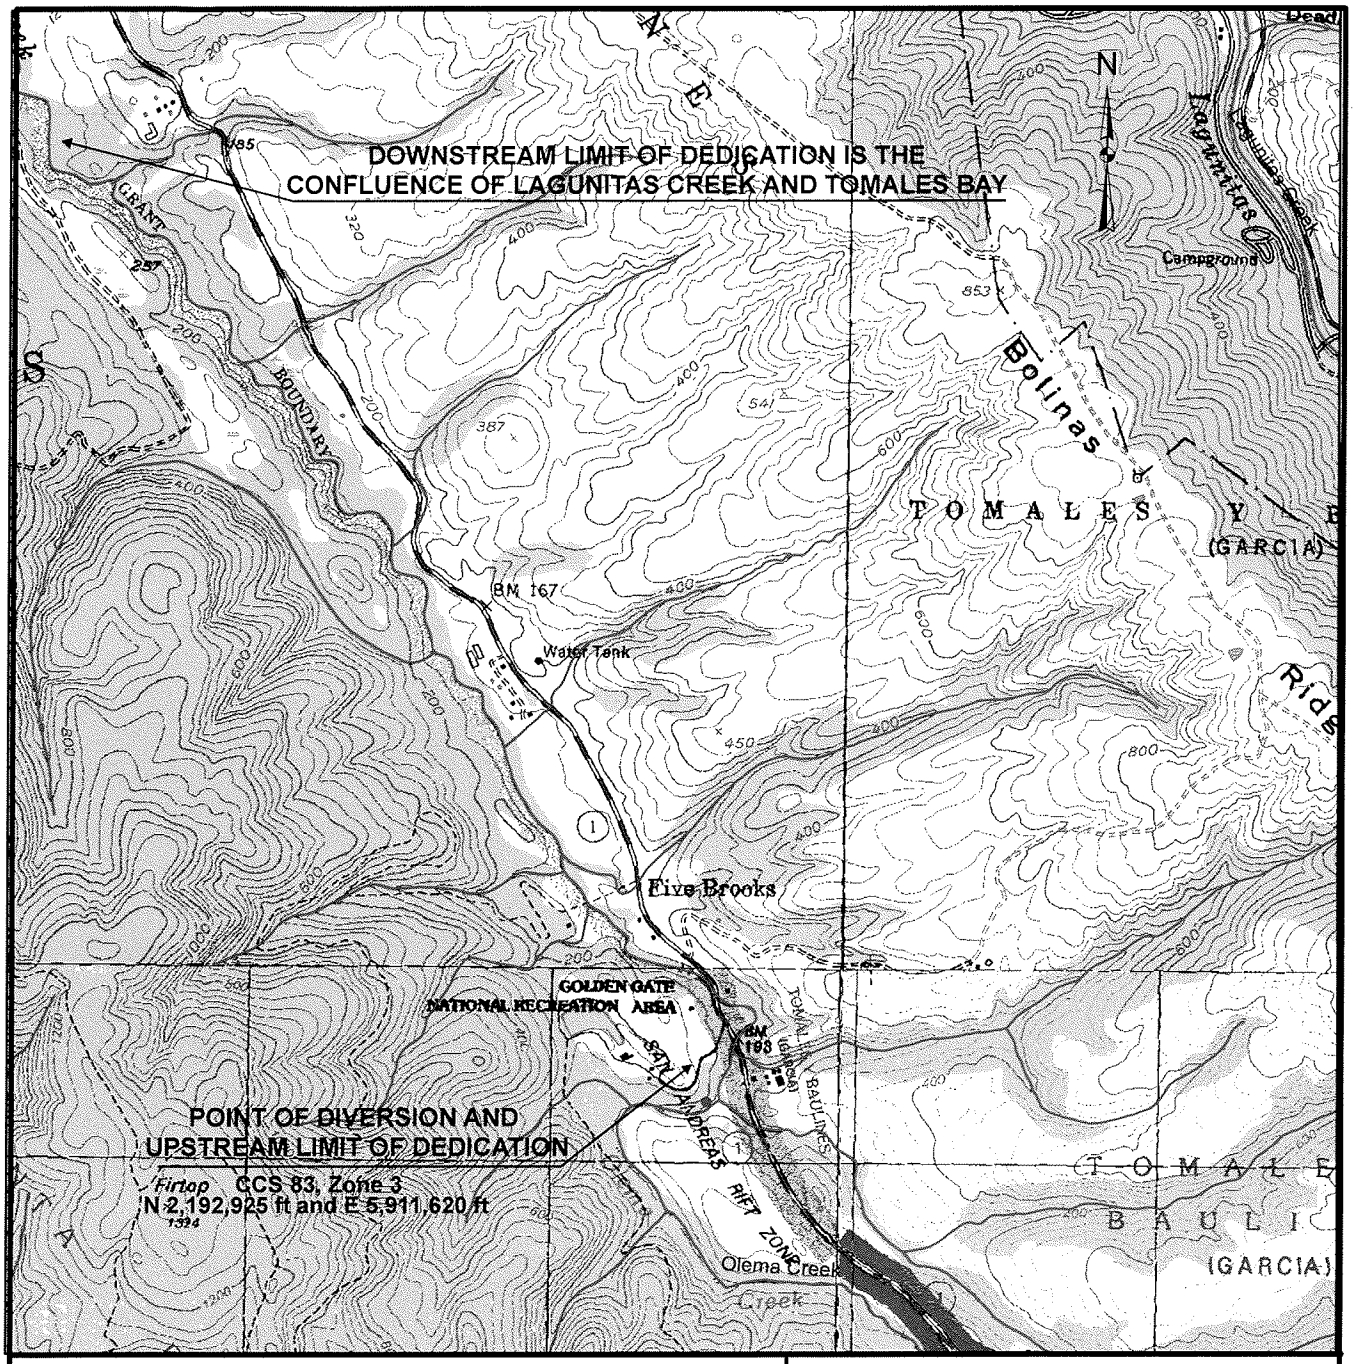

Section 1631. In the event that the State, or any city, city and county, municipal water district, irrigation district, lighting district, or political subdivision of the State so desiring to purchase and the owner of the works and property cannot agree upon the purchase price, the price shall be determined in such manner as is now or may hereafter be provided by law for determining the value of property taken in eminent domain proceedings.

The U. S. National Park Service - Point Reyes National Seashore (Petitioner) has filed four petitions for change in place and purpose of use, pursuant to California Water Code Section 1707. The Petitioner proposes to dedicate water diverted under Licenses 9730, 4342A, 3827, and 3800 to instream use to enhance the flow of three creeks, Lagunitas, Olema, and an Unnamed Stream (aka Fish Hatchery Creek) located within Point Reyes National Seashore, for the benefit of fish, wildlife, and recreation. The dedication of two of the existing water right licenses (4342A and 9730) to instream use is part of the Giacomini Wetland Restoration Project (Project), which involves restoring ranchland to active floodplain or wetlands. All structural diversions have been or will be removed and there will be no construction or re-grading as a result of these petitions. The impacts of the Project are addressed in the *Final Giacomini Wetland Restoration Project Environmental Impact Statement/Environmental Impact Report (2007 (Giacomini EIS/EIR))*, on file at the Division of Water Rights. Any correspondence directed to the Petitioner should be mailed to Eric Lord, 1201 Oak Ridge Drive Ste 250, Fort Collins, CO 80525, or by email at Eric_Lord@nps.gov.

FISH AND GAME ENVIRONMENTAL FILING FEE

Section 10005 of the Public Resources Code requires the California Department of Fish and Game (DFG) to impose an $850 filing fee on any user of water who files an application for a water right permit with the State Water Resources Control Board. The Division has received a letter from DFG pursuant to the subject petitions for change stating that the DFG has waived the filing fee per Public Resources Code section 1005 (d)(4).

