On January 25, 1994, and pursuant to the California Desert Protection Act of 1994, the Mojave National Preserve was created, and Death Valley National Park and Joshua Tree National Park were expanded. This creation and expansion involved a transfer of management responsibility from the Bureau of Land Management to the National Park Service. As part of this process, the Bureau of Land Management and the National Park Service desire to change the owner of record of water rights associated with these lands.

Please accept this as a request by the National Park Service and the Bureau of Land Management to change the owner of record from the Bureau of Land Management to the National Park Service. This request for change of owner of record only applies to the water rights listed on the two attached pages. Any changes in the owner of record for Joshua Tree National Park will be addressed under a separate letter for Mojave National Preserve and Death Valley National Park.

Please provide to this office a written verification of the change of ownership of each right listed on the two attached pages.

Sincerely,

Jeff Albright

IMPORTANT NOTICE

To: Water Users

SUPPLEMENTAL STATEMENTS OF WATER DIVERSION AND USE

Our records show that you filed a Statement of Water Diversion and Use as required by Sections 5100 through 5108 of the Water Code. Supplemental statements are required every three years. Supplemental statement forms are enclosed. Please complete and return one copy for each statement originally filed.

If you have permanently discontinued use of water, changed your address, or sold the project on which water was used, please let us know so we can revise our records. If you have used no water but may resume use in the future, please return the supplemental statement form showing no use.

Frequently we find that a person who has filed a Statement of Water Diversion and Use believes incorrectly that it established a water right. A STATEMENT OF WATER DIVERSION AND USE DOES NOT ESTABLISH A WATER RIGHT OR A CLAIM OF A WATER RIGHT. When a statement is filed, it is generally assumed by this Division that an old appropriative, riparian, or some other right covers the use.

Unless a diverter and user of water, other than groundwater, has an appropriative right initiated prior to December 19, 1914, or has a riparian or other basis of right, it is generally necessary to obtain a certificate for a water right for a stockpond or a permit to appropriate water from the State Water Resources Control Board. A riparian right exists by reason of ownership of land abutting upon a stream or body of water and affords no basis of right for use of water on nonriparian land. A riparian right attaches to the natural flow of the stream or source and not to imported water or drainage from use of stored water or groundwater. Water can be regulated but not stored under claim of riparian right.

Please reevaluate your basis of right to use water and file an application for a permit or a claim for a stockpond certificate if needed. Forms and instructions will be provided upon request.

NOTIFICATION OF EXISTING AND/OR FUTURE WATER USE TO THE STATE OF CALIFORNIA
INSTRUCTIONS

1. District number will be a 3 part number as follows: The first is the District's code, i.e. 01, 02, etc., followed by the fiscal year the notification form goes to the State Director or the year application is filed with the State. The third number is the numerical order or sequence for that fiscal year.

2. The number assigned by the State Water Resources Control Board to this notification after returned by the State to BLM.

3. Public lands under BLM jurisdiction and outside of statutory grazing districts are under this order. (Includes Section 16 lands.)

4. Public lands within statutory grazing districts (Section 3) are under these orders.

5. This citation covers Public Water Reserves No. 1 through 106. These were specific type reservations; that is, they were for specifically described tracts of public lands. All reservations were by Executive Order and made prior to April 17, 1926.

6. PWR is a continuing blanket type Order and covers all PWRs subsequent to April 17, 1926. Regulations are cited in 43 CFR 2321.1 and procedures in BLM Manual Vol. V, Part 4.18. To be effective the tract must be noted on the CSO Title Records. The Mineral Leasing Act of February 25, 1920, made certain oil and gas wells in which water was discovered subject to PWR 107. Wells must be released by driller or lessee to the U.S. and jurisdiction transferred by report from the USGS to BLM.

7. A blanket continuing type Order covering hot springs or waters with curative properties. Pertinent regulations are in 43 CFR 2321.1-2. The BLM Manual makes no specific provision for this type water. Treat the same as PWR 107.

8. Covers specific land withdrawals such as Stock Driveways, Power Sites, Administrative Sites, Reservoir Sites, etc. The Order or Statute withdrawing the land must be cited.

NOTE: All public land waters will be covered by either citations 1 or 4. In addition, they may be covered by a PWR or a specific land withdrawal or both. All types of withdrawals and reservations covering the water must be noted.

9. (a) If no name, consider as unnamed. If BLM has assigned a name, this may be used. Include project number if there is one. If no project or development is involved, so state.
(b) For impoundment type projects, name or describe drainage or watershed.
(c) Where the source is a drainage or small watershed, describe by township and range only, or by section if practical.

11. Briefly describe the development planned or already installed, i.e. "install concrete head box, pipe water 1,000 feet to 16 feet of cattle troughs."

12. (a) Not applicable to impoundment structures or wells.

13. (a) For impoundments, give capacity when full in acre feet.

14. (a) Applies to actual present use in gallons per minute.
(b) Anticipated use immediately after development.
(c) Base estimates on a period not to exceed 10 years after date of notification.

15. If application has been made or permit issued circle the word "yes" giving the date requested under (b), (c) and (d). If application was not perfected or the permit lapsed, so state under (d).

16. This section must be answered. If none are known, so state. District answers will be from information in their own files or field knowledge. Inquiry with the State Water Rights Control Board is not required.

17. Explain rationale in estimating future needs and uses or any other data given which may be questioned.

18. Diagram the water and water development on the grid using standard BLM map symbols. Use a scale between 1/4 inch and 2 inches to the mile and indicate this scale in the space provided. For longer pipe lines, a smaller scale may be used.

21. Date the State Director received the returned copy from the State.
