STOCKPOND RIGHTS

The stockpond program was 'sunset' by the Legislature as of December 31, 1997.

Under certain conditions, the owners of stockponds having a capacity of not more than 10 acre-feet as of January 1, 1975 which were constructed prior to 1969 have a valid water right. Prior to January 1, 1975, a right for seasonal storage of water in a reservoir of any kind could be obtained only by appropriating the water through the application-permit-license procedure, and this is still the only way to obtain a water right for stockponds constructed after January 1, 1969 or which are larger than 10 acre-feet. Claims of rights for such stockponds and applications for this certification should be filed with the SWRCB. The priority of the right will be subject to other stockpond water rights on which certificates have been issued by the SWRCB with an earlier priority, to appropriative water rights with an earlier priority, and to riparian rights. The priority of the right will be the date the claim is filed. Ponds which were the subject of water right litigation between private parties prior to January 1, 1974 are excluded.

Before a certificate of validity of the stockpond right is issued, the SWRCB will verify the location of the pond, its capacity, and that it is used primarily for stockwatering purposes. In some cases, a field investigation is necessary. The original certificate will be filed with the SWRCB and will be available for public inspection. A copy of the certificate will be mailed to the owner of the stockpond. So that the records may be reasonably current, a statement of continued existence of the pond and its use for stockwatering will be solicited from the owner as determined by the SWRCB (currently every 10 years). If the water has ceased to be used primarily for stockwatering, the SWRCB may revoke the certificate after notice and an opportunity for hearing.

A reasonably accurate estimate of the capacity of a stockpond of 10 acre-feet or less can be computed by use of the "onethird rule' as follows:

Stockpond capacity in acre-feet = 1/3 height of dam to spillway crest, in feet, multiplied by the surface area of pond when full, in acres.

Lina & Dylan,

I spoke with the SWRCB this morning regarding the Initial Statements of Water Diversion and Use for Gallagher 1, Gallagher2, and C1 Pond.

The SWRCB will not accept the Statements as submitted. Based on statute they are requesting that page 2 of all three be amended as follows:

Year in which diversion commenced (or specify nearest known year): "Not known" is not acceptable. Previous Initial Statements of Water Diversion and Use for other stock and wildlife ponds at PORE used 1950 as an estimate of the year in which diversion commenced. I recommend that we do the same on these.

Section 7: Quantity of Water Diverted is required. Previously we simply indicated the months that diversion occurred, this is no longer acceptable. Estimated quantities are acceptable, but must be reported. When entering data be sure to indicate if the amounts being submitted are reporting gallons or acre-feet. Input the year for the data that is being reported and record the estimated amount for each month. If no water is diverted enter 0.

Additionally on the maps they need an arrow labeled "POD & POU" pointing to the pond.

If you have any questions on this please call me. The SWRCB will not move forward on the Statements until they have this information.

Thanks,

Joe

Title Evidence No.: 05005805000002
Prepared by: Chicago Title Insurance Company

Enclosed for your review and approval of the Final Title is a comp ote Purchase Assembly relating to the acquisition of certain lands by the United States of America for use by the National Park Service. The assembly has been prepared with the view of meeting all of the requirements of the preliminary title opinion and includes all of the documentation prescribed therein.

An examination has been made of the title evidence and related papers pertaining to certain land in which interests have been acquired under authority of existing legislation. The land and estate acquired by the United States are more particularly described in the attached deed.

The attached final title evidence, continued to a date subsequent to the recordation of the deed, and accompanying data shown on enclosed list, disclose valid title to be vested in the United States of America subject to existing easements for public utilities, the rights and easements noted in Schedule "B" of the attached title evidence and any reservation contained in the deed and purchase agreement, which will not interfere with the proposed use of the land.

I hereby certify that the legal description in the subject deed has been checked and is correct and sufficient.

If you approve the title to the subject property, please sign in the space provided below and return this original memorandum to this office.