All petition for change filing fees for Licenses 3800, 4324A, 3827, and 9730 have been paid in full. No additional payment is required at this time. Please be advised that in addition to the

above fees, all active applications, petitions for change, permits and licenses may be subject to annual fees. These fees are based upon the acre-foot per annum requested under the application or authorized under the permit or license. If a fee is required, the Division will calculate the annual fee, and the State Board of Equalization will send you a Notice of Determination requesting payment. If you have any questions regarding the calculation or payment of fees, please contact our fee line at 916-341-5431.

The Division will prepare a public notice of your petitions for change. Any party may submit a protest during the public noticing period. A protest may be based on impacts to existing water rights or impacts to the environment. You will be advised of any actions that you must take after the petition is noticed to respond to protests.

Re: Petitions Pursuant to California Water Code § 1707
(Licenses 4324A, 9730, 3800, 3827)

Dear Mr. Crader:

Please find enclosed four petitions to change water rights pursuant to California Water Code § 1707. All four licenses are located within Point Reyes National Seashore and seek to enhance the flow of two creeks—Lagunitas and Olema creeks—for the benefit of fish and wildlife.

We have been working with Katy Washburn and Angela Nguyen-Tan of your office. They have provided valuable input and assistance as we have prepared the petitions. They were also able to come to the park for a site visit in May 2009 and are thus familiar with the creeks and subject water rights.

The appropriate fees are attached to each petition. The California Department of Fish and Game has waived the Fish and Game filing fee pursuant to Pubic Resources Code § 10005(d)(4). Consequently, no fee payment for the Fish and Game filing fee is enclosed. A copy of the fee waiver is attached. Charles Armor, the Regional Manager for the Bay Delta Region of the Department of Fish and Game, filed the original fee waiver with your office by memo dated September 24, 2009.

We appreciate the time and consideration of your staff to these petitions. If you have questions, please contact Eric Lord of my staff at (970) 225-3526.

Sincerely,

Charles W. Pettee

This form is not a CEQA document. If a CEQA document has not yet been prepared, a determination must be made of who is responsible for its preparation. As the petitioner, you are responsible for all costs associated with the environmental evaluation and preparation of the required CEQA documents. Please answer the following questions to the best of your ability and submit any studies that have been conducted regarding the environmental evaluation of your project. Subject: Fee Waiver for the National Park Service on Section 1707 Petitions for License Numbers 9730, 4324A, 3800, and 3827 on Lagunitas and Olema Creeks in the Point Reyes National Seashore, Marin County

The Department of Fish and Game (DFG) is requesting that the State Water Resources Control Board accept the four 1707 petitions from the National Park Service without the DFG filing fee required by Public Resources Code 10005. Per Section 10005 (d)(4) of the Public Resources Code, DFG is waiving the fee requirement for the four 1707 petitions referenced above on Lagunitas and Olema creeks because the purpose of the filings is to change the licenses from consumptive use to instream use for the benefit of fish and wildlife resources.

If you have questions regarding this protest, please contact Mr. Greg Martinelli, Water Conservation Supervisor, at (707) 944-5570; or by writing to DFG at the memorandum address listed above.

Re: Request for Fee Waiver

Dear Mr. Armor,

The Water Resources Division of the National Park Service is in process of filing 4 petitions pursuant to Cal. Water Code § 1707 with the State Water Resources Control Board. The purpose of the filings is to change the 4 licenses from consumptive use of water to instream use in support of fish and wildlife.

Through this letter, we are requesting, pursuant to Cal. Public Resources Code § 10005(d)(4), that the fee payable to the Cal. Department of Fish and Game be waived. Eric Lord of my office has provided draft copies of this project to your office for review and determination of the benefit to fish and wildlife.

If you need further information or have other questions, please contact Eric Lord of my staff at (970) 225-3526. I appreciate your consideration of this matter.

