Narrative / Remarks: Enter short narrative in the space below, attach additional page(s) as needed.

• Claim came from BLM to NPS with the land when DEVA was created pursuant to the California Desert Protection Act of 1994.

• BLM submitted original claim with the state based on Public Water Reserve No. 107 for MS & W Resources to develop a bona fide metalliferous mining operation.

• BLM claimed all available water and reported the rate of diversion as 0.5 cfs (362.2 afy) and that the well was the source of water for Saline Marsh Ponds.

• On 12/7/2016 California State Water Resources Control Board notified federal agencies that all Federal Reserve Rights diversion claims were now required to report annual water use.

• Starting with the 2016 report the diversion rate was revised to 0.05 cfs (36.22 afy).

• There are no diversions for consumptive use. The beneficial use of this water right is for the enhancement of aquatic ecosystems, riparian zones, and wildlife habitat.

SUPPLEMENTAL STATEMENT OF WATER DIVERSION AND USE

The records of the State Water Resources Control Board's (State Water Board) Division of Water Rights (Division) indicate that your agency filed the above listed water right on or before July 1, 1984. The Division designated the claimed right as a "Federal Filing" in lieu of a Statement of Water Diversion and Use.[1] By resolution No. 2016-005 dated January 19, 2016, the State Water Board adopted Reporting and Measurement Regulations that were later approved by the Office of Administrative Law on March 21, 2016. To the extent authorized by federal law, federal agencies are now subject to annual water use reporting requirements[2] for the Federal Filings. The above Federal Filing is subject to the reporting requirements for a Supplemental Statement of Water Diversion and Use. The Supplemental Statement shall be filed on electronic forms provided by the State Water Board **by July 1, 2017**.[3] To report online, go to the Report Management System (RMS) website and login with your user ID and password. The information required to login and access your online Supplemental Statement is listed above. (Please note: the 2016 report will not be available until January 1, 2017. Your new user ID and password will be activated on that date). You should keep this document for your reference.

Identifying Diversion Information

The Supplemental Statement associated with this Federal Filing is the diversion located on SALINE WELL in Inyo with a direct diversion rate of 0.50 Cubic Feet per Second. If your agency has limitations on locating the documents related to this filing, the State Water Board should have copies of the Initial Statement of Water Diversion and Use on microfiche and can provide copies of these documents, if needed. If your agency needs assistance with further identifying the subject Statement, please contact the analyst assigned to this Water Right: Gabriel Collins by phone at (916) 322-9257 or by email at Gabriel.Collins@waterboards.ca.gov.

Notification to Report Online

This is a one-time courtesy notice to report since this is the first year in which Federal agencies have been subject to the online reporting requirements. The Supplemental Statement will be due annually on July 1. If you would like to be notified electronically when reporting is due and receive other reporting related updates, please subscribe to our Lyris list (Water Rights Reporting Notification) at: http://www.waterboards.ca.gov/resources/email_subscriptions/swrcb_subscribe.shtml.

Measurement Device Requirements

Information regarding the new reporting and measuring regulations adopted by the State Water Board is available at: http://www.waterboards.ca.gov/waterrights/water_issues/programs/measurement_regulation/. This website explains the key provisions of the new regulation, deadlines for compliance, requirements by type of diversion, measurement methods, and alternative compliance information.

If you have multiple points of diversion, you must file a separate Supplemental Statement for each point of diversion. [4] Do not list total combined diversions from multiple diversion works on one Supplemental Statement.

Changes to Name or Address of Person Diverting Water

If there has been a change in the name or address of the person diverting the water, submit a change request to the Division.[5] The Change of Name/Address or Ownership form can be found at http://www.waterboards.ca.gov/water_issues/programs/ewrims/ownership/index.php.

Contact Us

Frequently asked questions pertaining to filling out online reports are posted at the RMS website and we encourage you to read these first. However, if you still have any questions or need assistance completing the report, please contact the analyst assigned to your Water Rights: Gabriel Collins by phone at (916) 322-9257 or by email at Gabriel.Collins@waterboards.ca.gov.

On January 25, 1994, and pursuant to the California Desert Protection Act of 1994, the Mojave National Preserve was created, and Death Valley National Park and Joshua Tree National Park were expanded. This creation and expansion involved a transfer of management responsibility from the Bureau of Land Management to the National Park Service. As part of this process, the Bureau of Land Management and the National Park Service desire to change the owner of record of water rights associated with these lands.

Please accept this as a request by the National Park Service and the Bureau of Land Management to change the owner of record from the Bureau of Land Management to the National Park Service. This request for change of owner of record only applies to the water rights listed on the two attached pages. Any changes in the owner of record for Joshua Tree National Park will be addressed under a separate letter for Mojave National Preserve and Death Valley National Park.

Please provide to this office a written verification of the change of ownership of each right listed on the two attached pages.

Sincerely,

Jeff Albright

SUPPLEMENTAL STATEMENTS OF WATER DIVERSION AND USE

Our records show that you filed a Statement of Water Diversion and Use, as required by Sections 5100 through 5108 of the Water Code.

After filing a statement reporting the diversion and use of water, supplemental statements are required every three years.

Copies of supplemental statement forms are enclosed. Please complete and return one copy for each statement originally filed.

If you have permanently discontinued use of water, changed your address, or sold the project on which water was used, please let us know so we can revise our records. If you have used no water but may resume use in the future, please return the supplemental statement form showing no use.

Gentlemen

We are returning State forms WRCB-7A pertaining to Water Applications 23674 and 23675 by MS & W Resources Incorporated. As specified on the form if the applicants develop a bona fide metalliferous mining operation they are protected under federal law in their use of that water incident to the mining operation. A right-of-way to divert the water applied for will be considered only under this condition and that provisions, acceptable to the Bureau of Land Management, for public uses and environmental considerations are made.

In addition to the WRCB-7A forms, we are submitting the Bureau of Land Management Notification forms covering the waters under the above applications. These Notification forms cover;

Saline Marsh - MS&W Resources Inc., application No. 23674
Saline Well - MS&W Resources Inc., application No. 23675

One additional Notification form is for Hunter Creek which to the best of our knowledge is not under State water filing at this time.

We call your attention to our use of a different format in the Bureau's Notification form. This is temporary on a trial basis only. It may be adopted at a later date if we find it is more desirable than the one currently in use.

Sincerely yours,

J. R. Penny
State Director

Note to File

Date: June 14, 2017
From: Joseph Chafey, WRB Hydrologist
File: DEVA Docket 045 – Saline Well (F007952S)
Subject: Other Supporting Information

Initial Claim: Notification of Existing and/or Future Water Use to the State of California submitted by BLM indicates that Saline Well POD is located in range 39E within DEVA boundary.

Supplemental Statement of Water Diversion and Use (1981, 1982, 1983) indicates range correction from 39E to 38E, this places the well outside DEVA boundary.

F007952S was made at the same time as S007953.

S007953 is located within DEVA boundary.

Both F007952S and S007953 were being developed by MS & W Resources Inc. for a bona fide metalliferous mining operation protected under federal law.

F007952S was transferred from BLM to NPS, S007953 was not.

Documents associated with these claims indicate that the well (F007952S) supplies water to the Saline Marsh ponds (S007953).
