

Supplementary Materials: Freshwater Mussel Bibliography

The following journal articles, reports, and books are a useful compilation of the literature underlying the biology, ecology, and conservation of native North American freshwater mussels. Sources are grouped into categories to ease in use of this bibliography. Most articles are available at the included DOI hyperlinks or on the NPS Integrated Resource Management Applications (IRMA) portal [<https://irma.nps.gov/Portal/>].

Table of Contents

Climate Change.....	2
Conservation	3
eDNA	4
Habitat Restoration	5
Landscape Distribution and Ecological Modeling	7
Mussel Biology and Ecology	8
Propagation Guidelines	9
State Surveys and Resources.....	9
Surveying and Monitoring	14
Taxonomy and Phylogenetics	15
Toxicology and Water Quality Threats.....	16

Climate Change