Sincerely,

Charles W. Pettee

Any such assignment or subletting without such consent shall be void, and shall, at the option of Lessor, terminate this lease. This lease shall not, nor shall any interest therein, be assignable, as to the interest of Lessee by operation of law, without the written consent of Lessor.

15. In the event of any breach of this lease by Lessee, then Lessor besides other rights or remedies h may have, shall have the immediate right of re-entry and may remove all persons and property from the premises; such property may be removed and stored in a public warehouse or elsewhere at the cost of, and for the account of Lessee. Should Lessor elect to re-enter, as herein provided, or should he take possession pursuant to legal proceedings or pursuant to any notice provided for by law, he may either terminate this lease or he may from time to time, without terminating this lease, re-let said premises or any part thereof for such term or terms (which may be for a term extending beyond the term of this lease) and at such rental or rentals and upon such other terms and

Such deficiency shall be calculated and paid monthly. No such re-entry or taking possession of said premises by Lessor shall be construed as an election on his part to terminate this lease unless a written notice of such intention be given to Lessee or unless the termination thereof be decreed by a court of competent jurisdiction. Neither the application for the appointment of such receiver, nor the appointment of such a receiver, shall be construed as an election on Lessor's part ~~to terminate this lease unless a written notice of such intention is given to Lessee.~~

19. All notices to be given to Lessee may be given in writing personally or by depositing the same in the United States mail, postage prepaid, and addressed to Lessee at the said premises, whether or not Lessee has departed from, abandoned or vacated the premises.

21. The waiver by Lessor of any breach of any term, covenant or condition herein contained shall not be deemed to be a waiver of such term, covenant or condition or any subsequent breach of the same or any other term, covenant or condition therein contained. The subsequent acceptance of rent hereunder by Lessor shall not be deemed to be a waiver of any preceding breach by Lessee of any term, covenant or condition of this Lease, other than the failure of Lessee to pay the particular rental so accepted, regardless of Lessor's knowledge of such preceding breach at the time of acceptance of such rent.

22. Any holding over after the expiration of the said term, with the consent of Lessor, shall be construed to be a tenancy from month to month, at a rental of FOUR HUNDRED AND NO/100THS ($ 400.00) Dollars a month, and shall otherwise be on the terms and conditions herein specified, so far as applicable.

Taxes

The ranch appraised includes Marin County Assessor's Parcels 188-030-01, 188-030-04 and 188-030-06. Total taxes for the year 1972-73 are in the amount of $14,828.10.

Parcel 188-030-05 is noted to be included in the title report for this ranch as shown in The Addenda of this report. However, that parcel is within the Point Reyes Seashore Project and not appraised here.

Zoning

The present zone designation assigned the land appraised is A-2. Uses allowed within this zone are for limited agriculture and basically all those uses permitted in R-1, or single family dwelling zones. Lot areas are restricted to two acres in size according to Marin County zoning specifications for A-2 zones.

The chapter pertaining to A-2 zoning for Marin County is included in the Addenda of this report.

History

The ranch was acquired approximately fifteen years ago by the present owners for investment and recreation purposes. The transfer is recorded in Marin County Official Records Volume 1210, Page 113. There are no recent transfers for the property which aid as indicators to its present fair market value.

Improvements

The ranch is improved with an older two story house, barn and garage in the headquarters area. A well and septic system serve this area for water and sewage disposal needs.

South of the headquarters area there is a cabin and two reservoirs. Fencing and rough road grading are the only other improvements on the property.

Descriptions and sizes of the improvement items are noted on the following page.

An examination has been made of the title evidence and related papers pertaining to certain land in which interests have been acquired under authority of existing legislation. The land and estate acquired by the United States are more particularly described in the deed.

The title evidence and accompanying data disclose valid title to be vested in the United States of America subject to the rights and easements noted in Schedule A attached hereto which your Department has advised will not interfere with the proposed use of the land.

The title evidence has been retained in the files of this Department.

Sincerely yours,

John N. Mitchell
